THE LAWN PACK

maintain your
LAWN

Ongoing care

For an ongoing healthy lawn you NEED to be applying products throughout the year to maintain and improve it. This typically means you apply products 4 times a year (once each season) to help the lawn thrive. It is a little known fact that in each season a different fertiliser is required so the grass has the correct nutrients for those weather conditions. You can tell the different nutrients by the 3 digit NPK level you will see on each fertiliser.

The Spring Pack

Greener Growth Fertiliser
- High nitrogen to get the grass growing lush and green for 3 months.
- Added calcium for disease resistance and magnesium for improved colour.
- NPK: 22-5-10 +2.5% MgO +2.5% CaO

Biostimulant Booster
- Significantly increases the mass of the root network. Improves soil microbiology, grass blade density and nutrient absorption.

The Summer Pack

Summer Thriver Fertiliser
- Coated granules for slow and steady release to prevent scorching even in low rainfall and high temperatures.
- Organic compounds for stress relief.
- NPK: 19-3-9

Biostimulant Booster
- Significantly increases the mass of the root network. Improves soil microbiology, grass blade density and nutrient absorption.

The Autumn Pack

Autumn Preparation Fertiliser
- Prepares the lawn for the cold months ahead.
- Maintains green colour and thickens the lawn without promoting too much disease-prone soft growth.
- Added magnesium for improved colour.
- NPK: 10-5-10 + 2% MgO

Biostimulant Booster
- Significantly increases the mass of the root network. Improves soil microbiology, grass blade density and nutrient absorption.

The Winter Pack

Winter Protection Fertiliser
- Supports root development and increases plant strength for better disease resistance during the colder months.
- NPK: 6-5-10

Biostimulant Booster
- Significantly increases the mass of the root network. Improves soil microbiology, grass blade density and nutrient absorption.

Deeper Green Iron Sulphate
- Double dose of iron sulphate for turf hardening, increasing disease resistance and producing a rapid green-up of turf.

Seasonal plan

Take the guesswork out of lawn care and subscribe to a seasonal plan.

Become your own lawn care professional with specific fertilisers and treatments for spring, summer, autumn and winter. Each product comes with a step-by-step guide and is measured out by lawn size for easy application.

Your neighbours will think you're paying a fortune for a professional service!

When you start your subscription you will receive the relevant pack for that season based on the dates below. Then roughly every 3 months you will receive the next season's pack.

The Spring Pack: March - May
The Summer Pack: June - August
The Autumn Pack: September - November
The Winter Pack: December - February

If at any point you wish to skip a season you can do so. For example, you may wish to do a renovation between March and October - in which case you can skip your next pack and buy an additional lawn renovation pack instead for that season.

You can cancel easily at any point throughout the year - we're here to make things easier, not tie you down!
