Air Quality Indicator Bad	AQI
Blue	0~35
Green	36~75
Red	76~999

INSTRUCTIONS FOR USE 21

USE WIFI FUNCTION

- Press and hold for 3 seconds to turn on the WIFI function, open the cell phone “tuya” App to connect to the machine, the indicator light is always on that means the connection is successful.

22 CONNECT WITH MOBILE APP

Scan the QR code to download the "Tuya" APP

1. Scan the QR code below

2. It will take you to the App's download page on either the Google Play Store or the Apple AppStore, then just follow the download and installation instructions. If your phone does not have that capability built-in, simply download a 3rd-Party QR Scanning App before scanning the QR Codes and you are ready to go.

CONNECT WITH MOBILE APP 23

Downloading a QR reader App:

1. Open youe mobile app store (App Store,Google Play)

2. Search for“QR code readers.
3. Sinply download the QR code reader to your phone,open it,scan the code and you are ready to go.

24 CONNECT WITH MOBILE APP

Please make sure your phone is connected to 2.4G WiFi and has Bluetooth turned on.

1. Press and hold the WiFi button for three seconds, and the WiFi indicator light (flashing) indicates that it is waiting for network configuration;
2. Make sure that the phone is connected to 2.4G WiFi and turn on Bluetooth (the phone can only use 2.4G WiFi not 5G WiFi);
3. Download the Tuya app and select Small Appliances-Air Purifier;
4. Click the "+" sign on the device interface to add a device and enter the WiFi information;
5. Follow the prompts on the phone interface to complete the connection (the machine's WiFi indicator light is on to indicate that the connection is complete).

Notes:

1. Since the app may be upgraded and updated, the actual operation may be slightly different from the above instructions, so please follow the instructions of the current program;
2. If you cannot connect to the Internet or change the network, please re-enter the WiFi account and password.
3. Press and hold the WiFi button for 3 seconds. The indicator light will flash instead of being on, indicating that the current WiFi connection has been disconnected.
4. If you need to reconnect, please follow the WiFi connection steps in the manual to reconnect.

CLEANING AND CARE/FAQ 25

MAINTENANCE AND CLEANING METHODS

Please remove plug from the socket before cleaning and maintenance .

- ◆ Cleaning the body for this device by damp cloth, then wipe it dry.
- ◆ If the machine is too dirty, neutral detergent can be used for cleaning, but please dilute the detergent before use.
- ◆ Do not clean the unit with the solvent listed on the right which may cause distortion or discolour.

If the machine can't work properly, please kindly check as below before you send it out for repair

Problem	Checking methods	Possible solution
Do not work	• Please check if the plug is disconnected from the socket.	➡ Power plug should be plugged properly
Odor can not be removed	• Is there a very strong odor in the using environment? (Notes: air should be purified continuously)	➡ It is recommended to ventilate first and then turn on the machine
	• Does the using life time for filters come to the end?	➡ Please replace the used filter with a new one.
High noise	• Is the PE bag for filter removed?	➡ Please take out filter and tear off PE bag.
	• Does the using life time for filter come to the end?	➡ Please replace the used filter with a new one.

If the problem is still existed after above inspections, please disconnect the power and it for repair

26 FILTER MAINTENANCE

CLEANING THE FILTERS

1. Remove the air inlet grilles from the front and back of the machine and take out both filters. (Unplug the air purifier before cleaning.)
2. Remove the washable pre-filters.
3. Rinse the pre-filters under water.
4. After cleaning, make sure the pre-filter is completely dry before reinstalling it.

FCC Warning:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.
