

DJI Thermal Analysis Tool 3 Release Notes

Date:	2024-11-07
Version:	v3.3.2

What's New

- After installing the infrared density filter on Zenmuse H30T, the temperature measurement range for images increases. In high gain mode, it ranges from -20° to 450° C, and in low gain mode, it ranges from 0° to 1600° C.

What's Fixed

- Fixed certain known issues.

DJI Thermal Analysis Tool 3 Release Notes

Date:	2024-05-16
Version:	v3.3.1

What's New

- Adds support for Zenmuse H30T.
- Supports setting Ambient Temperature for images captured by Zenmuse H30T.

DJI Thermal Analysis Tool 3 Release Notes

Date:	2024-04-25
Version:	v3.3.0

What's Fixed

- Fixed certain known issues.

DJI Thermal Analysis Tool 3 Release Notes

Date:	2023-12-15
Version:	v3.2.1

What's Fixed

- Fixed certain known issues.

DJI Thermal Analysis Tool 3 Release Notes

Date:	2023-11-15
Version:	v3.2.0

What's New

- Adds support for DJI Matrice 3TD.
- Supports zooming in or out on the image using the mouse scroll wheel and viewing of different areas of the image by click-and-drag.
- Adds Clear All Measurements that allows users to quickly clear all measurement data on the selected image.
- Supports switching image display using keyboard shortcuts (left and right arrow keys).
- When displaying a thermal image, the toolbar now includes the options for Original Size and Fit Window, allowing users to easily adjust the image display with an optimized UI design.
- Supports temperature-based image filtering and optimized the UI design of the image selection area.
- Optimized the UI design of spot, rectangle, circle, and line temperature measurement annotations.

DJI Thermal Analysis Tool 3 Release Notes

Date:	2023-07-18
Version:	v3.1.0

What's New

- Adds support for the batch adjustment of parameters.
- Supports the display of latitude and longitude.
- Supports the display of true minimum and maximum temperatures.
- Enhanced the clarity of measurements for better display.
- Optimized the display of measurements to resolve overflow issues at the edges.

What's Fixed

- Fixed the improper UI layout of line temperature measurements.
- Fixed the issue where the pop-up window does not appear exactly at the location of the mouse click.

DJI Thermal Analysis Tool 3 Release Notes

Date:	2022-11-07
Version:	v3.0.3

What's New

- Adds Image Selection Area which allows users to select multiple files at the same time and batch export report.
- Adds chroma bar information in exported JPG images.
- Adds shortcut keys to quickly switch between different tools in the toolbar and supports continuous operation with the same tool.
- Optimized font size adjustment in temperature measurement. Font size of all content displayed can be adjusted at the same time.
- Fixed some known issues.

DJI Thermal Analysis Tool 3 Release Notes

Date:	2022-09-27
Version:	v3.0.2

What's New

- Adds support for DJI Mavic 3T.
- Fixed some known issues.

DJI Thermal Analysis Tool 3 Release Notes

Date:	2022-07-19
Version:	3.0.1

What's New

- Fixed occasional issue where software crashes when adding visible light images.
- Optimized user experience.
