## FCC COMPLIANCE STATEMENT

### FOR AMERICAN USERS

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 Subpart B of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with Part 15 Subpart B of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

FCC Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

## TO WHICH THIS DECLARATION RELATES IS IN CONFORMITY WITH THE FOLLOWING STANDARDS

IEC 62365-4:2019

EN 55032:2015/A1:2020, Class B

EN 55035:2017/A11:2020

EN IEC 61000-3-2:2019/A1:2021

EN 61000-3-3:2013/A2:2021

A3/NZS C SFR 32: 2015 AMD 1: 2020

FCC CFR Title 47 Part 15 Subpart B:2021 Class B

CES-003 Issue 7:2020, Class B

## SAFETY INSTRUCTIONS

Please read the following instructions carefully.

- Keep the equipment away from humidity.
- Before you connect the equipment to the power outlet, please check the voltage of the power source.
- Make sure the printer is off before plugging the power connector into the power jack.
- It is recommended that you connect the printer to a surge protector to prevent possible transient overvoltage damage.
- Be careful not to get liquid on the equipment to avoid electrical shock.
- For safety and warranty reasons, ONLY qualified service personnel should open the equipment.
- Do not repair or adjust energized equipment under any circumstances.

## CAUTION

- Danger of explosion if battery is incorrectly replaced. Replace only with the equivalent type recommended by the manufacturer.
- Dispose of used batteries according to the manufacturer's instructions.
- Only use with designated power supply adapter model.
- Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Specifications are subject to change without notice

- ~ Do not remove the ground pin of power cord. The grounding is an important safety feature.  
Please keep the power cord grounded (earthed) all the time.
- ~ The cutter is an optional accessory. If the cutter is installed, it is not suitable for children to approach.

## 1.Thermal Label Printer

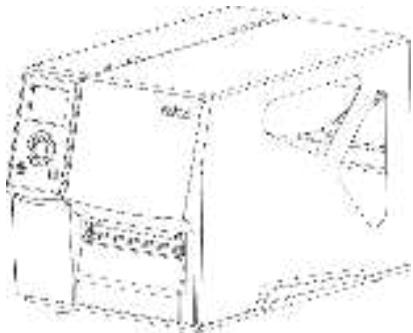

### 1-1 Box content

Please check that all of the following items are included with your printer.

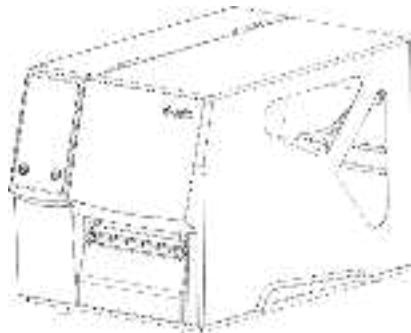

(Package content and logo style may vary per region.)

#### •Barcode Printer

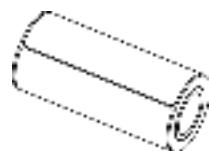

LX400ii

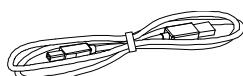

LX400

#### •Label Stock

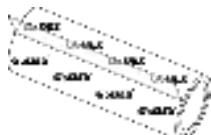

#### •USB Cable

#### •Quick Guide

#### •Ribbon

#### •Power Adapter

#### Power Cord

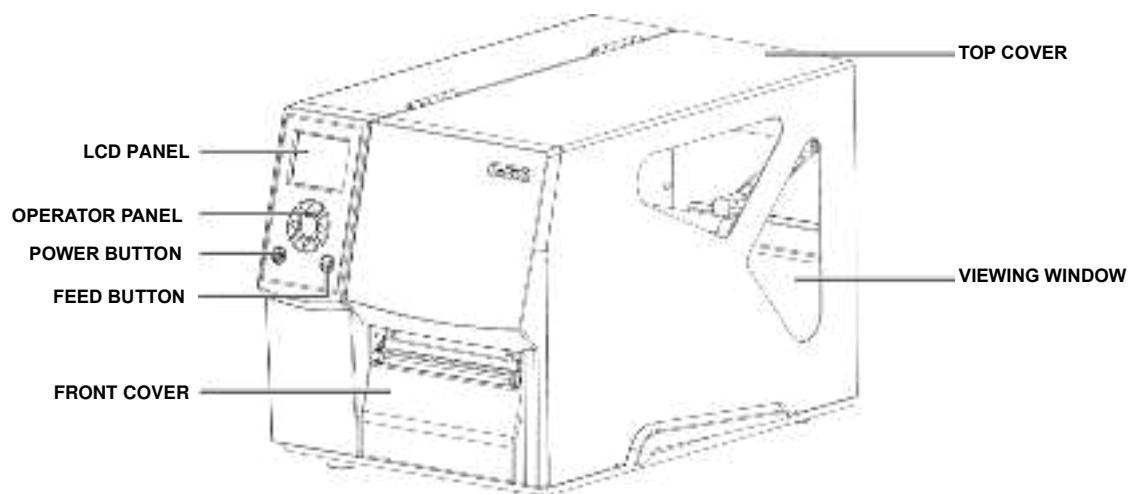

#### •Empty Ribbon Core

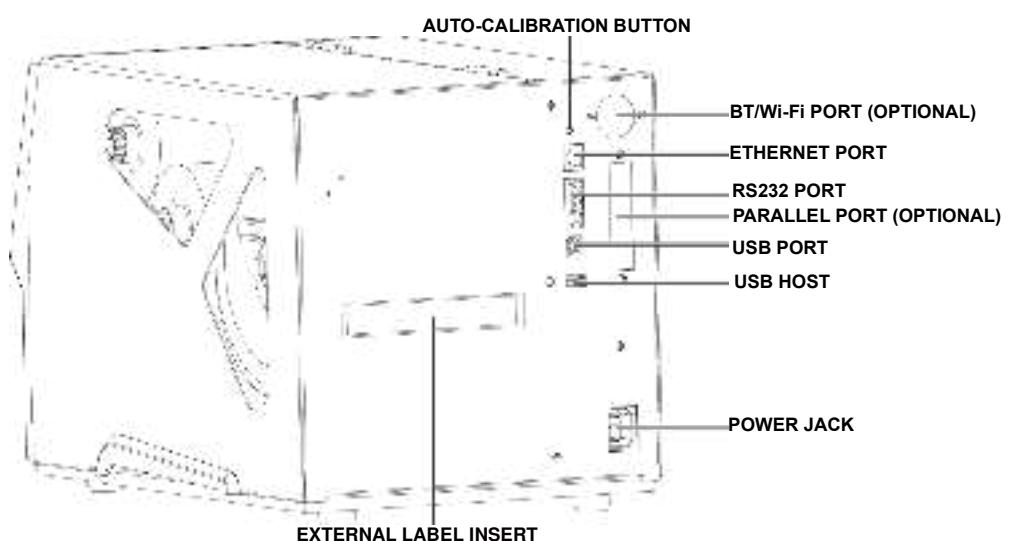

## 1-2 Getting to know your printer

(Z4400i)

### •Front View

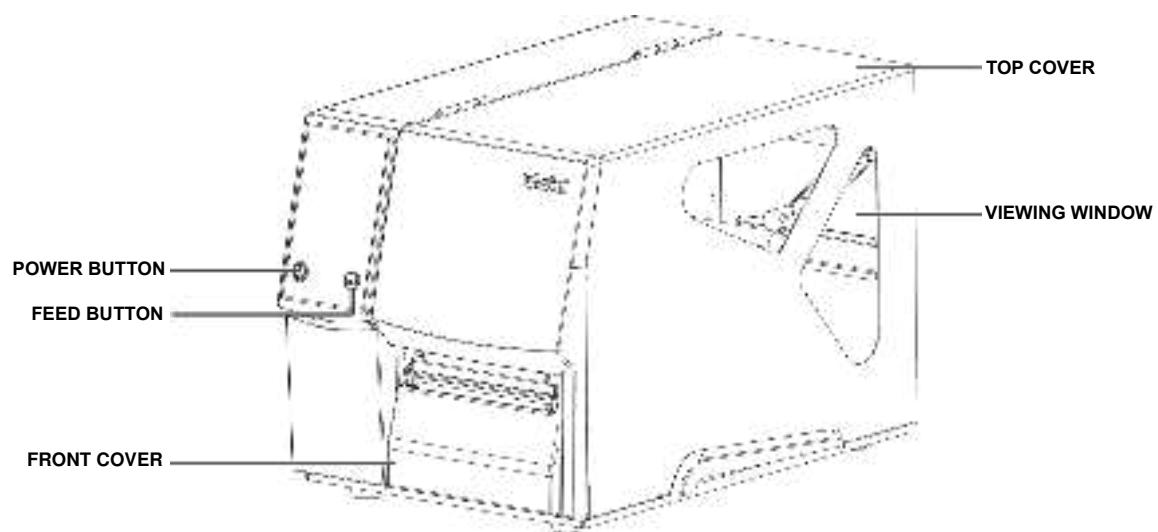

### •Rear View

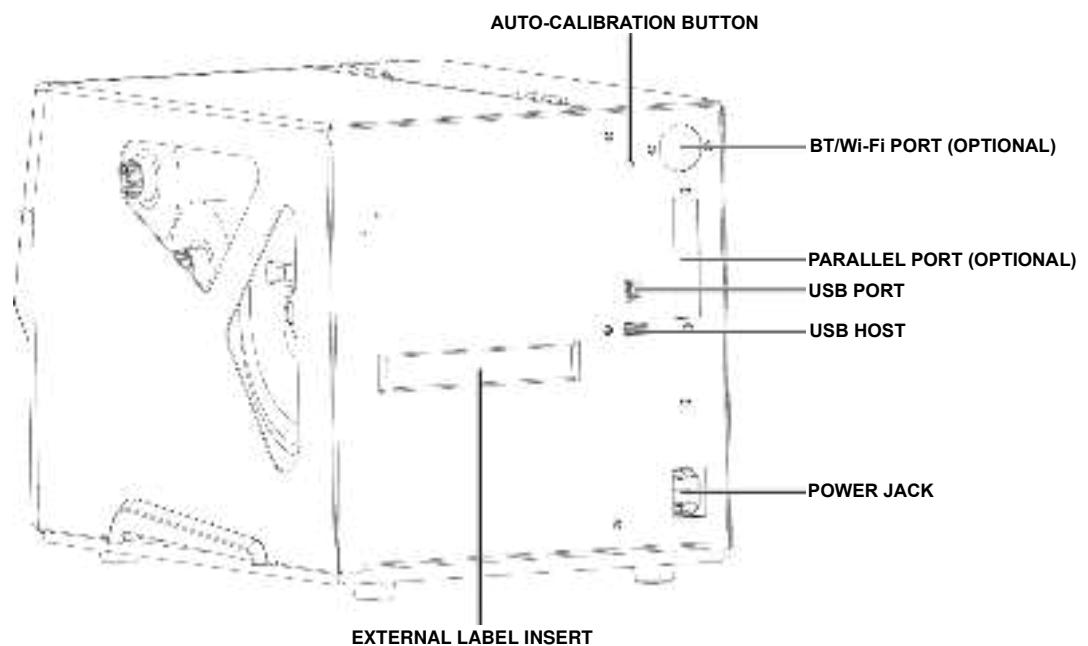

(ZX4004)

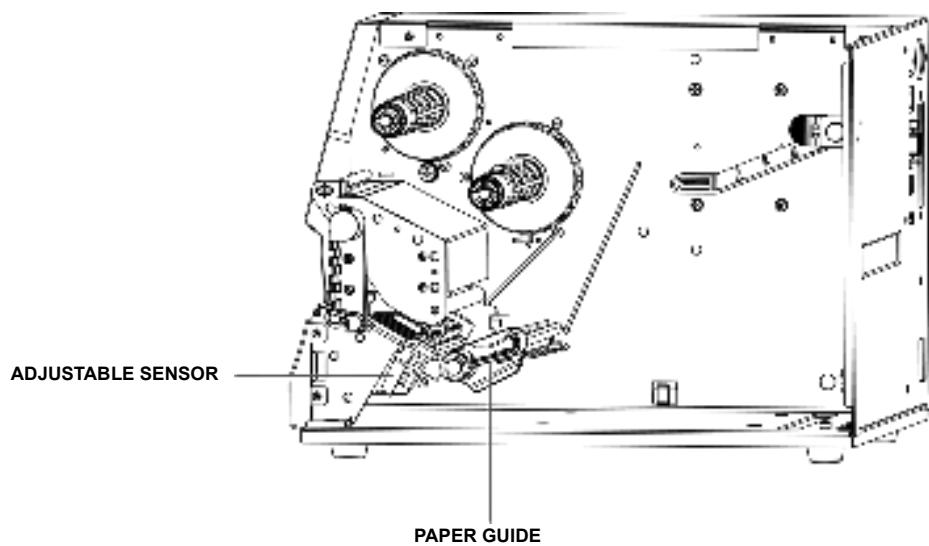

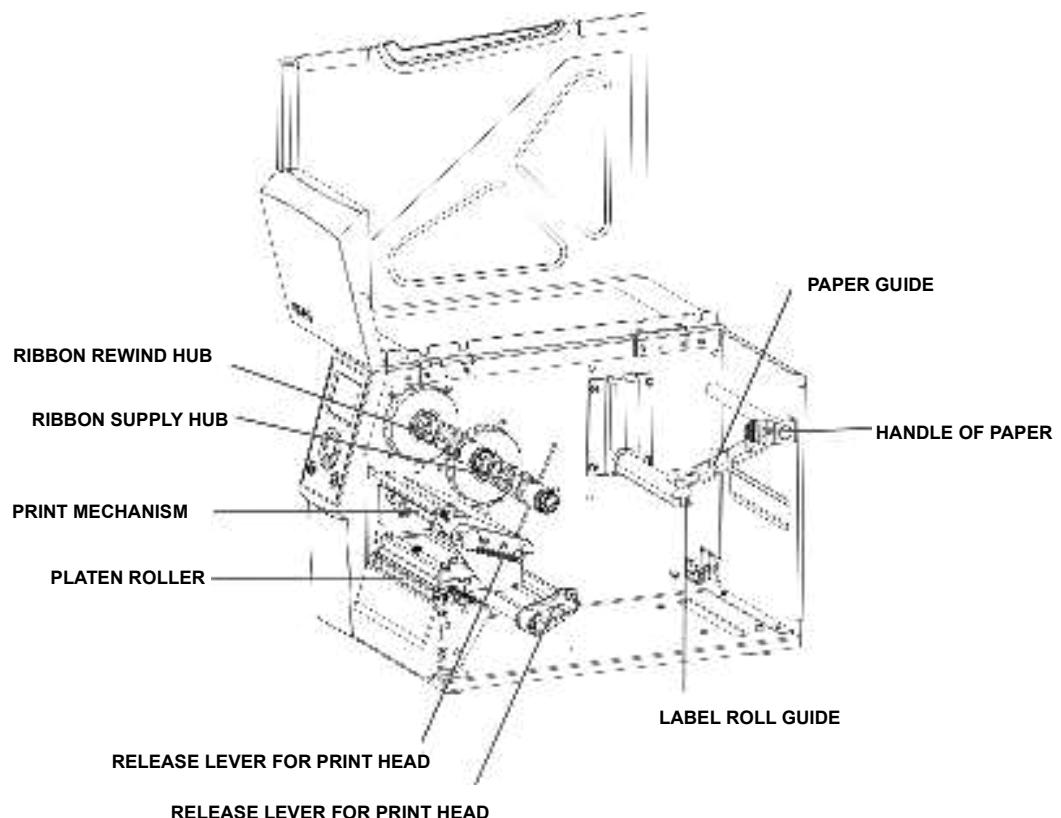

\*Front view

\*Rear view

•Open the printer cover

## 2. Printer Setup

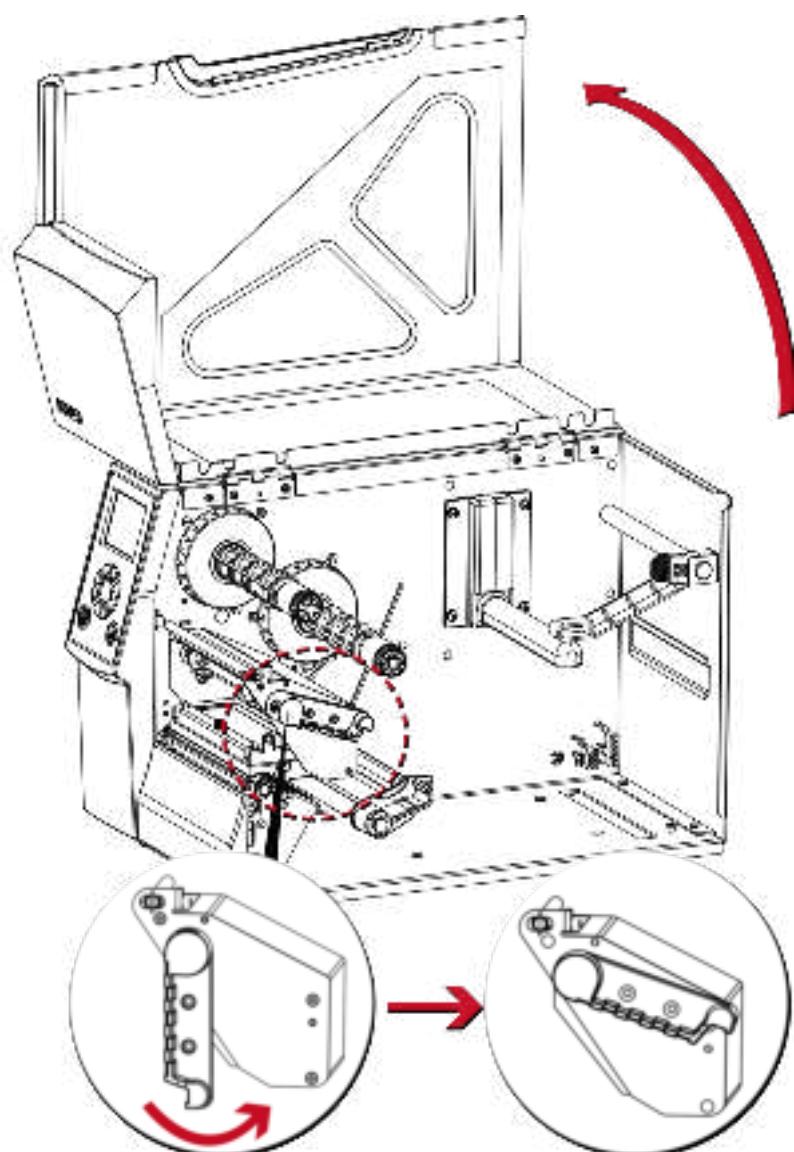

### 2-1 Loading the label roll

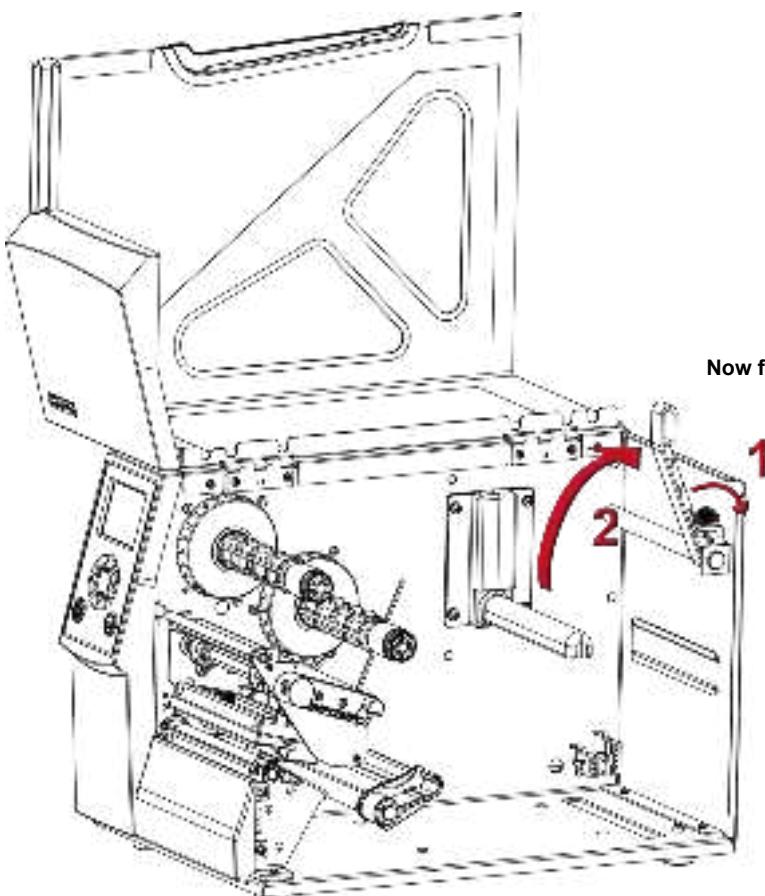

This printer supports the following printing methods:

Thermal transfer printing (TTP): Requires a ribbon for transferring a printed image to a medium.

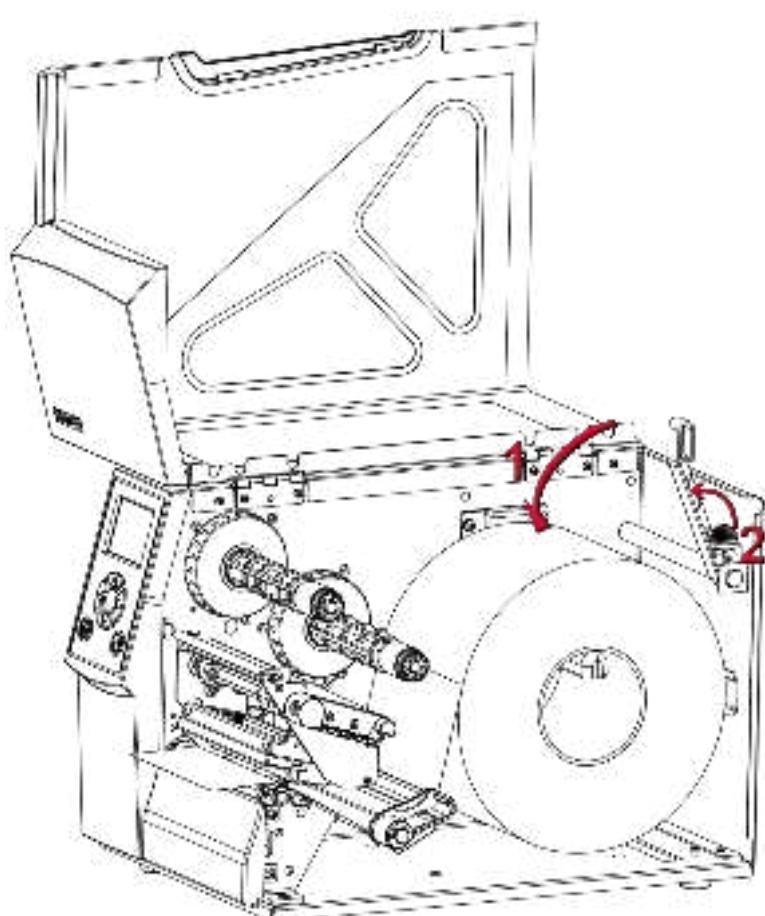

Direct thermal printing (DTP): Does not require a ribbon, only thermal paper.

Please check which printing method you are using and alter the settings accordingly in the printer driver, printer menu, and/or software.

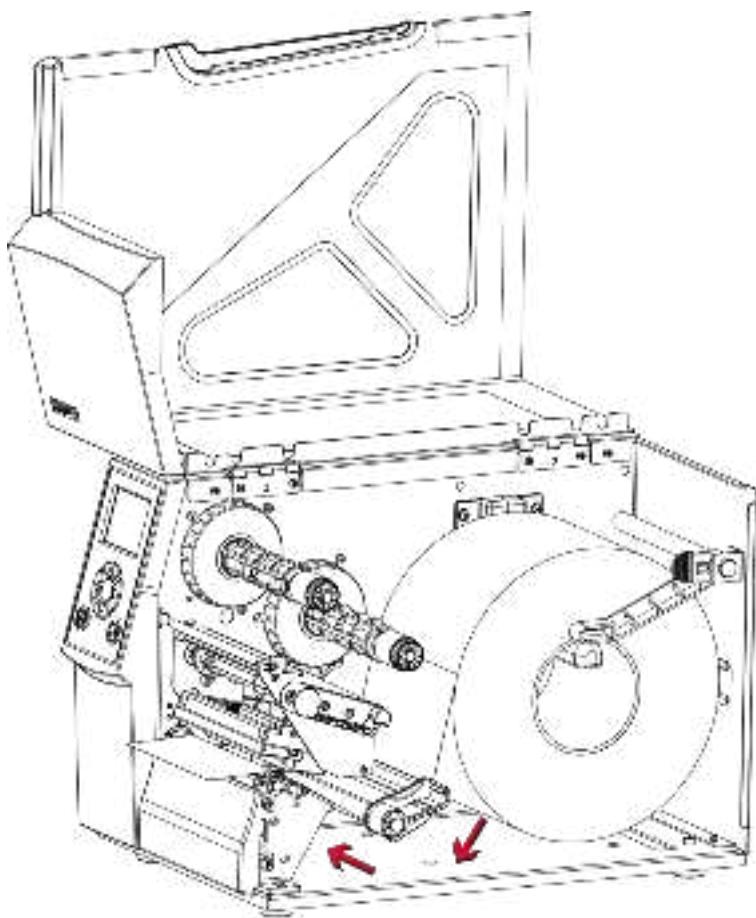

Now fold the label roll guide up

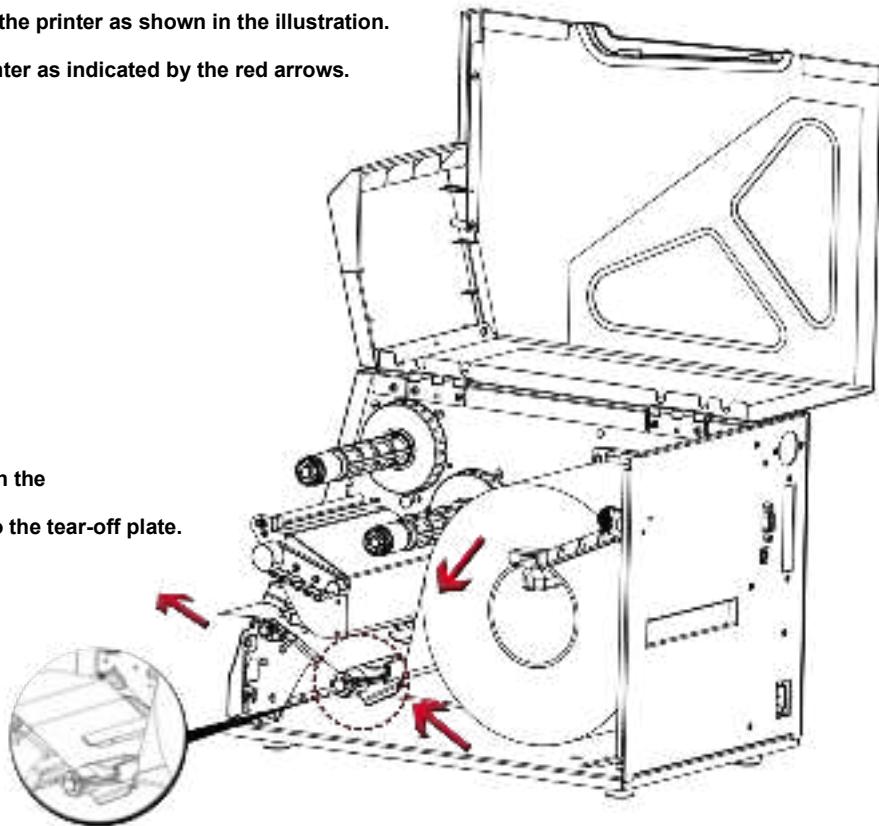

Place the label roll on the label supply hub,  
pushing it right up to the printer housing.  
(Do not apply too much pressure to avoid  
damaging the label stock.)

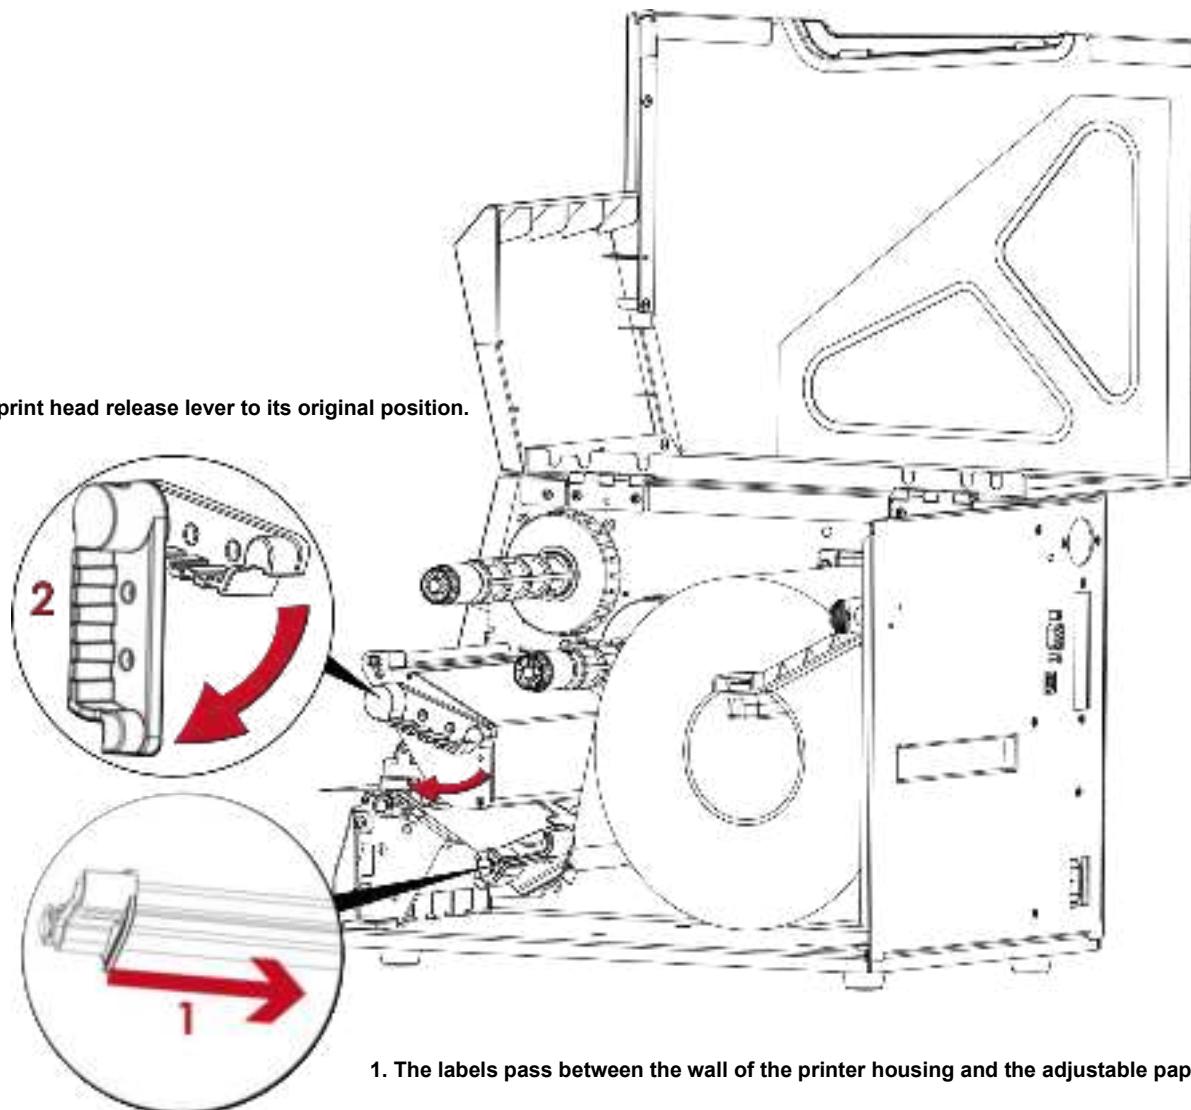

**Load the label roll into the printer as shown in the illustration.**

**Pass it through the printer as indicated by the red arrows.**

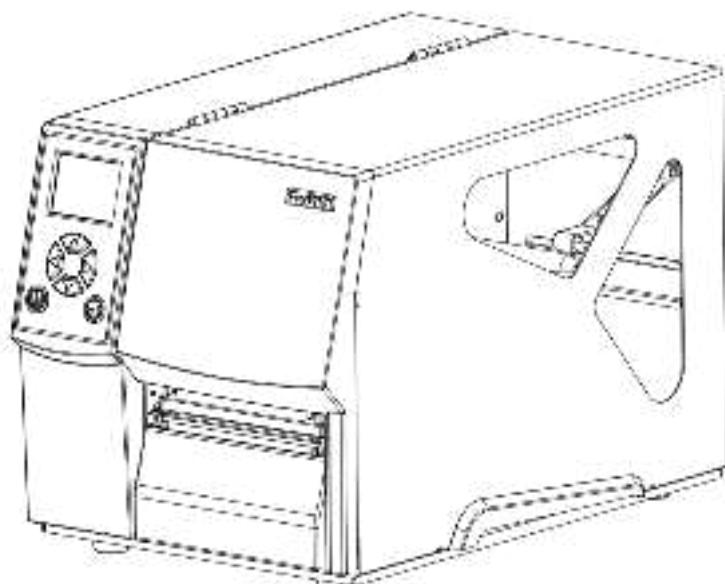

**Pass the label stock through the  
adjustable Sensor and up to the tear-off plate.**

2. Return the print head release lever to its original position.

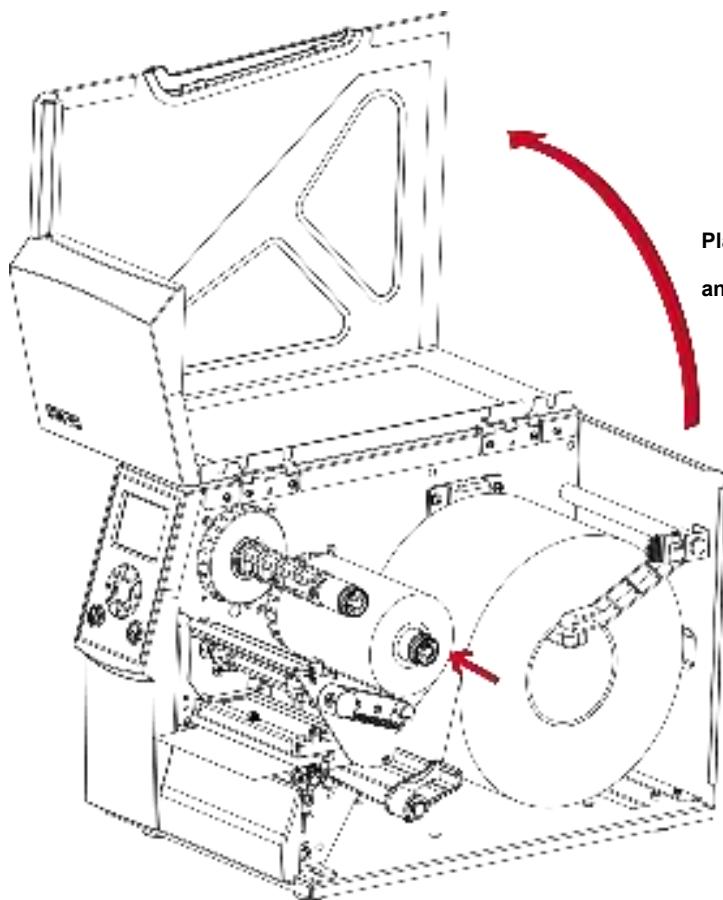

1. The labels pass between the wall of the printer housing and the adjustable paper guide.

Then close the printer cover.

## 2-2 Loading & removing the ribbon

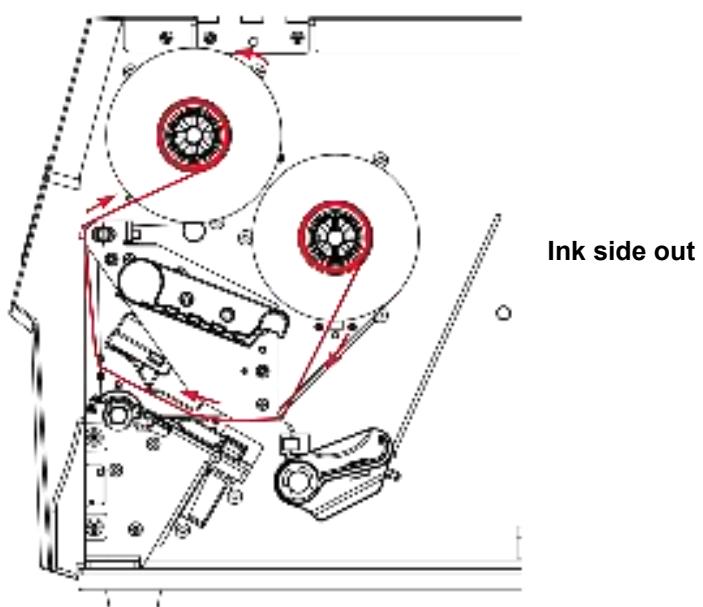

### • Loading ribbon

Place the printer on a flat surface  
and open the printer cover

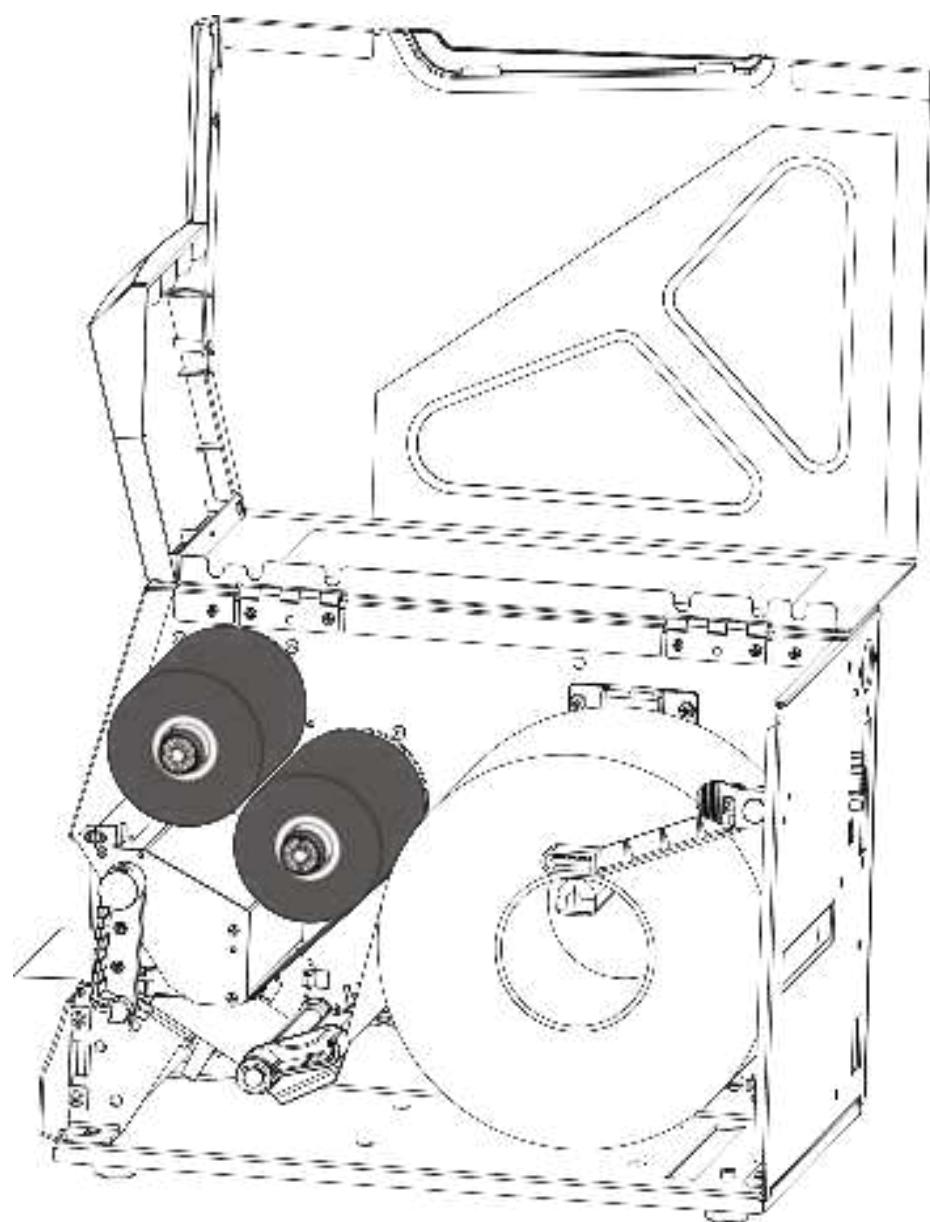

Place a new ribbon on the ribbon supply hub.

The illustration as below shows you how to install the ribbon.

Pass the ribbon under the print head and back up on the other side.

Attach it to the empty ribbon core.

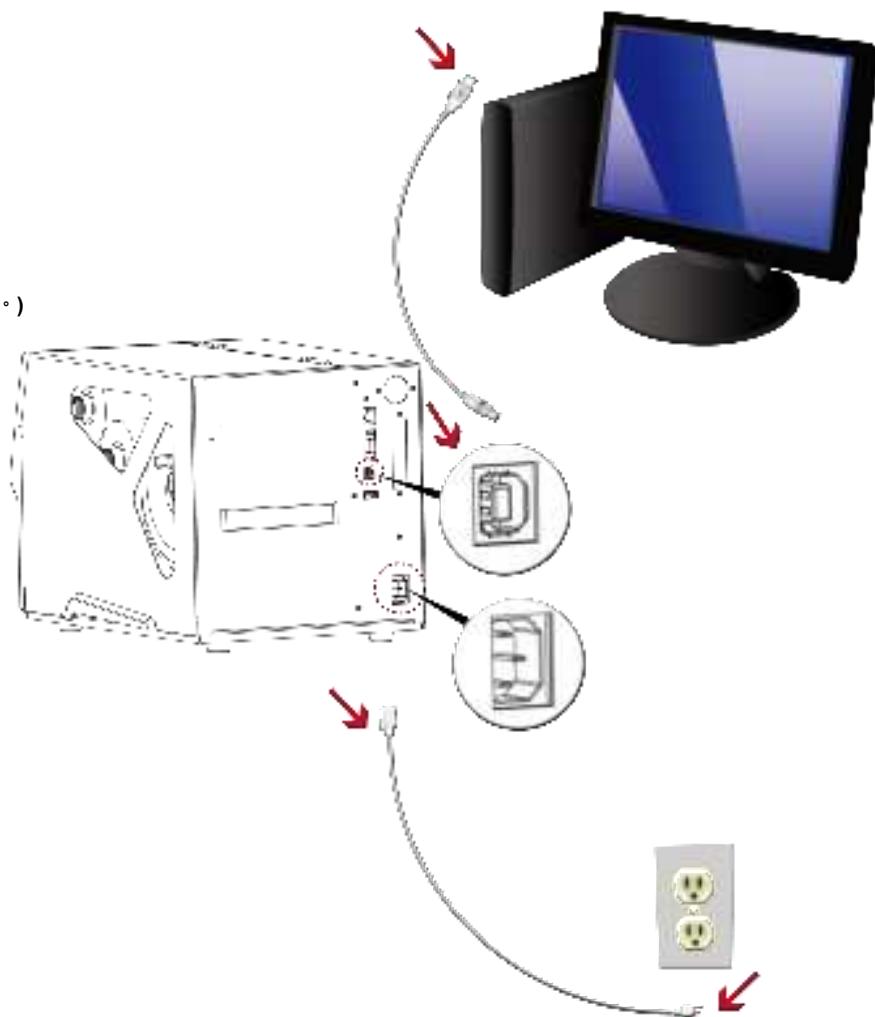

## 2-3 Connecting the printer to the host computer

- Please make sure that the printer is switched off.
- Connect the power cord to the AC adapter and connect the adapter to the printer.
- Connect the USB / parallel cable to the printer and host computer.  
(The type of cable may vary according to the products which you purchase)
- Switch on the printer. The LCD indicator should now light up.

BARCODE PRINTER

(Ports may vary per model.)

## 2-4 Installing printer driver and GoLabel II

Relevant documents and software can be found and download on CoCDX official website.

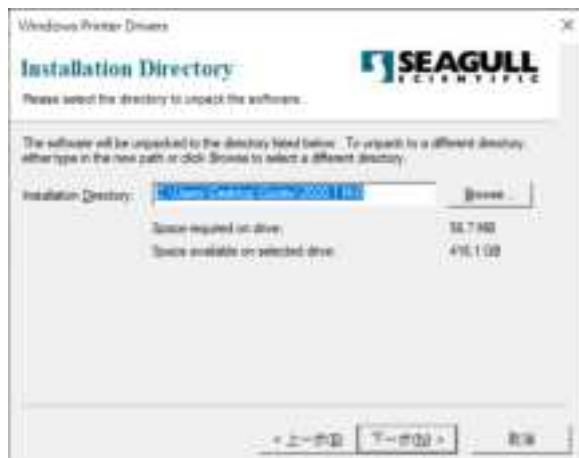

### Driver

Step1 Click the compressed driver file in the folder.

Select 'I accept the terms in the license agreement' and click 'Next'.

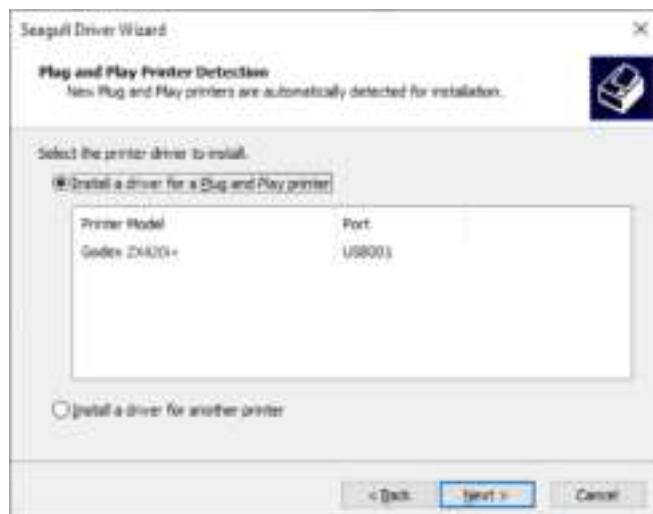

Step2. Select the path to unzip and click 'Next'

Step3. Click 'Finish' and open the Driver Wizard

Step4. The driver installation wizard will automatically detect the model, please click 'Next' to start the installation

Step5. After entering the printer name, click 'Next'

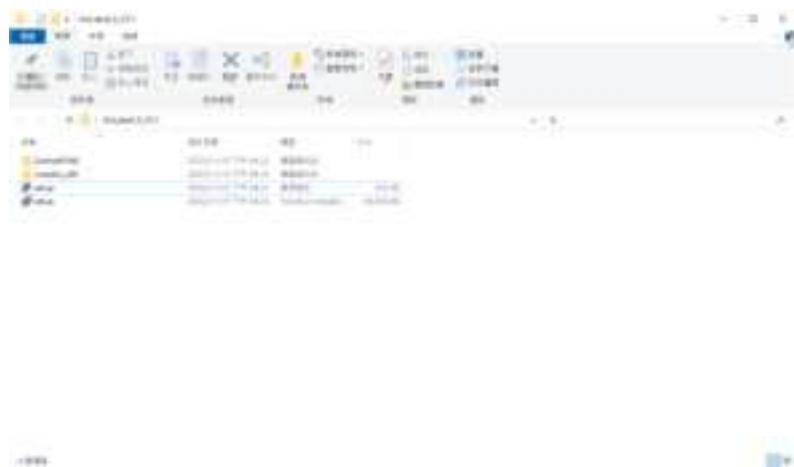

Step6. After confirming the settings, click 'Finish' to install

## Installing GoLabel II

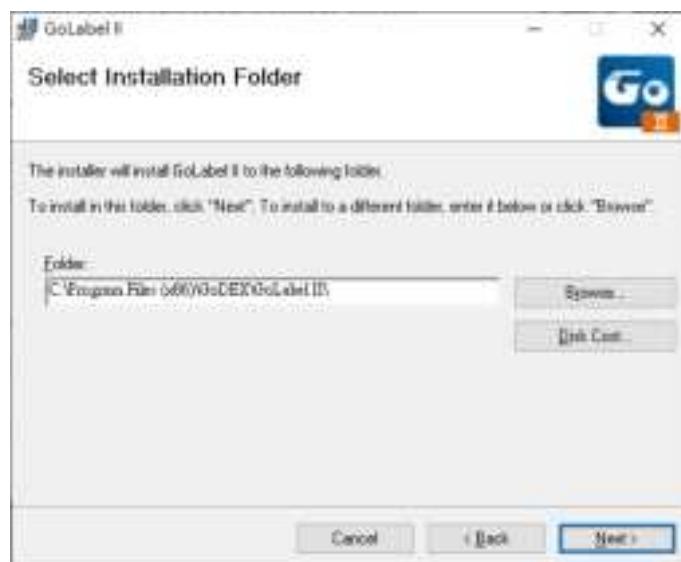

Step1. Click the installer in the folder to install.

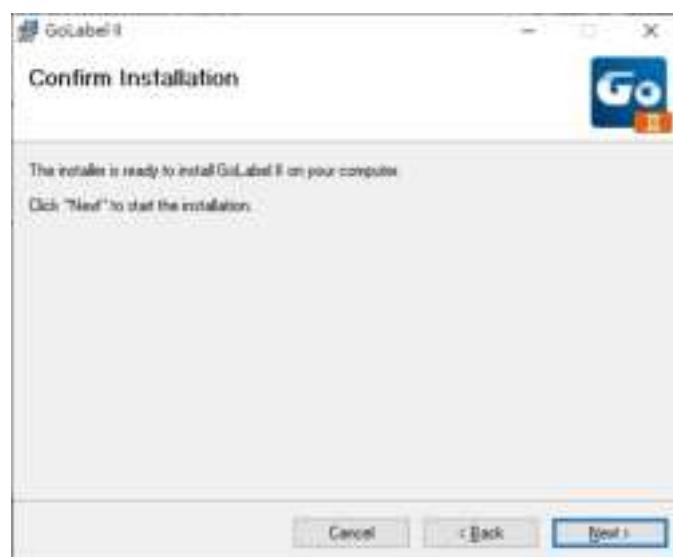

Step2. After entering the installation screen, click "Next".

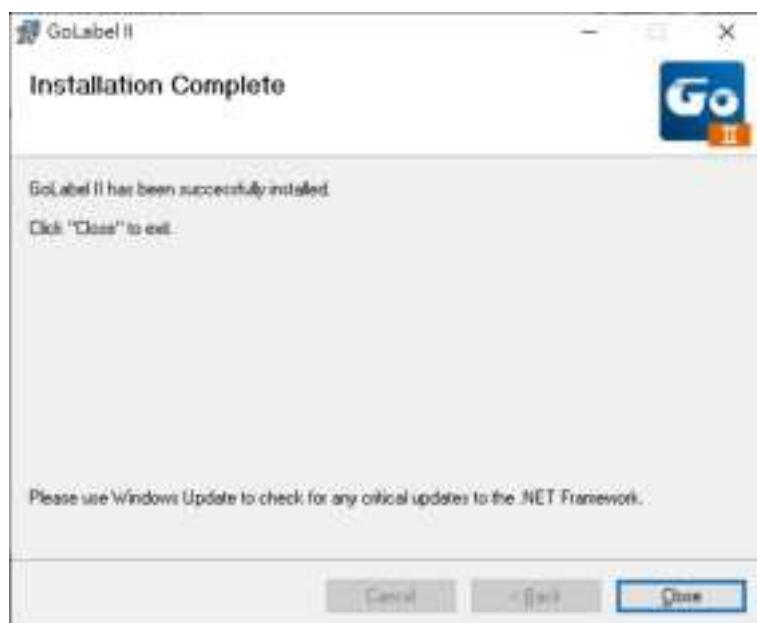

Step3. After selecting the folder to install, click "Next"

Step4. Click Next to start the installation

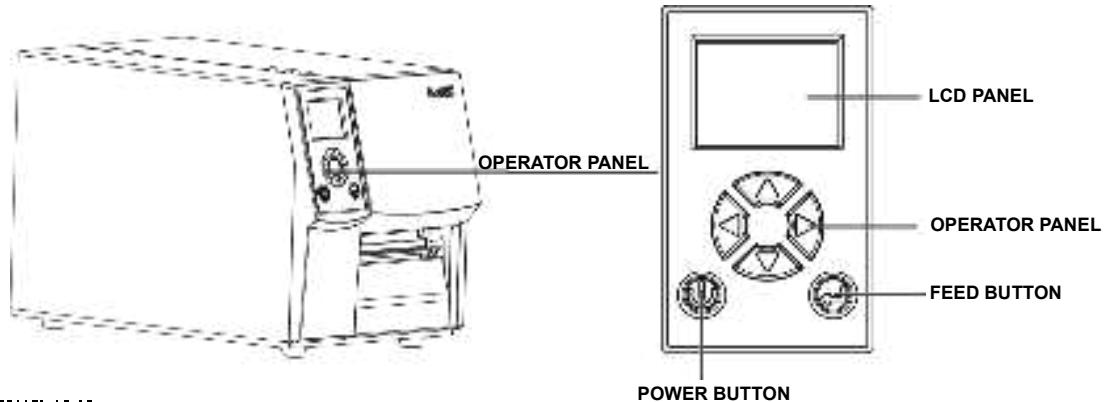

Step5. Finish installation

### 3. Operation Panel

#### 3-1 LED operation panel

(For ZX400i Series)

##### POWER Button

Press the POWER button to turn on the printer, and the START JP SCREEN appears. The printer is in "Ready to print" status. The LCD screen should display the message "READY" on the screen.

When printer is turned on, hold and press down the POWER button for 3 second will turn the printer off.

##### FEED Button

To turn on the printer, only press the FEED button.

When you press the FEED button, the printer will advance media until the FEED button is released.

If you are using continuous labels, pressing the FEED button will advance a length of media until the button is released.

If you are using media with gaps, pressing the FEED button once will advance only one label.

If the size does not stop at the correct position, you need to turn the auto-detection function for your media.

Please see Section 3-6 Label Calibration and Self-Test.

##### PAUSE PRINTING: FEED Button

Pressing the FEED button while the printer is in standby mode will set the printer to pause mode. In this mode, the printer can receive commands, but it will only process them when it is reset to standby mode. Pressing the FEED button again will reset the printer to standby mode.

Pressing the FEED button during printing will interrupt printing. When the FEED button is pressed again, the printer resumes printing. Example: While a 10-label print job is running, you press the FEED button to pause the printer. Two of the labels have been printed. To resume printing and print the remaining eight labels, you will need to press the FEED button again.

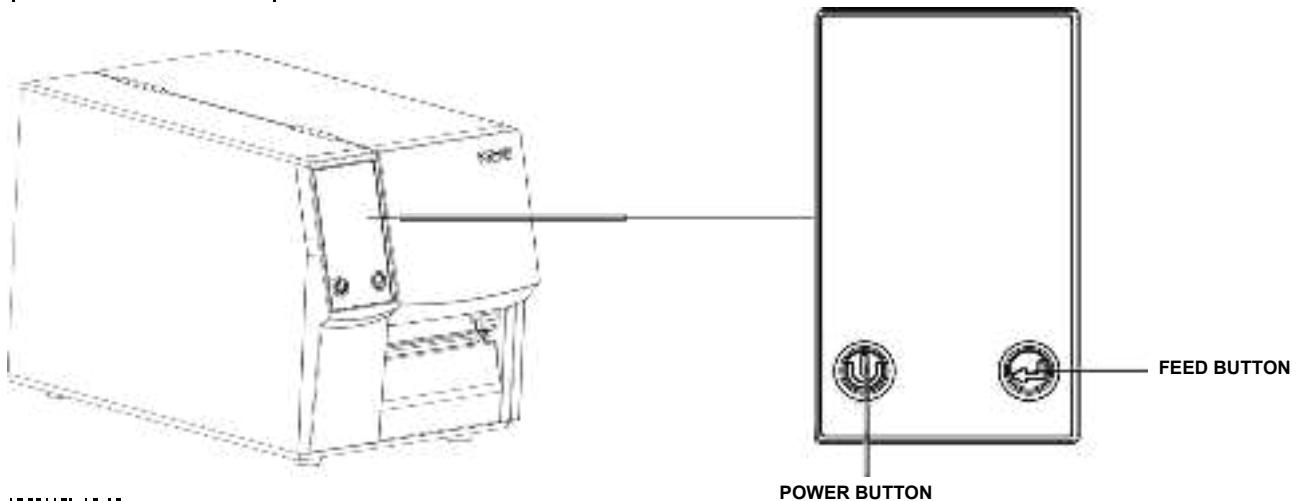

##### CANCEL PRINTING: FEED Button

Press and hold the FEED button for 3 seconds during printing cancels a print job. The current print job is cancelled.

Example: While a 10-label print job is running, you press the FEED button. Two of the labels have been printed.

The print job is canceled and the remaining eight labels will not be printed.

## {For ZX400-Series}

### POWER Button

Press the POWER button to turn on the printer, and the START UP SCREEN appears. The printer is in "Ready to print" status. When printer is turned on, hold and press down the POWER button for 3 seconds to turn the printer off.

### FEED Button

To turn on the printer, only press the FEED button.

When you press the FEED button, the printer will advance media until the FEED button is released.

If you are using continuous labels, pressing the FEED button will advance a length of media until the button is released.

If you are using media with gaps, pressing the FEED button once will advance only one label.

If the site does not stop at the correct position, you need to turn the auto-detection function for your media.

Please see Section 3.6 Label Calibration and SelfTest.

### PAUSE PRINTING: FEED Button

Pressing the FEED button while the printer is in standby mode will set the printer to pause mode. In this mode,

the printer can receive commands, but it will only process them when it is reset to standby mode. Pressing the FEED button again will reset the printer to standby mode.

Pressing the FEED button during printing will interrupt printing. When the FEED button is pressed again, the printer resumes printing. Example: While a 10-label print job is running, you press the FEED button to pause the printer.

Two of the labels have been printed. To resume printing and print the remaining eight labels, you will need to press the FEED button again.

### CANCEL PRINTING: FEED Button

Press and hold the FEED button for 3 seconds during printing cancels a print job. The current print job is cancelled.

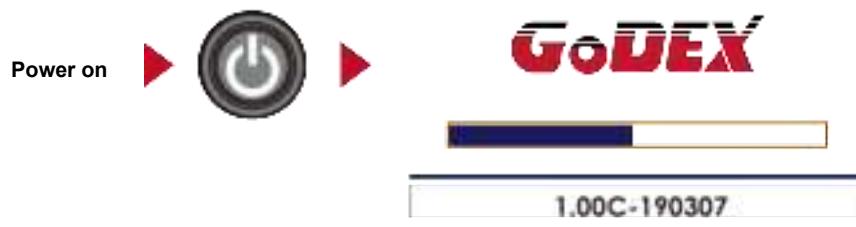

Example: While a 10-label print job is running, you press the FEED button. Two of the labels have been printed.

The print job is cancelled and the remaining eight labels will not be printed.

### 3-2 LCD interface introduction

#### Getting Started

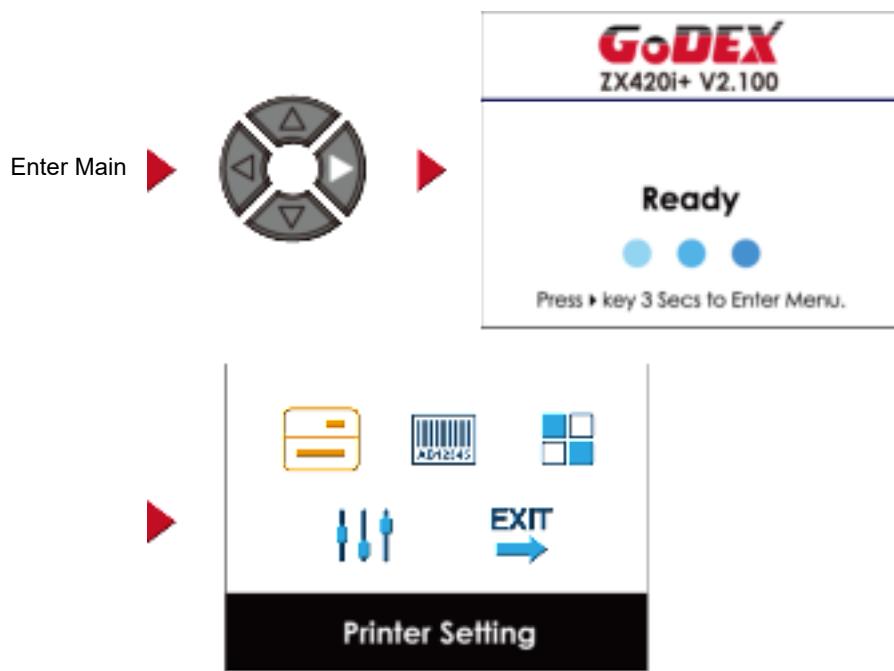

Press the POWER button to turn on the printer, and the START UP SCREEN appears.

If the printer is on "ready to print" status, the LCD screen should display the message "Ready" on the screen.

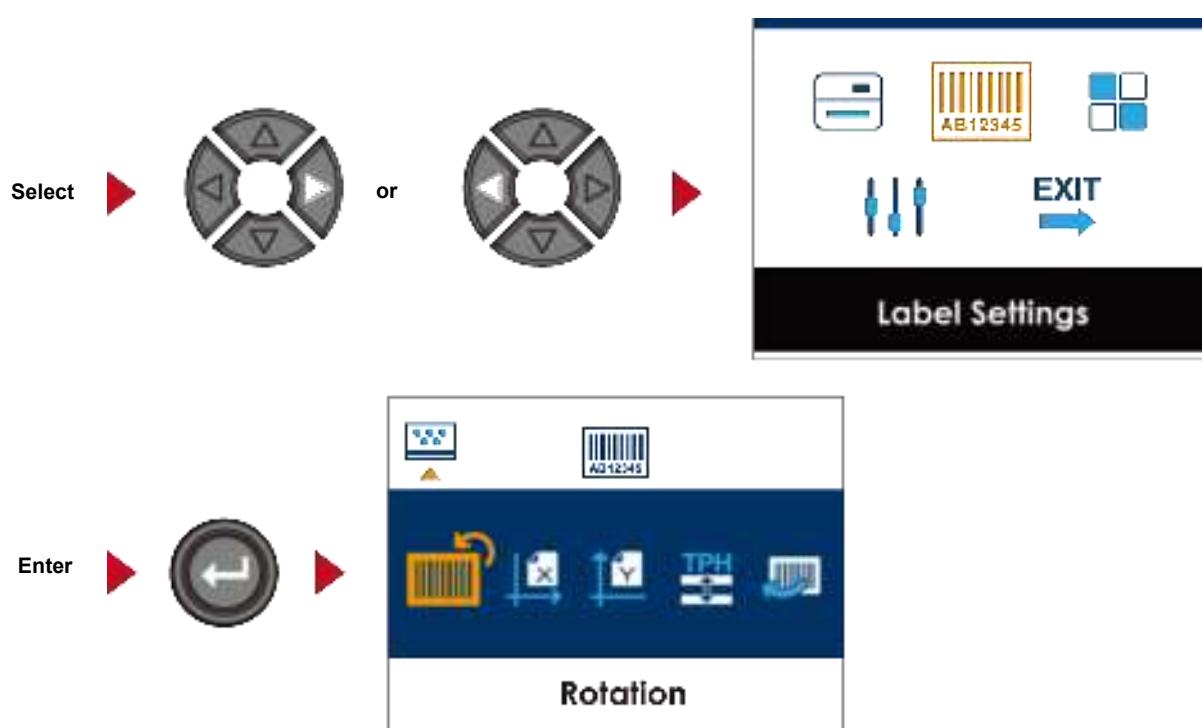

Please keep pressing ▶ button and wait for the timer to be filled, then the LCD interface will enter into the MAIN PAGE for SETTING MODE. You can make various setting functions in SETTING.

## Operations on Setting Page

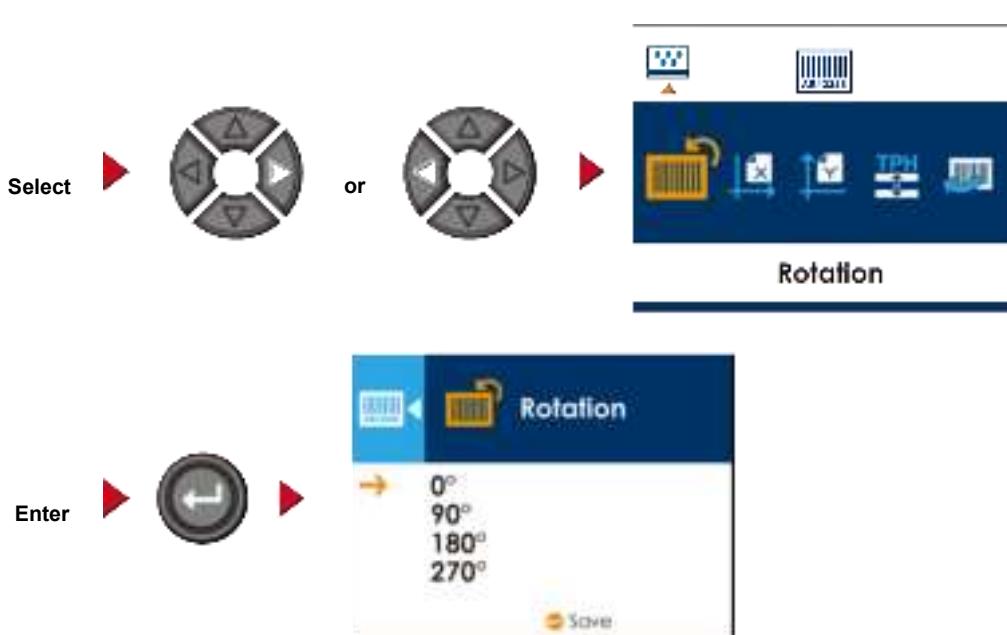

On MAIN PAGE press or button to move the cursor and select the functions.

Select a designated function and press FEED button, you will enter the SETTING PAGES for the function.

On SETTING PAGES, press or button to select the setting items.

Select a designated function and press FEED button, you will enter the SETTING VALUE PAGES for the function.

On SETTING VALUE PAGES, press or button to change the setting values.

Press button will apply the setting value you just selected, and the red tick will appear to mark the value.

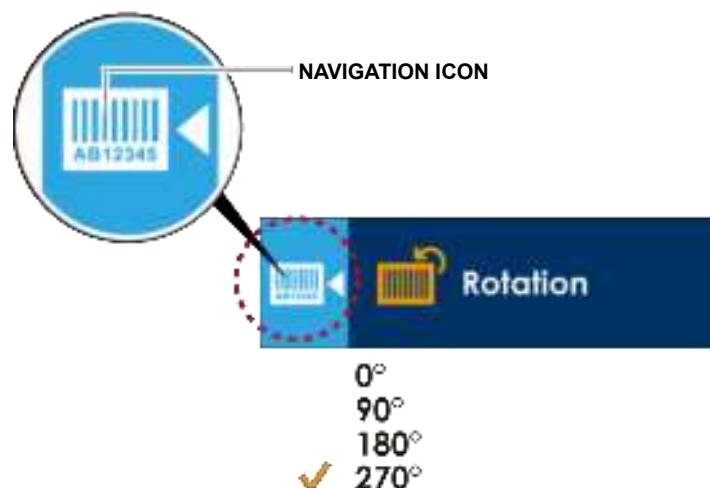

#### NOTE

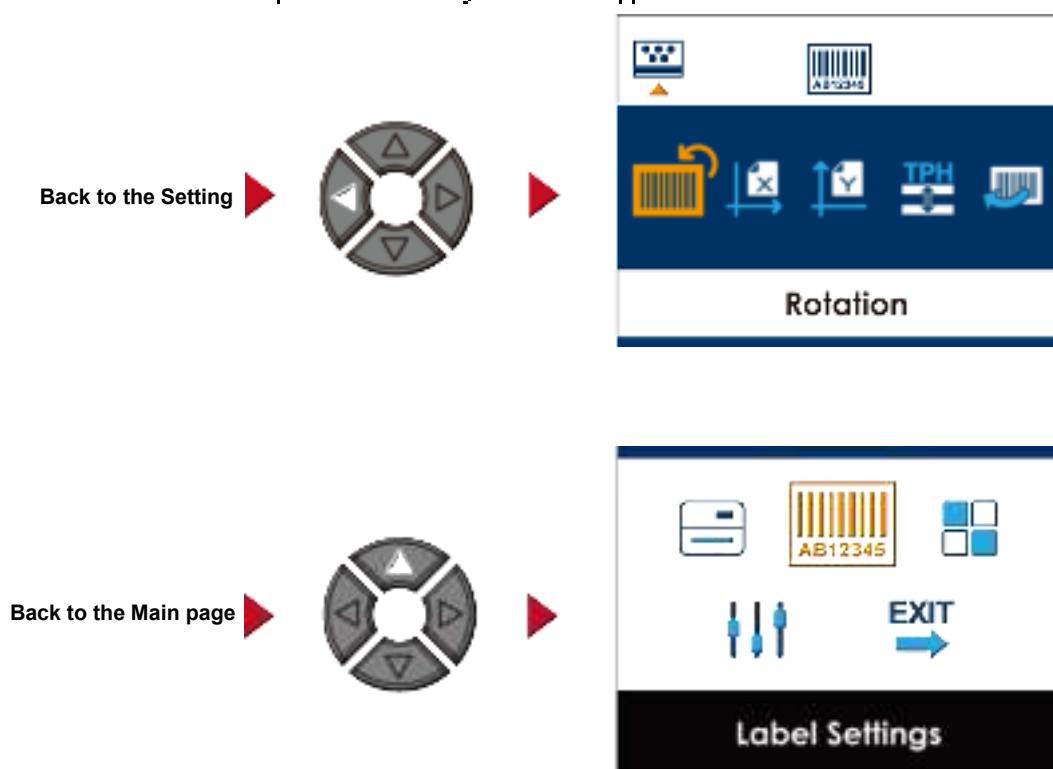

- The arrow indicates the value you are selected.
- The tick indicates that the selected value is applied now.

### Exit from Current Page to Ready Status

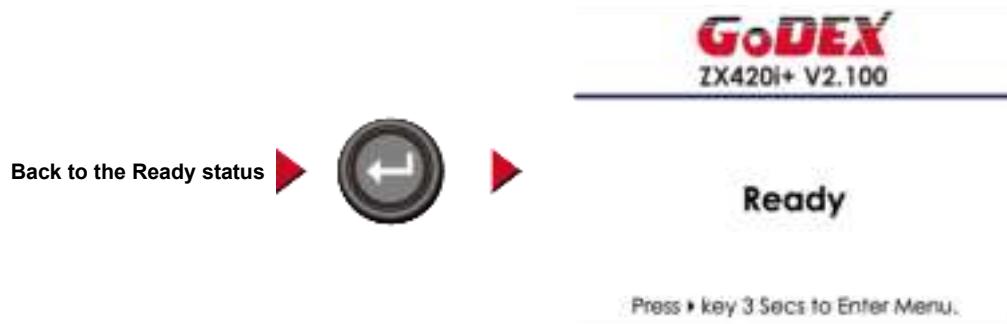

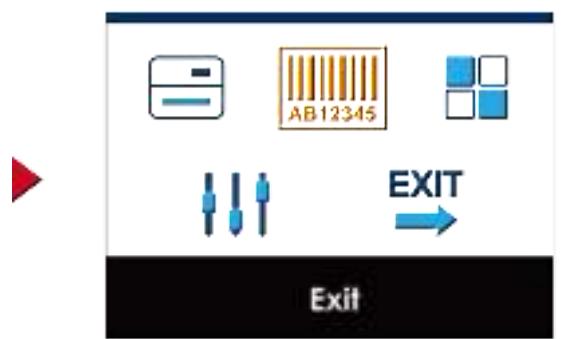

The icon on top-left corner displays the outline of upper level screen and also guides you back to upper level with left or up arrow.

On SETTING VALUE PAGES, press **button** will go back to the upper level screen.

On MAIN PAGE select the "EXIT" icon and press the FEED button to exit from SETTING MODE and the printer goes back to READY status.

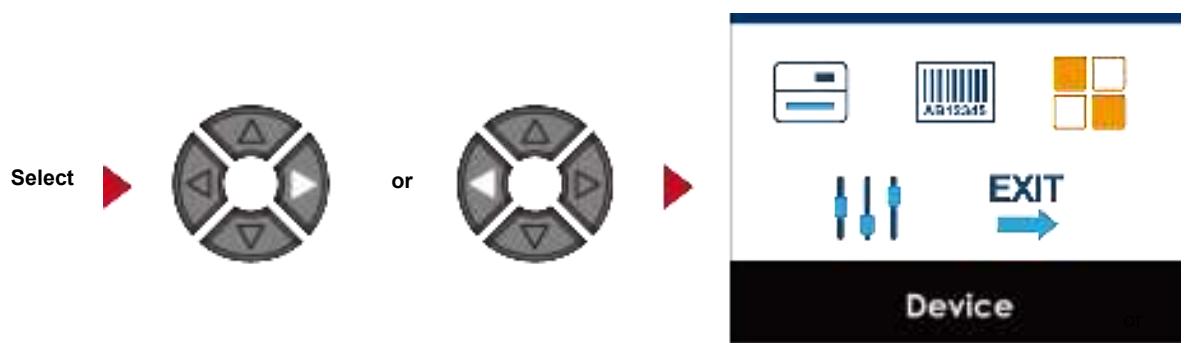

### 3-3 LAN setting

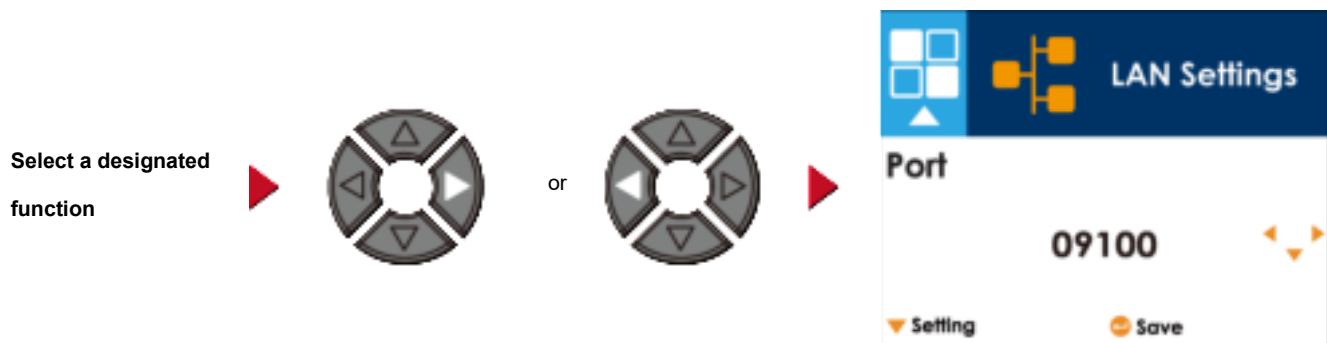

#### Operations on Setting Page

On MAIN PAGE press **◀** or **▶** button to move the cursor and select the functions.

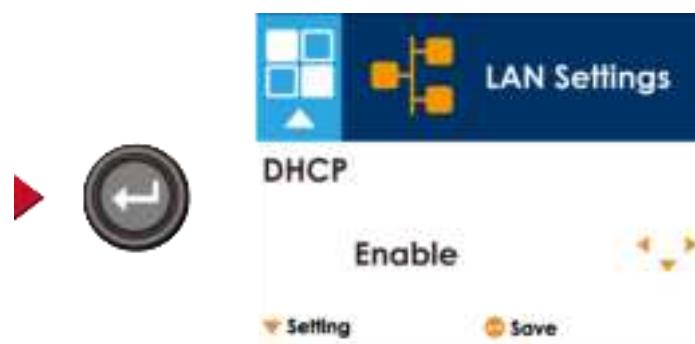

Select a designated function and press **F000** button, you will enter the **SETTING PAGES** for the function.

On LAN Setting PAGE, press **▶** or **◀** button to select the setting items.

Select DHCP and press **F000** button, you will be able to setup DHCP function.

The default of DHCP is Disable. Press ▲ or ▼ button to change the setting values.

Select ▲ to enable DHCP

Press FEED button twice to save the setting.

Press FEED once to exit

Press FEED again to  
save and return to  
previous

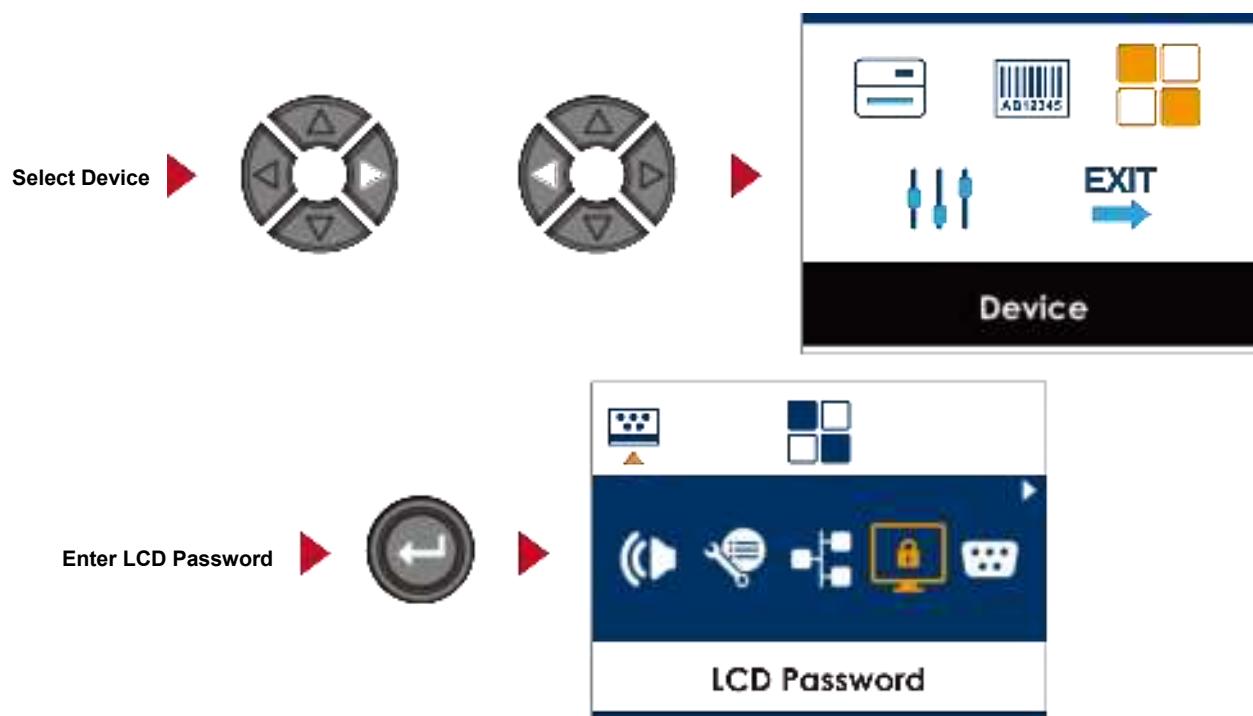

### 3-4 LCD password

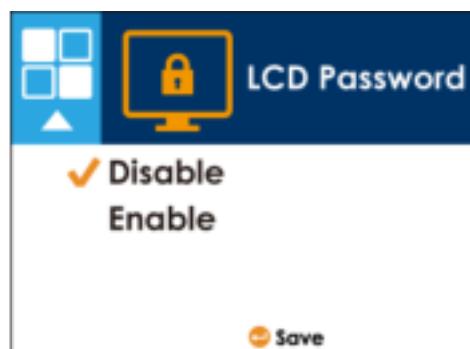

Operations on Setting Page

On MAIN PAGE press **<** or **>** button to move the cursor and select the functions.

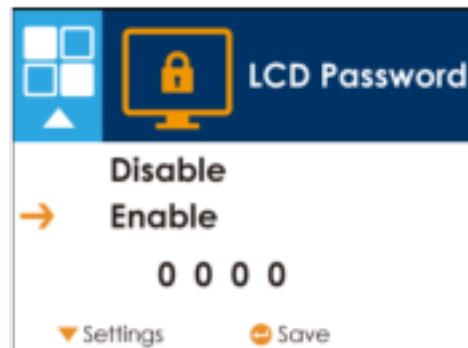

Select a designated function and press **FCIO** button, you will enter the **SETTING PAGE** for the function.

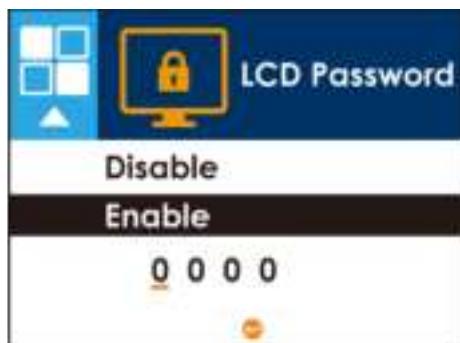

The default of LCD Setting is Disable. Press **▲** or **▼** button to change the setting values.

Select **▼** button to  
Enable Password

Select ▼ button again to setup  
the password

Press FEED button twice to save the setting

Press FEED button once to exit

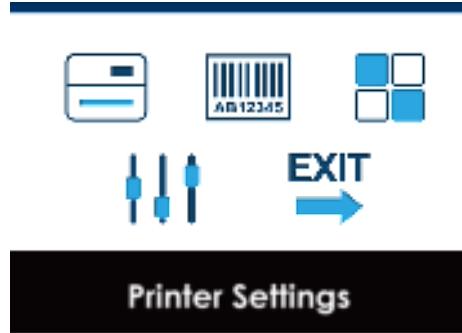

Press FEED button again to save and  
return to previous SETTING PAGE

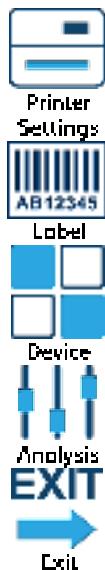

### 3-5 LCD interface function

#### Main Page

#### Printer Settings

Setting items for printer, ex. Printing speed, darkness.

Also includes a **Printing Wizard** for your ease of printing.

Setting items for printing label, ex. Rotation, Printing position offset.

Option modules and connection port settings.

Self-Diagnose functions for printer, ex. TPIII testing, self-test page printing.

Exit

## Status of LCD Interface

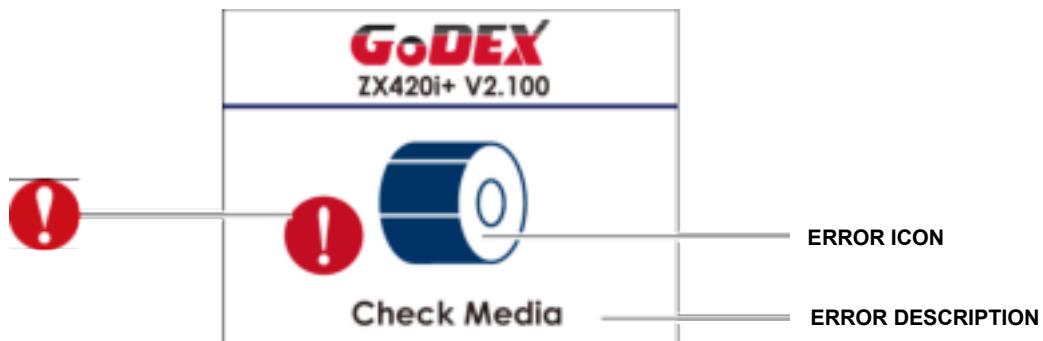

When printer is on standby status (ready to print), the LCD interface will display "Ready" on screen.

You can only print on this "Ready" status.

If there is any printers error, the LCD screen will display the error screen to show the type of error.

You can fix the error according the notice.

## Icon Definition

	To upper level	Appears on the NAVIGATION ICON of SettingPages. It guides you back to upper level by pressing "LEFT" key.
	To upper level	Appears on the NAVIGATION ICON of SettingValue Pages. It guides you back to upper level by pressing "UP" key.
	Lock	On Setting Value pages, press "RIGHT" key to lock the value for preventing unexpected change.
	Unlock	For locked value, press "RIGHT" key again to unlock the value.
	Scroll the value	On Setting Value pages, press "UP" or "DOWN" key to scroll the values for your selection.

### 3-6 Label size calibration and self test page

The printer can automatically detect and store label height.

That means the host computer does not need to transmit the label height to the printer.

And the self-test function lets you check whether the printer is functioning normally.

Here is how you run the label size calibration and self test.

**Step01** ➡ Check that the label stock is loaded correctly.

**Step02** ➡ Switch off the printer.

**Step03** ➡ Switch the printer on again, keeping the FEED button pressed. When the READY LED starts to flash red and the STATUS LED lights up orange, release the FEED button. The printer will now measure the label stock and store the label height.

**Step04** ➡ Once the printer has successfully measured the label stock, it will print a self-test label.

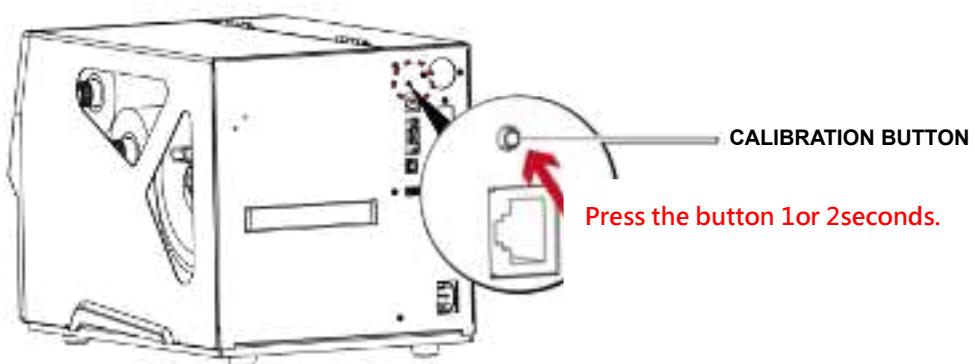

The contents of a self-test printout are listed below.

{The data below is for reference only. actual result may vary according to each situation.}

## Label Calibration Button

A hardware button to make a Label Calibration while printer encountering "Media Error" during the cases when first-time printer start up or change label or ribbon to another type, such as change using gap label to continuous or black mark labels.

Press the button 1or 2seconds.

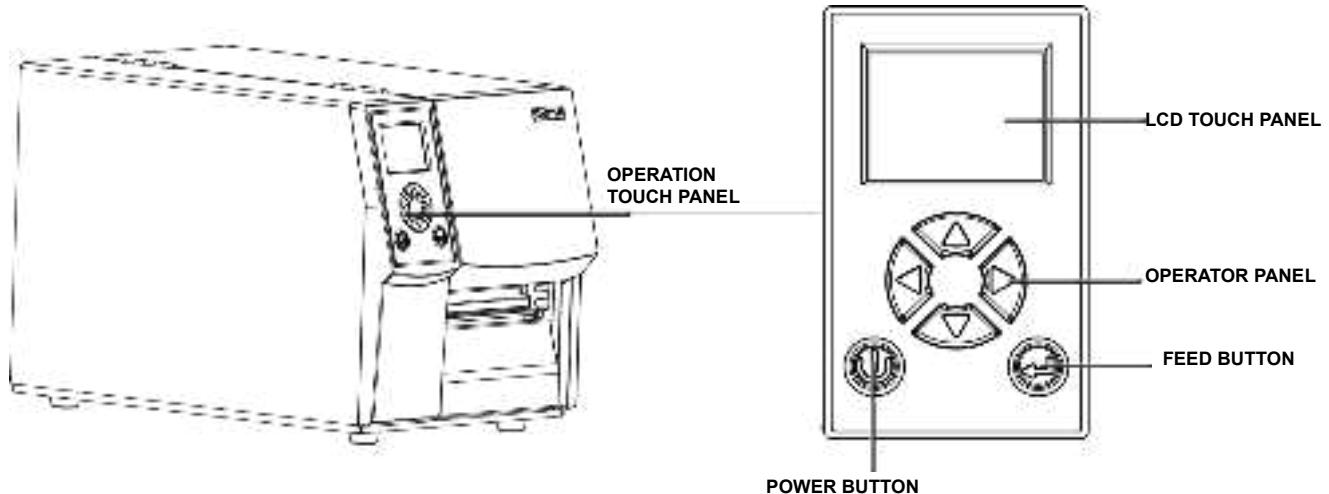

### NOTE

- Press C-button is equivalent to the auto-sensing command "-5SENSOR" that will cancel on-printing-job and make the Label Calibration immediately.

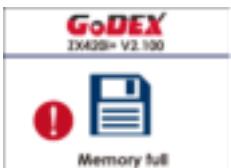

### 3-7 Error alerts

(For ZX400i/ZX400i Pro Series)

In the event of a problem that prevents normal functioning of the printer, you will see an error message on LCD indicators and hear some beep signals. Please refer to below table for the error alerts.

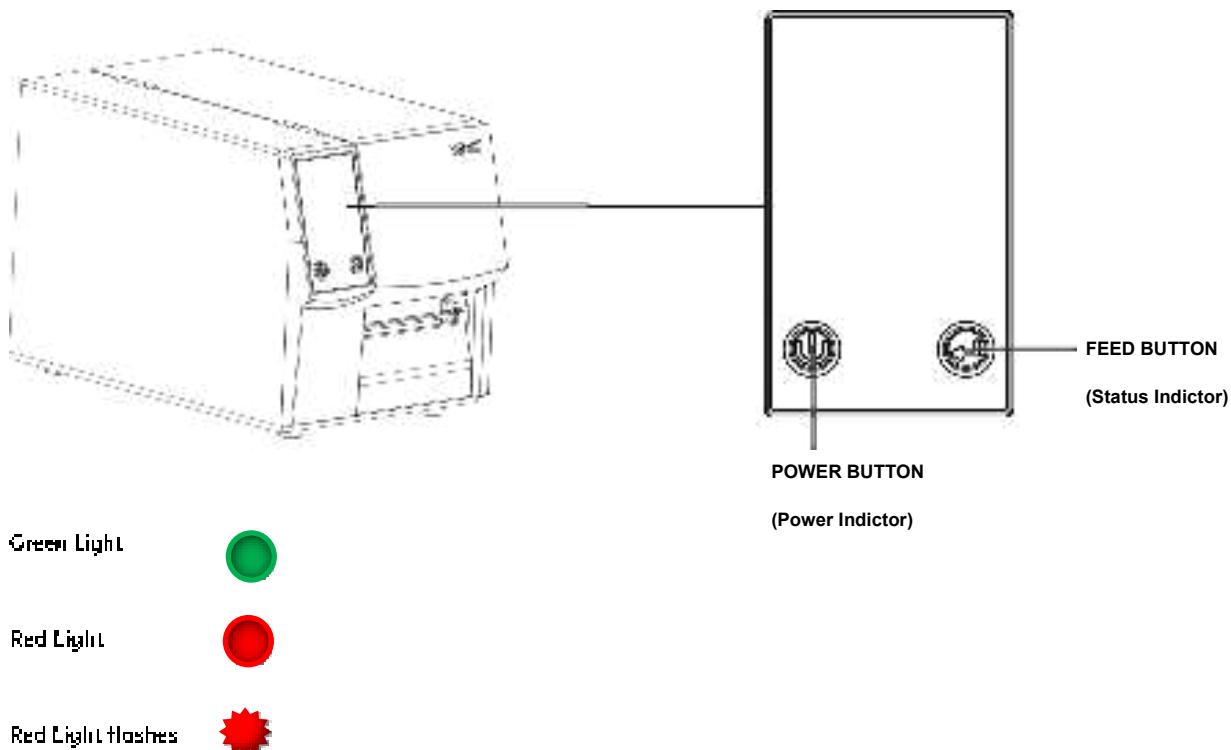

Operation Panel		Type	Beeps	Description	Solution
Status					
	Print Head Error	2 x 4 beeps	The printing mechanism is not correctly closed.	Open the print mechanism and close it again.	
	Print Head Error	None	High temperature of the print head.	Once the print head has cooled down, the printer switches to standby mode.	
	Media Error	2 x 3 beeps	No ribbon is installed and the printer displays an error.	Make sure that the printer is set to direct thermal printing mode.	
			The ribbon is finished or the label supply hub is not moving.	Replace the ribbon roll.	
	Media Error	2 x 2 beeps	No paper is detected.	Make sure that the label sensor is positioned correctly. If the sensor still does not detect the paper, run the auto-detection function again.	

			Paper is finished.	Replace the label roll.
			Printer feed problem.	Possible reasons: the print medium has become trapped around the rubber roll; the sensor cannot detect a gap or black mark between the labels; there is no paper. Please reset the sensor.
			The memory is full. The printer prints the message "File System full".	Delete unnecessary data or install additional memory.
	File Error	2 x 2 beeps	Unable to find file. The printer prints the message "File Name not found".	Use the ">X4" command to print all files. Then check whether the files exist and whether the names are correct.
			A file of the same name already exists. The printer prints the message "Duplicate Name".	Change the name of the file and try saving it again.

(For ZX400 / ZX400 Pro Series)

In the event of a problem that prevents normal functioning of the printer, you will see an error message on LCD indicators and hear some beep signals. Please refer to below table for the error alerts.

Types	LCD above the display		Beeps	Description	Solution
	Power Indicator	Status Indicator			
Print head is open			4x2 beeps	The print mechanism is not closed.	Please make sure that the print mechanism is closed correctly.
Print head is overheat				The print head is too hot.	Once the print head has cooled down, the printer switches to standby mode.
check ribbon			3x2 beeps	No ribbon is loaded.	Please make sure that the printer is set to thermal direct mode.
				The ribbon is finished or the ribbon roll is not moving.	Replace the ribbon roll.

check media			1x2 beeps	Unable to detect the paper.	Please make sure that the gap sensor is positioned correctly. If that does not fix the problem, run the auto- detection function again.
				The labels are finished.	Replace the label roll.
				Paper jam.	Check the path of paper feeding.

### 3-8 USB host

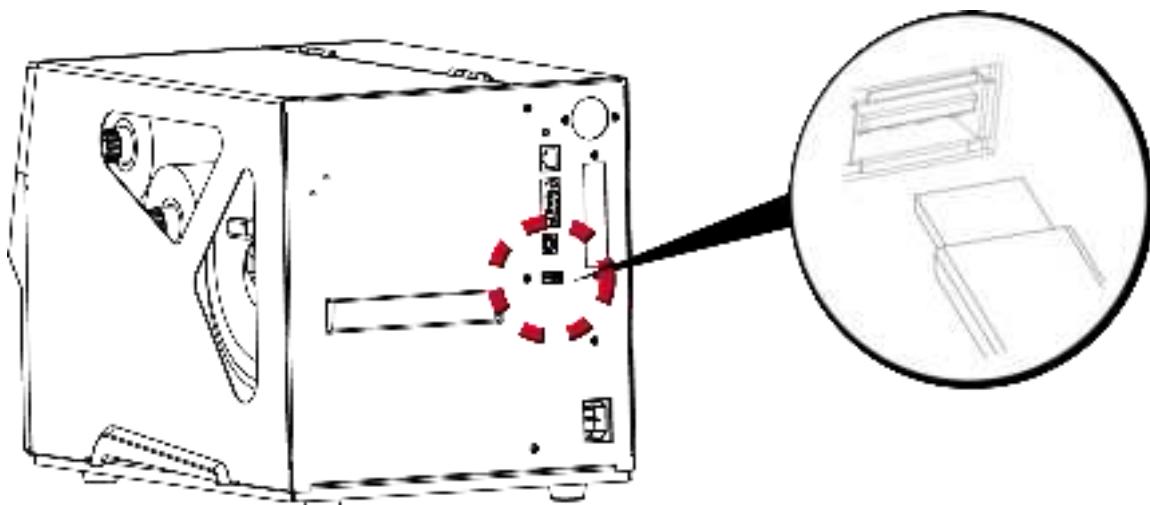

Definition : USB Host port supports either device : USB memory stick, keyboard or scanner.

#### Purpose:

- **USB memory stick :** It extends the user memory space up to 32GB for Graphic, Font, Label FormaL DDF and Command files downloading. The printer's Firmware also can be updating it copy new version of Firmware into USB memory stick.
- Connecting an USB keyboard to printer for "Keyboard Mode" mode operation.
- Plug-in an USB scanner to operate the printer in "Keyboard Mode".

#### Usage of Extended Memory

- **USB memory stick :** It supports hot-plugging function; printer will create a folder "\LABELDIR" and switch "User Flash" to "Extended Memory" automatically while user plugs an USB memory stick into a GoDEX printer.
- Connect the USB Stick plugged-in printer to PC via USB Device or Ethernet port and run "GoLabel" software to download Graphic, Font, Label FormaL DDF and Command files to the printer.
- Detail download procedures, please refer to "GoLabel Online Help".

#### Usage of Firmware Update

- Remove USB memory stick from printer and plug-in it to a PC's USB port; delete Firmware ".bin" file from "\LABELDIR\FW" of USB memory stick if it existing; or create a folder "\LABELDIR\FW" to USB memory stick if it doesn't existing.
- Copy a new version of Firmware ".xxxxxxxx" to the Folder "\LABELDIR\FW"; and then remove USB and plug-in back to the printer that going to update Firmware.
- The printer will update the Firmware automatically when plug-it-into the printer and printer find out the Firmware in "\LABELDIR\FW" is newer version.
- Don't remove the USB memory stick out while it's under updating with "Flash Writing..." message that displays on LCD panel.

## USB keyboard

When plug-in an USB keyboard to the printer, LCD touch panel will display "Enter Standalone", press the "Y" key on keyboard to entering to the dialog for "Keyboard Mode" operation.

Here have six sub-dialogs "Recall Label", "Country Code", "Code Page", "Clock Setting", "Database Setting", "Label Edit". It is able operating by keyboard as follow definitions:

1. Press "ESC" key to exist from "Keyboard Mode" or back to previous dialog
2. Press "T1", it will let the printer from "Home Page" mode entering into "Keyboard Mode"
3. Press "Enter", "Arrow" and "Alphabetic" keys as the usual in PC that will perform the key-in function of "Keyboard Mode".

## Scanner

When plug-in an USB scanner to the printer, LCD touch panel will display "Enter Standalone", tap the "Y" to entering the dialog of "Keyboard Mode" operation.

Scanner is using in "Keyboard Mode" to scanning the "Serial Number, Variable" and Print Quantity while the printer prompts a message on LCD touch panel and wait for data input.

- 
- The USB Host port on GoLabel printer supports "FAT16" function.
  - The USB Memory Stick supports with "FAT32" Disk Format and up to 32GB only. The available vendors are Transcend, Apacer, Patriot, Corsair and Kingston.
  - The download function for Graphic, Font, Label Format, CBB and Command File is operated by GoLabel of PC and must go through the "PC to PC" mode printer itself.
  - On a PC, user may copy entire folder "LABEL-R" from USB memory, stuck to PC or vice versa. Copy a sub folder or individual file in "LABEL-R" to PC or vice versa is not supported.

## 4 NetSetting for Ethernet

### 4-1 Installing the NetSetting software

The NetSetting software is used to manage the network configurations when connecting the printer via Ethernet port.

NetSetting can be downloaded from Codex official website. To install the NetSetting, please follow below steps.

**Step01** ➡ After entering the installation screen as shown in the figure below, click "Next".

**Step02** ➡ Specify the 'Installation Folder', then click "Next" to installing.

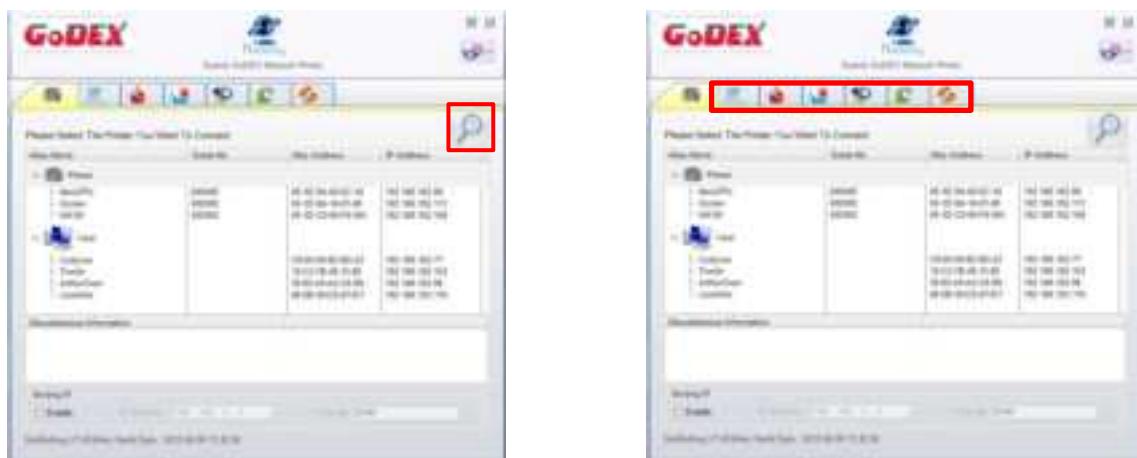

**Step03** → Once the installation is completed, you will see the NetSetting icon on your desktop as right diagram.

## 4-2 The interface of NetSetting

GoDEX printer can also be used through a network connection (as a remote network printer). make sure the printer connected to the Internet and the power cord, you can use the Interface of NetSetting to search connected network printers.

**Step01** → Click the NetSetting icon to start the program, you will see the start page as left diagram. Click the magnifier icon to search the GoDEX printers which are connected via Ethernet port in your network environment (as right diagram).

**Step02** → There are six tabs on the top of interface which can configure different types of network settings. But for the data security reason, you need correct password to enter the configuration pages.

### NOTE

\*The default password is "1111", you can change the password later from the "IP Setting" tab.

## IP Setting

The IP Setting Tab can change the printer name, Port number, Gateway setting and the password for configuring the printer. You can also set the printer's IP address either by DHCP or by Static IP.

You can press "Set" button to apply the settings and "ReGet" button to refresh the setting values.

### NOTE

- ^ To fully benefit from the NetSetting software, you should be familiar with basic networking principles. Please contact your network administrator for related network setting information.
- ^ When enabling DHCP, if you find the IP Address as: IP = 169.254.229.88, Net mask = 255.255.0.0, Gateway = invariable (inst. value), the IP Address is invalid.

## Alert Path Setting

NetSetting will send the alert messages to designated mail account when the error happened on printer.

The alert messages are sent by SMTP (Simple Mail Transfer Protocol) or SNMP (Simple Network Management Protocol).

You can set or change the configurations of SMTP and SNMP on this "Alert Path Setting" tab.

You can press "Set" button to apply the settings and "ReGet" button to refresh the setting values.

## Alert Message Setting

For the alert message notification function, you can decide which error cases need to be sent out to the operator. Moreover, the alert messages can be set to be sent by SMTP, SNMP or both.

You can press "Set" button to apply the settings and "ReGet" button to refresh the setting values.

## Printer Configuration

Set or change the configurations of connected printer. Most of key settings for the printer operation can be done by this setting page.

You can press "Set" button to apply the settings and "ReGet" button to refresh the setting values.

## User Command

The "User Command" tab provides a communication interface for operator to control the printer. Input printer commands in "Input Command" window and press "Send Command" button, the commands will be sent to the printer.

For some commands that will return response message, the message will be displayed in "Output Message" window.

You can press "Set" button to apply the settings and "ReGet" button to refresh the setting values.

## Firmware Download

On "Firmware Download" tab, the current version of printer firmware will be showed on the screen. If you need to update the printer firmware, just specify the file location of firmware file and press "Start Download Firmware" button. The printer firmware then can be updated remotely.

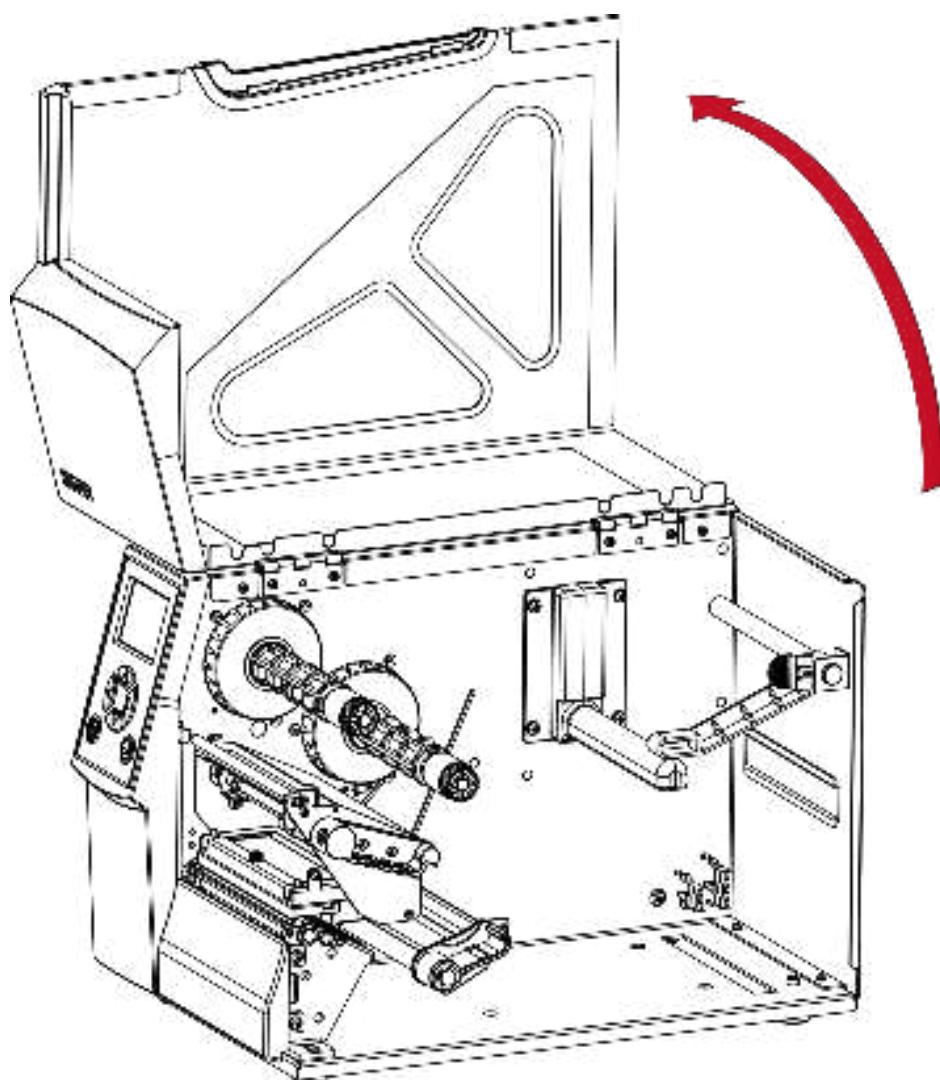

In addition to the firmware update, you can press "Recover To Factory Settings" button to restore the printer configurations back to factory default.

## 5 Accessories

### 5-1 Preparation steps

Before installing the optional modules, please make some preparations as follows.

1. Turn off the printer:  
Remember to switch off the printer before installing any module.
2. Open the printer cover

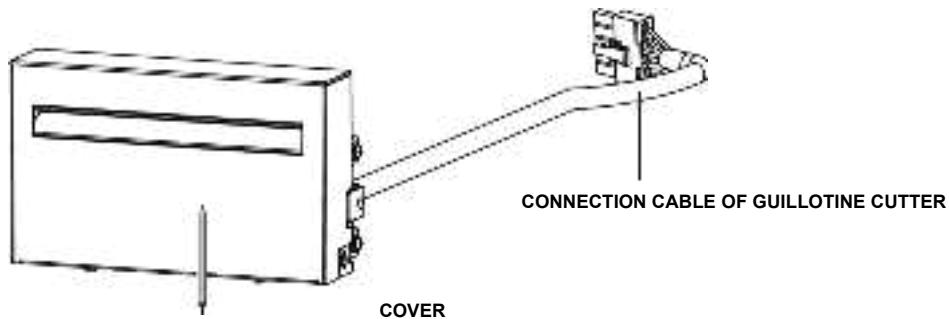

#### NOTE

- Remember to switch off the printer before installing the cutter.
- Do not use to cut adhesive labels! Glue residue will be left on the cutter blade and impair its functioning.

## 5-2 Installing the Cutter

### 5-2-1 Installing the guillotine cutter

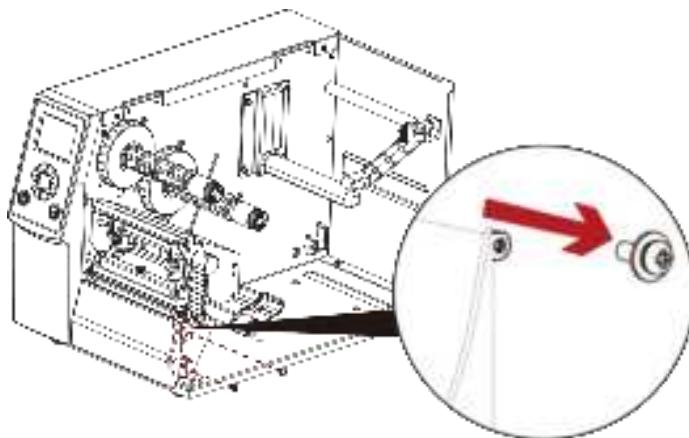

#### Overview Of Guillotine Cutter

---

#### Steps for installing the Guillotine Cutter:

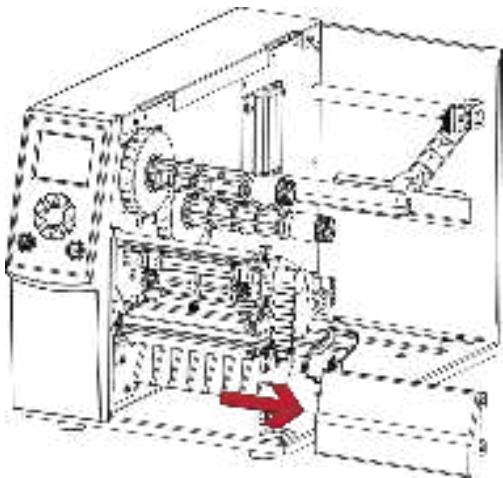

{Power off the printer and remove the power cable before installing the guillotine cutter module}

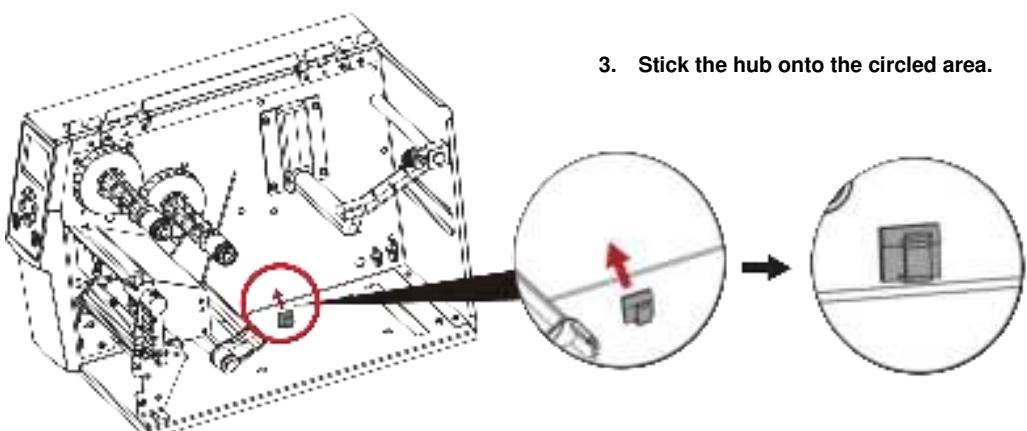

1. Remove the screw (as circle indicated).

#### NOTE

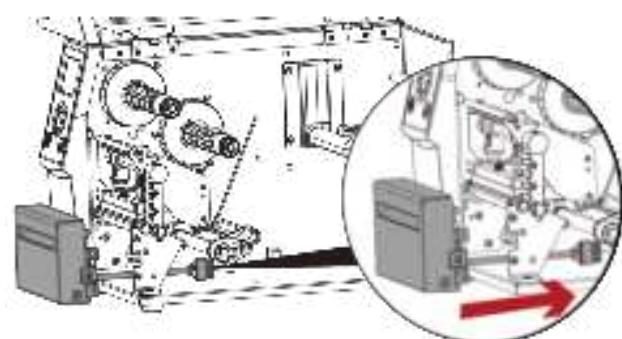

- Power off the printer and remove the cable from the connector before installing guillotine cutter module.
- Labels with adhesive glue are not applicable or otherwise could result to malfunction.
- Applicable label size is at maximum width of 118mm and minimum length of 30mm. (Usage with labels outside this range will be excluded from warranty terms)
- Stop position (^Ex command) should set to 26-27 through GoLabel before using the guillotine cutter.

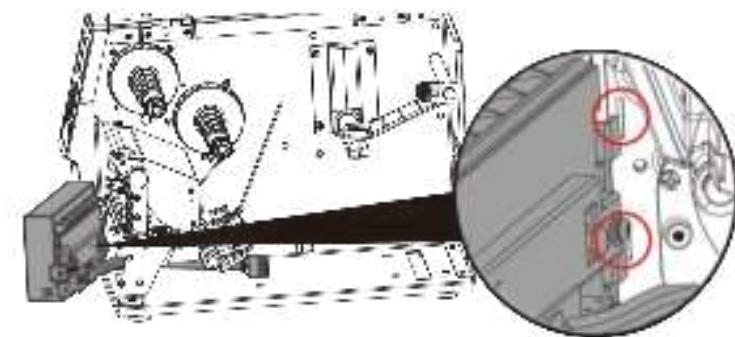

2. Remove the cover panel by pushing to right-hand side.

3. Stick the hub onto the circled area.

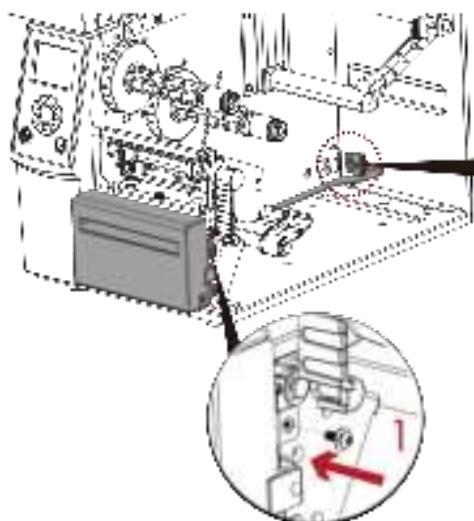

4. Direct the cutter's cable through the platen bracket of the printer.

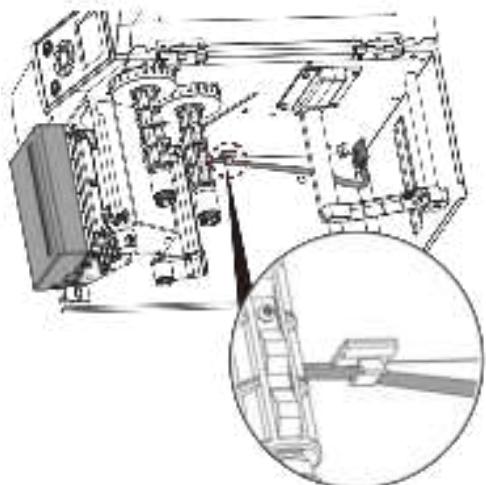

5. Engage the catches of the cutter module firmly into the printer.

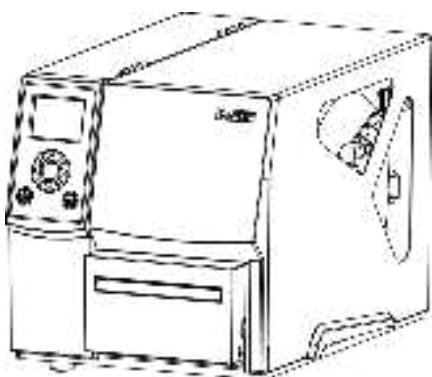

6. Tighten the screws and plug the cutter's cable into the printer in the direction of the arrow.

7. Put the cable into the hub.

8. Close printer cover.

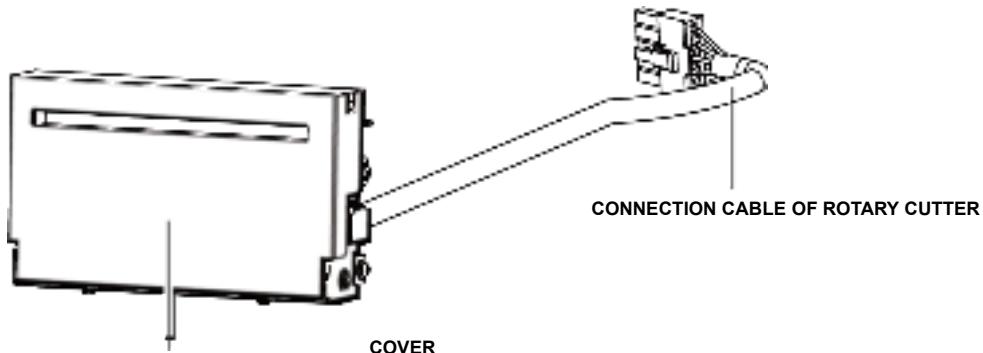

#### NOTE

\* Printer power should be off when plugging the connector to avoid misfunction

## 5-2-2 Installing the rotary cutter

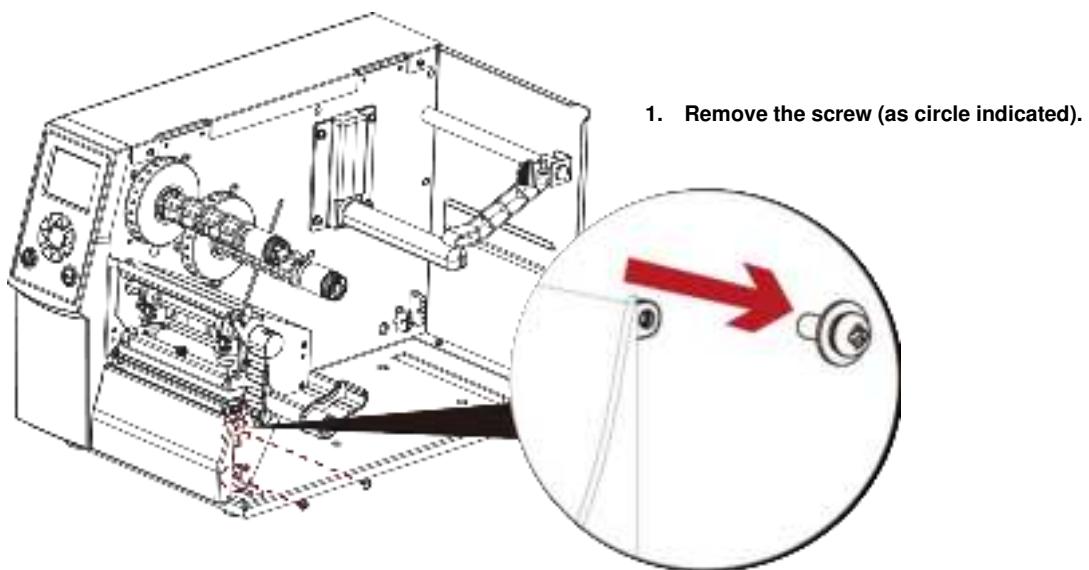

### Overview Of Rotary Cutter

---

#### Steps for installing the Rotary Cutter:

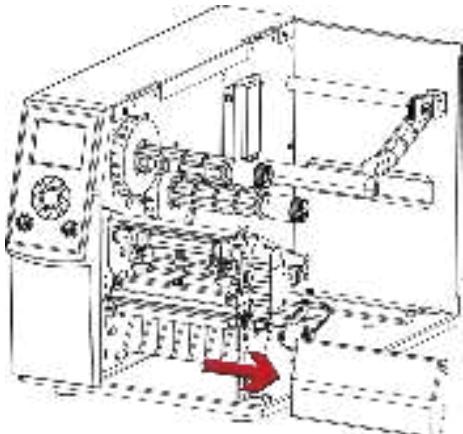

(Power off the printer and remove the power cable before installing the guillotine cutter module)

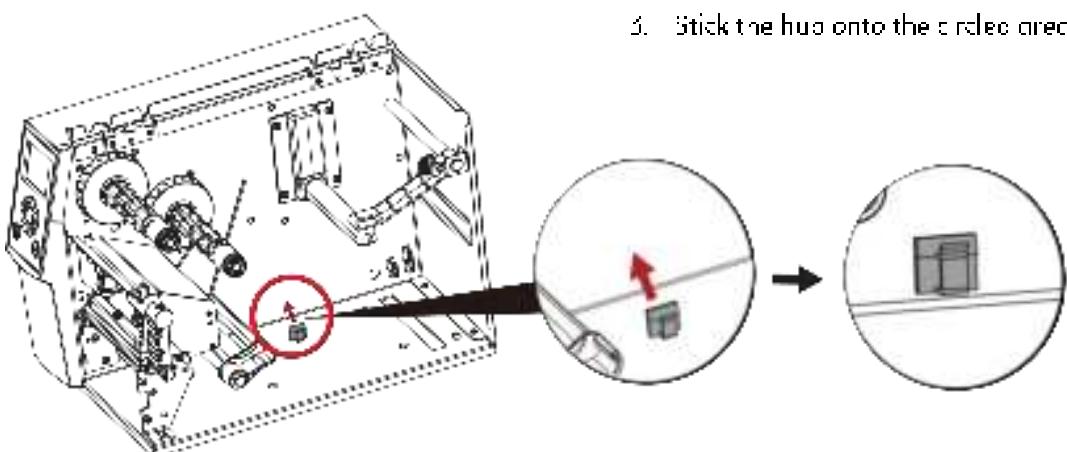

---

#### NOTE

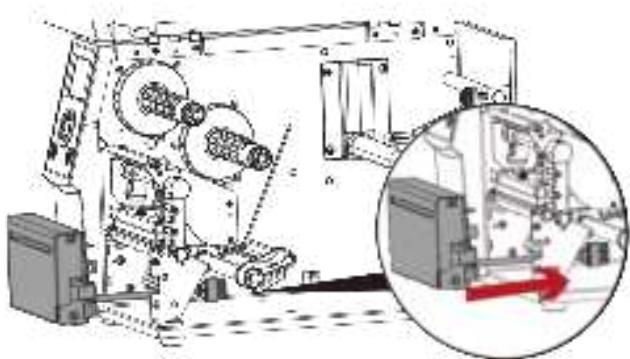

- Power off the printer and remove the cable from the connector before installing rotary cutter module.
- Labels with adhesives or glue are not applicable or otherwise could result to malfunction.
- Applicable label size is at maximum width of 15mm and minimum length of 30mm. (Usage with labels outside this range will be excluded from warranty terms.)
- Stop position (\*Ex command) should set to 29-30 before using the rotary cutter.

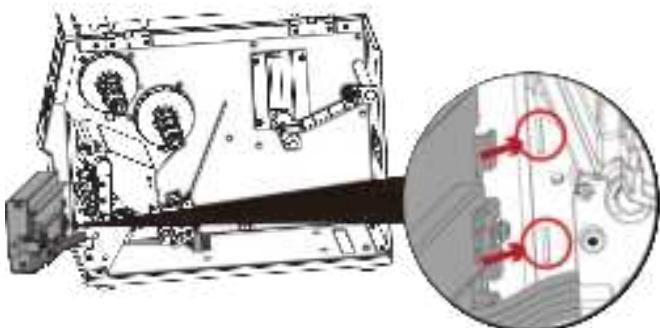

2. Remove the cover panel by pushing to right-hand side.

3. Stick the hub onto the circle area.

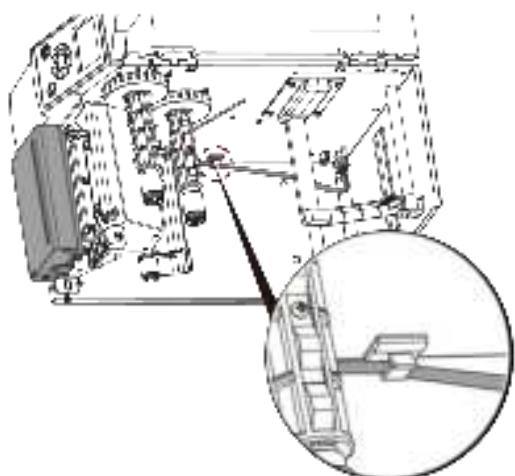

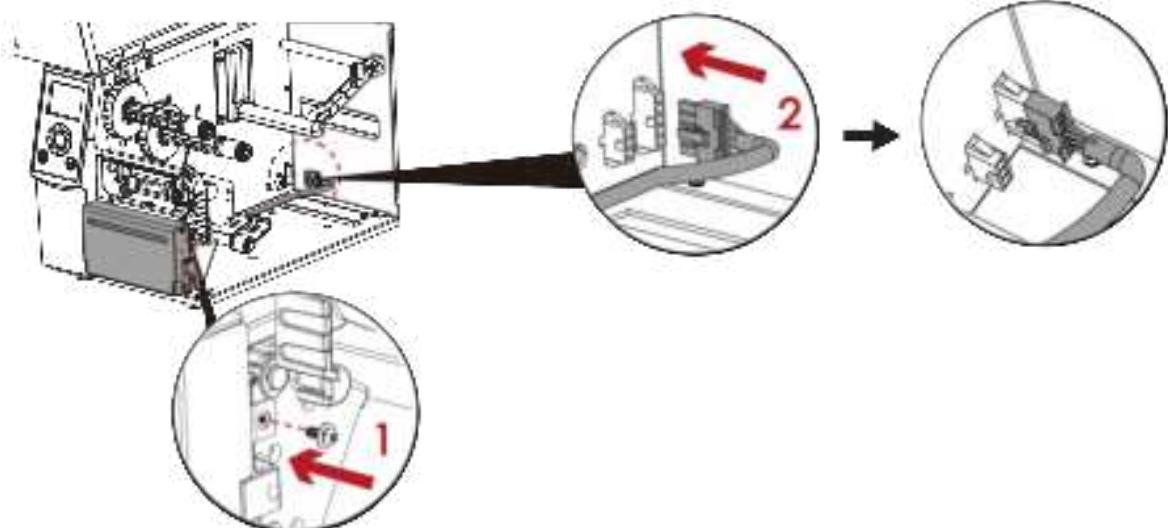

4. Direct the cutter's cable through the printen bracket of the printer.

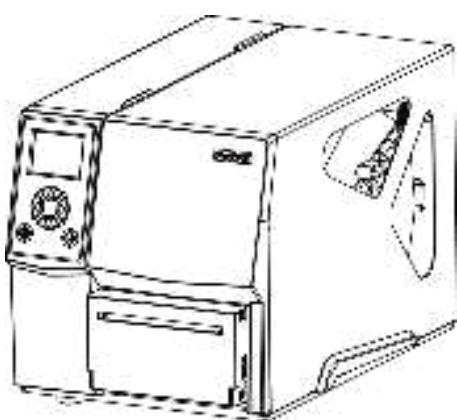

5. Engage the catches of the cutter module firmly into the printer.

6. Plug the cutter's cable into the printer in the direction of the arrow.

7. Put the cable into the hub.

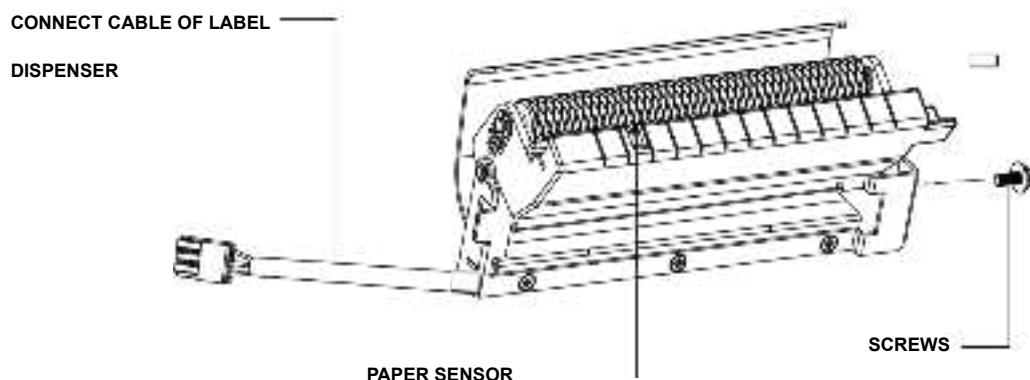

8. Close printer cover.

#### NOTE

Printer power should be off when plugging the connector to avoid incision

## 5-3 Installing the label dispenser

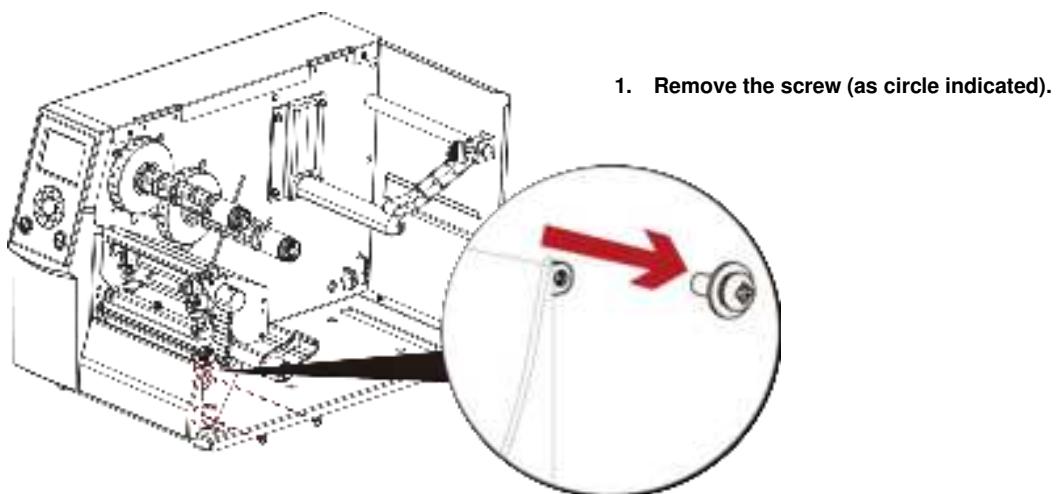

### The Overview of the Label Dispenser

---

### Steps for installing the Label Dispenser

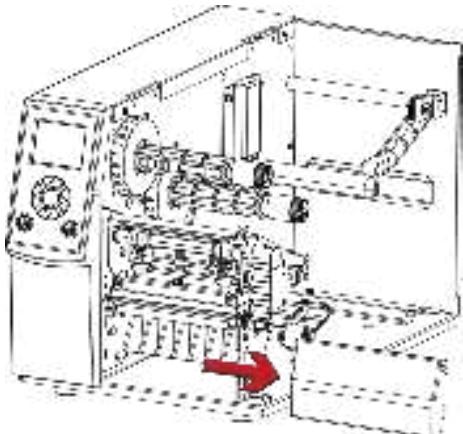

(Power off the printer and remove the power cable before installing the label dispenser module)

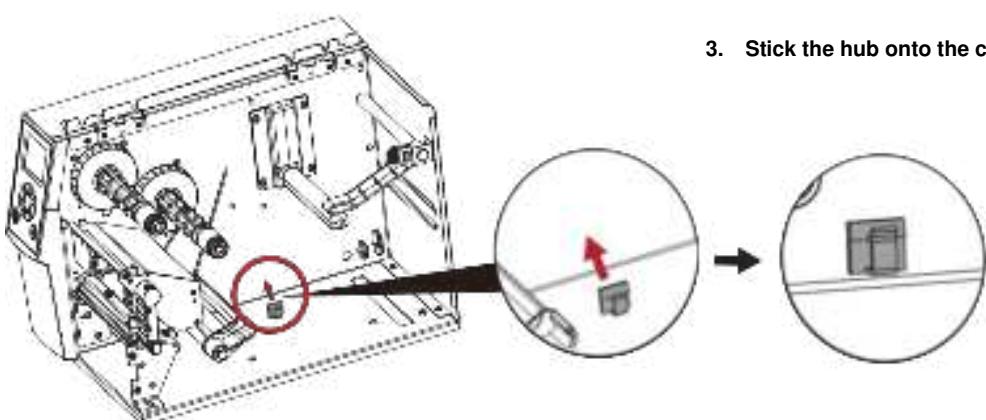

---

### NOTE

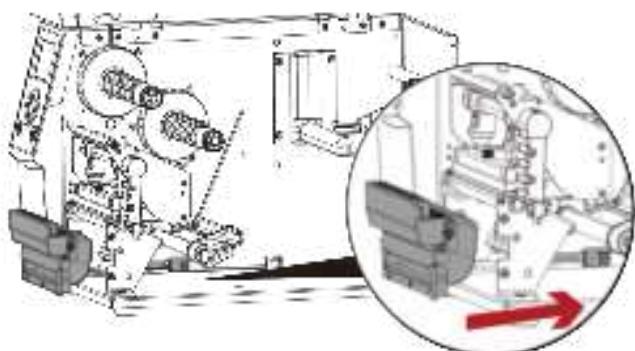

- A label liner thickness of 0.005 mm ± 10% and a weight of 55 g/m<sup>2</sup> ± 5% are recommended.
- The label dispenser will take labels up to a max. width of 110 mm, and labels should be at least 25 mm high.
- When using the label dispenser, set the value for Unit to 9 mm.

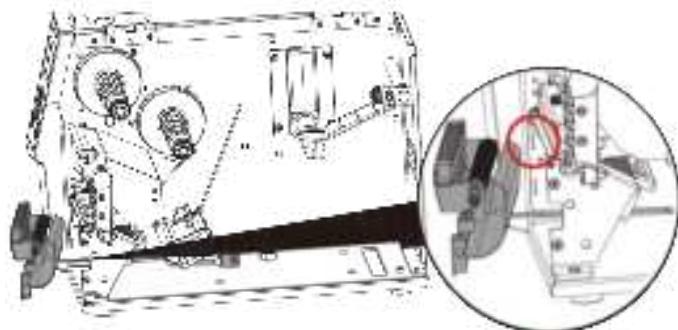

2. Remove the cover panel by pushing to right-hand side.

3. Stick the hub onto the circled area.

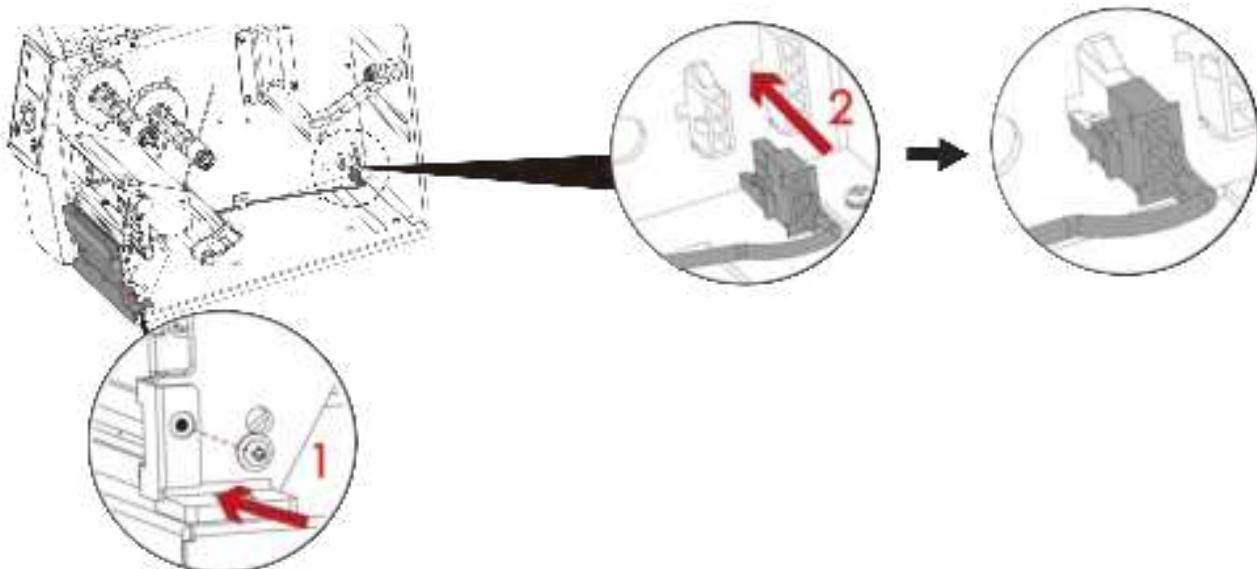

4. Direct the label dispenser's cable through the platen bracket of the printer.

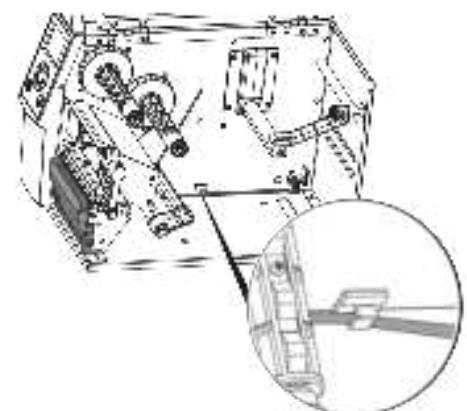

5. Engage the catches of the label dispenser module firmly into the printer.

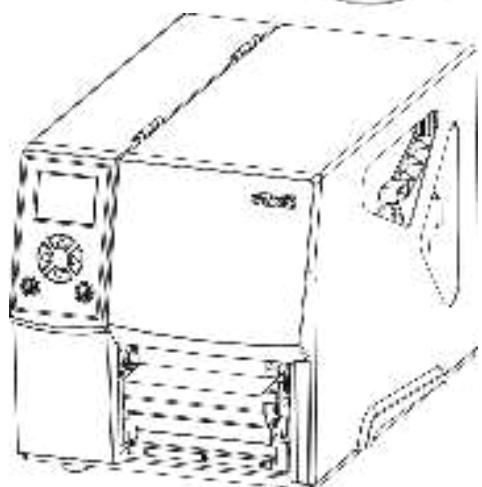

6. Plug the label dispenser's cable into the printer in the direction of the arrow.

7. Put the cable into the hub.

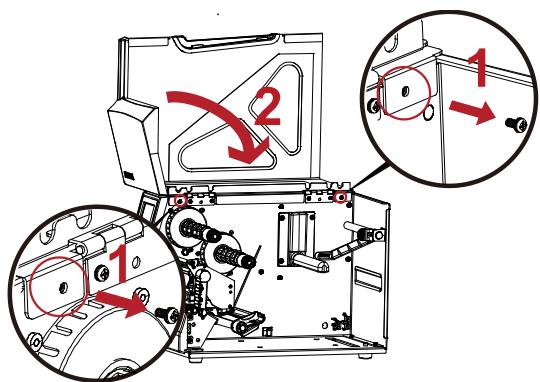

8. Close printer cover.

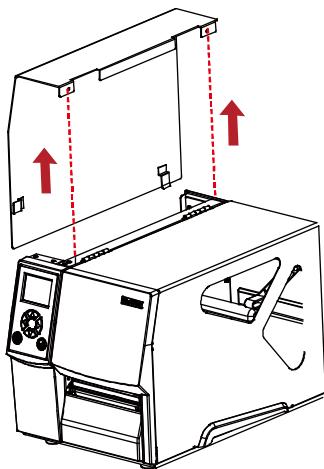

**NOTE**

- Printer power should be off when plugging the connector to avoid malfunction.

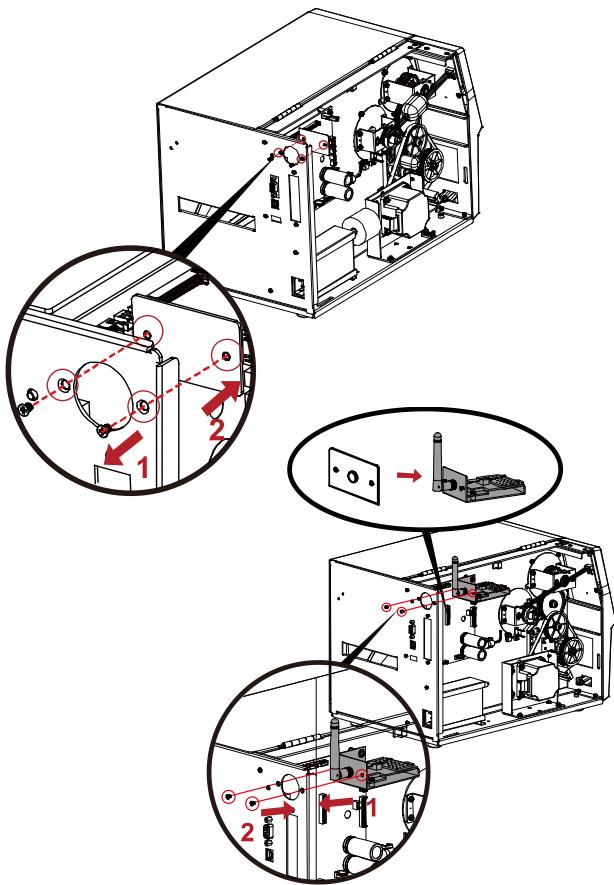

#### 5-4 Installing the WiFi module

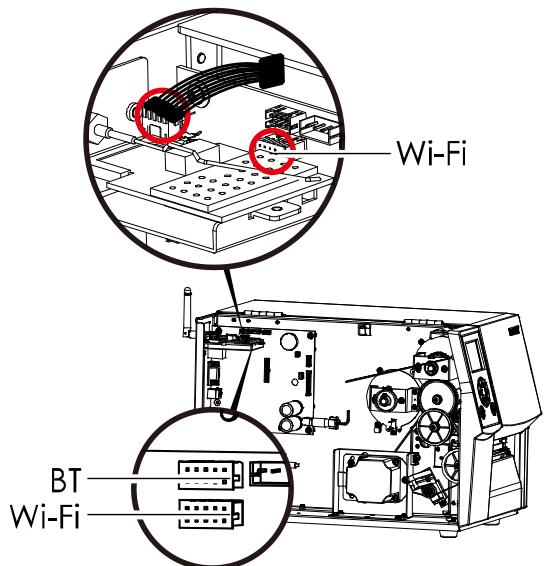

Step1. Remove the screw on the left side cover.

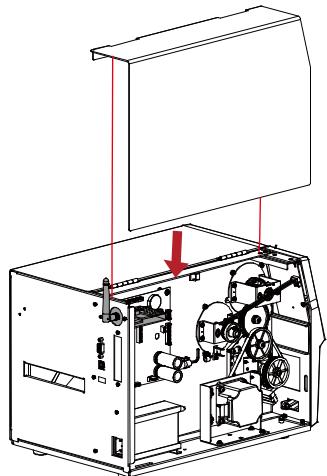

Step2. Disassemble the left side cover.

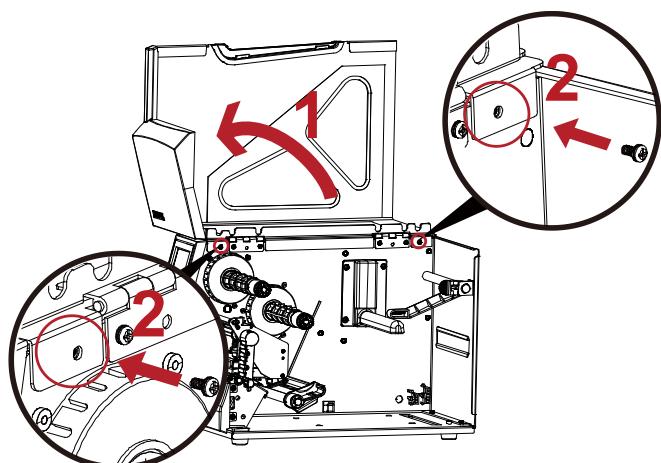

Step3. Install the WiFi Module.

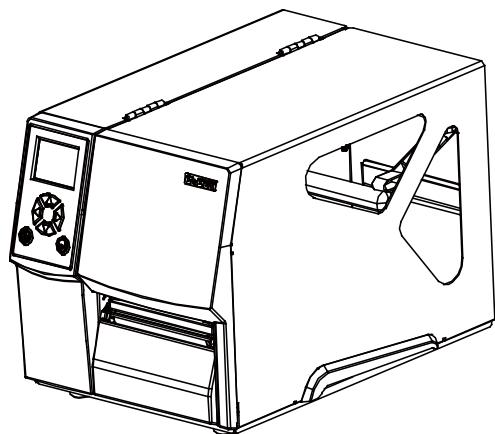

Step4.Connect the cable.

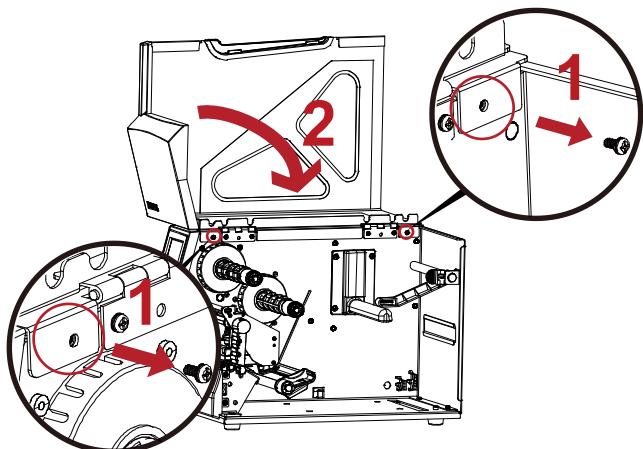

Step5.Install the left side cover.

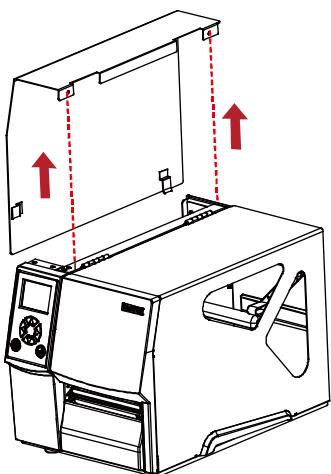

Step6. Lock the left cover screws.

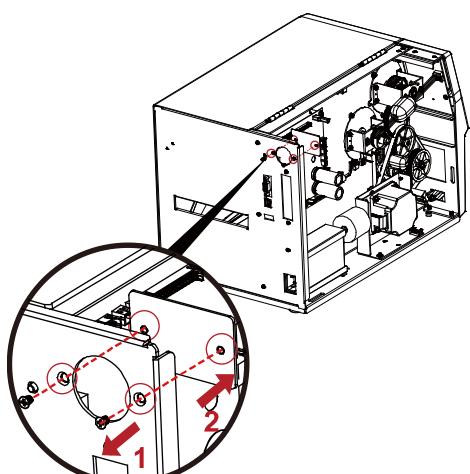

## 5-5 Installing the bluetooth module

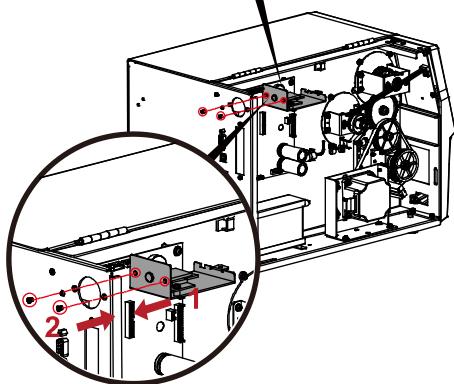

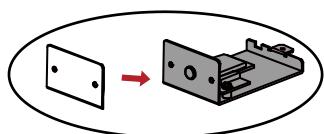

Step1. Remove the screw on  
the left side cover.

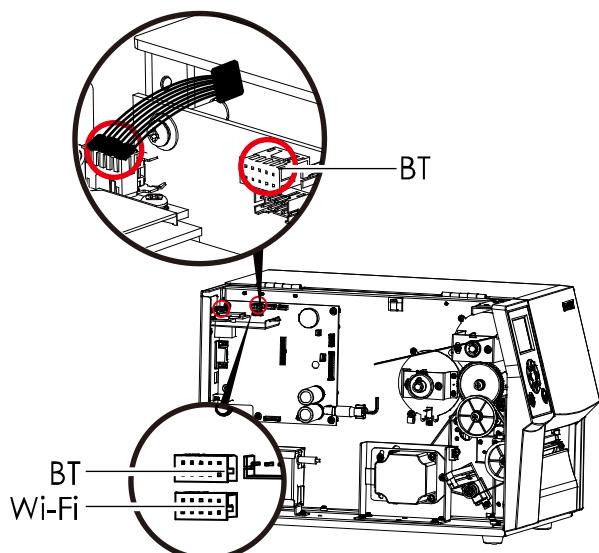

Step2. Disassemble the left  
side cover.

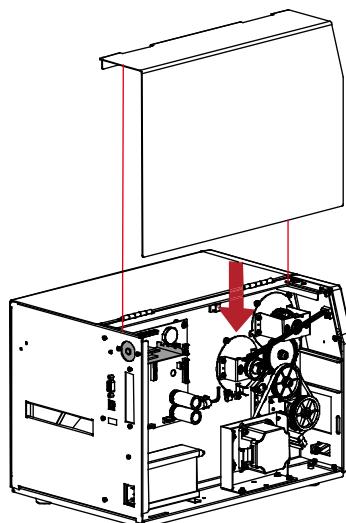

Step3. Install the Bluetooth  
Module.

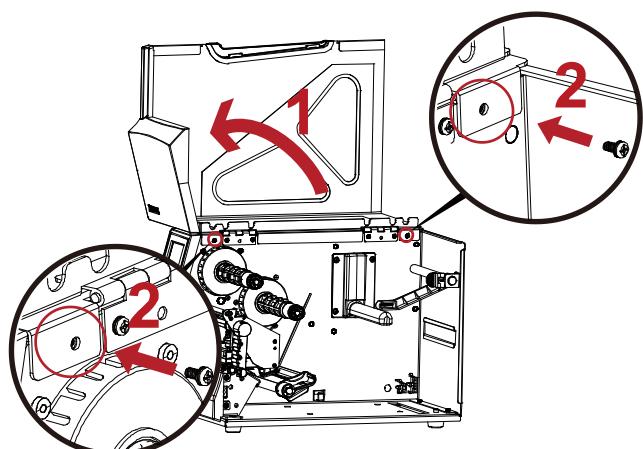

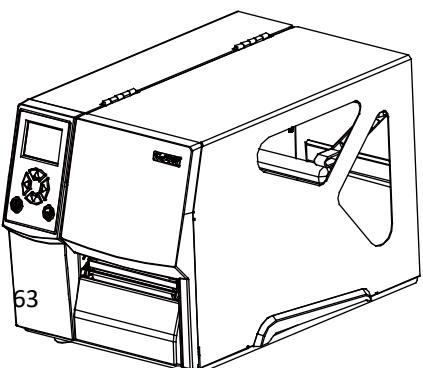

Step4. Connect the cable.

Step5. Install the left side cover.

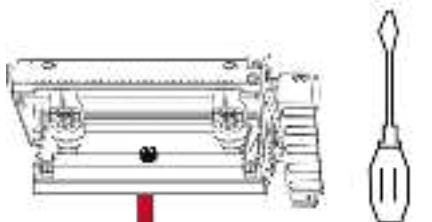

Step6. Lock the left cover  
screws.

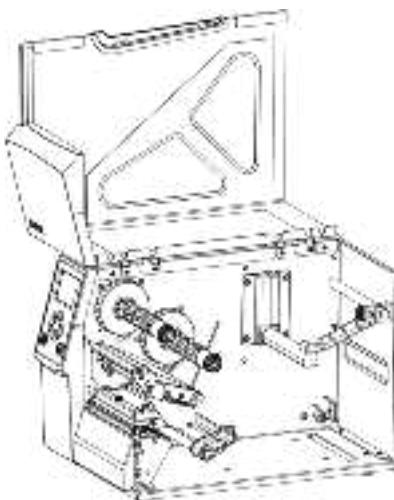

## 6 Maintenance and Adjustment

### 6-1 Installing / removing the print head module

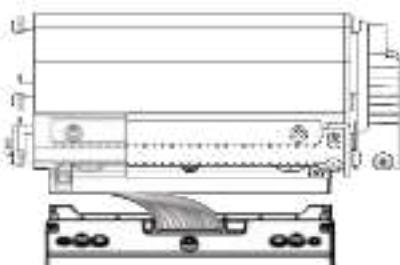

1. Open the printer cover.

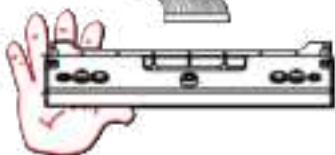

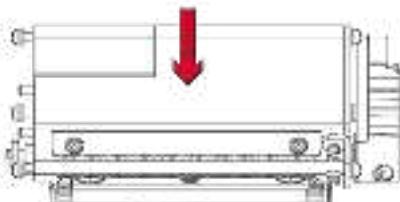

2. Using a screwdriver or a coin, loosen the screw to take out the TPH module.

3. Turn the print head  
counterclockwise  
to a top right position

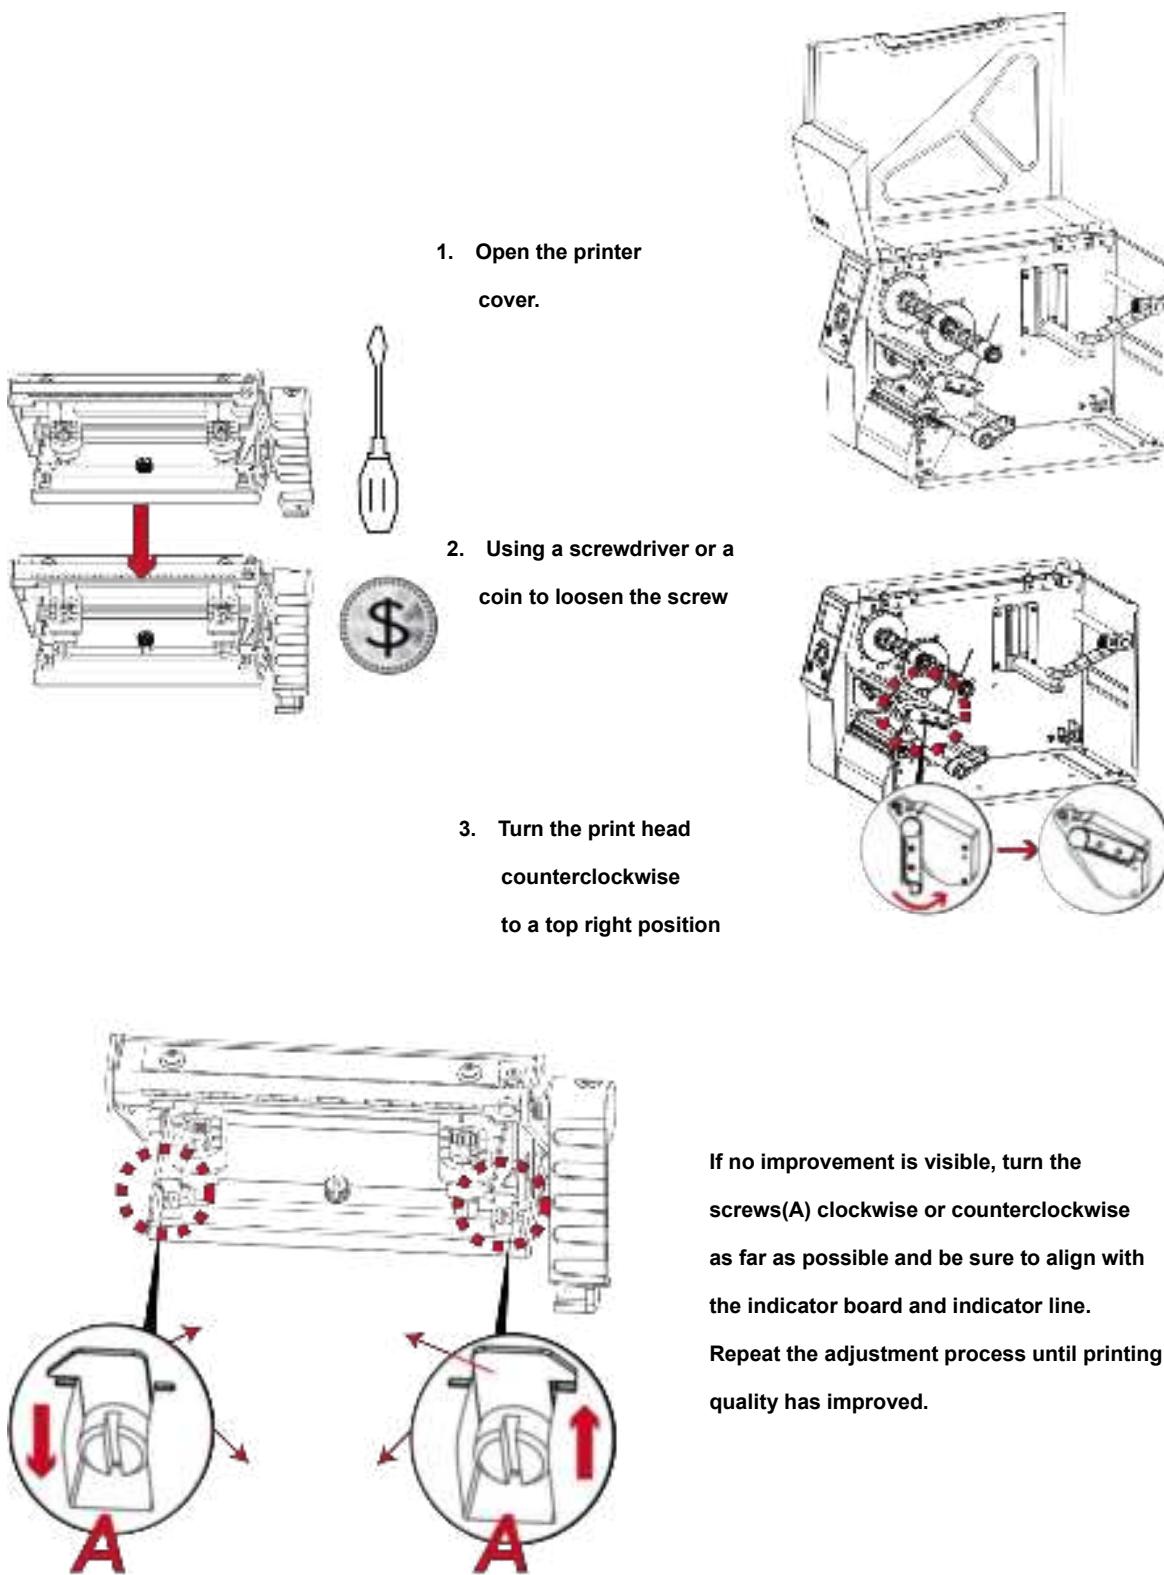

4. Turn the print head  
counterclockwise  
to a top right position

#### NOTE

\* Remember to switch off the printer before removing the print head module.

## 6-2 Adjusting the print line

## 6-3 Adjusting ribbon tension

You can adjust the ribbon tension by turning the ribbon shaft knob (see illustration) clockwise or counterclockwise.

There are 4 possible settings, which is marked on the ribbon supply hub.

0.1 : Tension is the highest

0.4 : Tension is the lowest

If the tension is so low that the ribbon does not move forward, you need to reduce the tension of the ribbon supply hub.

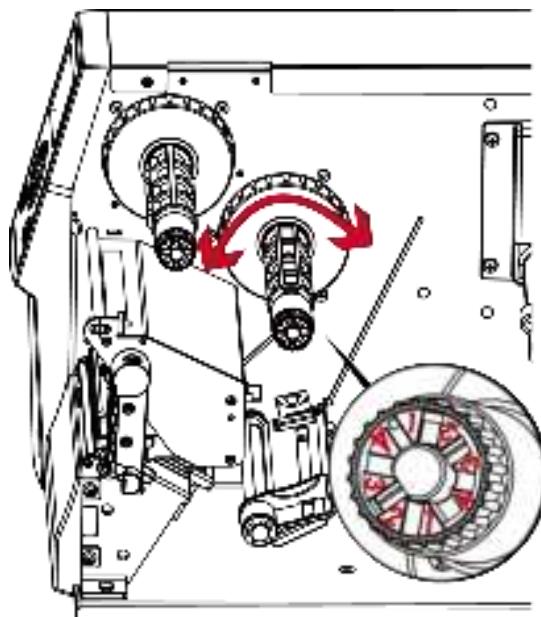

To set the tension, press in the knob and turn it clockwise or counterclockwise as required.

Increasing the tension of the ribbon rewind hub will remove any wrinkling of the ribbon during printing,

which results from the use of different ribbon materials. (For details about the wrinkling/creasing of ribbons,

see Section 6-6.)

If you are using a very narrow ribbon, the printer may not move the label stock forward (particularly with a ribbon that is less than 2" wide). In that case, reduce the tension by turning the knob of the ribbon supply hub counterclockwise.

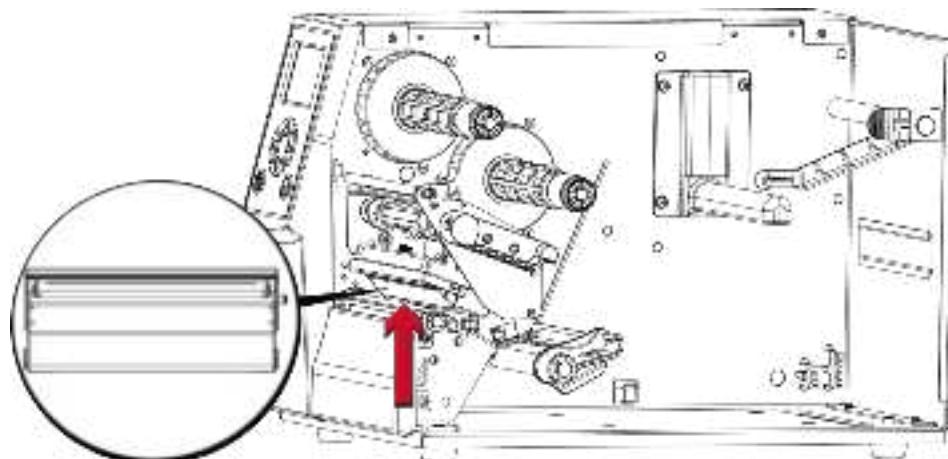

## 6-4 Cleaning the thermal print head

Dirt on the print head or ribbon may result in inadequate print quality

(there are only partial images on the label). The printer cover should therefore be kept closed when possible.

Keeping dirt and dust away from the paper or labels ensures a good print quality and a longer lifespan of the print head. Here is how you clean the print head:

1. Switch off the printer.
2. Open the printer cover.
3. Remove the ribbon.
4. Release the print head by turning the print head release lever.
5. To remove any label residue or other dirt from the print head  
(see Red arrow), please use a soft lint-free cloth dipped in alcohol to wipe.

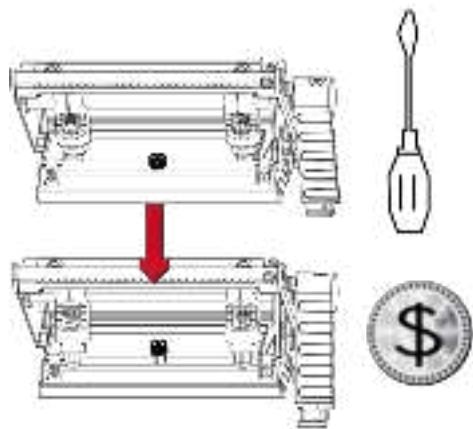

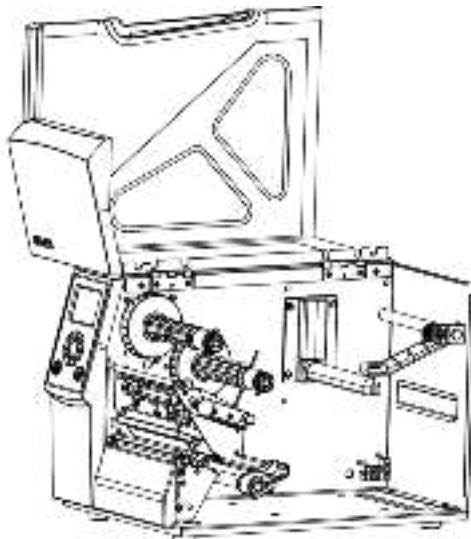

### NOTE

\* The print head should be cleaned once a week.

\*\* Please make sure that there are no metal fragments or other hard particles on the soft cloth used to clean the print head.

## 6-5 Adjusting the balance and print head tension

### 1. Open the printer

When using a variety of label stock

and ribbons, the ink may not be evenly distributed.

If there is no printed image on one side of the paper,

or the ribbon wrinkles, the print head pressure

must be readjusted using the TPH spring boxes.

Move the TPH spring boxes as shown in the illustration

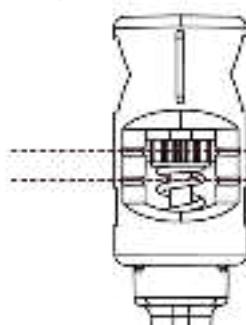

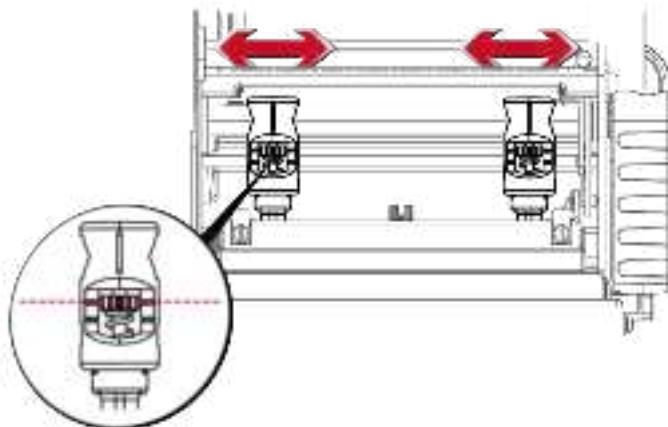

to change the print head pressure.

The wider the label you are using, the further apart

the TPH spring boxes must be moved away from

each other. If there is no quality improvement,

you need to change the pressure on the TPH spring boxes.

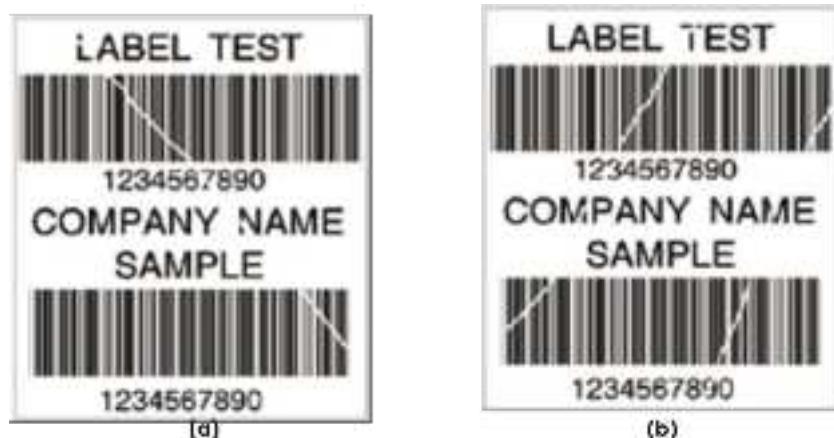

Reset Mark (A)  
Mark (B)

Turning the screw left increases the pressure,  
while turning it right reduces the pressure.

Be sure not to turn the screw so that it goes below Mark(B).

## 6-6 Ribbon shield settings

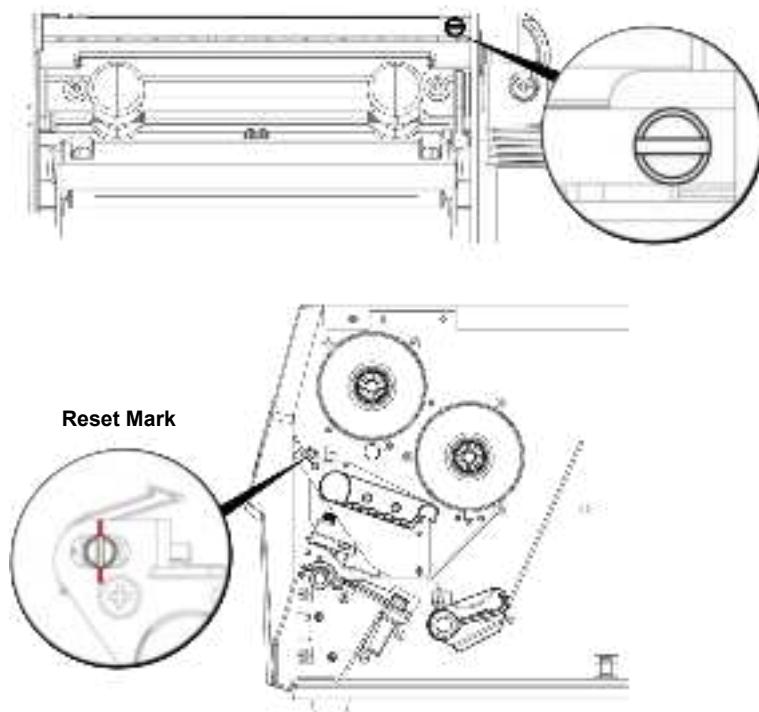

The use of different ribbon materials may cause wrinkling of the ribbon, which in turn affects the print result as illustrated by the examples in (a) and (b). To change the print quality, you can adjust the ribbon shield screws. If your print result looks like the example in (a), you need to turn ribbon shield screw clockwise. If your print result looks like the example in (b), you need to turn ribbon shield screw counterclockwise.

To keep track of the change in print quality, you should adjust the screws by half a turn at a time.

Print a test page. If there is no improvement in the print result, turn the screw by another half turn.

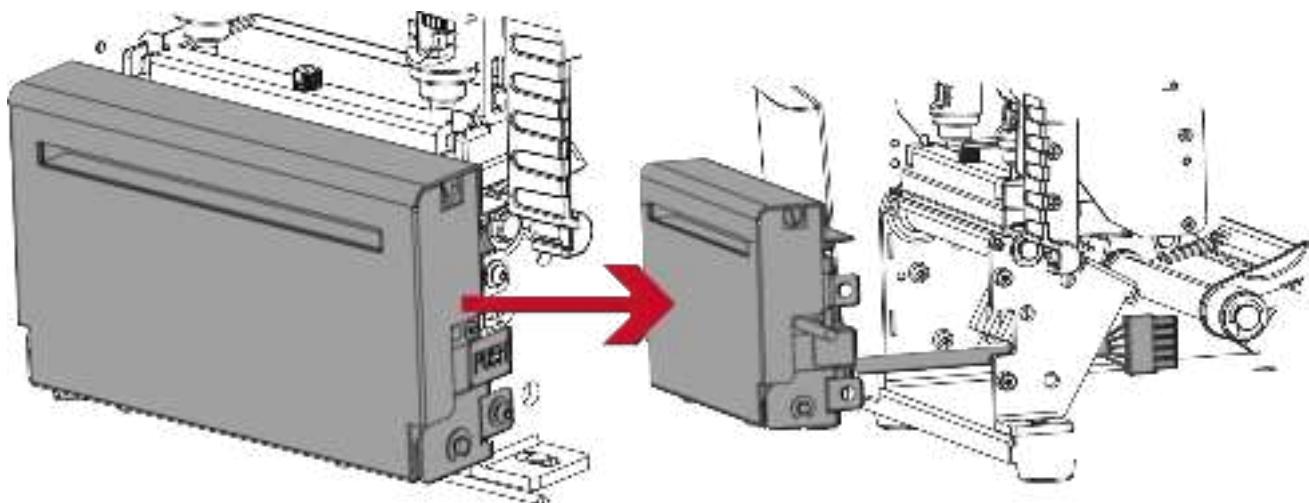

Do not turn the adjustment screw more than two full turns( $360^\circ$  ).

### NOTE

- If you adjust the screw by more than two full turns, the paper feed may no longer function correctly. In that case, unscrew the ribbon shield screws to align the reset mark and restart the adjustment process.

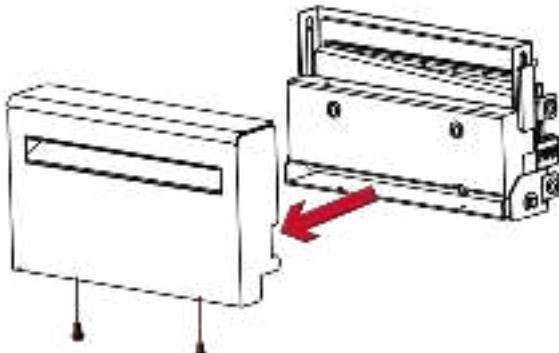

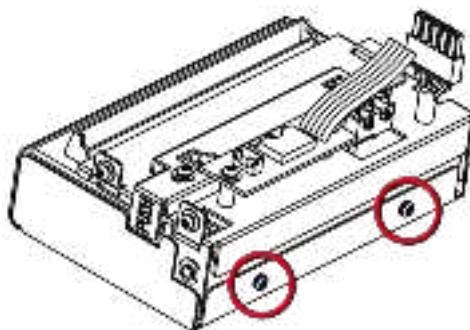

## 6-7 Cutter settings

Switch off the printer before removing the CUTTER.

(Remove or install cutter refer to "accessories" in Section 5)

Unscrew the screw at the  
bottom of cutter.

Remove the cutter cover.

Clean and remove jammed paper.

Reinstall CUTTER back onto printer.

### NOTE

\* Remember to switch off the printer before removing the CUTTER.

\*\* The label medium should be at least 30 mm long to ensure correct functioning at the cutter.

## 6-8 Troubleshooting

Problem	Solution
The printer is switched on but the LED does not light up.	<ul style="list-style-type: none"> <li>♦ Check the power supply. Please see the Section 2.1</li> </ul>
The LED lights up red and printing is interrupted.	<ul style="list-style-type: none"> <li>♦ Check the software settings (driver settings) or command codes.</li> <li>♦ Look for the error alert in the table in Section 3.3, Error Alerts.</li> <li>♦ Check whether the print mechanism is closed correctly. Please see the Section 3.3</li> </ul>
The label stock passes through the printer but no image is printed.	<ul style="list-style-type: none"> <li>♦ Please make sure that the label stock is loaded the right side up and that it is the suitable material.</li> <li>♦ Choose the correct printer driver.</li> <li>♦ Choose the correct label stock and a suitable printing mode.</li> </ul>
The label stock jams during printing.	<ul style="list-style-type: none"> <li>♦ Clear the paper jam. Remove any label material left on the thermal print head and clean the print head using a soft lint-free cloth dipped in alcohol. Please see the Section 6.1</li> </ul>
There is no printed image on some parts of the label.	<ul style="list-style-type: none"> <li>♦ Check whether there is any label material or ribbon stuck to the print head.</li> <li>♦ Check for errors in the application software.</li> <li>♦ Check whether the starting position has been set correctly.</li> <li>♦ Check the ribbon for wrinkles.</li> </ul>
There is no printed image on part of the label or the image is blurred.	<ul style="list-style-type: none"> <li>♦ Check the thermal print head for dust or other dirt.</li> <li>♦ Use the internal "~-1" command to check whether the thermal print head will carry out a complete print job.</li> <li>♦ Check the quality of the print medium.</li> </ul>
The printed image is positioned incorrectly.	<ul style="list-style-type: none"> <li>♦ Check whether there is paper or dust covering the sensor.</li> <li>♦ Check whether the label stock is suitable. Contact your supplier.</li> <li>♦ Check the paper guide settings.</li> </ul>
Skiping labels during printing.	<ul style="list-style-type: none"> <li>♦ Check the label height setting.</li> <li>♦ Check whether there is dust covering the sensor.</li> <li>♦ Run the auto-detection function. Please see the Section 3.2</li> </ul>
The printed image is blurred.	<ul style="list-style-type: none"> <li>♦ Check the darkness setting.</li> <li>♦ Check the thermal print head for dust or dirt. Please see the Section 6.1</li> </ul>
The cutter does not cut off the labels in a straight line.	<ul style="list-style-type: none"> <li>♦ Check whether the label stock is positioned straight.</li> </ul>
The cutter does not cut off the labels completely.	<ul style="list-style-type: none"> <li>♦ Check whether the label is more than 0.2 mm thick.</li> </ul>
When using the cutter, the labels are not fed through or cut off incorrectly.	<ul style="list-style-type: none"> <li>♦ Check whether the cutter has been correctly installed.</li> <li>♦ Check whether the paper guides are functioning correctly.</li> </ul>
The label dispenser is not functioning normally.	<ul style="list-style-type: none"> <li>♦ Check whether there is dust on the label dispenser.</li> <li>♦ Check whether the label stock is positioned correctly.</li> </ul>

### NOTE

\* If any problems occur that are not described here, please contact your dealer.

## APPENDIX

### Product specifications

Model Name	ZX420i	ZX420ii	ZX430i	ZX430ii
Print Method	Thermal Transfer / Direct Thermal			
Resolution	203 dpi (8 dots/mm)		300 dpi (12 dots/mm)	
Print Speed	Jp to 6 ips (152 mm/s)		Jp to 5 ips (127 mm/s)	
Print Width	4.25" (108 mm)		4.16" (105.7 mm)	
Print Length	Min. 0.16" (4 mm)**, Max. 279.53" (7100 mm)		Min. 0.16" (4 mm)**, Max. 25.08" (3200 mm)	
Processor	32-bit RISC CPU			
Memory	Flash SDRAM	128 MB 128 MB		
Sensor Type	Adjustable reflective sensor and transmissive sensor; left aligned			
Type	Continuous form, gap labels, block mark sensing, and punched hole; label length set by auto sensing or programming			
Width	Tear: Min. 0.6" (20 mm) – Max. 4.06" (110 mm) Cutter: Max. 4.01" (117 mm) Dispenser: Max. 4.33" (110 mm)			
Media	Thickness Label roll diameter Core diameter	Min. 0.0024" (0.06 mm) – Max. 0.01" (0.25 mm) Max. 9" (230.2 mm) with 3" (76.2 mm) core Max. 5" (127.4 mm) with 1.5" (38.1 mm) core Max. 5" (127 mm) with 1" (25.4 mm) core Min. 1" (25.4 mm) – Max. 3" (76.2 mm)		
Ribbon	Types Length Width Ribbon roll diameter Core diameter	Wax, wax/resin, resin Max. 1476' (450 m) Min. 1.16" (30 mm) – Max. 4.33" (10 mm) 3" (76.2 mm) 1" (25.4 mm)		
Printer Language	EZPL, GEPL, GZPL, GCP, auto switch			
Software	Label design Management tools APP for Printing	GoLabel II (for EZPL only) (Windows) GoTools (Windows/Android) GoUtility (Windows) GoAPP (Android/iOS)		
Driver	Windows 7, Windows 8 & 8.1, Windows 10, Windows 11, Windows Server 2008 R2, 2012, 2012 R2, 2016, 2019, 2022, Mac, Linux			
SDK	WinCE .NET, Windows 7, Windows 8 & 8.1, Windows 10, Windows 11, Android, Mac, iOS

\* Specifics listed are subject to change without notice. All company and/or product names are trademarks and/or registered trademarks of their respective owners.

\*\* Minimum width, height, and maximum print speed specifications can be dependent on material, number of variations such as label type, thickness, spacing, liner construction, etc. Océ 2K300 is pleased to test non-standard materials for minimum print height and maximum print speed capabilities.

\*\*\* Due to 2K400 Series WiFi module message communication through LAN port, please make sure WiFi module has been removed when you want to use LAN port.

\*\*\*\* The cutter is an optional accessory. If the cutter is installed, it is not suitable for children to approach.

## Interface

- Parallel port
 

Handshaking	: DSTB is sent to the printer, BUSY to the host computer
Interface cable	: Parallel cable compatible with IBM computers
Pinout	: See below

Pin No.	Function	Transmitter
1	/Strobe	Computer / printer
2-9	Data 0-7	Computer
10	/Acknowledge	Printer
11	Busy	Printer
12	/Paper empty	Printer
13	/Select	Printer
14	/Auto-Linefeed	Computer / printer
15	N/C	
16	Signal Gnd	
17	Chassis Gnd	
18	+5V, max 500mA	
19-30	Signal Gnd	Computer
31	/Initialize	Computer / printer
32	/Error	Printer
33	Signal Ground	
34-35	N/C	
36	/Select-in	Computer / printer

- Serial Port

Default settings : Baud rate 9600, no parity, 8 data bits, 1 stop bit, XON/XOFF protocol and RTS/CTS

RS232 (using 9 pin to 9 pin)

DB9 Socket		DB9 Plug	
-	1	1	+5V, max 500mA
RxD	2	2	RxD
TXD	3	3	RxD
DTR	4	4	N/C
GND	5	5	GND
DSR	6	6	RTS
RTS	7	7	CTS
CTS	8	8	RTS
RI	9	9	N/C
Computer			Printer

- USB Port

Computer Connector: Type A

Pin NO.	1	2	3	4
Function	VBUS	D-	D+	GND

Connector Type : Type B

## Notice

\* The total current to the serial port may not exceed 500mA.

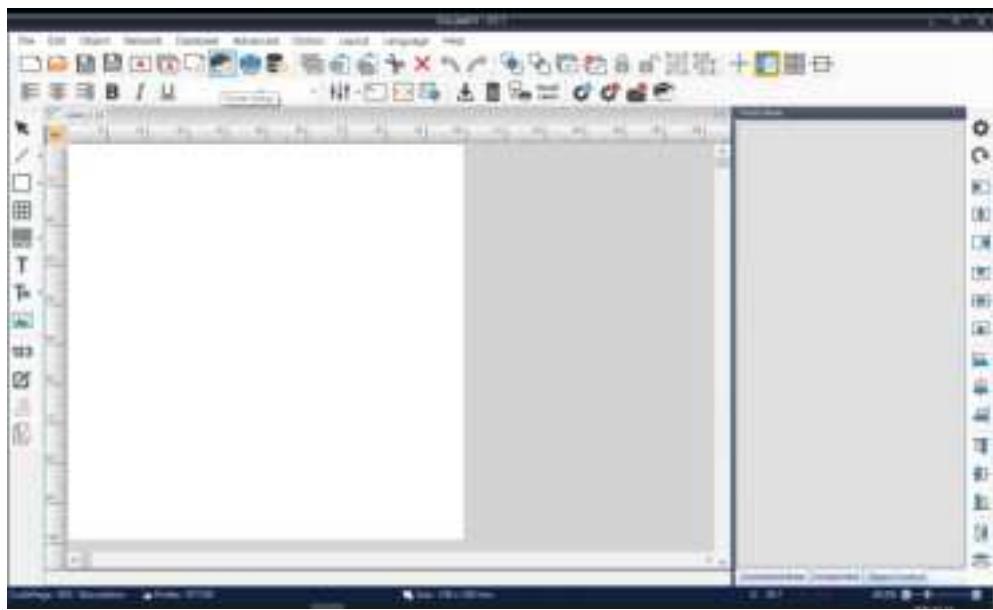

## Wi-Fi Printer Server Module Installation(Quick Setting)

\* Quick setting only supports GoLabel 1.15K and Arm 7 (FW1.100)  
Or Arm 9 (FW2.00A) or higher version

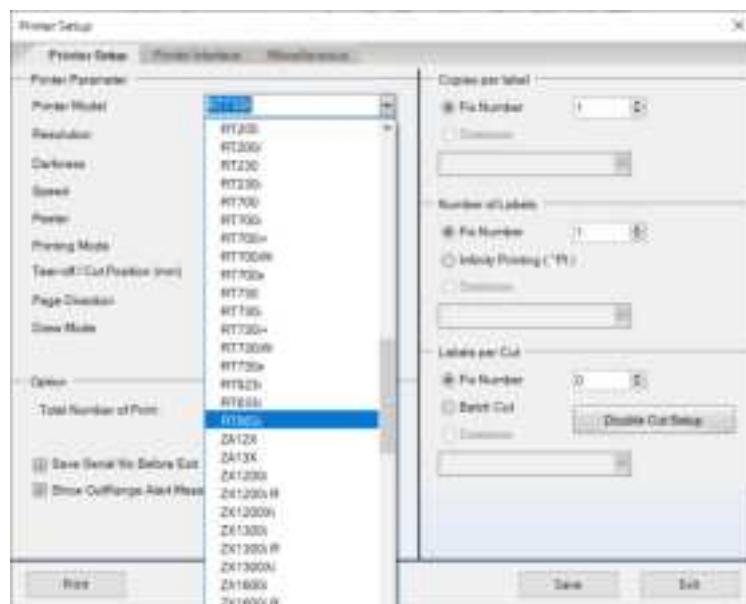

Set up wireless network through GoDEX Wi-Fi tool

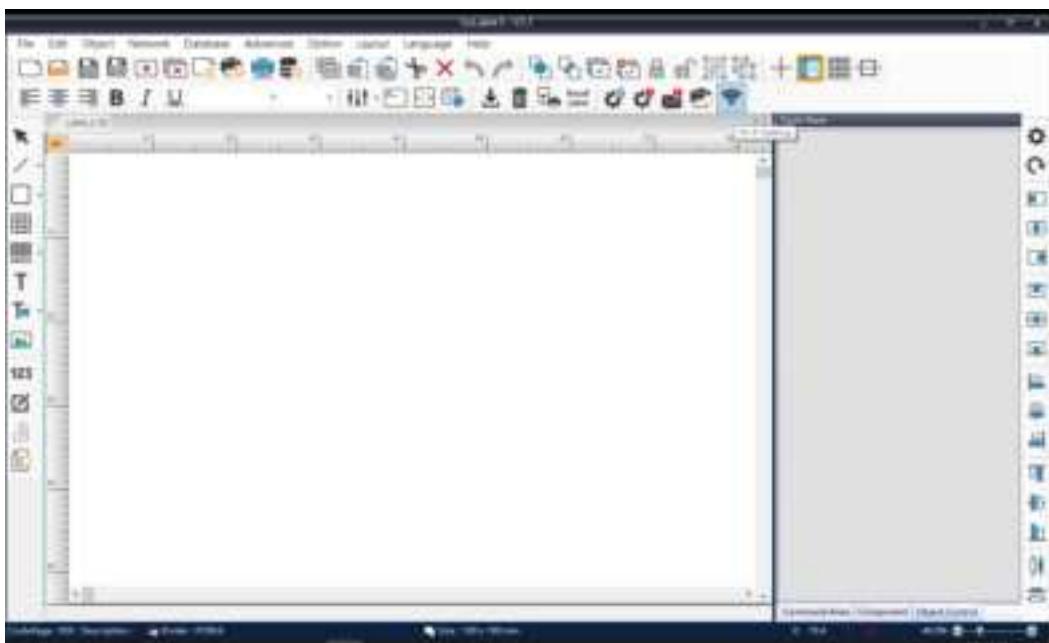

1. Turn on the printer connect printer and computer by USB cable.
2. Start GoLabel.
3. "Generic" → "Printer Setup".

4. Select printer model ([Wi-Fi supported models](#)).

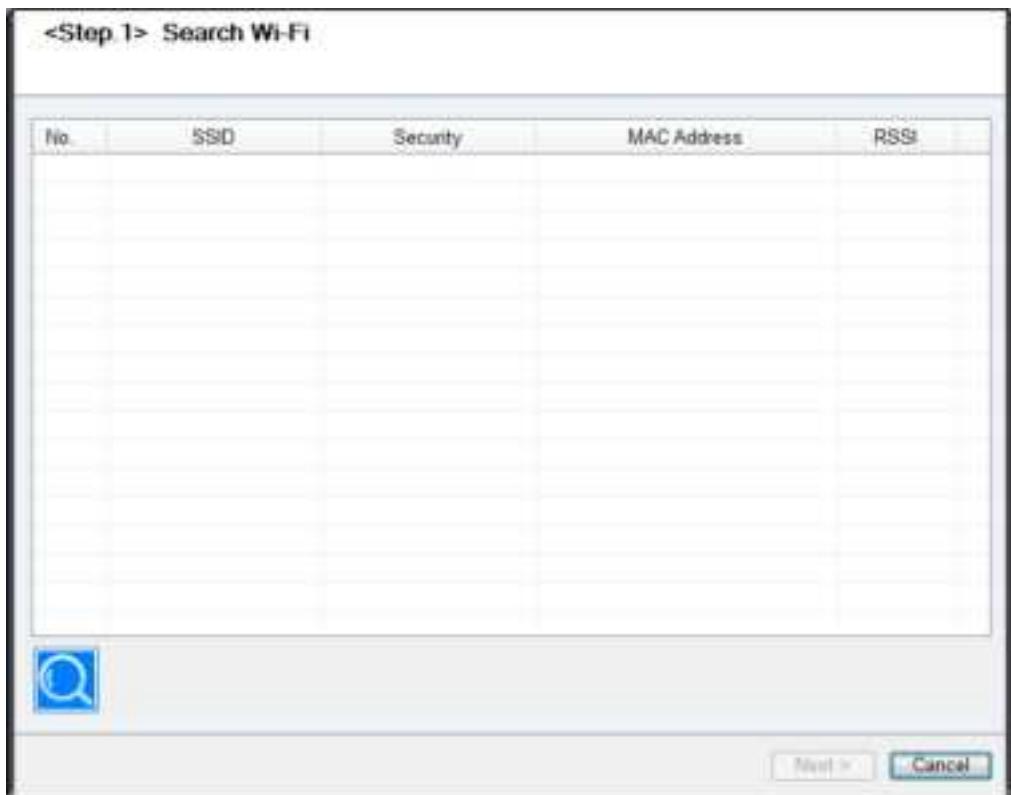

5. Click 'Wi-Fi Setting' icon.

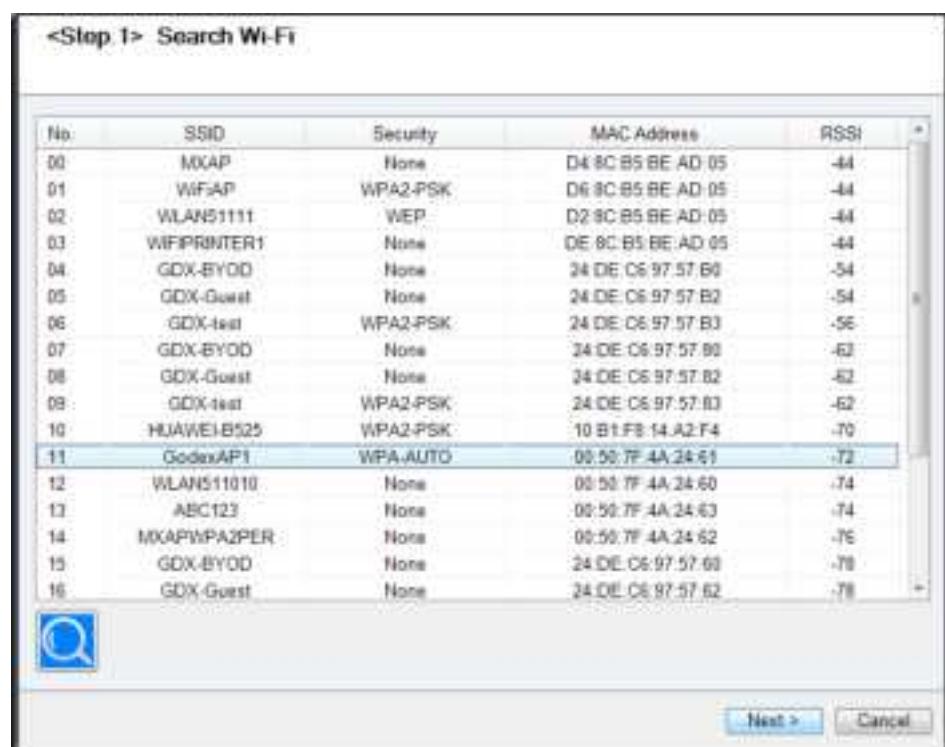

6 Click 'Quick Setting' icon.

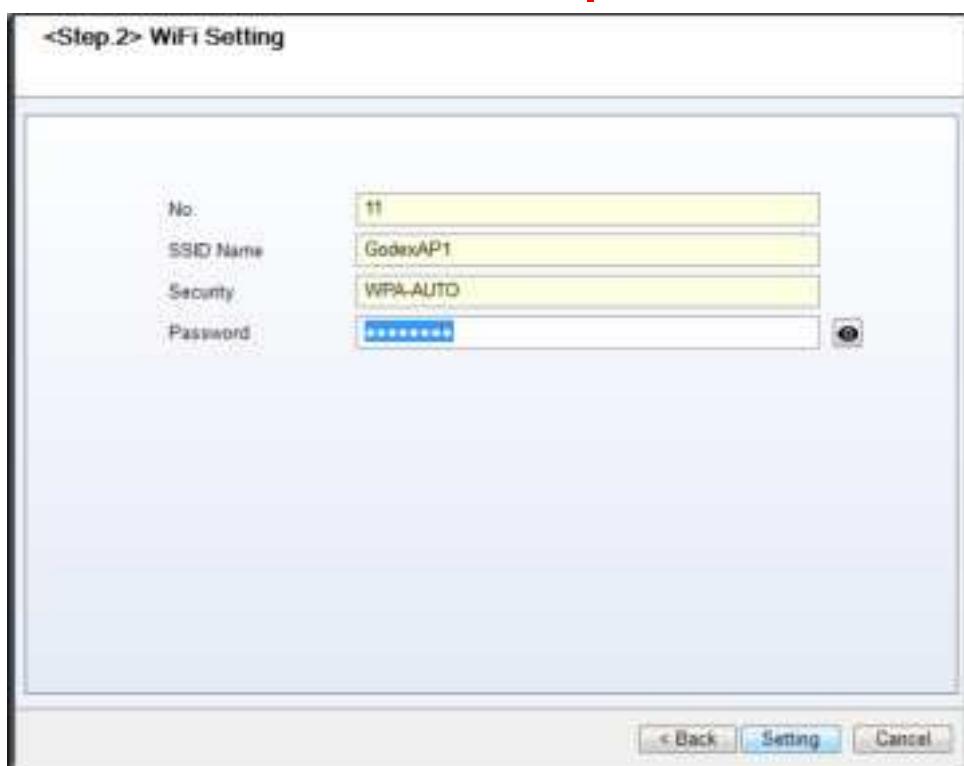

7. Click the Search button.

⑧ Select server and click **next** button.

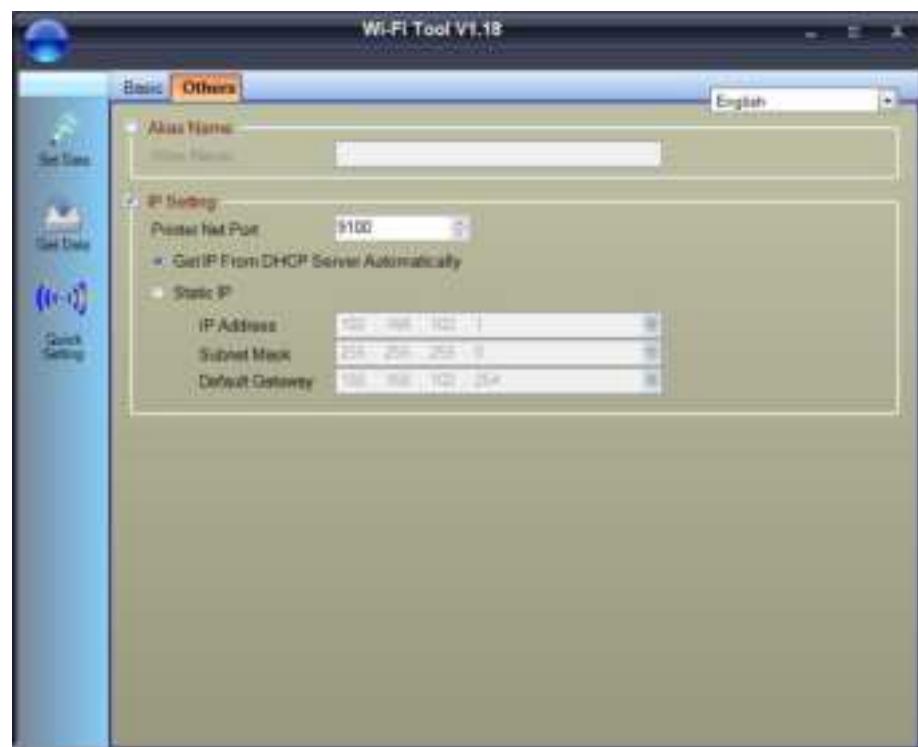

⑨ Enter the **password** set on the server side and click the "Setting" button

10. After the setting succeeded, a prompt will pop up and the printer will restart.

11. Select the 'Others' tab and click the 'Get Data' icon after selecting 'IP Settings'!

12. After remembering the IP address, open the 'Printer Settings' window.

13. Select the 'Printer Interface' tab, fill in the IP address and click "Save" to complete the setting.

## BT module setting instructions (Connect to mobile phone)

First pair the phone with the printer.

\* Android applies to BT2.1 and 4.0  
iOS only works with BT4.0

1. Turn on the printer and wait for it to enter the 'Ready' state.

2. Select the printer model you want to connect.

(The default pairing password is 0000)

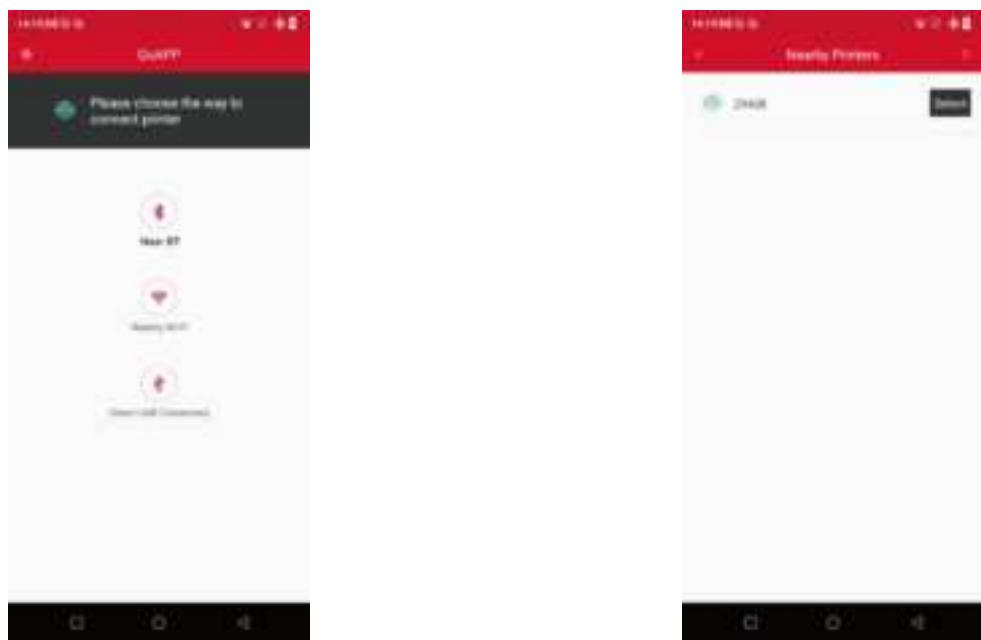

3. Open the GoApp application.

## Select connection method and printer

4. For the connection method, choose "Near BT" button.
5. The printers which installed the BT module will be listed below, select the printer to connect.

6. If the connection is successful, the function window will be displayed.

<sup>4</sup> When using the BT4.0 module, you need to use CoLabel to send the command "**\*XSCT:EXTERNCARDMODE,6**" to the printer first.
