

Hallolux 134A Toner Cartridges Troubleshooting

If you have any further questions, please feel free to contact us.

1. Since the toner is using the OEM recycle chip, when you install the cartridge, the warning light would be on during printing. This warning light should not affect your daily work, so you can ignore it.

2. When requesting printing from a PC, a message will pop up like above. Click "Confirm" or "X" to close it.
