

360° DVR Monitor

3 Channel HD Single View Monitor

MN-K110DT

The 360 DVR Monitor features a 10.1" HD display with LVDS interface, supporting resolutions up to 1920×1080. The monitor offers flexible viewing options, including horizontal and vertical flip, mirror, and zoom functions, with the OSD menu maintaining an upright orientation regardless of image display settings.

Control is facilitated through a capacitive touchscreen interface, with optional button and remote control operation. This device is engineered for compatibility with RVS 360° systems and AI DVRs, accommodating 360° and AI technology integrations. It operates as a 3-channel HD single-view monitor.

High-Resolution Display:

10.1" HD monitor with LVDS interface; supports input up to 1920×1080.

Flexible Viewing Options:

Horizontal/vertical flip, mirror, zoom; OSD menu remains upright regardless of image orientation.

Capacitive Touchscreen:

Smooth and intuitive control, with optional button and remote operation.

Made for 360° and AI technology

Compatible with RVS 360° Systems and AI DVRs
