

INSTRUCTION MANUAL

Light Kit for The Fauna Collection Tiger 31217

Thank You

For Purchasing this product. To give you the perfect hidden-line effect, we use severely thin aviation-grade wire with high tension and pressure tolerance. However, due to its thin nature, be careful not to cut through it as it might be susceptible to shearing during installation. Always be careful not to press brick pieces down on the wire.

Let's Get Started

if you face any challenges, please feel free to reach out via **support@gameofbricks.eu** Please note that we offer 2 years of free light kit maintenance.

Sound Guide

SOUND GUIDE

(only if sound not works or crackly)

#1 fix

If the sound is a continuous beeping (warning), please use [these batteries](#) or a power bank, or adjust your position.

#2 fix

Sound often is dependent on a network.

01

Check your network. Do you have internet and a power source?

02

Disconnect every thing from the laptop. Restart it in this state. Please find it by clicking this page.

03

Press the power button to turn on the laptop.

Press the power button to turn on the laptop.

Press the power button to turn on the laptop.

Press the power button to turn on the laptop.

Press the power button to turn on the laptop.

Press the power button to turn on the laptop.

Press the power button to turn on the laptop.

Press the power button to turn on the laptop.

Press the power button to turn on the laptop.

Press the power button to turn on the laptop.

Press the power button to turn on the laptop.

Press the power button to turn on the laptop.

Press the power button to turn on the laptop.

Press the power button to turn on the laptop.

Press the power button to turn on the laptop.

Press the power button to turn on the laptop.

Press the power button to turn on the laptop.

Press the power button to turn on the laptop.

Press the power button to turn on the laptop.

Press the power button to turn on the laptop.

Press the power button to turn on the laptop.

Press the power button to turn on the laptop.

Press the power button to turn on the laptop.

Press the power button to turn on the laptop.

Press the power button to turn on the laptop.

Press the power button to turn on the laptop.

Press the power button to turn on the laptop.

Press the power button to turn on the laptop.

Press the power button to turn on the laptop.

Press the power button to turn on the laptop.

Press the power button to turn on the laptop.

Press the power button to turn on the laptop.

Press the power button to turn on the laptop.

Press the power button to turn on the laptop.

Press the power button to turn on the laptop.

Press the power button to turn on the laptop.

Press the power button to turn on the laptop.

Press the power button to turn on the laptop.

Press the power button to turn on the laptop.

Press the power button to turn on the laptop.

Press the power button to turn on the laptop.

Press the power button to turn on the laptop.

Press the power button to turn on the laptop.

Press the power button to turn on the laptop.

Press the power button to turn on the laptop.

#3 fix

Please test the sound module by using our [step-by-step video guide](#). Please find out if you can still hear the sound.

Press the power button to turn on the laptop.

#4 fix

Please check if sound files are in the sound module (operation and software) by using our [step-by-step video guide](#).

Now you can try it by connecting the sound module using your USB cable. Please do not connect your phone to a PC. There is a risk that the data will be lost.

Check your network. Do you have internet and a power source?

The main questions are:

- 01 Did you change the sound module and the sound was still working properly?
- 02 Did you connect the power source to the laptop?
- 03 Did your sound module work properly?
- 04 Did it work sound files in your sound module?
