Picking Your Night Light

- Press the “  ” button to turn on the night light. Press the button again to enter the breathing light mode, and then again to turn off the night light. In the breathing light mode, the light will gradually change from brightest to darkest, then from darkest to brightest.
- Press and **hold** the “  ” button to select the brightness of night light. This will start a cycle between brightest and darkest. When you’ve reached the desired brightness, just release the button.
- Press the “  ” button to select the specific color desired. Press the button again to cycle to the next color. There are 8 colors: red, yellow, orange, green, cyan, blue, purple and warm white.
- Press and **hold** the “  ” button for **1** second to turn on the 8 colorful lights. In this mode, the colors automatically cycle from one to the other.
- You can still turn on the night light by pressing the “  ” button even when your R2 is power off. This is to help you use the night light only without sounds.

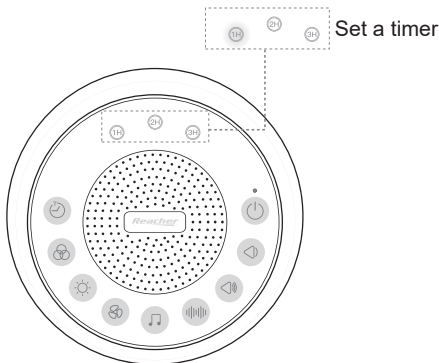

Note:

- You can **not** adjust the brightness of the light when using the breathing light mode.

Timer and Factory Reset

Using the Timer

- Press repeatedly the “  ”button to select a sleep timer ranging from 1H, 2H, 3H to enter sleep mode. The LED light of the selected timer will light up accordingly. If you want to leave your R2 on all night, please press the “  ”button until there is no LED light on.

- When you use the timer, the sound will gradually fade once the preset sleep time comes.

Performing a Factory Reset

- Press and **hold** the “  ” button for **5** seconds, your sound, volume and timer settings will go back to the default.

Here are the factory default settings:

The default sound: Gentle Waves

The default volume of sound: Level 10

The default timer: Off

Memory Function

The memory function will save your last sound, light color, light mode, timer, volume, brightness settings when you turn Glows off. Your last settings remain saved when you turn it on next time.

Warning: Please ensure to **TURN OFF** the machine before unplugging the power adapter, otherwise the machine will not save your last settings.

Using the Earphone/Headphone Jack

The earphone/headphone jack is on the back of the machine, compatible with the 3.5mm headset device.
