How do I connect NovoPen® 6 or NovoPen Echo® Plus with my Android or iOS smartphone?

What does your smartphone need to connect?

Your smartphone needs to be compatible with NovoPen® 6 and NovoPen Echo® Plus.

Having trouble? Check:

- Ooes your smartphone have a NFC (Near Field Communication) spot?
- Does the app manufacturer support your smartphone and OS? Check out their compatibility list.
- Have you updated to the latest version of the app?

The location of the NFC spot varies depending on the smartphone model. It's important that you hold your pen in the correct position next to your phone. Here are some examples:

Keep the phone on a flat surface and stand the pen on top of it (for iOS phones).

Tips to help you connect:

- Put the pen in the middle of the NFC spot.
- Check if the dose counter is at 0. It is not possible to transfer the dose log when an injection

make injections.

is in progress.
 Ensure that there are no other NFC devices, such as credit or travel cards, close by when you

If you are unsure, please refer to your smartphone instruction manual or contact your provider to confirm the NFC spot location.

- scan the pen.
 If your dose log is full, it may take more than 10 seconds to transfer all data. Moving the
- NovoPen® outside of the range of the NFC spot could cause the dose log transfer to be incomplete so keep the pen in the middle of the NFC spot throughout.
 If the pen has run out of battery (shows "End" or blank display) it is not possible to transfer the dose log and the pen may need to be replaced. You can still use the pen to
