Q3:Does smart bird feeder camera need Wi-Fi to operate?

A3:Yes, for the bird feeder camera, only 2.4GHz Wi-Fi signal is workable. If you're having trouble connecting your feeder to your Wi-Fi network, you may need to install a Wi-Fi extender to boost your signal into your backyard.

Q4:How long is the connection distance of the bird feeder?

A4:It depends on the strength of your network signal, the stronger the network signal, the farther the bird feeder can be installed from the router; the weaker the network signal, the closer the bird feeder needs to be installed to the router.

Q5:Why does the app always show: The current network is in poor condition/The APP keeps going in spinning circles?

A5:Network signal is weak if there are walls among the feeder, router and phone. Because network signal will be absorbed or blocked by walls or large obstacles. It will be helpful to have strong Wi-Fi with a Wi-Fi extender/booster.

Q6:How do I connect to Wi-Fi correctly?

A6:For the first connection, it is best to place the camera and router close to or in the same room to prevent unstable signal. Confirm whether your phone system is supported or not. ( IOS>V10.0 version, Android≥V5.0 version ) Whether the Wi-Fi is 2.4GHz or not, Wi-Fi password entered correctly. If there is multiple Wi-Fi at home, please check whether the phone and camera are connected to the same WiFi. The waiting time can reach up to 120s.

# About Battery

---

# About Battery

---

## Q1:How long does the battery last?

A1:Built-in 5200mAh battery, birdhouse camera can run for about 4-6 months on standby under normal conditions.

## Q2:How is it charged?

A2:A solar charging panel integrated into the roof can provide constant source of power support for the smart bird camera, save electricity expenses. We also provide the USB cable included in the order. You can charge the bird feeder camera battery via USB for a continuous charge during night and rain day.

## Q3:Why the camera battery is drain so fast?

A3:It is low power consumption camera. Plus the solar panel power in charge, it can maintains the daily energy consume in sunny day. If the battery drains too fast you should check:

1. Whether you check the camera with APP too often.
2. Whether the camera always wakes up due to too many birds visiting.
3. Do the Wi-Fi performance is good or not? Once the camera lost Wi-Fi or Wi-Fi is too weak, the camera will scouring the Wi-Fi signal again and again, till the power used up.

# About Reset

---

# About Reset

---

## Q1:How to reset the bird feeder?

A1:Can you try to follow these steps below and reset the bird feeder camera:

1. Turn on the camera;
2. Insert the pin into the reset/Sync hole which next to the USB hole, and keep 5s ; ( Please check the attachment);
3. Turn off the camera and wait 30s; Turn on the camera and reconnect again.

## Q2:Why can I connect before but can't connect now?

A2:Can you try to follow these steps below:

1. Click the three dots in the upper right corner of the APP, and then select "Delete Device" at the bottom.
2. Reset the bird feeder camera.

Q4:Is there a subscription cost to the AI service?

A4:AI service does not need to be paid, it is free.

Q5:How to identify birds species?

A5:Just click on “recognition” icon, APP will identify the bird species and provide the bird introduction.**Detailed steps are on page 20**

Q6:Why the recognition result is wrong?

A6:The result accuracy depends on the angle and clarity of the bird pictures. To ensure get a correct result, please ensure the picture is clear enough. The identify features (bird’s head, tail, wings or pattern on feathers) should not be obscured by obstructions. The bird should occupy the main position of the picture.Try to capture the best moment to recognize the bird if the previous recognition accuracy rate is too low.If there is two or more bird species in one picture the identified result will be the one on the main position.

Q7:How many account can connect this Smart Bird Feeder ?

A7:Only one account can connect the Smart Bird Feeder.If the device have been occupied by other account , but you don't know whom , please reset the camera, then connect.

Q8:What are the operating temperatures?

A8:Bird feeder can work at a minimum temperature of - 5 ° F (- 20.5 ° C) and a maximum temperature of 120 ° F (48.5 ° C). If this temperature range is exceeded, we recommend that the product be returned to the room to avoid damage.

Q9:Can I use the bird feeder camera without a TF storage card?

A9:It is not affected for daily use without TF storage card. Without storage card, it can receive notifications, watch in real time, take pictures and record videos (It will be stored in the APP Gallery ); just can't use the Playback function.

Q10:Is this bird feeder weatherproof?

A10:Yes, the feeder itself is weatherproof! It is made from premium quality IP65 weatherproofing done stainless steel brackets. The durable materials used are Weatherproof and extremely durable, lasting for many years.

# About Using

---

**Q11:Can the bird feeder camera connect to an IPad?**

A11:It can connect to iPhone & IPad, Android phone and Pad. But it cannot connect to Mac, computer, smart TV.

**Q12:Can bird feeders be hung from trees?**

A12:Our smart bird feeder is equipped with screws, which can be installed in a suitable place with screws. We do not recommend hanging up, because shaking will affect the accuracy of AI recognition.

**Q13:How to share the device with others?**

A13:Everyone who wants to be shared or use this smart bird feeder, need to install this “Bird Lover” APP, and you have below methods to share the device:

1. Share the device by adds other’s APP account name.
2. Add other account to your family group.
3. Give your account name and code for others to login in.

# About Using

---

## Q14:How to install the Bird Lover APP?

A14:Please follow these steps below and install the Bird Lover APP:

Method 1: Scan the QR code on the color box or instruction manual to download the APP.

Method 2: For Android system, please go to Google Play and input "Bird Lover" to search the App then download. For IOS system, please go to App store and input "Bird Lover Feeder" to search the APP then download.

## Q15:What's the specification of the camera? Can I see it clearly as at outdoor?

A15:It's able to output 1080P live stream video and 2 megapixel pictures. It ensures you will enjoy vivid images and live stream of birds.

# About Using

---

## Q16:Why the “Playback” is not available?

A16:1. Please confirm you have input the TF card or purchased the iCloud storage (The first month free).

2. Please make sure if you have allowed the “Recording Settings”.

3. The camera only supports TF memory card.

## Q17:Does it have local storage?

A17:There’s no local storage in the bird feeder. You need to input a TF storage card on the camera. After inserting a TF card, the feeder will record videos of visiting birds when it senses a visitor. Those videos will save on TF card.However, if without TF card, you also can get the bird coming notification and watch bird in real time.

## Q18:What is the use of solar panels?

A18:The solar charging panel integrated into the roof can provide constant power support for the smart bird camera on sunny days, which means you don’t have to worry about running low on the battery. At the same time, the sun provides free energy to the battery, helping you save on your electricity bill.
