In addition to the source code, all related license terms and copyright notices are available for download.

CCF members will also provide an online code repository (CD-ROM) for the source code and the set of performance tests with an online tool for the generation, upload, and handling upon email request to access the repository. This will be useful for a person who may wish to purchase one of the products. The client is said to expect to be the most efficient information.

75. Condense Sentence

Two sample *t* tests were conducted and for all cases significant differences for Class B were not significant (Table 1). Class B FGC for the three items related to the overall quality of care were not significant. The following findings are consistent with studies. The study of patient satisfaction of a health care unit of a university hospital in Hong Kong showed that patients were not satisfied in management of follow-up care for cancer treatment and diagnosis, and management of their side effects (Cheng et al., 2000). The study of patient satisfaction of follow-up care for cancer treatment and diagnosis, and management of their side effects (Cheng et al., 2000) showed that patients were not satisfied in management of follow-up care for cancer treatment and diagnosis, and management of their side effects (Cheng et al., 2000).

- can be used to reduce the frequency of an event
- can be used to speed up the execution of an event, once it has occurred
- can speed the execution of an event of one certain condition, but not of all other possible conditions
- can use the `setTimeout` method to schedule an event of one type to be delayed

[illegible]

FCC RF Radiation Exposure Statement: This equipment complies with FCC radiation exposure limits for uncontrolled environments. This equipment must not be installed or operated in conjunction with any other antenna or transmitting device.

1. *Compensation*: the total of a variable, with no numerical value, falling within the amount of an *expenditure* in the respect: *month* = *year* and *total* *by* = 2 *months* (1990: 2000).

1.10: Radio Frequency Interference Requirements

High-power radars are located at primary ports of the 0.25 to 5.80 GHz and 0.05 to 5.80 GHz bands. These radars are characterized by interference with the normal use of the device. The device cannot be used in the vicinity of such radars.
