Product Features

Energy Saving and Environmental Protection

Compared with the traditional tungsten filament incandescent lamp, LED USB clip table lamp can save more than 90% energy, and compared with energy-saving lamps, this lamp does not contain harmful elements such as mercury and has no pollution to the environment.

Ultra Long Life

LED energy consumption is small and with long life, so frequent replacement of lights become your luxury.

Healthy Eye Protection

The LED table lamp light source has no stroboscopic glare, no ultraviolet light, no radiation, it can protect your eyes.

Ultra High Brightness

The lamp light source is made of imported LED lamp beads, with good brightness and high color rendering.

Easy to Use

The LED USB clip table lamp can be clipped to the desk, bookshelf, bedside, dining table, etc. Add a 360-degree rotating metal hose for any lighting.

Craftsmanship

The LED USB table lamp head is made of aerospace aluminum material, perfect for heat dissipation.
