

POWERTECH

SL4110

Solar Rechargeable 60W RGB LED Party Flood Light

Instruction Manual

BOX CONTENTS:

Lamp

Solar Panel

Remote Controller

Support Bracket

Wall Bolts

Operating Manual

INSTALLATION:

1. Take out the lamp from the packaging

Power On

2. Press button above

3. The light should turn on automatically

Once the Waterproof connector is connected correctly, place the Solar Panel towards the Sunlight. The light should automatically turn off and the Charging indicator (See position Below) will flash regularly. This means the Solar panels is charging the batteries correctly.

(Please use arrows on connector to align correctly)

Fix the product on the wall with supplied wall bolts. The installation height is suggested to be between 3-6 meters.

Please make sure the Solar panels are installed at the correct Angle for your Country and in the correct direction for your Hemisphere. Also ensure that the sunlight to them is not blocked by obstacles such as trees, shadows, buildings etc. The panel needs unobstructed sunlight to charge correctly.

100% charging efficiency ✓

75% charging efficiency ✗

50% charging efficiency ✗

Tips:

1. Installation direction of the solar panel is 5-10 degrees south to west, an angle of 35 degrees with the horizontal place.
2. Please also ensure that the panel is affixed firmly to a permanent structure so it is not affected by winds or movement.
3. Please use the supplied remote to select your required brightness and duration time of the light to your desired requirements. (Reserved keys on the remote are for use with other models.)
