Q & A （Frequently Asked Questions）

1、Account Can't login

Q: Verify the email again or after changing the password, but still prompt for incorrect username or password

A: If the email has not registered an account or has been logged out, username or password error will be prompted, please click create account to register.

Q: Prompt error -1 or 404

A: Check your phone network, change WIFI or traffic and log in again.

2、Pairing process prompts error messages

Q: When pairing the device, Pairing failure and a prompt indicating is displayed. Please restart the device

A: The device needs to be paired for ten minutes when it turns on. After power off and restart, the device can be pair again

Q: When pairing process, it prompts that the user has been registered

A: After restoring the factory, Pair the device again.

3、 Prompt for device offline or delayed after logging in the account

Q: The device prompts offline

A: Offline situations please check your device online status, usually caused by network disconnection or power supply disconnection. Check the power supply when the network port light is not on, and check if there is a self-check process after power outage and restart. If the network interface light is always on but not blinking, please check whether the network connection is normal (check whether the router background device list is connected to the device)

Q: The picture is severely stuck

A1: Your network conditions or WIFI signal is not good.

A2: Multiple users are watching on a device at the same time, and the buffer is full.

A3: The setting of video frame rate and resolution is too high. You can reduce them appropriately to effectively improve the smoothness and stability of monitoring videos.

4、 An exception occurred during network connection

Q: It indicates that the wireless connection has failed. Please check the configuration information and pair again

A: 1、 During the distribution process, the device prompt tone overlaps with the sound wave emitted by the phone, resulting in unclear recognition of some parts. Prompt to wait for configuration before clicking on Next Step.

5、 Incorrect WiFi information.

Q: The wireless password is incorrect, please pair again.

A: Password error, replace with correct password for pairing.

6、 Playback or storage abnormal

A1: First, check whether the storage of the device's memory card is normal. If the memory card is not recorded to a certain extent or not formatted when it is full, please check and try to replace the memory card (please select a memory card from a large factory, such as Kingston, Sandisk, Lonco, Samsung, Patriot, and do not support expansion cards)

A2: Check if the speaker version is the latest model and upgrade to the latest version (enter the settings interface → system information → check for updates → upgrade equipment)

FCC Caution.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

*RF warning for Mobile device:

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.

The FCC certification of this device refers to RF exposure testing performed in typical operating conditions, where a person is no closer than 20 centimeters from the device surface at all times, except for non-repetitive patterns with transient time intervals in the order of a second. Only in the stated conditions, the device is shown to fully comply with the FCC RF Exposure requirements of KDB 447498.
