Community Internet using your ISP: easy to install and operate

Many rural communities around the world had no hope of getting Internet access until now. The Starlink Internet operates almost everywhere in the world and can be shared with homes in a community when the Internet service is managed using a Guest Internet controller. The unique Guest Internet features maintain good Internet performance for many users while ensuring that Starlink requirements are not exceeded.

Provide a community Internet service with the STAR-1 kit and your ISP or Starlink antenna

The STAR-1 kit can provide an Internet service for many people when connected to an ISP or Starlink antenna. The Internet service is provided for mobile devices over a wide range from the GIS-K7 location. Install the GIS-K7 on a rooftop for the longest range.

The GIS-K7 sets rules for Internet access so that the service from one Starlink antenna can be shared between many people, and to ensure that the Starlink data capacity is not exceeded which may result in a service interruption. The rules include the duration of access, maximum data speed, maximum data volume, and time at which the service can be used.

Access is provided with a voucher that can be printed using the GIS-K7 or using the free Cloud service. The voucher access code has the rules for Internet access.

Guest Internet has no other charges and the equipment is very easy to use so it is not necessary to rely on an expert to operate the system, anyone can do it.

The GIS-K7 is a powerful outdoor wireless that has all the features of the Guest Internet family of Internet controllers. The GIS-K7 is a very economical solution to provide community Internet.

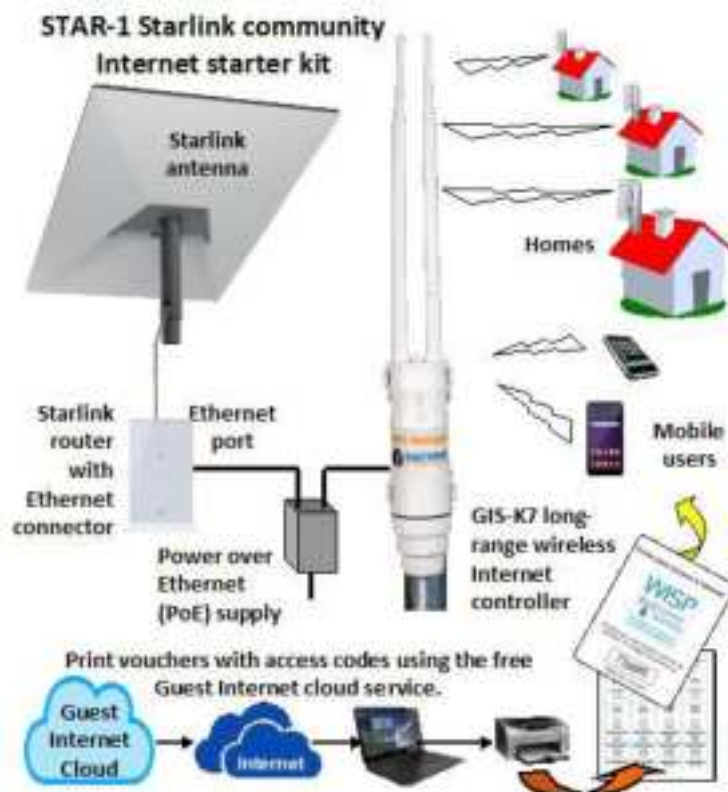

Items included with the STAR-1 kit

- ❑ GIS-K7 Wireless with Internet controller
- ❑ Power over Ethernet (PoE) supply
- ❑ Extension Ethernet cable
- ❑ Free Cloud account to manage the service
- ❑ Print vouchers using the GIS-K7 or using the Cloud account
- ❑ Complete guide, how to connect, configure and provide your Internet service
- ❑ **The Starlink antenna is not included**

The GIS-K7 connects to the Ethernet port of the Starlink router. Download a copy of the Guest Internet manual from our website for more information.
