

Install large sites faster. Earn more. Worry less.

easee®

Charge Pro

On large-scale and complex EV charging sites you need a product designed for your workflow. The Easee Charge Pro is the professional solution engineered with the installer in mind. Every feature is engineered to protect your reputation and drive your profitability by enabling you to:

- Win more complex and large-scale project bids.
- Drastically reduce time spent on installation and commissioning.
- Minimize call-backs and simplify long-term service for your clients.

The Easee advantage

Our philosophy of Effortless Electrification begins with you, the installer. We believe a truly great charging system should make your job simpler, faster, and more profitable. That's why every aspect of the Easee Ecosystem, from its physical design to its powerful software and integrations, is purposefully engineered to solve your real-world challenges on site. Strengthening your reputation and your bottom line.

Design flexible, competitive solutions

Use the cost-effective Easee Ready docking station to prepare an entire site for future growth. On the same circuit, you can mix the MID-certified Charge Pro chargers with Charge Core chargers. This flexibility allows you to design the most competitive and cost-effective system for any scenario.

How we deliver

The Easee Ready docking station system and full interoperability between Charge Pro and Core chargers.

This means for you

More competitive project bids and the ability to deliver a customised, tiered solution for any client.

Streamline installation and commissioning

Digital and physical setup is where time is won or lost. Our two-part system streamlines the physical work, allowing you to mount and wire all docking stations in one efficient phase. Commissioning is even faster. The Easee Installer App uses NFC and Bluetooth for rapid, wireless configuration of each charger in minutes.

How we deliver

The Easee Ready docking station system and the intuitive Easee Installer App.

This means for you

A dramatic reduction in time spent on-site for both physical and digital setup.

Count on proven reliability

The Easee Charge Pro runs on our proven charger platform, trusted by over 900,000 chargers with over 99% uptime. This market-leading reliability minimizes the risk of product failures and call-backs, protecting your reputation and your profit on every job. It's all backed by a standard 5-year warranty.

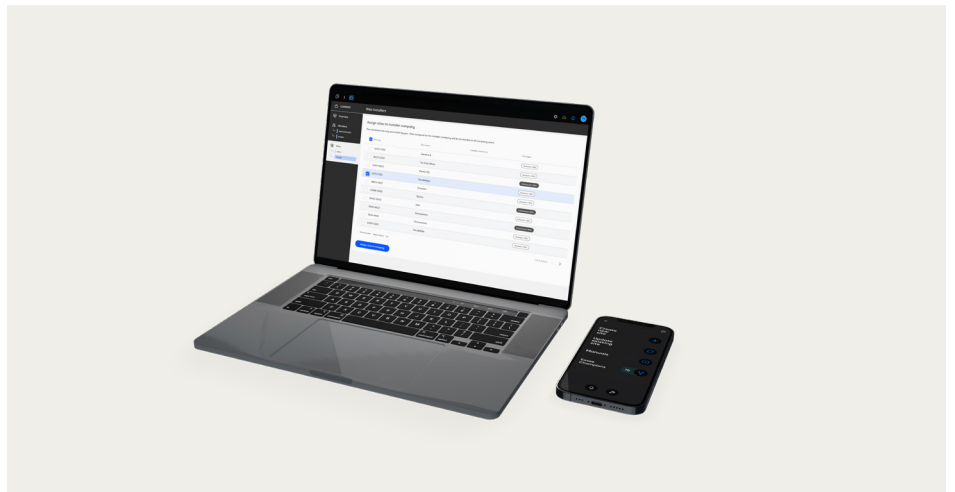

How we deliver

A proven platform with more than 99% uptime, robust engineering, and a standard 5-year product warranty.

This means for you

The confidence of installing a product that works, leading to happier clients and fewer unpaid service visits.

Manage your entire operation

Easee Control and Easee Companies are more than just tools for a single site; they are the central hub for your entire installation business. From one dashboard, you can remotely monitor all your installed sites and diagnose issues. But it goes further: you can also manage your team of electricians, control their access levels to specific sites, and on- and off-board employees.

How we deliver

The free Easee Control and Easee Companies platforms for centralized management of sites, personnel, and remote diagnostics.

This means for you

Access to powerful tools to reduce site visits, streamline team management, run your business more efficiently, drastically reduced financial risk.

Solve your client's toughest power problems

A project is often stalled when a building lacks sufficient power. The Easee Charge Pro's built-in load balancing allows you to safely install more chargers on the existing grid, making the most of the existing electrical infrastructure.

How we deliver

Built-in load balancing that works with the optional Easee Equalizer to automatically and dynamically manage site capacity.

This means for you

The ability to win more complex projects that other systems can't handle.

Deliver compliant, integrated solutions

Meet any project requirement without added complexity. The Charge Pro has a MID-certified meter built-in, so no separate hardware is needed for compliant measuring. It also supports OCPP 1.6J, ensuring seamless integration with your client's preferred management software and allowing for tailored solutions for billing and energy and fleet management. This way you can confidently deliver on all technical requirements.

How we deliver

An integrated MID meter and full support for the OCPP 1.6J industry standard.

This means for you

Easily meet tender requirements and the ability to deliver tailored solutions for billing, energy and fleet management for your customers.

Grow your business

Ready to spend less time on site and more time growing your business? We provide the tools and support you need to succeed. The Easee Charge Pro is conveniently available from your selected electrical wholesaler.
