Reliable Quality

Our powerful sliding gate opener can operate gates that weigh up to 3300lbs (1500kg). Designed with pure copper motor and steady base, it can ensure taht the gate opener opens the gate smoothly at the speed of 13 m/min (43ft/min) while producing less than 56 dB noise. The machine is equipped with waterproof and dust-proof shell. Also, it is corrosion and rust resistant for durability.

Convenient Remote Control

Our automatic sliding gate opener is equipped with 2 wireless remotes. You can use the 4-button remotes to open, close, stop, or use the pedestrian mode on the gate. The remotes can work range up to over 100 ft, so you don't have to wait at the gate every time coming home. Auto-close feature can be set to 12, 24 or 36 seconds with the option to deactivate. The emergency release key allows you to enter or leave even if there is a power outage.

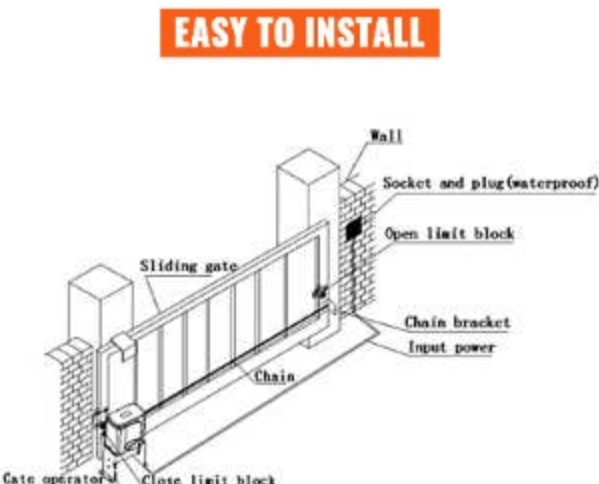

Anti-shock Stroke Design

Compared with others, our gate opener is equipped with two photo cells. It can detect the tiny obstruction during gate closing or opening and make the gate stop and reverse to open automatically for safety protection. Avoiding people and gate opener from hurting.

Superior Safety

The thrust of the motor is adjustable during operation to prevent the motor from overloading, thus protecting the motor. The motor has a temperature protector. The motor automatically cuts off the power supply when the temperature is too high. Moreover, equipped with manual clutch, you can manually disconnected for safety when power is off.

Easy To Install

This gate opener is designed to be easy to install with no electrician or welding required. Also, our kit includes everything you need for installation. You can also get an extra installation tool(1 red hex wrench). It is quite easy and convenient for you to assemble.

Wide Application

This gate opener can be utilized for many applications including hotel, factory, school, private house, farm and ranch, etc. It is convenient and intelligent that can improve the quality of your life.

3300lbs Sliding Gate Opener Offers Effortless Operation and Convenience

This sliding gate opener is a must-have for your life. With its powerful 550W motor, it can handle gates up to 3300 lbs. This ensures smooth and efficient operation, even for heavy gates. Its sliding speed of 40 feet per minute means you spend less time waiting. The motor's high torque of 26 N.m. guarantees reliable performance whether your gate is metal, wood, or a combination. Therefore, this opener is capable of handling all types of commercial applications. It doesn't matter if your gate is made of metal, wood, or both. You can find reliability regardless of your residential or light commercial needs. And with this gate opener, you can enjoy the convenience of automatic operation. Your daily routine becomes smoother and more efficient.

Compact and Powerful Design Ensures Silent and Smooth Operation

The VEVOR gate opener is incredibly powerful. It operates with minimal noise, making it ideal for residential areas. The compact design doesn't compromise on performance. It runs smoothly, ensuring your gate opens and closes without any hitches. The low noise level is due to its advanced motor technology. This ensures a peaceful environment around your property. The gate opener's small footprint means it won't take up much space. That's a great advantage for properties with limited space because its elegant design fits well with any home or business aesthetic.

Easy Installation and Programming Enhance User Experience

The VEVOR gate opener is simple to install. It includes everything you need to set up the machine. This makes the setup process smooth. The included accessories make it easy. Installation Instructions are clear and easy to follow. That means even those with limited technical skills can install it. Programming the remote controls is straightforward and quick. Therefore, you can begin using your gate without any difficulties. Easy installation and programming enhance the overall user experience. You get a functional gate opening without the need for professional help. Saving time and money makes it easier to use effectively.

Reliable Performance with Durable Components

The construction of this gate opener ensures longevity. It has strong components that provide reliable performance. The motor is powerful and durable, providing consistent operation. You can trust it to work efficiently for years. The opener is designed to withstand various weather conditions. Yes, this gate opening is made in temperatures ranging from -13°F to +131°F. This makes it suitable for use in different climates. IP44 protects it from dust and water. So, it's protected from both dust and rain, making it safe in various environments. With a well-designed gate opener, you can count on its efficiency and durability.

Enhanced Safety with Built-in Infrared Sensor

Safety is a top priority with the VEVOR gate opener. It has incorporated an infrared sensor that detects obstacles. This prevents the gate from closing on people or objects and stops it from shutting down on anyone or anything. The sensor ensures safe operation, especially in busy areas where you need to be careful. Is this important for homes with children or pets? The infrared sensor adds an extra layer of security because it gives you peace of mind, knowing your gate opener operates safely. Reliability: The sensor provides smooth and secure gate operation every time.

Cost-Effective Solution with Affordable Pricing and Effective Performance

This gate opener offers excellent value for money. It's priced affordably, making it accessible to many. Despite its low cost, it doesn't compromise on performance. The opener is effective and efficient, ensuring your gate runs smoothly. Cost-effectiveness extends beyond maintenance. You can easily maintain it. Maintaining it will be easy because it reduces long-term costs. This makes it a smart investment for your property. You get exceptional quality gate opening without breaking the bank. Affordability and performance make it an outstanding choice.

Wide Range of Control with Remote and Keychain Remotes

The VEVOR gate opener comes with convenient control options. It includes remote controls with a range of up to 230 ft. This allows you to open or close your gate from a distance. Keychain controls are small and elegant, fitting easily in your pocket. These controls provide added convenience, making it easy to operate your gates on the go. Wide Range of Control ensures you can manage your own gate when you're not alone at all times. With multiple control choices, you have the method that suits you best.
