Vane Versus Hot Wire

Which sensor type should you choose? For many technicians, it is ultimately a matter of preference but there are some distinguishing factors to keep in mind. Vane anemometers are very useful for fast, accurate measurements of air velocity. The ultra compact size of a hot wire anemometer probe makes it easy to access small openings such as louvered vents. Telescoping hot wire probes are also useful for reaching high locations.

LRK10/LRK15 Lighting Retrofit Kits

Applications:

- Lighting System Audits
- Post-retrofit Verification Testing
- Construction Audits
- Project Installation

Designed for professionals who routinely audit existing and replacement lighting systems for energy efficiency and lighting performance

- Successful lighting retrofit contractors need tools to comprehensively assess lighting infrastructure: from light levels for a given space to energy usage. Older technology such as incandescent lights or aging ballasts can impact the bottom line with added energy costs. Insufficient or excessive lighting can impact productivity or worker health with eyestrain from dim lighting or glare. As you work with clients to evaluate newer, high efficiency fluorescent and LED lighting retrofits, get the tools that deliver accurate, actionable information.
- Both LRK10 and LRK15 kits include:
 - Model LT300 Light Meter: Quickly measure lighting levels with this ergonomic, easy to use light meter (see p. 115)
 - Model DT200 Compact Laser Distance Meter - Quickly calculate area even in hard-to-measure spots
- LRK15 kit also includes:
 - Model 380940 400A AC/DC Power Clamp Meter: Versatile electrical test tool with built-in wattage measurement

Calibration Traceable to **NIST**

WHEN YOUR JOB DEMANDS IT, EXTECH GOES THE DISTANCE TO DELIVER CERTIFIED ACCURACY FOR YOUR TEST & MEASUREMENT EQUIPMENT.

Calibrate your Expectations

Extech is one of the few suppliers that offers a broad range of measurement instrumentation complete with a Certificate of calibration that is traceable to NIST (The National Institute of Standards and Technology), an agency of the U.S. Department of Commerce. This Certification ensures that, since traceable standards are used and maintained, Extech products will perform optimally and will meet or exceed published specifications in all of their functions.

Calibration Adds Value

Our in-house calibration lab accommodates a wide range of calibrations and services and was built specifically with our customers' requirements in mind. Our Calibration Lab complies with all pertinent industry guidelines ensuring that high quality standards are maintained. NIST traceable Calibrations are performed by skilled technicians under strict ISO-9001 guidelines and procedures. Our Calibration equipment is state-of-the-art, regularly tested for peak performance, and continually upgraded.

Extech for Makers

WITH EXTECH, DON'T JUST BUILD, MAKE. DON'T JUST PROGRAM,
HACK. DON'T JUST DESIGN, FABRICATE.

Turn to Extech
for all your maker/
hacker test equipment

The Choice for Makers & Hackers

Around the world, a new generation of makers and hackers is exploring innovative ideas in electronic hardware, programming and 3-D printed fabrication. And it's happening at home, at school, and also in HackerSpaces, MakerSpaces, TechShops and FabLabs. Inventive minds are solving small and large challenges by building electronics with simple yet sophisticated platforms like Arduino and Raspberry Pi. Extech is proud to be play a prominent role in Maker/Hacker culture. See how:

Hacker Training

Leading hacker and security expert, Joe Grand uses Extech EX410 digital multimeters as part of the standard equipment in his popular "Hands-On Hardware Hacking and Reverse Engineering" course given at major events around the world.

EEV Blog

Extech multimeters have been featured on the influential maker/hacker site, EEV Blog. The EX330 won the \$50 multimeter shootout against 4 other comparable meters and the EX505 survived an extreme canyon trip.

Make

Extech meters, benchtop power supplies and borescopes have been featured on *Make:* in Product Reviews as well as in gift guides for the holidays and Father's Day. Extech's EX330 even received a "Best of Make:" honor.

The New York Times

The New York Times explored the idea of "home labs" and touted the Extech's EX210 multimeter for its built-in infrared thermometer.
