Lite Bluetooth gamepad — instruction manual · English

L L2 power LED pair R2 R
- select + start
L3
digital joystick
d-pad R3
star home
mode LED digital joystick

- press **home** to turn on the controller
- press & hold **home** for 3 seconds to turn off the controller
- Press and hold **home** for 8 seconds to force turn off the controller

Switch

1 — put the controller on **S** mode first then press **home** to turn on the controller. LED starts to rotate
2 — press **pair** button for 2 seconds to enter its pairing mode. LED turns off for 1 second then starts to rotate again
3 — go to your Switch Home Page to click on Controllers, then click on Change Grip/Order. LED becomes solid when connection is successful
- controller will auto reconnect to your Switch with the press of **home** once it has been paired

Windows (X - input)

1 — put the controller on **X** mode first then press **home** to turn on the controller. LEDs 1 & 2 start to blink
2 — press **pair** button for 2 seconds to enter its pairing mode. LEDs turn off for 1 second then start to rotate again
3 — go to your Windows device's Bluetooth setting, pair with [8BitDo Lite gamepad]. LED becomes solid when connection is successful
- controller will auto reconnect to your Windows device with the press of **home** once it has been paired
- USB Connection: connect your 8BitDo Lite controller to your Windows device via USB Cable after step 1

Turbo function

1 — hold the button you would like to set turbo functionality to and then press the **star** button to activate/deactivate its turbo functionality
- d-pad and analogue sticks are not included
- this does not apply to Switch mode

battery

status —	LED indicator —
low battery mode	red LED blinks
