90' Pull Line

Killer B™ Fan Hardware

- (4) Large fender washers are for use on the Mobile™ Series Fan Holder and Fold-up Silk Fan.
- (2) 1/4" Wing Nuts

WARNING: Killer B™ is so realistic, you need to use a blaze orange safety flag when carrying him through the woods.

Before Start

Use one of the following methods to get Killer B™ to regain his shape:

- Place Killer B™ under HOT water.
 - Use a hair dryer to warm Killer B™.
 - Place Killer B™ outside on a warm sunny day.
- These methods will pop him back into his original shape.

Assembly of Killer B™

Step 1 - INSTALL STAKE INTO DECOY - (See Diagram 1)

-Make sure that the stake gets installed through the stabilizer bracket during installation.

NOTE: Bottom section of stake easily installs and removes for compact carry.

Step 2 - ATTACH SILK FAN TO FAN BRACKET - (See Diagram 2)

NOTE: For added realism add real feathers to the Mobile™ Series Real Fan Holder. (See Next Page)

TIP: You may trim Killer B's™ beard to the length you desire.

Diagram 1

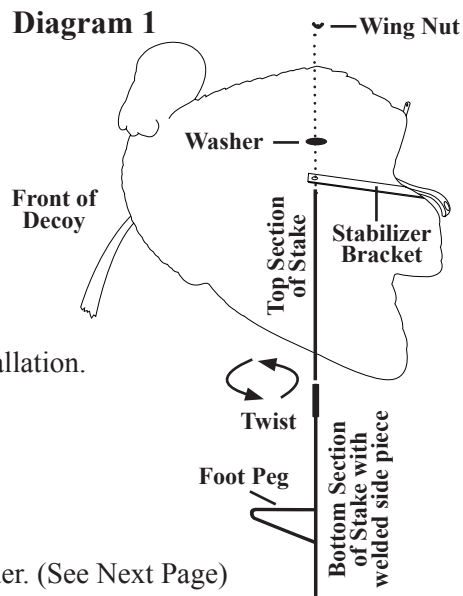

Diagram 2

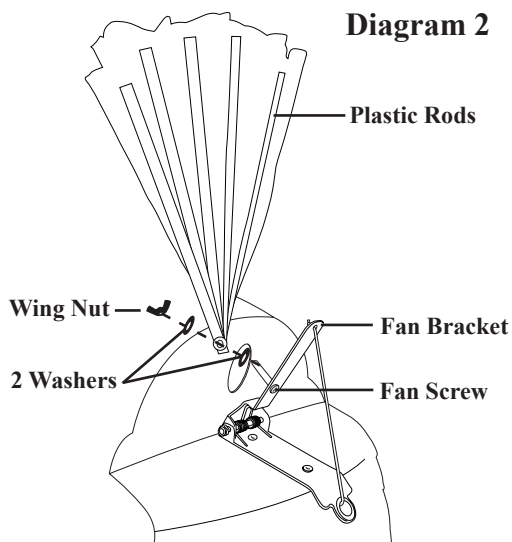

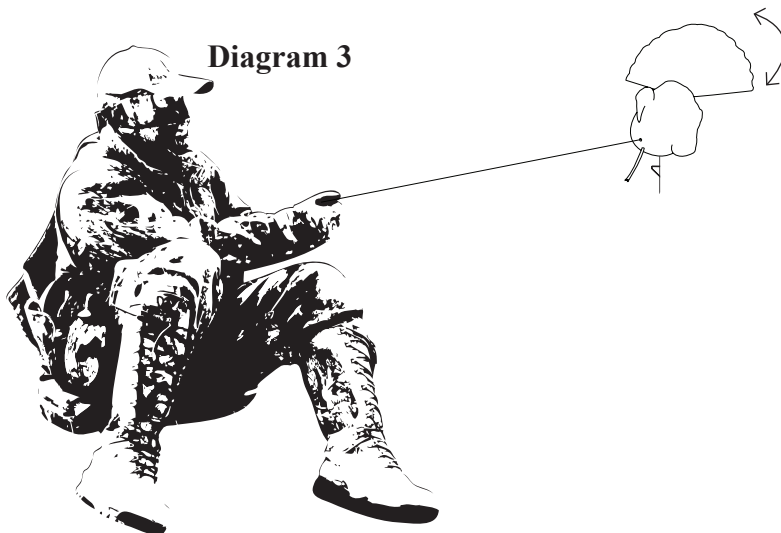

Diagram 3

Setting Up Killer B™ For Use

Step 1 - **IMPORTANT** Install stake into ground with foot peg facing towards the front of the decoy, toward direction of pulling line (See Diagram 3). This will keep the decoy from tipping over when pulling the line towards you (See Diagram 4).

Step 2 - Attach 90' Pull Line to O-Ring on front of decoy above beard (See Diagram 5).

Killer B™

Strutting Gobbler Decoy **Model No. 69021**

"Killer B" is so Realistic and Mobile that you will have gobblers strutting in your lap!"

INSTALLING THE MOBILE™ SERIES REAL FAN HOLDER ON KILLER B™ -

(Large washers are used on the Fan Holder) - 1. Place washer onto bolt. 2. Place the Fan Holder onto the bolt. 3. Place the second washer on the bolt. Hand tighten wing nut to desired tension.

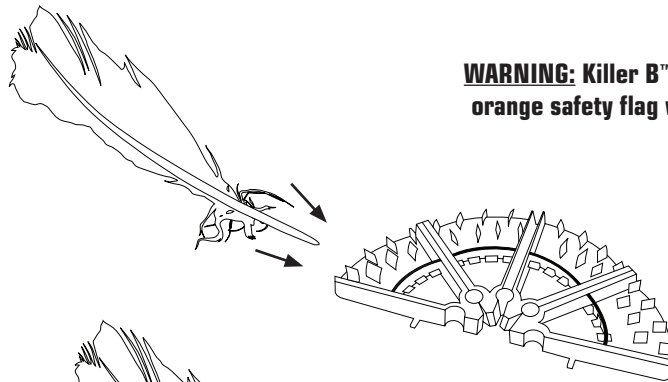

ASSEMBLY OF MOBILE™ SERIES REAL FAN HOLDER -

Your first step to create your real fan using the Mobile™ Series Fan Holder is to cut the real turkey fan where the tail feathers meet the body. Take one of the fan feathers and pull straight back to remove the feather. There will be some meat on the end, scrape the meat off with a knife. If the end of the quill is too long just cut it off so the feathers will be even.

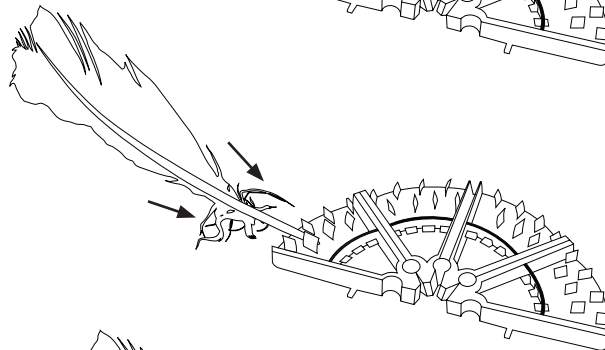

The process takes approximately 20 minutes to complete your fan. A gobblers normal tail fan has 18 feathers. The Mobile™ Series Fan Holder utilizes 16 feathers.

Step 1

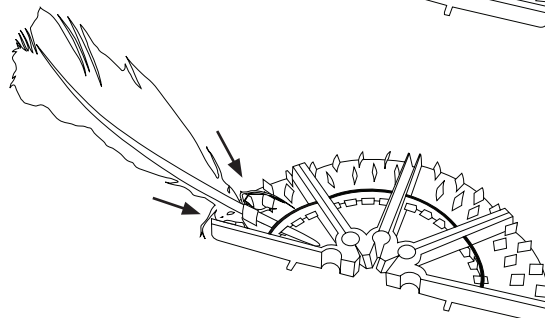

WARNING: Killer B™ is so realistic, you need to use a blaze orange safety flag when carrying him through the woods.
