

CONAIR®

INSTANT HEAT $\frac{3}{4}$ -INCH ULTRA-SLIM CERAMIC FLAT IRON

With 25 variable heat settings, this ceramic flat iron has your number. Reaching a stabilized temperature within 30 seconds, it delivers up to 400 degrees F of styling heat to flatten, straighten or flip. The uniform heat recovery system delivers consistent styling temperatures, while the Turbo Heat boost feature intensifies the results.

STYLING WITH THE NEW EASY-GLIDE FLOATING CERAMIC-COATED PLATE The plate of your new flat iron is designed with a little give, to “float” in your iron. This provides better contact with hair, eliminating gaps, for straighter results. The easy-glide ceramic surface is the one of the latest – and best – technological advances in hair appliances. The ceramic even heat distribution produces the ultimate in healthy, shiny, silky-looking hair. You’ll find that hair glides easily over the surface of the plates as you’re straightening, and that it is easier to clean styling products residue, etc. off the plates after each use. The ceramic surface also helps smooth down flyways and frizzies. As you smooth your hair, heat is evenly distributed so that the style you create has a salon-perfect, silky smooth, shiny finish. Hair also glides right through the plates after it’s straightened. And that’s not all. Conair's professional salon standards of engineering provide you with a Uniform Heat Recovery System to maintain the flat iron at a constant temperature. A constant surge of power ensures that heat is continuously delivered for optimal styling results, unlike other units that lose heat during use. It provides consistent styling power so that every strand of hair is set with the same level of heat for uniform results and a perfect finish. Ceramic technology is a pleasure to work with, makes styling your hair easier and provides professional results.

Start with a hair section that is 2 inches (5 cm) wide and no more than 1/2 inch (1.25 cm) thick. Open the iron and place a hair section between the two hot plates, close to the scalp. Trap hair between the plates by firmly squeezing the handles together. While maintaining the tension, slowly pull the iron down along the hair section toward the end. At the end of hair section, release the pressure on the handle and allow the hair to slide out. Repeat process on additional sections of hair until you achieve the hair style you desire. It may be necessary to repeat process on certain areas, depending on the texture of your hair. Some experience is necessary when learning to use this flat iron. After using the iron several times, you will learn the ideal way to straighten and style your hair easily.

- Slim curved handle gets close to the roots
- Ceramic-coated plates for even heat that's gentle on hair
- Floating plate for better contact and straighter results
- 400°F high heat
- 30-second instant heat-up
- Uniform heat recovery system restores plate temperature to optimum level for consistent results

- 25 variable heat settings for every type of hair
- Turbo Heat increases the temperature by 36°F, maximizing results
- Auto-off
- On/Off touchpad
- On indicator light
- Turbo Heat indicator light
- Dual voltage for worldwide travel
