

Bluetooth Speaker

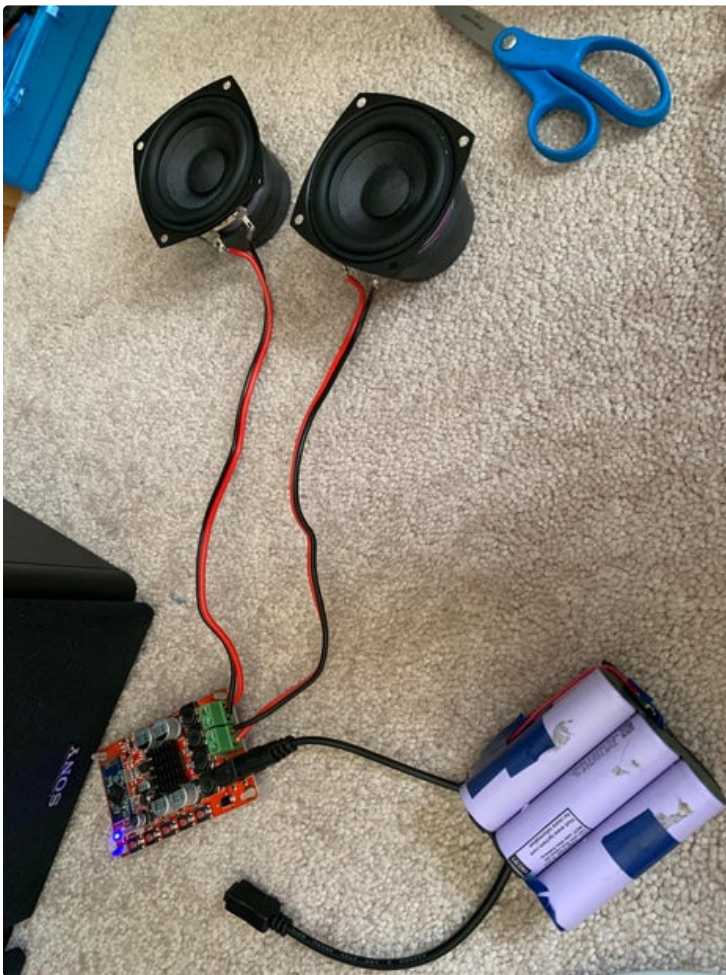

by garrettmoe

Fun bluetooth speaker

Supplies:

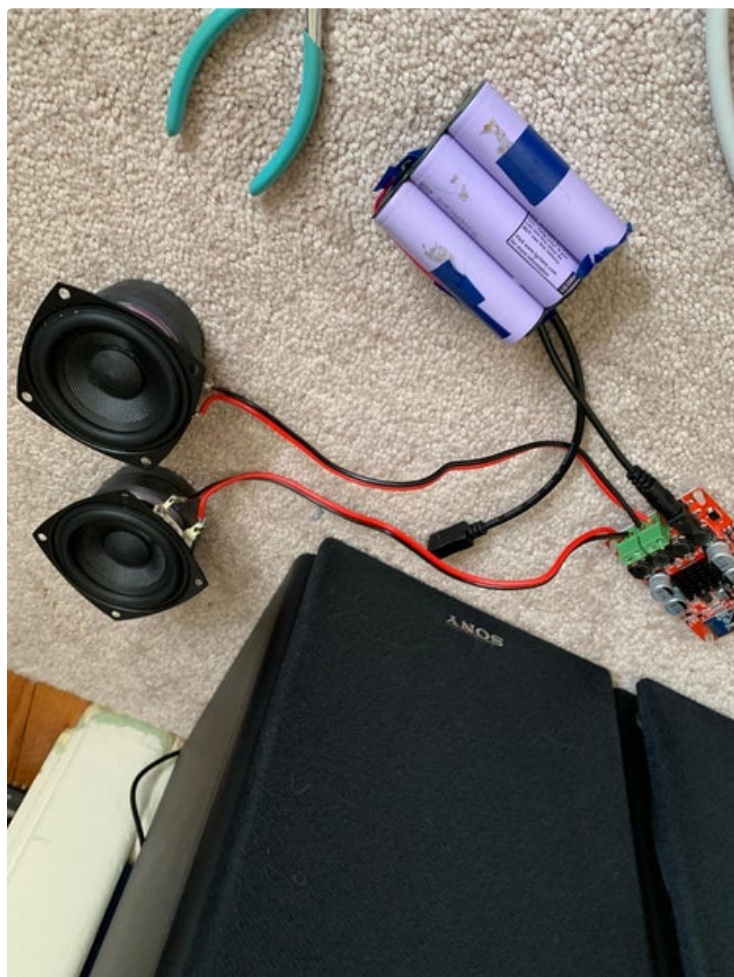

Speakers, the board, and a battery pack (read step 1)

Step 1: Get Parts

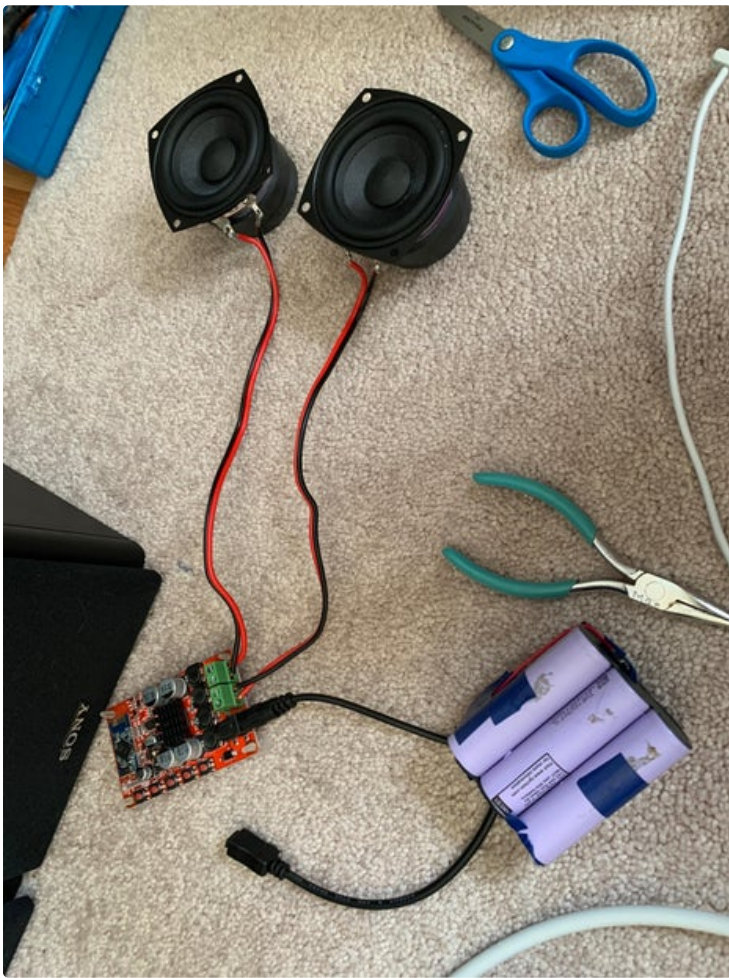

Get a aideepen audio bluetooth board, two speakers, and a battery pack. The board requires 8 to 24 volts to work.

So get a high voltage battery

Step 2: Assemble

Wire everything together. Input to battery then battery to board then board to speakers

Step 3: Box It Up

Make a case for it any way you want.
