This product is intended for adult smokers. This product is not recommended for non-smokers, young people under the legal age, pregnant or breast feeding women and those experiencing general ill health.

Contents:

- 1* K Lite mod
- 1* USB cable
- 1* Warranty card
- 1* User manual

Mod Specifications

Optional output voltage: 3.0V, 3.5V, 4.0V, 4.5V, 5.0V
Supported resistance range: 0.8-3.0Ω
Continuous firing time: 10 seconds
Firmware update: N/A
Battery type: Built-in LiPo
Battery capacity: 900mAh
Dimensions: 26.5*75*17mm

Instructions

• Power on/off

Pressing the fire button 5 times within 2 seconds will turn the device on or off. The indicator light will flash white 3 times to indicate on or off.

• Vaping

When the device is on, press the fire button, the indicator light will indicate your device's current charge. When its current charge is above 3.8 volts (60-100%), the indicator light will be green. When the charge is between 3.5 and 3.8 volts (30-60%), the light will be blue. When the charge drops below 3.5 volts (0-30%), the light will then turn red to remind you that it is time to charge the device.

1

• Set the output voltage

Press the mode button to adjust the output voltage. The voltage display will turn on for 3 seconds to indicate the value of the corresponding output voltage: 3.0V, 3.5V, 4.0V, 4.5V, 5.0V.

Protection Features

- Automatic cutoff: The preset continuous fire time is 10 seconds, after 10 seconds of continuous firing, the indicator light will flash pink 10 times and the device will stop firing.
- Short circuit protection: When the device detects a short, it will stop firing, and the indicator light will flash pink 3 times.
- Low voltage protection: When the battery level drops below 3.0V, the device will not function and the indicator light will flash red 15 times to remind you to charge the device.
- Overcharge protection: When the device is fully charged, it will stop charging to prevent overcharging of your battery.
- Over heat protection: When the temperature of the chip is above 75 °C/167 °F, the indicator light will be yellow for 3 seconds and the device will cut off.

2

Charging Instructions

- Charging the device via Micro USB charging port, the maximum current can reach up to 1A, and the recommended charging voltage is 5.0V.
- When the USB cable is attached, the indicator light will flash red 3 times. While charging, the indicator light will indicate the device's current charge status: 3.5 volts or less (0-30%) = red light; 3.5 to 3.8 volts (30-60%) = blue light; 3.8 volts and above (60-100%) = green light. When the device is fully charged, the indicator light will flash green 20 times then remain off. When unplug the USB cable, the indicator light will flash green 3 times.

IMPORTANT INFORMATION ABOUT USING NICOTINE CONTAINING E-LIQUIDS
