CE Listed  5-15P

Notes & Details

Erase unsightly lipstick marks, fingerprints, and smudges from glassware with the Noble Warewashing Last Call heavy-duty upright electric glass washer! This powerful unit is designed for use in a sink while fully submerged in water; all you need is a bottle of liquid glasswashing detergent, and you're ready to restore glasses to their original, lustrous shine. It's made of heavy-duty stainless steel and delivers exceptional performance and reliability, making it ideal for fast-paced commercial environments. Plus, because the motor is encased by a protective top guard, you'll never need to worry about water damaging the electrical components.

With a heavy-duty, high-powered 1/3 hp motor, the glass washer spins its (4) 6" brushes and (1) 7 1/2" center brush quickly and efficiently to automatically scrub glasses inside and out, with enough torque to keep the brushes rotating and cleaning even during heavy use. This not only minimizes time and labor costs, but ensures better and more consistent results than painstakingly washing each glass by hand. The best choice for an immaculate shine, this powerful glass washer helps showcase your most popular beverages with ease. It requires a 115V electrical connection for operation, and comes with a cord and plug.
