MODEL: SLT-2203

Customer Service: (877) 246-0990 – ApplianceSupport@monchateau.us

FEATURES

- 1200 Watts of Power
 - Smoothies, Juices, Purées, Food Prep and More
 - 5 Speed Setting
 - 6 Stainless Steel Sharp Blades
 - 72-oz. Blender Jar
 - Blender Lid Lock
 - ON/OFF Switch
- Pulse/Clean Switch
 - To achieve desired texture at highest speed
 - Quickly clean Blender Jar
 - Preset Function Panel
 - Grind
 - Puree
 - Ice Crush
 - Milk Shake
 - Smoothie

QUICK START GUIDE

- 1 Before first use, hand wash with mild soap Removable Measuring Cup, Lid, Jar and Blades with a brush. **WARNING: Be Careful, blades are very sharp!** Rinse well all parts and dry.

2 Place Blender Base on a sturdy horizontal surface.

3 Assemble all parts washed in step 1 onto Blender Base. Make sure Lid is locked in place by turning it into the slot on the handle.

4 Insert power plug into power outlet.
5. Remove Lid, add liquid ingredients first, then follow with solid ingredients in small pieces, then frozen ingredients.

NOTE: This will provide more consistent blending and prevent unnecessary stress on the motor. Food to liquid ratio is 2:3 and the amount of ingredients should NOT exceed the MAX level as indicated on the Jar.

WARNING: Always remove the core from fruits, vegetables and cut into small pieces. Never use boiling, hot liquids, or run the blender empty.
- 6 Place Measuring Cup and Lid back on the Blender Jar.

NOTE: The Measuring Cup can be removed to add ingredients to Blender Jar. Make sure Blender is “OFF” before removing Measuring Cup.

QUICK START GUIDE

7. Press the ON/OFF Switch to turn “ON” the blender, then choose from the 5 speeds or 5 preset function controls; Grind, Puree, Ice Crush, Milk Shake or Smoothie. While blending, press the Pulse/Clean Switch (max 3 seconds) to increase to highest speed and release switch. Turn the knob on the Function Panel to “OFF” icon  and press the ON/OFF Switch to “OFF” to stop the blender’s operation.

WARNING: Do not run the blender for more than 6 minutes at a time, and always wait until the unit is cooled to room temperature before performing next operating cycles.

TROUBLESHOOTING

QUESTIONS	POSSIBLE CAUSES	SOLUTIONS
Why is the blender not turning “ON”?	After selecting the desired function, the “ON/OFF” switch is not pressed.	Press “ON/OFF” switch and select desired function.
Why is there an undesirable odor coming from the blender?	It is a normal condition when the blender is used for the first time and the motor is running.	After several times of using the blender, the odor will go away. If it does not, please contact our customer service department, or go directly to our company’s maintenance point for inspection.
	The blender is overloaded.	1. Check the processing volume and blending time. 2. Check whether the voltage is the correct one.
	No ingredients are placed in the blender jar.	Check whether there are ingredients in the blender jar.
Why are there abnormal sounds coming from the blender?	The blender jar is not installed correctly.	Turn off the blender and check whether the blender jar is installed correctly.
	There is a foreign object inside the blender jar.	Turn off the blender and check whether there are any foreign objects inside the blender jar.
