Next Generation Camera Platform

Turing was founded on innovation – and that drives us to deliver the most advanced AI-driven video surveillance and workplace safety solutions available in the market. Our industry-leading, NDAA-compliant products offer customers a full view of their business to transform their safety, security, and analytic capabilities. All solutions can be monitored from a centralized management platform to deliver the most comprehensive system for safety, security, and analytics.

Our extensive North American team offers regionalized hands-on sales and product support. Every team member is focused on our partners and on delivering the most cutting-edge solutions and support. We know your partnership is critical to our success, and our products and program were developed to support your entire sales process.

In our product catalog you will find the latest in NDAA-compliant surveillance technology including our EDGE+ and Smart Series IP cameras and NVRs. They can be paired with our Turing Vision AI-analytics platform, which features a large variety of highly intelligent AI algorithms.

EDGE+
TURING VISION

EDGE+ Series Cloud Camera w/ CORE AI License

The Turing Edge+ cloud cameras offer true direct-to-cloud video security without the need for any additional peripherals. With onboard analytics and storage, the Edge+ combines unparalleled convenience and compatibility with the already versatile Turing Vision cloud VMS and CORE AI.

Cloud VMS included

Smart VSaaS event search & clips w/ included TV-CORE1Y

Direct-to-cloud without the need for NVR or bridge

Onboard microSD storage included

+ 3-Clicks, Fastest Installation on the Market

SCAN

Scan a QR Code or enter a MAC Address.

AUTO SEARCH

Use Search to find more Edge+ in LAN automatically.

BATCH ADD

"Add & Activate" all cameras with one click.

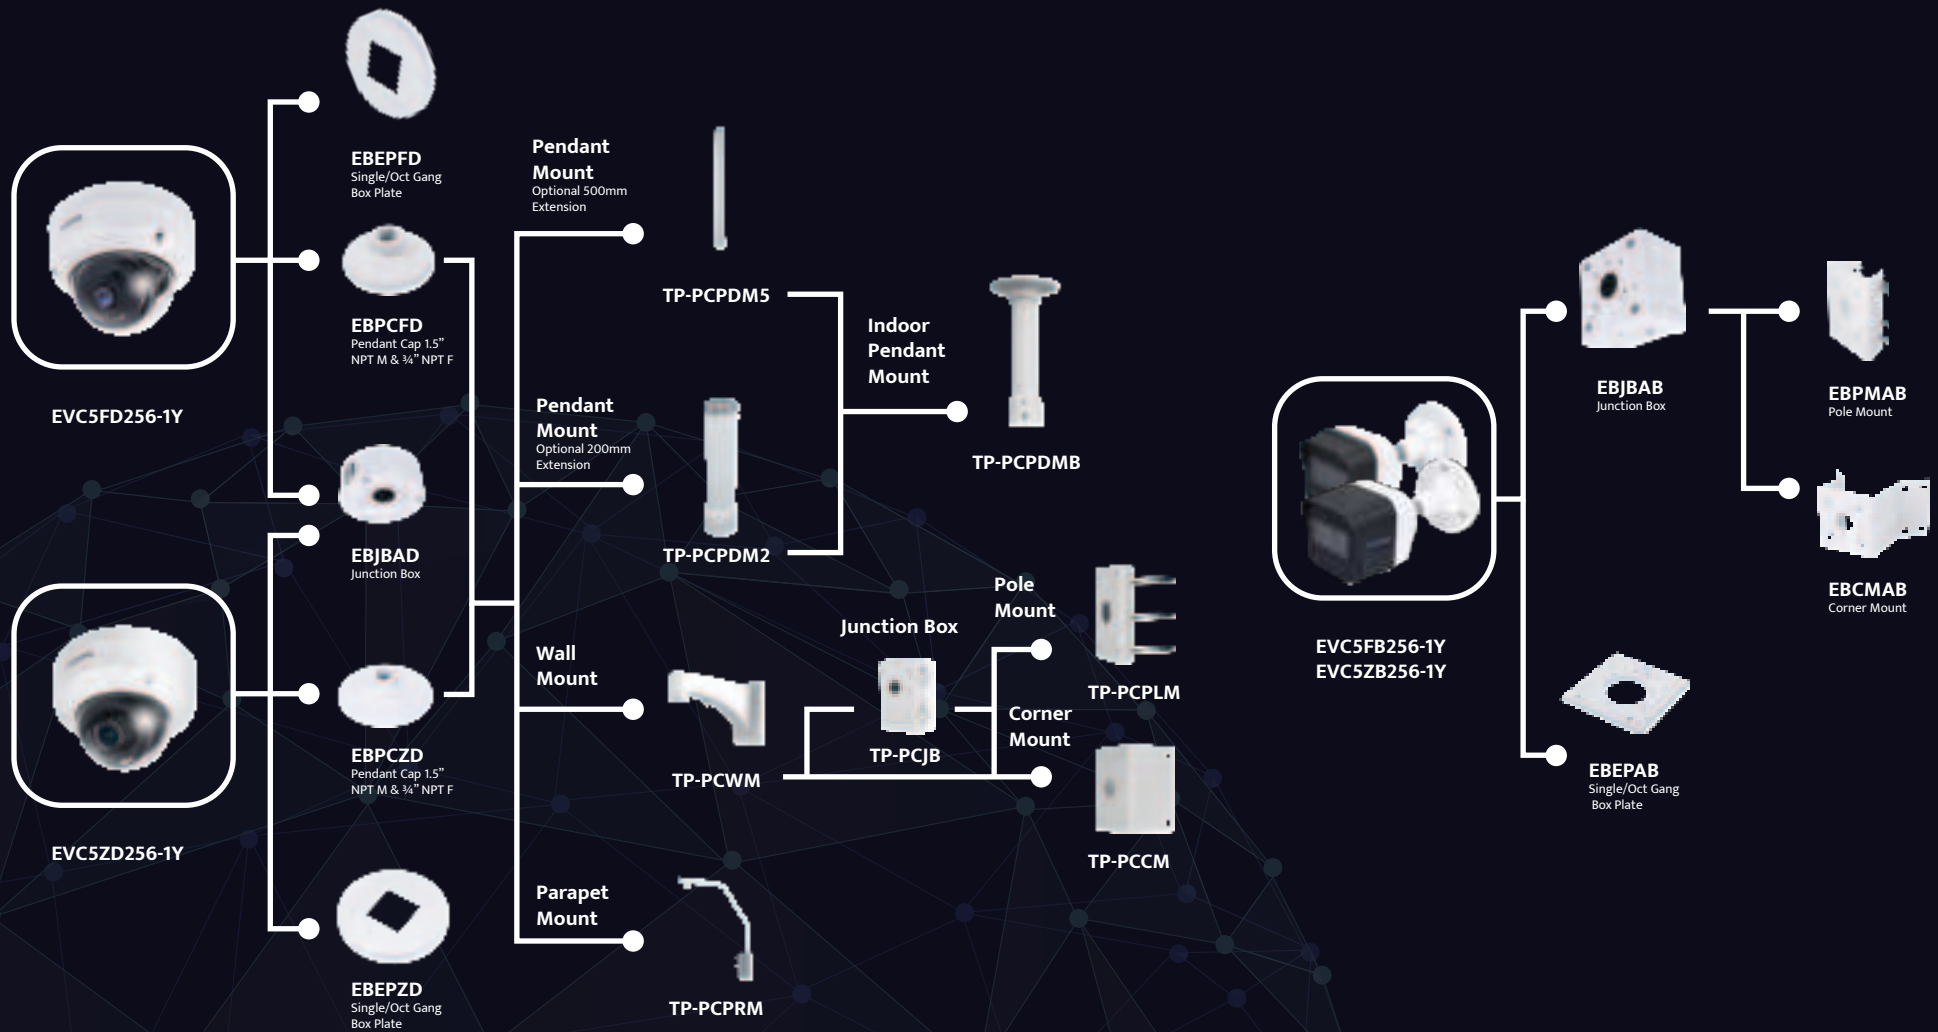

EDGE+ Series Cloud Camera w/ CORE AI License

The Turing Edge+ cloud cameras offer true direct-to-cloud video security without the need for any additional peripherals. With onboard analytics and storage, the Edge+ combines unparalleled convenience and compatibility with the already versatile Turing Vision cloud VMS and CORE AI.

Cloud VMS and Core AI
TURING VISION

Features & Benefits

Turing Vision is the industry-leading safety and security video platform. It's AI-enabled, cloud-based platform allows you to search, be alerted, and analyze detection patterns across multiple locations.

Turing Vision allows you to improve operational efficiencies, increase safety, and get the most out of your camera infrastructure investments.

Setup in Seconds, Easy to Use

Fast and accurate search,
Powered by AI

Share and distribute key clips
to stakeholders

Archive and backup important
clips to the cloud for future
reference

Create accurate smart alerts
for incident prevention

Experience the Power of the Cloud

Easily access multiple sites
from anywhere and on any
device

Evidence data is stored across
the cloud for redundancy and
reliable retrieval

Complies with regulatory
mandates for data privacy

Flexible Integration with New and Existing IP Cameras

Seamlessly integrate with
existing infrastructure and take
advantage of the cloud

Turn existing third-party
cameras into Smart AI cameras

Effortless Remote Maintenance

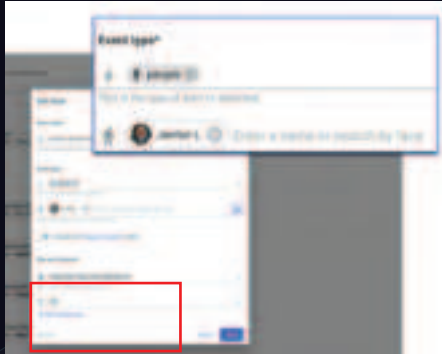

Manage and upgrade your
systems remotely

Comprehensive training
and support

Better Safety and Security, Powered by AI

Through leveraging advanced AI, Turing Vision allows you to find, capture, and send security clips in seconds. In addition, you can share and distribute key clips to stakeholders and create smart alerts for incident prevention.

Customized Smart Alerts

Quickly setup AI-powered Smart Alerts based on an individual's face*, people attributes or vehicle attributes such as license plate number, color, make, or body type. Lastly, receive notification through email, SMS and mobile push.

Vehicle Attribute Search

Easily Search by vehicle color, make and body type.

License Plate Recognition

Capture vehicle attributes and license plates with one camera. Search by a license plate number. Flag detected license plates for future alerts, or exclude whitelist license plates from alerts.

Face Search

Accurate face recognition that allows you to create face profile to search for an individual easily.

People Attribute Search

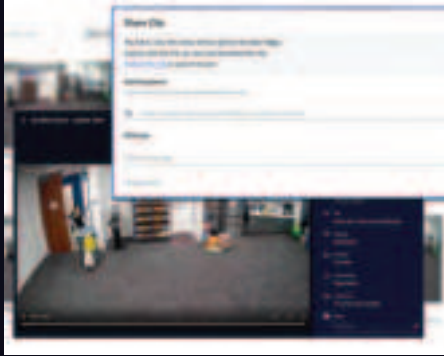

Easily Search based on an individual's face*, or non-biometric attribute such as color of attire, long/short sleeves, and accessories such as hat.

*Activation depends on state regulations and the compliance with Biometric information Protection Act (BIPA). Please refer to our privacy policy.

Cloud-Based Platform Benefits

Experience the power of the cloud, Turing Vision allows you to archive and backup important clips to the cloud for future reference. Option to store 24/7 video footage offsite in the cloud. Easily access multiple sites from anywhere and on any device. Lastly, manage and upgrade your system remotely.

Cloud Archive and Share

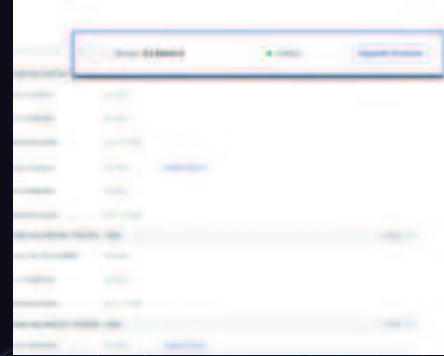

Archive and save important detection event video clips or snapshots indefinitely in the cloud for redundancy and reliable retrieval*. Share and distribute key clips to stakeholders.

*Continuous active subscription required.

Centralized Monitoring

Easily access multiple sites (live view and replay camera recordings) from any location and on any device.

OTA Firmware Upgrade

Quickly manage and upgrade your system from anywhere by running OTA (Over the Air) system/firmware upgrades, setting up camera detection regions, and other settings.

Remote Device Management

Through the Device Management Dashboard, actively monitor the status of your cameras, NVR, and Turing Bridge.

Elevate Your Business with Turing Partner Portal

Turing Partner Portal will elevate your business by driving sales, keeping you informed, providing easy customer device management, and a secure way to track and manage licenses and subscriptions.

Stay Informed

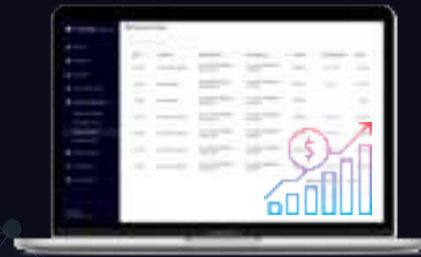

Utilize our wide array of helpful sales and marketing resources, including sales tools, current promotions, technical guides, campaigns, and decks. Gain access to Turing University to get educated on all the features and functions of Turing Products.

Improve Efficiency

Create and manage customer accounts, monitor device health, upgrade firmware, manage licenses, and request admin access for additional support and troubleshooting, all done remotely to maximize efficiency.

Increase Revenue Streams

Eliminate upfront licensing costs & capture post-installation sales with Turing Customer Subscription. Make recurring shared revenues with hassle-free auto renewals and have peace of mind with secure PCI compliant online transactions.

Partner App

Coming soon

With Partner App, onsite installation and troubleshooting have never been easier. Maximize productivity, reduce downtime, and increase customer satisfaction with the convenience of the Partner App at your fingertips.

Vertical Solutions

Turing Vision Hybrid Cloud Solution is widely applied into different verticals and proves its value to customers by increasing video search efficiency with AI, saving time to learn with super easy to use GUI, and eliminating cost on maintenance with its cloud-based architecture.

[illegible]

Supercharge Your Access Control with Videos

VIEW ALL YOUR ACCESS CONTROL SITES FROM ONE CENTRALIZED LOCATION

Easily manage and simplify your security workflow with all your access control sites on one centralized platform.

INVESTIGATE ACCESS EVENTS FAST WITH TIED VIDEO

Experience the power of Turing's filtering capabilities - effortlessly track and search for any entrance or exit access events tied with video footage.

INSTANTLY VIEW, DOWNLOAD, AND ARCHIVE EVENTS

Streamline your security process by having instant access to important footage and the ability to view, download, share, or archive it.

Smart Series
TURING VISION

SMART Series IP Cameras w/ CORE AI License

Turing offers a full line of NDAA-compliant IP cameras that perfectly compliment our comprehensive cloud offering. On-the-edge person and vehicle detection AI can be found from regular low-light cameras to high-speed PTZs, enabling a highly efficient experience while searching for incidents or persons of interest. All Turing Smart Series cameras are compatible with CORE AI license.*

TwilightVision

Superior Low Light

True WDR

IP67

Onboard AI

A majority of Turing SMART series cameras are equipped with the TwilightVision super low light technology. With built-in IR illuminators, these cameras can detect persons and vehicles and store events in the Turing Vision cloud even in poorly-lit environments.

Superior low-light performance

VibrantView

Color Low Light

True WDR

Warm Light LED

Onboard AI

VibrantView cameras feature large and highly sensitive image sensors along with supplemental visible light LED. Full color images in low light show clothing and vehicle colors, perfect for attribute searches on the Turing Vision cloud in any lighting condition.

Vibrant colors anywhere, anytime

Dual-Light Active Deterrence

IR & Warm Light

True WDR

Audio Alerts

Onboard AI

"Active Deterrence" cameras are fully capable of giving visual and audio warnings for true loss prevention. The additional "dual-light" system also provide advantages of both IR and visible lights at night.

Loss prevention realized

Pan-Tilt-Zoom

Superior Low Light

Long Range IR

Smart Tracking

Onboard AI

A variety of PTZ cameras are offered for applications that need to both cover an open area and zoom in to detail when needed. Onboard AI is available to accurately capture events for cloud event storage and searches.

Smart, flexible, quick

SMART Series IP Turrets - TwilightVision™

A majority of Turing Smart Series Cameras come equipped with the **TwilightVision** superior low light technology. Complemented by strong IR illuminators and 120 dB true WDR, the **TwilightVision** series excels in a variety of lighting conditions. All Smart Series cameras include intelligent people and vehicle filters which accurately give intrusion notifications as well as saves storage space from false alarms.

SMART Series IP Cameras - VibrantView™

The **VibrantView** network cameras are equipped with low aperture lenses, low-light sensors, and powerful warm light LED that produce color video in scenes with little to no ambient light. This not only greatly increases the ability to identify a person or vehicle in the dark, but also makes attribute searches in Turing Vision significantly more effective. All Smart Series cameras include intelligent people and vehicle filters which accurately give intrusion notifications as well as saves storage space from false alarms.

SMART Series IP Cameras - Dual-Light

The **Dual-Light** cameras combine the best of IR and warm-light cameras, using invisible IR supplement light to detect people and vehicles, then switches to a short-range warm light once valid intrusion has been detected. The included active deterrence feature is also capable of giving visual and audio warnings through built-in speakers for true loss prevention.

SMART Series VSaaS-Ready NVRs

Turing AI offers a variety of network video recorders that act both as local recorders and a gateway to the Turing Vision VSaaS. Each NVR comes bundled with a Turing Vision Bridge which is to be installed on the same network as the NVR and the Internet. This setup provides versatility for both Turing Smart Series cameras as well as legacy third party cameras.
