

## BLUE LIGHT PROTECTION COMPUTER GLASSES

### How do they work?

Our glasses are **non-prescription** blue light blocking glasses. They are designed to block blue light and UV rays. Wearing them while using digital screens may reduce headaches, eye strain, fatigue, dry eyes, glare, and may improve sleep. With these glasses, you can safely endure longer exposure to blue light.

### Tips for peak performance:

1. Keep the lens surface clean. Use our fiber cleaning cloth to regularly wipe away particles or stains.
2. Store your glasses in the provided case when not in use to prevent scratches, dust, and other damage.
3. Avoid touching or scratching the lenses for long-lasting blue light protection.
4. Avoid using harsh chemicals or abrasive materials that could harm the coating.
5. Avoid leaving your glasses in places with excessive heat, or extreme cold, as it may damage the coating.

## Ensuring glasses effectiveness:

1. Press the torch button on the small light and aim it at a white area of the testing card. It should turn blue/purple.
2. Once the blue fades, position the lenses of your Benicci Glasses about 3/4" above the test area.
3. Perform the test again, directing the light through the lens for a few seconds.
4. The area should stay white or slightly turn blue, indicating your glasses work as they are supposed to.

**If your glasses fail the test, feel free to contact us for a free replacement.**

## Disclaimer

Our blue light blocking glasses (the "Product") is not a medical product, and has not been prescribed, certified or approved by any licensed medical professional, including but not limited to any ophthalmologist or optometrist.
