GameStop Universal System Selector Button Replacement

Written By: Jared

🔧 **TOOLS:**

[Phillips #00 Screwdriver](#) (1)

Step 1 — Button

⚠️ Disconnect the DC 6V IN power cable from the device.

- Remove the three front panel screws on the bottom of the device.

Step 2

- Carefully pry off the front panel of the device to reveal the button in need of replacement.

Step 3

- Pull firmly on the button in need of replacement to free it from its housing.

Step 4

- Push the replacement button into its new housing.

Step 5

- Snap the front panel back into place and re-insert the 3 front panel screws, completing the replacement.

The system selector button should now be working properly.
