	QUESTION	ANSWER
1	What is the primary function of the cell membrane?	Control the movement of substances in and out of the cell.
2	What is the difference between a prokaryotic cell and a eukaryotic cell?	Prokaryotic cells lack a nucleus and other membrane-bound organelles, while eukaryotic cells have a nucleus and various organelles.
3	What is the function of the nucleus in a eukaryotic cell?	It contains the cell's genetic material (DNA) and controls the cell's activities.
4	What is the function of the mitochondria in a eukaryotic cell?	They are the powerhouses of the cell, where cellular respiration occurs to produce energy (ATP).
5	What is the function of the Golgi apparatus in a eukaryotic cell?	It is involved in the processing, sorting, and transport of proteins and lipids.
6	What is the function of the lysosomes in a eukaryotic cell?	They are involved in the breakdown of waste materials and cellular debris.
7	What is the function of the endoplasmic reticulum in a eukaryotic cell?	It is involved in the synthesis and transport of proteins and lipids.
8	What is the function of the chloroplast in a plant cell?	It is the site of photosynthesis, where light energy is converted into chemical energy (sugar).
9	What is the function of the cell wall in a plant cell?	It provides structural support and protection to the cell.
10	What is the function of the vacuole in a plant cell?	It stores water, nutrients, and waste products, and helps maintain turgor pressure.

Question	Answer
1. What is the main purpose of the study?	To investigate the effect of the new curriculum on the learning outcomes of the students.
2. What are the research objectives?	To determine the impact of the new curriculum on the learning outcomes of the students.
3. What is the research hypothesis?	The new curriculum will have a positive effect on the learning outcomes of the students.
4. What is the significance of the study?	The study is significant as it provides information on the effectiveness of the new curriculum.
5. What are the limitations of the study?	The study is limited to the sample of students and the duration of the study.
6. What are the findings of the study?	The findings show that the new curriculum has a positive effect on the learning outcomes of the students.
7. What are the conclusions of the study?	The study concludes that the new curriculum is effective in improving the learning outcomes of the students.
8. What are the recommendations of the study?	The study recommends that the new curriculum be implemented in all schools.
9. What are the implications of the study?	The study implies that the new curriculum is a good example of how to improve the learning outcomes of the students.
10. What are the future research directions?	Future research should focus on the long-term effects of the new curriculum.

1. **What is a vector?** (10 points) (10 min)

→ A vector is a mathematical object that has both magnitude and direction. It is represented by an arrow pointing from the origin to the tip of the vector.

2. **What is a scalar?** (10 points) (10 min)

→ A scalar is a mathematical object that has only magnitude and no direction. It is represented by a single number.

3. **What is a tensor?** (10 points) (10 min)

→ A tensor is a mathematical object that has both magnitude and direction, and it can also have multiple components. It is represented by a matrix or a set of numbers.

4. **What is a tensor product?** (10 points) (10 min)

→ A tensor product is a mathematical operation that combines two tensors to form a new tensor. It is represented by the symbol $\otimes$.

5. **What is a tensor contraction?** (10 points) (10 min)

→ A tensor contraction is a mathematical operation that reduces the rank of a tensor by one. It is represented by the symbol $\cdot$.

6. **What is a tensor decomposition?** (10 points) (10 min)

→ A tensor decomposition is a mathematical operation that breaks down a tensor into a product of simpler tensors. It is represented by the symbol $\rightarrow$.

7. **What is a tensor network?** (10 points) (10 min)

→ A tensor network is a mathematical representation of a tensor contraction. It is represented by a diagram with nodes and lines.

8. **What is a tensor algebra?** (10 points) (10 min)

→ A tensor algebra is a mathematical structure that combines tensors and scalars. It is represented by the symbol $\otimes$.

9. **What is a tensor calculus?** (10 points) (10 min)

→ A tensor calculus is a mathematical framework for dealing with tensors. It is represented by the symbol $\otimes$.

10. **What is a tensor field?** (10 points) (10 min)

→ A tensor field is a mathematical object that assigns a tensor to each point in a space. It is represented by the symbol $\otimes$.
