North East Africa

Product Portfolio

Welcome Message

Dear Partner,

GE Healthcare has been in existence for over 100 years and is a leading global medical technology and diagnostics innovator, at the center of an ecosystem striving for precision health.

For more than 40 years in Egypt, we have committed to localization and long-term engagement. In 2002, we established direct operations in the country, with more than 200 employees, 50% dedicated to after-sales services and customer support, to support the country's healthcare infrastructure modernization, providing advanced products and solutions to public and private sectors and their patients.

Focused on delivering solutions that are aligned with the needs of the Private and Public sectors, building sustainable customer partnerships, and reinforcing leadership in oncology and cardiology cares, GE Healthcare does not only offer full range healthcare product portfolios but also supports customers through training and education delivered at our Training Center in Cairo.

Our goal is to deliver increased capacity, improved productivity, and better patient outcomes for our customers.

We have also built a product portfolio with offerings that span the premium, mid-tier and affordable care market segments. For example, our products are used in research facilities expanding the frontier of innovation – and at the same time, we have more products featured in the World Health Organization's Compendium of Innovative Technology for Low-Resource Settings .

We could not be more excited about the path ahead for GE Healthcare in Egypt, and for the outcomes we will deliver for our customers. Find out more about our solutions available in Egypt in this brochure.

My team and I are delighted to help you deliver a better patient's experience and successfully grow your business.

Sincerely,

General Manager
GE Healthcare, North East Africa

Who We Are?

GE provides transformational medical solutions and services and is shaping a new age in patient care for Egyptians. GE's medical expertise is helping physicians imagine new ways to predict, diagnose and treat disease, so patients can live their lives to the fullest.

GE has more than 15,000 healthcare technologies installed across Egypt to help bring better health to more people.

We help improve outcomes for healthcare providers, help improve outcomes for patient, staff & enterprise; while also supporting our customers in the pursuit of precision health.

GE Healthcare employs more than 250 people in Egypt who work hand in hand to provide the best customer service and experience in the market.

4 Training & Education

First Medical Imaging Training Center in Egypt

- Intends to train radiologists & radiographers.
- Main focus is on diagnostic imaging equipment as Magnetic Resonance (MR), Computed Tomography (CT) and other scanner technologies.
- It will help Egyptian hospitals and clinics optimize the use of our DI equipment to deliver a better patient experience and improve healthcare outcomes through enhanced imaging results.
- It will serve to further build our commitment, supporting current and future medical professionals generations.
