Usage Instructions

- 1. Pull out the metal tube and screw off the coil cap
- 2. With dab tool put your desired concentrate oil onto coil. (Don't stab the coils and don't overfill or 'flood' the coil).
- 3. Assemble the Yocan Torch XL portable dome-less e-nail.
 4. Attach the Yocan Torch XL to your glass (fits 14mm & 18mm ground glass joints).
 5. Power on the Yocan Torch XL portable dome-less e-nail with 5 quick clicks of the power button at the
- top of the battery.

 (White light will flash 5 times and the Yocan Torch XL is on standby)
- Adjust voltage: Press the power button with 3 clicks.
 White light indicates 3.2v, Blue light indicates 3.7v, Green light indicates 4.2v.

- 7. Preheat: Press the power button with 2 clicks to start preheat, Blue and White lights blink for 10 seconds. To stop preheat, press the power button with another 2 clicks.

 8. To start the device, press the power button with 1-click (light is on), inhale. To stop the device, press the power button with 2-click (light is on), inhale. To stop the device, press the power button with another 1-click (light is out). If you want a fully hit, press the airflow button and release it before you stop inhaling
- 9. Enjoy your Yocan Torch XL
