# INSTRUCTIONS FOR USE

## 1. Start up

1.1 Press the power button to start working

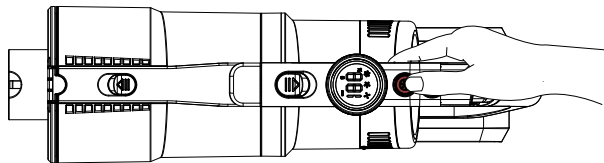

1.2 Real-time display of remaining power and gear status, with the power display decreasing every 5%

The remaining power is for reference only. There may be a certain deviation from the actual time in different modes and environments.

## 2. Suction power level adjustment

2.1 Press to adjust the gear during work

2.1 Gear adjustment light display

MIN

MID

MAX

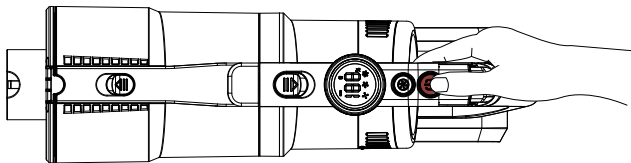

2.2 Low battery light display  
When the battery power is lower than 15% during work, the display number starts to flash, and the power is about to be exhausted.

## INSTRUCTIONS FOR USE

### 3. Shut down

- 3.1 Press the power button again during work to complete the shutdown.

- 1.2 When the power is turned off, the screen numbers will still flash for a certain period of time, indicating that the battery level is less than 30% at this time. To ensure sufficient time for next use and battery cycle life, please connect the adapter to charge as soon as possible.

### 4. Fault light display - full of dust

When the trash can sign lights up, it means the product is blocked. Please remove the main unit, floor brush, and pipes for cleaning and inspection.

### 5. Fault light shows - the floor brush is entangled

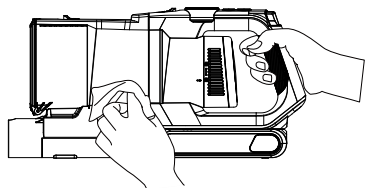

When the please wrap sign lights up, it means that the floor brush roller is stuck. Please pick up the floor brush, remove the roller, clean and check
