Assembly Steps

STEP 1

Attach the Left Crossbar (**H**) to Leg (**B**) and Right Crossbar (**I**) to the Motorized Leg (**A**) using M6x11mm Screws (**S-A**) and 5mm Allen Wrench (**T-B**).

STEP 2

2.1 Place the Side Brackets (**G**) onto the Legs (**A,B**) facing inwards with the **Inset Holes** on top. Loosely attach Side Brackets using M8x18mm Screws (**S-B**) through the top holes using 5mm Allen Wrench (**T-B**).

2.2 Secure the Side Brackets (**G**) using M6x11mm Screws (**S-A**) through the side holes using 5mm Allen Wrench (**T-B**).

2.3 Tighten the M8x18mm Screws (**S-B**) from 2.1 using 5mm Allen Wrench (**T-B**).

STEP 3

Attach the Feet **(C)** to the Legs **(A,B)** using the M6x35mm Screws **(S-D)** and 5mm Allen Wrench **(T-B)**.

STEP 4

Insert the Inner Crossbar (**J**) into the **Left Assembly** and into the **Right Assembly**.

Partially thread M6x11mm Screws (**S-A**) into the Left and Right Crossbars (**H,I**) using 5mm Allen Wrench (**T-B**).

STEP 5

5.1 Loosen the **Wing Nut** on the Sync Rod (**D**) so that it freely extends.

5.2 Fully insert the **Hex Shaft** into Leg (**B**) so that the **Ring** makes contact.

5.3 Extend the **Spline Shaft** to fit into the Motorized Leg (**A**). Tighten the set screw using 2mm Allen Wrench (**T-A**). Leave the **Wing Nut** loosened.

STEP 6

Insert the Rubber Pads (**M**) into the holes on Side Brackets (**G**) and Left and Right Crossbars (**H, I**).

Pinch together the ends of Hooks (**L**) and insert into the slots on Side Brackets (**G**).

Before Proceeding

Follow the instructions included with your desktop (not included) to assemble your desktop.

STEP 7

For VIVO Desktops

7.1 Flip the desk frame upside down onto the desktop and extend the frame until the holes on the Side Brackets (**G**) line up with the pilot holes on the desktop.

7.2 Attach the frame and Control Panel (**E**) to the desktop using ST5x15mm Screws (**S-C**) through the Side Brackets (**G**) and Crossbars (**H,I**) using a Phillips screwsdriver or drill.

For Non-VIVO Desktops

Use the diagram to the right to pre-drill any holes that are not already pre-drilled.

Drill Bit: 1/8" (3mm)

STEP 7 - Cont'd

Secure the Inner Crossbar (**J**) by tightening the previously installed M6x11mm Screws (**S-A**) using 5mm Allen Wrench (**T-B**). Tighten the **Wing Nut** on the Sync Rod (**D**). If the Sync Rod has disconnected, insert back into Leg (**B**).

STEP 8

Plug the Power Cable (**F**) and the cable from the Motor (**A1**) into the Control Panel (**E**). Remove adhesive backing from Cable Clips (**K**) and place them on the underside of desktop to route cables.

Controller

Overview & Troubleshooting

Controller Manual

Standard Operation

LED Panel

Displays the current desk height

Up Arrow

Press and hold to raise the desk. Release when desired height is reached.

Down Arrow

Press and hold to lower the desk. Release when desired height is reached.

Memory Settings

Use these settings to save and return to your desired height. These can be used to save a sitting and standing height for easy sit-to-stand transitions.

Programming a Memory Setting

Use the arrow keys to adjust the desk height. To program, press and hold the desired Memory Button. For example, press and hold the **1** button until “H1” displays. Height is now saved.

Once the height is saved, quick press the corresponding **Memory Setting** Button to return to that position.

Troubleshooting

Reset Process

If the height of the desk does not match the displayed height, the desk will need to be reset. Unplug the desk for 10 seconds, then plug it back in and lower the desk to its lowest position. Press and hold  for 10 seconds. The display will show **rES** and the legs will move to their lowest setting. When the desk no longer lowers, you can release button.

Error Codes

Code	Description/Solution
HOT	Overheated: If the desk motor has been running continuously for 5 more minutes, the motor will automatically shut off prevent damage from overheating. Wait at least 18mins before attempting any further height adjustments.
E 10	Sensor Malfunction: Motor safety sensor cannot be detected. Power off the desk, unplug the cables, and wait 5mins. Reconnect cables and restore power to the desk. Perform RESET process before proceeding with height adjustments.
E20	Overload Warning: The 220lbs/100kg weight capacity of the desk has been exceeded. Unplug the desk and remove extra items on desk. Restore power to the desk and attempt height adjustment again.
E02	Operation Warning: If vibration, collision, or incline is detected the desk will stop raising/lowering. If the warning in error, follow the RESET process before attempting height adjustments.
E32	Overvoltage Warning: The input voltage is too high. If correct AC adapter is being used, unplug the desk from the wall and disconnect all cables from the controller. Wait 5 minutes then plug the cables back in and restore power. Perform RESET process. If error persists, please contact our Product Support Team at 309-278-5303 or help@vivo-us.com for further assistance
E31	Undervoltage Warning: The input voltage is too low. If the correct AC adapter is being used, unplug the desk from the wall and disconnect all cables from the controller. Wait 5 minutes then plug the cables back in and restore power. Perform RESET process. If error persists, please contact our Product Support Team at 309-278-5303 or help@vivo-us.com for further assistance

Custom Programming

Change Displayed Height Metric

To switch between inches and Centimeters, press and hold buttons 1 & 3 for 2 seconds. Repeat process to switch again.

Child Safety Lock

To activate the child safety lock, press and hold buttons 1 & 2 for 2 seconds. LOC will be displayed when controller is locked, and normal display height will show when unlocked. Repeat process to switch back.

Collision Force Detection (CF)

To change the sensitivity of the Collision Force Detection, press and hold buttons 1 & 4 for 2 seconds until the display shows "H". Press up or down to select "OFF", Low (L), Normal (n) or Heavy (H) collision force detection. Wait for 2 seconds to save the setting.

Brightness Adjustment

To adjust the control panel brightness, press and hold the 3 and 4 button for 2 seconds until "L", "n" or "H" is displayed. Use the up and down arrow buttons to select the desired brightness level.

Better Products for a Better Workspace Experience

We are dedicated to creating high-end ergonomic solutions for the office with top of the industry support.

Monitor Mounts

Mount ultrawide monitors and more with our clamp-on and wall mount solutions.
