

BIG BOY Floating Shelf Warranty Use and Care Manual

The Dolle BIG BOY Floating Shelf is a lightweight, heavy-duty shelf made of Medium Density Fiberboard (MDF). There is a Scratch-Resistant Melamine coating on the outside to give it a durable and modern finish.

Use and Care

The BIG BOY Shelf is designed to be used indoors. It should not be placed in direct contact with water or moisture. When cleaning, use a clean dry cloth to spot clean.

The shelves are not designed to be cut or modified in any way. The shelf is hollow with a support beam through the middle for stability. If the structure of the shelf is changed, it will compromise the structural integrity of the shelf.

Weight Limit

The weight limit for this shelf is dependent on the mounting method. When installed into studs, the weight limit is 100 pounds per shelf. When installed into drywall using screw anchors, the weight limit is 33 pounds per shelf. Please refer to the installation guide for more details on shelf weight limits.

Warranty

Our products have a 1-year warranty. Please reach out to info@dolleshelving.com with a copy of your receipt or proof of purchase.
