#### Product&Notes

#### What's in the Box

• Lumary Wall Washer Light

#### Get Ready

- Know your Wi-Fi network and password.
- $\bullet$  Make sure your mobile device is running iOS 13.3 or higher and Android 9.0 or higher.
- Make sure you're connecting to a 2.4GHz Wi-Fi network (Lumary can't connect to 5GHz networks).

#### Notes

#### **Button Functions:**

- 1. Long press 5s to enter the network configuration mode.
- When the factory equipment is powered on, the lights will flicker automatically.
- 2. Tap the button, the mode is different each time.
- 3. Press twice in a row: OFF (Open will remember the color or state before the last close.)

(Note: Long press for 5s in any mode will enter the network configuration state.)

## **Application Connection**

 Find and isntall the "Lumary" App on App Store, Google Play.

#### 2. Register a Lumary account.

Enter your email address.

Log into the App.

Note:Please select your region and country.

#### 3. Connect

NOTE: Lumary's products can't connect to 5GHz networks.

#### Steps:

- Advised to enable Bluetooth, Enable Bluetooth to add some Wi-Fi device easily;
- 2. Each time the device without distribution network is powered on, confirm the light is breathing or blinking pairing mode;
- 3. Open the Lumary App,In the top corner of the Devices screen, click "+" and select "Add Device" to confirm that the device is paired.

#### If not, you need to use the wall switch to reset: on-off-on-off-on;

- 4. Find the device, choose Wi-Fi and enter password, press "Next".

  Click "Add", and wait patiently. After that, click "Done", and the device is successfully added to the App.
- 5. Other ways to add devices, Open the Lumary App>>In the top corner, click "+">> Choose "Lighting">> Select "Light Source (BLE + Wi-Fi)" >> Select "AP Mode" or "EZ Mode" in the upper right corner.

#### 4. Troubleshooting

- 1. Can't connect to your Wi-Fi network.
- Make sure you entered the correct Wi-Fi password during the Wi-Fi setup. Check whether there are any Internet connection problems. If the Wi-Fi signal is too weak, reset your Wi-Fi router and try again.
- 2. If you fail to bind, you will need two phones, one to set the hotspot and the other to connect the hotspot and add the device through the app. If the device is successfully added, the device is normal. The problem may be in the router, you need to check your router Settings to see if there are MAC and DHCP restrictions. Lumary's products do not support 5GHz networks.
- 3. If you have any questions. You can contact us via our after-sales email: support@lumary.tech or leave a message on our official social media account.

## Group Control

1. Log in to Lumary App, tap the smart device and enter into, click"  $\angle$  " in the top right corner.

2.Click "Create Group", then select a device and save.

3. You can reset the group name and save it, and the group can control devices.

## 1. What should I do, if I don't have internet access to my Lumary product?

If you do not have a network, you will need two mobile phones, one to set up the hotspot and the other to connect to the hotspot and add the device via the app (refer to the guide).

## 2.If my Wi-Fi internet goes down, will Lumary App still work?

Lumary products need to be connected to Wi-Fi in order to use them remotely, and the device can be controlled simply using the app via the LAN as well as Bluetooth.For example: on, off, dimming, colour temperature, colors.

### 3. Why does the flickering occur with Lumary products?

Lumary's products are factory set to the default network configuration. If the device has not been connected to the network, it will flash for three minutes each time it is powered on. If the device has not been connected to the network, it will flash for three minutes every time it is powered on. If the device is connected to the network, it will stop flashing and will automatically connect to the network when it is switched off and on via the wall switch after 15 seconds.

#### 4.Can I share with family and friends?

Yes, you can share access to your Lumary devices. In the Lumary App, from your main device list, click on one of the devices press the "..." button on the top right and click on "Share Device" to give or revoke sharing permissions. In order to share, the other user should already have downloaded the Lumary App and registered an account.

#### 5.Can I group multiple Lumary devices together?

Yes, you can group multiple same-type devices by room, location, or however else you want. The same devices can be in multiple groups. For example, if you create a group for "Bedroom" and another group for "Entire House", your Bedroom lights can be included in both groups. From your main device list, click on one of the devices you want to group, press the "..." button on the top right for advanced settings, and click "Create Group". You'll be able to name a new group and choose which devices you'd like to group together.

# 6.My Lumary device has a funny name. How do I rename it?

From your main device list, click on one of the devices you want to rename, press the "..." button on the top right for advanced settings, and click "Modify Device Name" (or "Modify Group Name"). You'll then be able to choose a more familiar name. cally connect to the network when it is switched off and on via the wall switch after 15 seconds.

#### 7.What's the wireless range?

The range of your home Wi-Fi is heavily dependent on your home router and the conditions of the room. Check with your router specifications for exact range data.

## 8.What should I do if the device Appears offline or is unreachable?

Make sure your Wi-Fi router is online and in range, and check that you have the latest Lumary functionality by clicking "Check for firmware update" in your device settings. Try to turn off the device >> clear the application cache >> reboot the router >> turn on the device after one minute and check and confirm the device status after five minutes.
