2 Loops Side(Loop Surface)
=No Adhesion

Quick and Easy Wall Frame Hanging Guide

Wipe wall with
rubbing alcohol,
keep it dry and clean.

Take out the
product you
purchased

Take out the
hook strips
(hook surface)

Take out the
loop strips
(fur surface)

Two hook strips(hook surface) can not stick to each other

Two loop strips (fur surface) can not stick to each other

Take out one loop strip(fur surface) and one hook strip(hook surface)

Fit the hook surface (hook side) and fur surface(loop side) together and pinch them tightly

Tear off the smooth release paper on the one back side

Attach the strip side without the release paper tightly to the photo frame and press it down for 30s.

Peel the smooth release paper on the other back

Apply firm pressure to the frame against the wall for at least 60 seconds to ensure a secure and sturdy attachment.

Frame Removal Instructions

1.Gently lift the picture frame so that the hook side and the loop side apart each other

2.Carefully support above the adhesive strip.

3.Slowly peel vertically along the wall

Tips for Decorating a Photo Wall

Nine-Grid Photo Wall

Staircase Photo Wall

Mirror Reflection Photo Wall

Spiral Photo Wall

NOTE

1. Please do not hang valuable and fragile items, precious souvenirs, or any dangerous items. Do not place hanging items above seats, beds, or any valuable items to avoid falling off due to improper use, causing danger.
2. If you paint the wall, Please wait at least one month until the paint is dry before using this product. This product applies to surfaces with a temperature of 10°C to 40°C.
3. Some latex paint walls will peel off due to their own aging. Please check the surface condition carefully before use.
