

KEYENCE is dedicated to providing ADDED VALUE solutions for engineers in nearly all industries. We provide the tools that let manufacturers and researchers stay competitive in the global marketplace.

KEYENCE VALUE

KEYENCE has steadily grown since 1974 to become a world leader of innovation in the development of automation, quality assurance and R&D.

KEYENCE products are used in a wide variety of industries and fields

KEYENCE offers a wide range of factory automation products including automation sensors & safety equipment, static eliminators, barcode readers, measuring instruments, vision systems, laser markers and digital microscopes.

Innovation

KEYENCE has been ranked as one of Forbes' "World's Most Innovative Companies" every year since the list's inception in 2011. Our products not only meet current but also future customer requirements in many manufacturing and R&D industries. We have also been named one of Business Week's "1000 Best Valued companies".

Direct Sales Network

KEYENCE employs a large number of sales engineers throughout the world enabling invaluable direct on-site support. This direct approach allows us to meet customers' needs at every stage of their businesses, from design and research through production and beyond. Today, KEYENCE serves over 200,000 customers in some 70 countries around the world.

Corporate Information

Global Headquarters: Osaka Japan

Founded: May 1974

Capital: US\$300,362,000

2013 Global Sales: US\$2,598,137,000

Worldwide Employees: 4,000

Note: US dollar amounts are converted from Japanese yen for convenience only at ¥102 = US\$1, the approximate exchange rate on March 20, 2014

Versatile Products

Products for manufacturing and research and development: Sensing, Vision, Measurement, Laser Markers and Microscope products

KEYENCE products are designed to add value to the manufacturing and research practices of our customers. Our products are engineered to be versatile, so they can be used in every industry for a wide variety of applications. KEYENCE offers the world's best products for today and tomorrow's application needs.

Sensors

Reliable presence/absence detection

Process Controls/ Process Sensors

Monitor system pressure and flow

1D/2D Code Readers

Ultra-compact digital barcode readers

Machine Vision Systems

Ultra-high-speed, multi-camera universal machine vision system

Laser Markers/ Inkjet Printers

High speed 3-axis laser makers

Digital Microscopes

High resolution images, 3D profiles, and superior depth of field

Image Measurement

Place and press measurement

Laser Displacement Sensors

High-speed, high-accuracy CMOS laser displacement sensors

Static Eliminators

High-speed/wide area static eliminator

Safety Curtains and Scanners

Machine guarding solutions

KEYENCE Service & Support

Direct Sales Network

KEYENCE incorporates direct sales rather than having distributors or sales agents. Our technically trained sales engineers have extensive product knowledge along with application and industry experience. Customers can expect on-site support to quickly solve applications saving invaluable time.

Value Added Products

KEYENCE sells a broad range of products, enabling comprehensive support for a wide range of equipment across all industry sectors.

Find your solution efficiently and avoid having to consult with multiple vendors.

Other Companies

Onsite line operations stall while waiting for support

You need direct access to the people that can provide you with quick and practical solutions.

KEYENCE

DIRECT SUPPORT

CONVENTIONAL SALES

Solution Providers

The Customer

Consulting with and managing multiple solution providers is troublesome and time consuming.

KEYENCE

JUST ONE COMPANY TO CONTACT

KEYENCE

Sensors Expert
Laser Marking Expert
Barcode Readers Expert
Vision System Expert
and more.

The Customer

The Right Solution

Same Day Shipping

With most items in stock, received orders can ship the same day, reducing your overhead costs and losses due to work stoppage.

Globally Local

KEYENCE works closely with machine builders in many countries and can make introductions and suggestions for improvements in remodeling and developing turn-key solutions at your overseas plants.

Same-Day Shipping is Available

Quick delivery of products to customers.

Order time for same day shipping

SENSORS

FIBEROPTIC

FS & FU Series

High function amplifiers and a vast array of sensor head options provide reliable solutions for the most challenging detection conditions.

Threaded mounting

Set screw mounting

Integrated bracket mounting

Limited space mounting

Oil/Water environments

High temperature environments

Small targets

Variable target position

PHOTOEYE

GENERAL PURPOSE PHOTOEYE PZ Series

METAL PHOTOEYE PR-G Series

METAL MINIATURE PHOTOEYE PR-M/F Series

DISTANCE-BASED LASER PHOTOEYE LR Series

LASER

DISTANCE-BASED LASER SENSOR GV Series

Stable detection of targets, regardless of color, surface finish, or background.

LASER SENSOR LV Series

Lasers are ideal for difficult applications, since they provide a small visible beam spot over long distances.

SPECIALTY

HEAVY DUTY PHOTOEYE PX Series

Ensure reliable detection, even under harsh washdown conditions.

COLOR, UV & LUSTER DETECTION CZ Series

Solve tough applications involving color, luster, and UV detection.

PRESSURE

AP Series

Versatile mounting and pressure detection options

GP Series

Ideal for both hydraulic and pneumatic applications.

PROXIMITY

ES Series

Reliable detection for all metal types.

FLOW

LIQUID FLOW FD-M Series

Maintenance free operation. Monitor instantaneous and accumulated flow of conductive liquids.

SAFETY

CURTAIN

GL-R Series

Built-in guarding, all-in-one functionality, and innovative wiring options make the GL-R Series a perfect solution for countless safety applications.

GL-S Series

Ultra slim design featuring built-in mounting brackets and simplified wiring configurations for seamless integration. Highly visible indicators provide operation status at all times.

SCANNER

SZ Series

Safety laser scanners allow users to protect and monitor complex hazardous zones with ease.

Area protection

Collision prevention

Access protection

First laser scanner with a built-in muting function

HIGH PRECISION MEASUREMENT

1D LASER DISPLACEMENT SENSOR

LK Series

With a best-in-class sampling rate of 392 kHz, the LK Series can obtain reliable optical measurements of even the most rapidly moving processes. This series also has the highest accuracy and repeatability in its class.

- Coarse Targets
- Transparent Targets
- Fine Targets
- Mirror Targets

Measuring the thickness/width of a steel plate

Multi-point thickness measurement

2D/3D LASER DISPLACEMENT SENSOR

LJ Series

The LJ Series is ideal for high accuracy inline and offline measurements. High precision 3D measurement provides an accurate reproduction of surface profiles.

Measure Up to 8 Features at the Same Time

- Peak Height
- Average Height
- Gap
- Angle
- Bottom Height
- Width/Position
- Cross Sectional Area
- Profile Comparison

OPTICAL MICROMETER

LS Series

Speed (Fastest in its class)

13.3 times faster than conventional systems

Stability (World first)

Active tilt and vibration correction

Durability (Low maintenance)

No moving parts

Measuring the run-out of a rotating shaft

2-Axis Optical Micrometer

LS-9006D/9030D **NEW**

Measurement of the outer diameter of a fine wire

MACHINE VISION SYSTEMS

MACHINE VISION SYSTEM

XG & CV-X Series

KEYENCE was one of the first companies to develop the concept of using a camera for part inspection. Being involved in machine vision since the 1980's, our current machine vision system is the result of KEYENCE's immense industrial knowledge from solving countless applications in a wide variety of industries.

LumiTrax™ **NEW**

A fusion of high-speed cameras with intelligent lighting and an advanced inspection algorithm

The LumiTrax™ system captures targets with a newly developed ultra high-speed camera and controlled partial lighting. The completely new capturing method analyzes multiple images acquired with lighting from different directions to create shape (surface irregularity) and texture (pattern) images.

ETCHING INSPECTION

STAMPED CHARACTER INSPECTION ON METAL CASTING SURFACE

KEYENCE offers a complete solution and the support for all your image processing needs.

Cameras

Lighting

Lenses

Displays

CODE READERS/STATIC

BARCODE READER

BL Series

High Scan Speed:
1300 scans/sec

High Resolution:
0.08 mm 0.0031"

Unmatched reading ability on
poor quality codes

Verification of test tubes

Uneven background
(cardboard)

Curved part (sticker)

Shiny background
(aluminum)

Thick print lines
(coated paper)

1D/2D CODE READER

SR Series

AUTOFOCUS

The reader can be mounted at any distance
and maintain a clear image.
[Up to 1000mm 39.37" away]

AUTOMATIC TUNING

Determines optimal settings for exposure time,
image processing filter, etc.
[From about 750,000 combinations]

AUTOMATIC POLARIZATION

Glare can be eliminated with the built-in
polarizing filter. Reader angle adjustment or
external lighting is unnecessary.

Scratched

Thick printing

Thin printing

Parallel distortion

STATIC ELIMINATION

SJ Series

KEYENCE offers a wide variety of models to
meet the needs of a new era of improved
productivity and quality in the workplace.

Spot, Bar, & Blower Types

Built-In Display

Low Voltage Wiring

Calibration-Free Setup

Low Maintenance Operation

Prevent particles from sticking to the cutting
machine

Static elimination on
films

Static elimination in
feeder bowls

INTELLIGENT SENSORS

VISION SENSOR

IV Series

Difficult applications that formerly required multiple conventional photoelectric or proximity sensors can now be tackled easily with a vision sensor. Automatic focus, color imaging models, and high intensity illumination set the IV Series apart.

Multiple inspections in one field of view

Color detection tool checks printing

DIGITAL CONTACT SENSOR

GT2 Series

The GT2 Series is a digital contact sensor and is the first to employ a quartz glass scale shot system for high-accuracy measurement. Customers have the option of either a standard model or air push model.

Packing insertion check

Pencil Type Model

The new pencil type model combines a slim $\varnothing 8\text{ mm}$ $\varnothing 0.31''$ body with high-accuracy measurements

CCD LASER SENSOR

IG Series

The IG Series is a thru-beam CCD laser sensor that can perform a variety of measurements with high repeatability and stability. This sensor is also able to detect transparent targets.

Gap measurement between rollers

Edge control of a glass substrate

MARKING TECHNOLOGY

LASER MARKER

MD & ML Series

KEYENCE's 3-Axis laser markers are equipped with the most advanced optical components for laser marking. Nearly every shape can be easily programmed and accurately marked. 3D profiles and CAD data can be used to program any target profile.

MD-X Series **NEW**

Plane

Cylinder

Sphere

Circular Cone

Applications

[CONTRAST MARKING]
MOLDED PACKAGES (BGA)

[HIGH-SPEED 2D CODE
MARKING] METAL CASTING

[3D MARKING] ANODISED
HOUSINGS

[BLACK-ANNEALED
MARKING] PRECISION TOOLS

[COATING REMOVAL] ON-BOARD
INSTRUMENT PANEL SWITCHES

[THIN FILM PROCESSING]
GOLD-PLATED CONNECTORS

INKJET PRINTER

MK-U Series **NEW**

A combination of intuitive maintenance and advanced quality control.

Easy Operation

Stable Operation

Easy Inspection

Minimized down time

Auto-Shower Cleaning **World's First**

Conventional automatic cleaning only cleans along the ink path. With KEYENCE's newly developed auto-shower function, the MK-U is able to clean the ink path, nozzle, electrode plates, and gutter all at once. This reduces the need for disassembly for maintenance, and enables stable printing by proactively sustaining print head components.

Conventional automatic
cleaning

Auto-shower cleaning

INSPECTION & ANALYSIS

DIGITAL MICROSCOPE

VHX Series

The VHX Series Digital Microscope was designed to overcome the shortcomings of traditional optical microscopes - shallow depth-of-field, short working distance, lack of portability and versatility, sample limitations, etc. By integrating advanced zoom optics with a CMOS camera, 23" LCD monitor, LED light source, controller, fully-motorized stage, and analysis/reporting software, the VHX streamlines testing and improves the speed and efficiency of the inspection process. With a wide range of magnification, from 0.1x to 5000x, the VHX Series enables observation of macro-scale stereoscopic images as well as detailed, SEM level analysis. Many lighting techniques are also supported including bright and dark field, transmitted, polarized, and differential interference observation.

INSTANT MEASUREMENT SYSTEM

IM Series

The IM Series is a one step solution to conventional quality control inspection problems. With the press of a button, KEYENCE's patented pattern analysis tools provide traceable 2D analysis of any part placed on the measurement stage. With an industry leading 100 nm resolution, the IM Series provides unprecedented solid state measurement in a low cost, green, and space saving package.

LASER SCANNING MICROSCOPE

VK-X Series

Automatically analyzes and differentiates 3D surfaces based on nanometer-level profile and roughness data. Non-contact system works on any material and requires no sample prep.

3D MEASURING MACROSCOPE

VR Series

Our one-shot 3D measuring macroscope uses a new technology to: capture 3D data over a wide area with just the click of a button, eliminate measurement variation between users, and provide a variety of measurements such as profiling, volume, and roughness.

FLUORESCENCE MICROSCOPE

BZ-X Series

This fully integrated microscope is capable of performing fluorescence, bright field, and phase-contrast imaging - without the need for a darkroom.
