

PIXIE Garage Door & Gate Controller

#PC206GD-R-BTAM

Basic operation

- Set up via PIXIE App
- 4 clicks manual pairing
- 9 clicks reset device

Applications

Garage doors and gates which accept a dry contact input signal

Whats in the box

1 x Garage door & gate Controller, installation instructions

Accessories

CSR41BTP Contact Sensor as per page 2

#PC206GD-R-BTAM

PIXIE Garage Door & Gate Controller

The PIXIE Gate & Door Control is designed to control motorised sliding gates, swing gates and garage doors which accept dry contact signals (such as bell press, voltage free signal, dry-contact etc) as a command input. It's capable of monitoring the open/close status via a set of contact sensors (sold separately), and sending status change notifications to the user as required via PIXIE PLUS App only.

Features

- Garage Sensor part#: CSR41BTP – required for STATUS & Push Notifications (Gateway Needed for notifications)
- Control 1 sliding gate, or 1 swing gate, or up to 2 garage doors
- Works with wired contact sensors (magnetic reed switches) for different gates and doors, providing monitoring of open / close status.
- Two in-built buttons for easy setting and testing
- Two LED indicators to reflect the contact sensor's position status

Electrical

Input(V)(Hz)	240/50
Max loads	Dry contact signals only
Operating ambient min/max (°C)	0 to 60°
Typical wireless range	15 metres typical indoors **
IP Rating	IP20

Wiring Diagram

ROLLER DOOR CONTACT SENSOR

CSR41BTP

Contact Mode: Normally closed (N.C.)

Operation Gap: > 40mm

Operation Voltage: < 100V DC

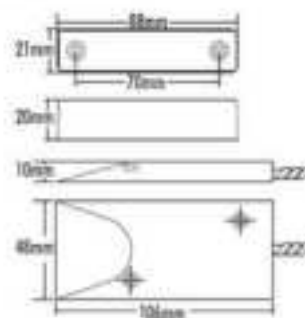

Operation Current: < 500mA

Reed Switch Dimension: L106 * W48 * H10 mm

Magnet Dimension: L88 * W20 * H21 mm

Cable Length: 650mm

Installation Method: Surface mounted

PIXIE fits in

PIXIE fits in to a huge range of Australian wall plates
