# Quick Guide – Configure Huawei Router using HiLink Mobile App

1. Download **Huawei HiLink** App from Google Play Store or Apple AppStore.

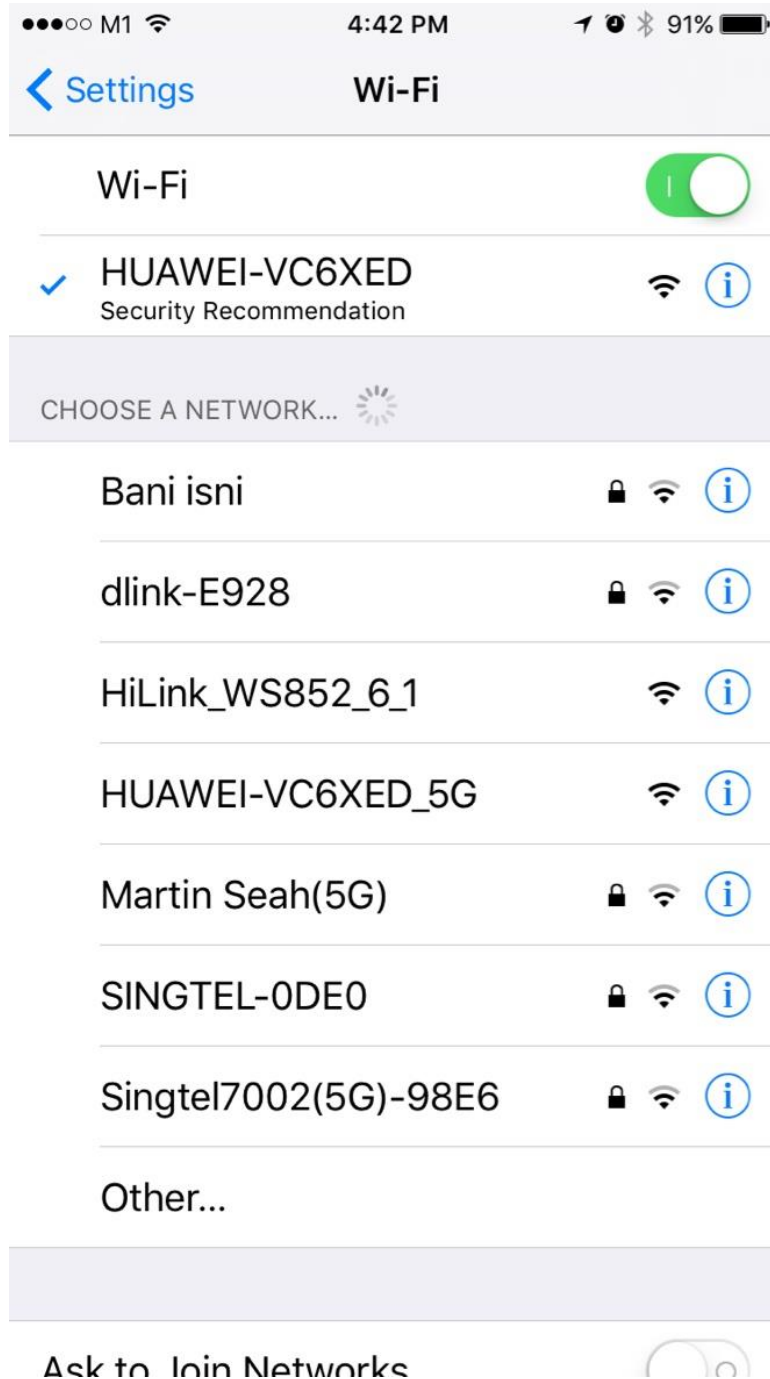

2. Connect Power Adatper

3. Connect network cable from your ONT to the WAN port of your Huawei Router
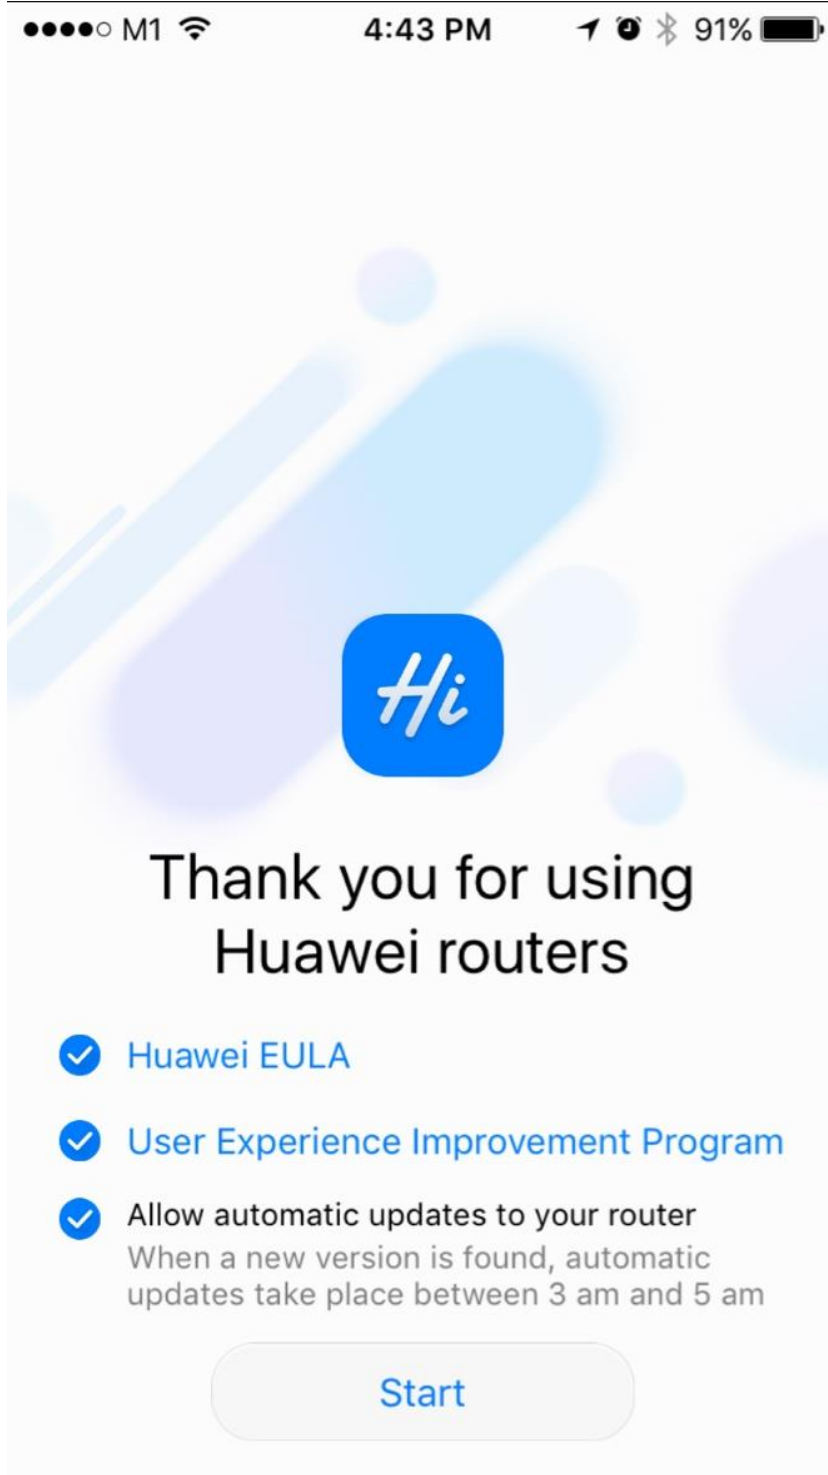

4. Now on your mobile phone, connect to the wireless network name start with "**HUAWEI-**", e.g. HUAWEI-VC6XED, you can find the WiFi Name at the bottom of your router.

5. Wait for the WiFi connection to complete, you will see a blue color tick.

6. Now launch the Huawei HiLink mobile App.

7. Click on "**Start**" button and it will automatically detect your internet connection.

8. Next, enter your desired WiFi Name and WiFi password, e.g. My-A1
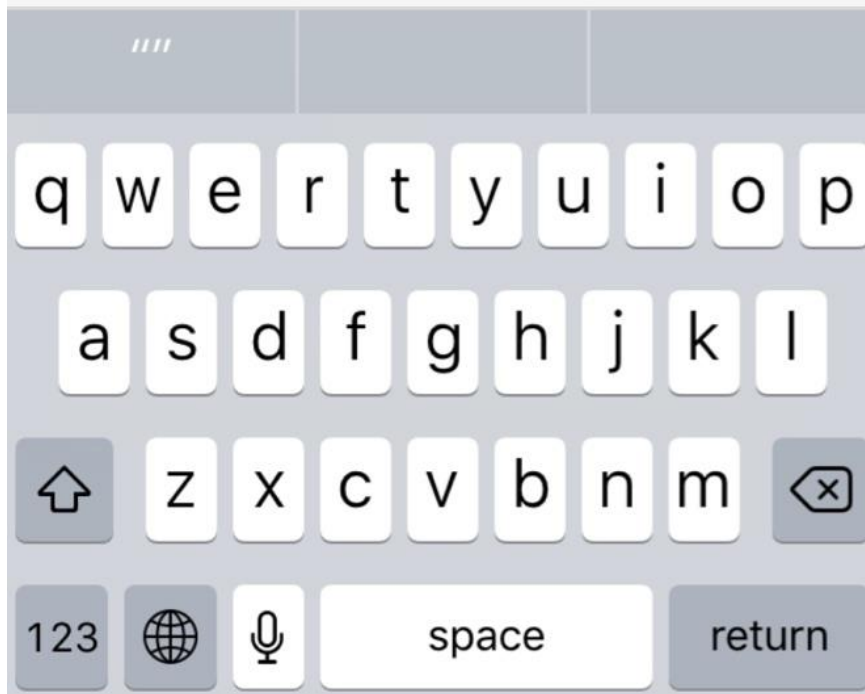

9. Setup your admin password; this is used to manage settings of the router through Web.
Check "**Use Wi-Fi password as Router password**" if you want to use the same password.

10. Click on "**Next**" to save the settings.

11. It will take a few seconds to save the settings and the router will reboot after that.

12. Congratulations! You are done with the configuration.

13. Now you can connect to the new Wi-Fi using the password you specified earlier.

14. Enter the password to connect to new Wi-Fi name "My-A1"

Ask to Join Networks ⚪

Known networks will be joined automatically. If no known networks are available, you will have to manually select a network.

16. In Huawei HiLink mobile App, there are a few tools available to manage and monitor your home network. Please feel free to explore them.
