### Power bank function description

#### 1. Charging the device

Wired connection: The Type-C cable /Lightning cable can be plugged into the mobile device to charge, or connect to the Type-C port.  
Magnetic wireless charging function: Click the button, wireless connection to the mobile device, wireless charging power output.

#### 2. Charge the mobile power supply (Note: Type-C port supports bidirectional, can be output or input)

Plug the adapter into a home wall outlet and connect it to the Type-C port of this product for charging.

#### 3. The display displays the remaining power 100%

The green icon  lights up to display the fast charge status

Click the power switch button of the product to see the power display to know how much power is left.

When the product charges the mobile phone device (supports the fast charge protocol),  the green light indicates that it enters the fast charge state, if it is not displayed, it is the ordinary fast charge state.

#### 4. Product lighting function

Long press the power switch button of the product for about 3 seconds to activate the first gear of the lighting function, long press again to the second gear, long press the third time to flash SOS, and long press the last time to turn off the lighting function.

### Precautions

\*Please charge the battery at least once every 3 months if it will not be used for a long time. During the use of this device, it will be slightly hot, but it is normal that it is not hot.

\*Always keep the product dry and do not use chemical agents for cleaning and scrubbing. Please take care of the environment, recycle this device at the designated location, and do not dispose of it arbitrarily.

\*Children or persons who are not equipped to use this device alone must use this device under the supervision of an adult.

\*Do not bump, disassemble, pierce, crush, or expose this device to moisture.

\*Do not apply this power bank to devices that do not meet the output parameter requirements, it may cause malfunction or fire.

### FAQ

\*When the power bank cannot be charged:

- Please check whether the power adapter is suitable, the connector used, and whether the converter is normal.
- It is recommended to choose a suitable brand of power adapter for charging.

\*When the power bank cannot charge other devices:

- The power bank is too low, please charge it before using it.
- If the internal circuit of the power bank is faulty, please contact the after-sales service department of the local dealer for help.

Made In China

### User guide

1. This product is compatible with most of all mobile phone models commonly available on the market.

2. Product has a lighting function, which is convenient for outdoor activities such as night travel.

3. This product has wired output power supply and supports more than 99% of mobile phones.

4. Portable and small to carry around, can be placed on the desktop, with the use.

### Packaging List

- Power Bank \* 1
- Instruction Manual \* 1
- Charging Cable \* 1

### Product Performance

- PD20W fast charge
- Wireless charge 15W
- Intelligent chip identification charge and discharge function protection
- The digital screen displays the percentage of battery

#### Remarks: Description of wireless charging functions

\*Place the phone on the wireless charger, click the switch button to turn on the wireless charging function.

\*When using the charger to charge the mobile power supply and using the wireless charging function to charge the device at the same time, only the ordinary 5W wirelessLine charging function.

\*During the charging process of the mobile power supply, in a fully charged state, since the charging protocol is switched to the 5V input state, it is turned on at this time. In wireless charging mode, only ordinary 5W charging can be performed. When you stop charging the power bank, it will restart automatically, and Wireless charging can enter fast charging mode.

\*When using PD12V charger to charge the power bank, because this function does not support 12V power supply, wireless charging feature will be turned off.

### Specifications

Name	Magnetic wireless power bank
Product model	T6
Type of cell	Lithium-ion battery
Battery capacity	10000mAh
Type-C input	DC 5V=3A/9V=2.22A/12V=1.5A
Type-C output	DC 5V=3A/9V=2.22A/12V=1.67A
Type-C Cable output	DC 5V=3A/9V=2.22A/12V=1.5A
Lightning Cable output	DC 5V=3A/9V=2.22A/12V=1.67A
Wireless output	5W/7.5W/10W/15W
Lighting adjustment	First gear lighting High light in second gear Third gear SOS flashing
Product Size	87.3*67.7*28mm
Executive standard	GB/T35590-2017
Operating temperature	10°C 40°C

宽120mm 高110mm

## **FCC Warning Statement:**

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- - Reorient or relocate the receiving antenna.
- - Increase the separation between the equipment and receiver.
- - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- - Consult the dealer or an experienced radio/TV technician for help.

## **FCC Radiation Exposure Statement**

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) This device must accept any interference received, including interference that may cause undesired operation.

The magnetic function only adjusts the charging position.
