

The soft, padded handgrip and poly enclosure provide a comfortable material for patient usage.

Detecto's model DHS digital handgrip dynamometers provide rehabilitation exercise solutions for patients and physicians.

The DHS allows medical professionals to evaluate the recovery condition of a patient's impaired hand. The data may be used for reference to view rehabilitation progress.

DHS SERIES

Digital Handgrip Dynamometer

MULTIPLE CAPACITIES AVAILABLE

Ideal for:

- Rehabilitation Therapists
- Home Healthcare Nurses
- Physicians

Detecto's model DHS digital handgrip dynamometers provide accurate grip strength readings.

DHS SERIES

DIGITAL HANDGRIP DYNAMOMETERS

Everything needed for hand evaluation in one convenient package: DHS handgrip dynamometer, instruction manual, and battery. Comes in convenient shockproof carrying/storage case with individual storage compartments for each item.

- CONVENIENCE
- REPEATABILITY
- MEASUREMENT ACCURACY
- PRODUCT RELIABILITY

Featuring:

COUNT MODE —

Rehabilitation programs may be set up using Detecto's DHS series dynamometers for patients to do exercises. Only if the patient's gripping force reaches the target set by a medical professional does it count one time.

AVERAGE MODE —

This mode is designed to evaluate the combined average of both the left and right hand's gripping force.

MAX MODE —

The percentage of a patient's gripping force may be set for it to refresh the LCD on the following squeeze.

Detecto model DHS-88 pictured above with
40 kg x 0.1 kg / 88 lb x 0.2 lb capacity

Detecto's battery-powered model DHS digital handgrip dynamometers feature a large easy-to-read LCD screen, choice of two different capacities plus pound or kilogram readouts, a button to zero the last maximum reading stored in memory, and they come complete with shockproof carrying case and instruction booklet.

Each Detecto DHS series dynamometer comes in a convenient molded carrying case with built-in handle and shockproof design.
