Add an All-in-One Sensor to your Home Security System

After you install your Keypad Sensor Hub, you can use the Arlo Secure App to add All-in-One Sensors.

To install your All-in-One Sensor:

1. Open the Arlo Secure App and tap **Add Device or + if you have other devices**.
2. Follow the setup instructions for your All-in-One Sensor.

Note: The sensor is for indoor use only. The Arlo Secure App shows you how to separate and reattach the front module from the back housing.

Do not attach the sensor adhesive unless the app instructs you to do so. If you're using the sensor to detect water leaks, the adhesive isn't needed.

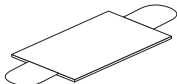

What's in the box

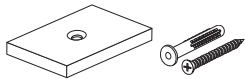

All-in-One Sensor

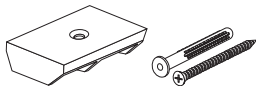

**Magnet with
Adhesive**

**Sensor
Adhesive**

**Flat Wall Plate with
Short Screw and Anchor**

**Corner Wall Plate with
Long Screw and Anchor**

Note: Your sensor might not need a wall plate, depending on how it will be used. The Arlo Secure App explains this during setup.
