# WELCOME TO #LIVINGHIFI

We know that audio quality matters to you. It matters to us, too. A lot. The POWERNODE is a network music streaming amplifier that conveniently brings the enjoyment of hi-resolution audio to everyday life. Simply add a pair of loudspeakers to create the ultimate two-channel system, which can also be grouped with other Bluesound Players to create multi-room listening experiences. The POWERNODE must be wired or connected wirelessly to your home network for full functionality.

This Quick Setup Guide will take you through the basic steps to get your POWERNODE positioned, plugged in, and on your network.

Go to [bluesound.com/downloads](https://bluesound.com/downloads) to download the App. The initial network setup is done using the BluOS App on your phone or tablet. Make sure you have the App downloaded and installed, and your phone or tablet nearby as you get started.

The POWERNODE online owners manual has even more in-depth information, including troubleshooting tips and tricks. Please visit [bluesound.com/products/powernode](https://bluesound.com/products/powernode) to download the latest version of the manual.
