

WCC Location Area Service Version 1.6.25202

Release Notes - September 2025

Highlights

The **WCC Location Area Service** is a new feature that integrates with the **PTT Pro** application. This service allows administrators to preconfigure **BSSIDs** with friendly names for various locations or stores. Users of the **PTT Pro Android** application can view these friendly names when they connect to the corresponding access points, making it easier to identify their current location within the application.

LAS v1.6.25202 offers:

- Maintenance and security updates

Device Support

Location Area Service is available in PTT Pro Android v3.3.10272 or higher.

Features in Location Area Service v1.6.25202

Maintenance:

As part of maintenance, we have implemented the bug fixes.

Security updates

Spring Boot version is updated to include the latest security fix.

Usage Notes

- Location Area Service is only available to PTT Pro customers.
- To request access to Location Area Service, contact Zebra support.
- Devices need to be configured to use the Location Area Service. Refer to the Location Area Service Guide for more details.
- For operation of the Location Area Service feature in PTT Pro, refer to the PTT Pro User Guide for Android .

Known Issues

- The presence of duplicate users will result in failure in login
