STANDBY AND PRIME POWER GENERATORS

FOREWORD

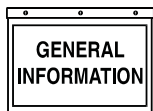

This Quick Reference Parts Guide was created to assist the Generac Power Systems dealer and service technician with basic information related to Generac Power Systems service. It is intended for informational purposes only and is not designed as and should not be used as a comprehensive, all-inclusive manual. Should you require additional materials or information, please order them through your normal source of distribution or contact your normal source of advisement.

Section 1 — General Information

GENERAC® POWER SYSTEMS

◆ DATA PLATE

Every generator set has a metal DATA PLATE that contains important information pertinent to the generator. The data plate, which can be found attached to the generator's lower connection box, lists the unit's serial number and its rated voltage, amps, wattage capacity, phase, frequency, rpm, power factor, etc.

GENERATOR SET DATA				MADE IN USA
TYPE CODE				
MODEL			SERIAL	
RATED KW		RATED KVA		UPSIZE ALT. KW
VOLTS			AMPS	/ /
PHASE		POWER FACTOR		HERTZ
ALT. R.P.M.		ENG. R.P.M.		PROD. DATE
GENERAC POWER SYSTEMS, INC. WAUKESHA, WI.				
CLASS ☐ ROTOR ☐ STATOR WINDING INSULATION AT 40° AMBIENT				

◆ DATA CARD

A DATA CARD is also affixed to the lower connection box of each standby generator set. A second, matching card is located under the control panel cover. Like the data plate, this card also contains valuable information pertaining to the generator. When requesting information, ordering replacement parts, asking for service, etc., the information from this card is needed (see page 19 for example of generator set data card). It provides the following information:

- Generator Model Number
- Date of Manufacture
- Generator Identification Code
- Generator Assembly Groups

NOTE:

The above is a generic representation of a data card. For actual information related to this particular model, please refer to the “construction document” located at the end of this manual, or to the data cards affixed to the unit.

► Generator Model Number

This number is the key to numerous engineering and manufacturing details pertaining to your unit. Always supply this number when requesting service, ordering parts or seeking information.

► Identification Code

Use this code to obtain important information about the generator. For example, if the code is ...

SD 100 - A 1 6 5.0 D 18 CB Y N C

– identify the generator as follows:

- SD – Standby diesel generator (“SG” indicates a standby gaseous fuel unit).
- 100 – Rated output is 100,000 watts (100 kW).
- A – Voltage code (see “Voltage Codes” on this page).
- 1 – Indicates single-phase unit (3 – indicates three-phase unit).
- 6 – Indicates unit rated 60 Hertz (Hz) (5 – indicates 50 Hz).
- 5.0 – Engine is 5.0 liter (304 cubic inches).
- D – Unit has diesel fuel system (“N” indicates natural gas; “L” indicates LP Liquid Withdrawal; “V” indicates LP Vapor Withdrawal).
- 18 – Alternator rpm rating (1,800 rpm); “36” indicates 3,600 rpm.
- C – Unit has an option “C” control panel (option “D” and “E” panels also are available).
- B – Indicates a brushless unit (“D” indicates a direct excited unit with brushes and slip rings; “P” indicates a permanent magnet excitation).
- Y – Unit is equipped with a standard enclosure (“N” indicates no enclosure; “S” indicates unit has an acoustic enclosure).
- N – Unit does not have an exhaust muffler (“Y” indicates a muffler has been mounted; “L” indicates a muffler has been shipped loose with the unit).
- Y – Unit has a main line circuit breaker (“C” indicates unit has a UL-listed circuit breaker; “N” indicates no circuit breaker has been mounted).

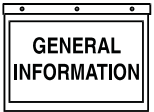

► Groups and Assembly Numbers

The data card lists the groups and corresponding assembly numbers for each unit. The assembly numbers refer to exploded view drawing numbers that are applicable to the specific generator model. These drawings are located in the back half of this manual.

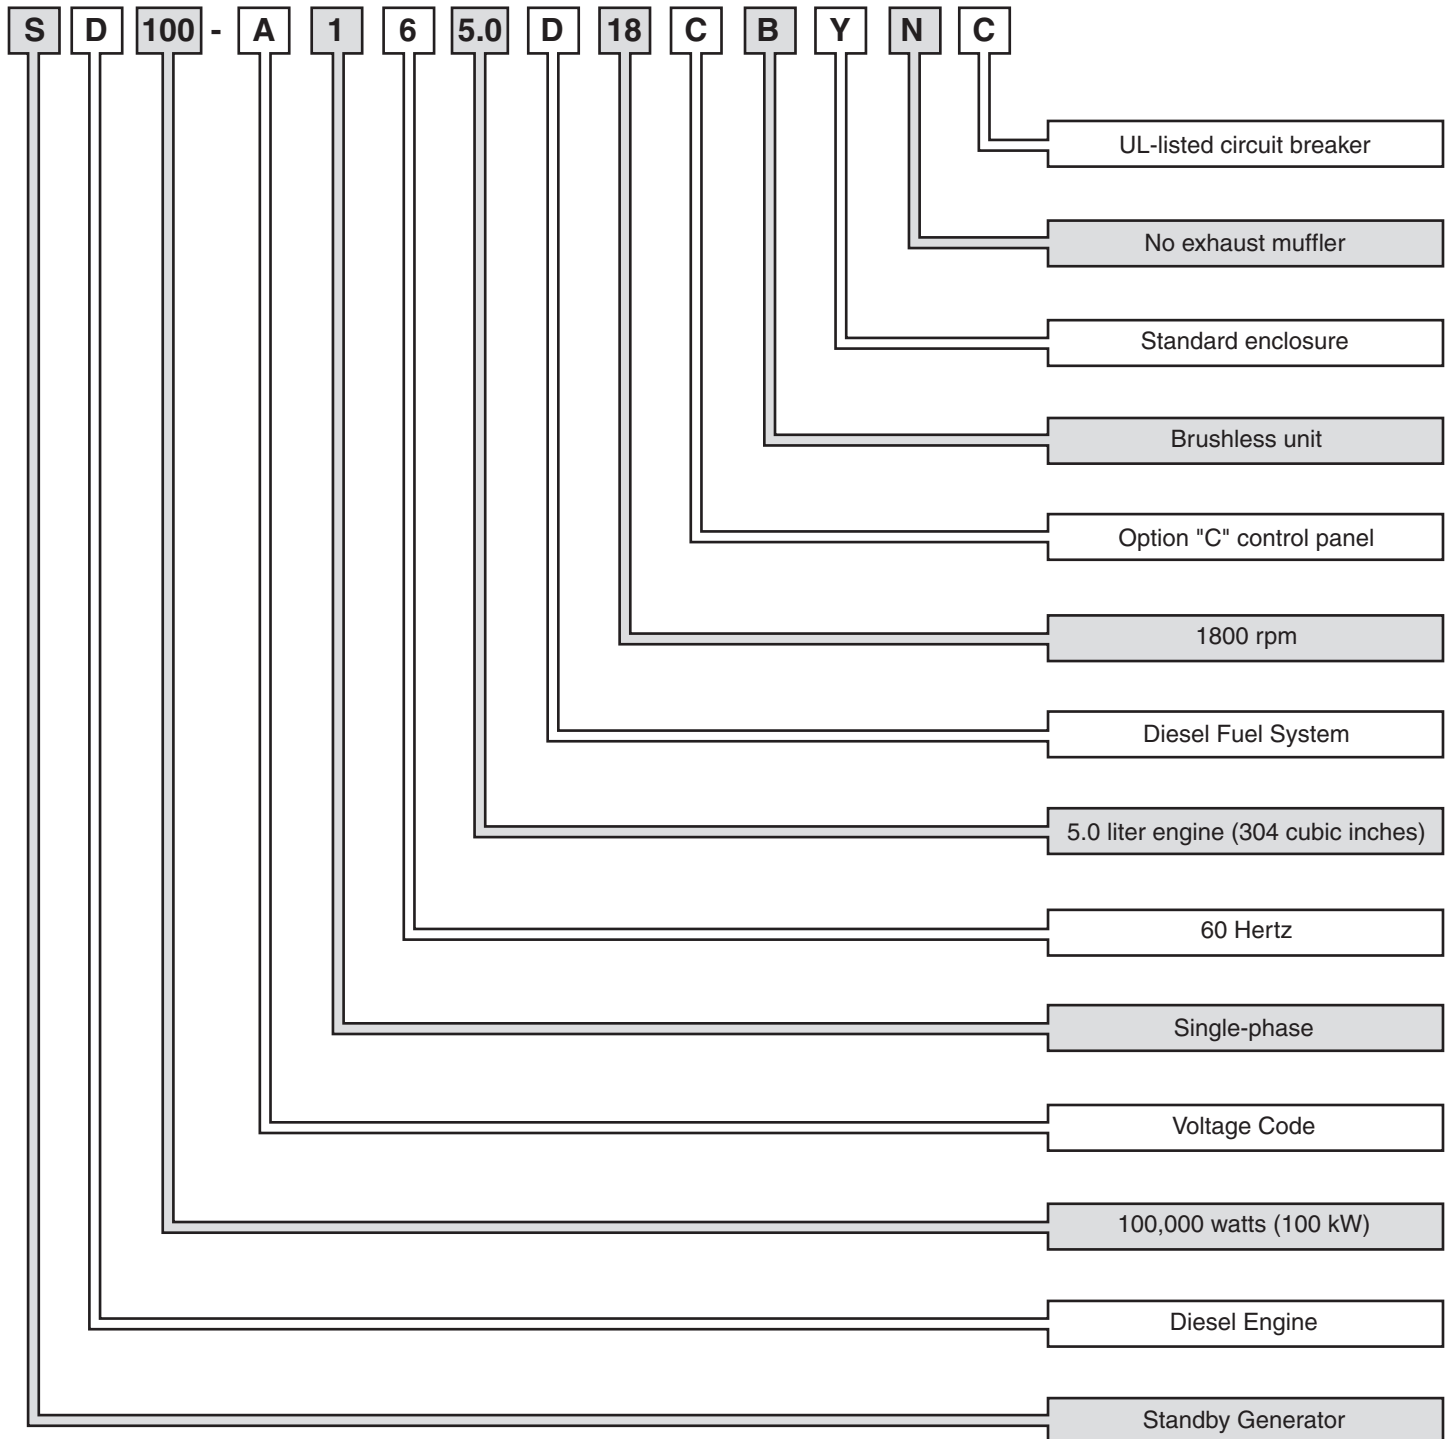

► Voltage Codes

The identification code letter following the unit's kilowatt rating is the generator's “voltage code.” Any one of the following voltage codes may be listed.

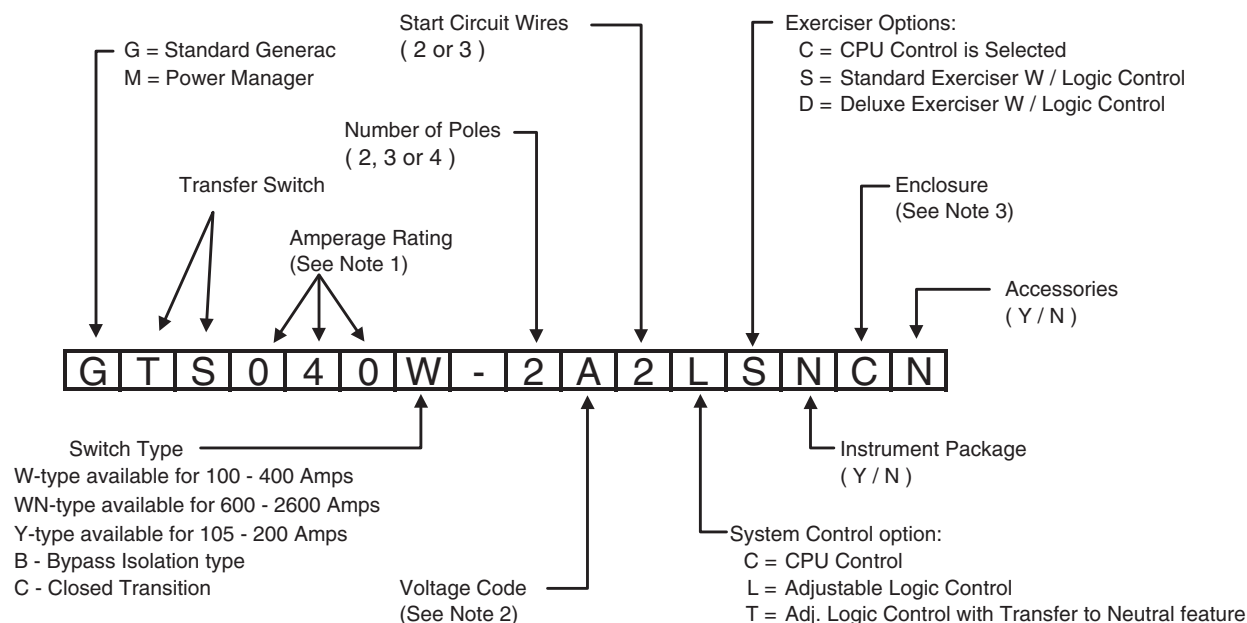

- A – 120/240 volts, single-phase, four-lead, 60 Hz
- D – 120/240 volts, single- and three-phase, 12-lead, 60 Hz
- G – 120/208 volts, three-phase, 12-lead, 60 Hz Broad Range
- J – 120/240 volts, three-phase, 12-lead, 60 Hz Broad Range
- K – 277/480 volts, three-phase, 12-lead, 60 Hz Broad Range
- L – 346/600 volts, three-phase, six-lead, 60 Hz
- M – 110/220 volts, single-phase, four-lead, 50 Hz
- N – 115/200 volts, three-phase, 12-lead, 50 Hz Broad Range
- P – 100/200 volts, three-phase, 12-lead, 50 Hz Broad Range
- R – 231/400 volts, three-phase, 12-lead, 50 Hz Broad Range
- S – 277/480 volts, three-phase, six-lead, 50 Hz

Identification Code Example

Type Code Legend for Configured Transfer Switches

Note 1:

Switch amperage rating is displayed value multiplied by 10
 e.g. 040 = 400 amps
 260 = 2600 amps

Note 2:

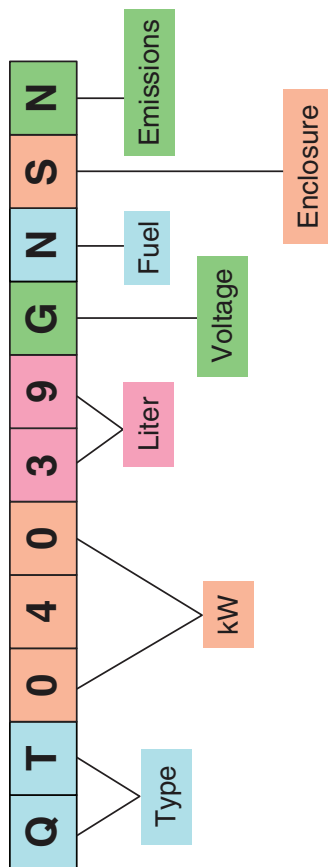

Voltage Code:

- A = 120 / 240 VAC (Single Phase / 3 Lead)
- D = 120 / 240 VAC (Single or Three Phase / 12 Lead)
 (Full capacity single or three phase; cannot be reconnected for 277/480V)
- G = 120 / 208 VAC (Three Phase / 12 Lead)
- J = 120 / 240 VAC (Three Phase / 12 Lead)
- K = 277 / 480 VAC (Three Phase / 12 Lead)
- L = 600 VAC (Three Phase / 3 Lead)
- M = 110 / 220 VAC (Single Phase / 3 Lead)
- N = 115 / 200 VAC (Single Phase / 12 Lead)
- P = 100 / 200 VAC (Three Phase / 12 Lead) (Adjustable to 240V)
- R = 231 / 400 VAC (Three Phase / 12 Lead) (Adjustable to 380V or 416V)
- S = 480 VAC (Three Phase / 3 Lead)
- X = Full Capacity All Voltages (Only with Direct Excitation)

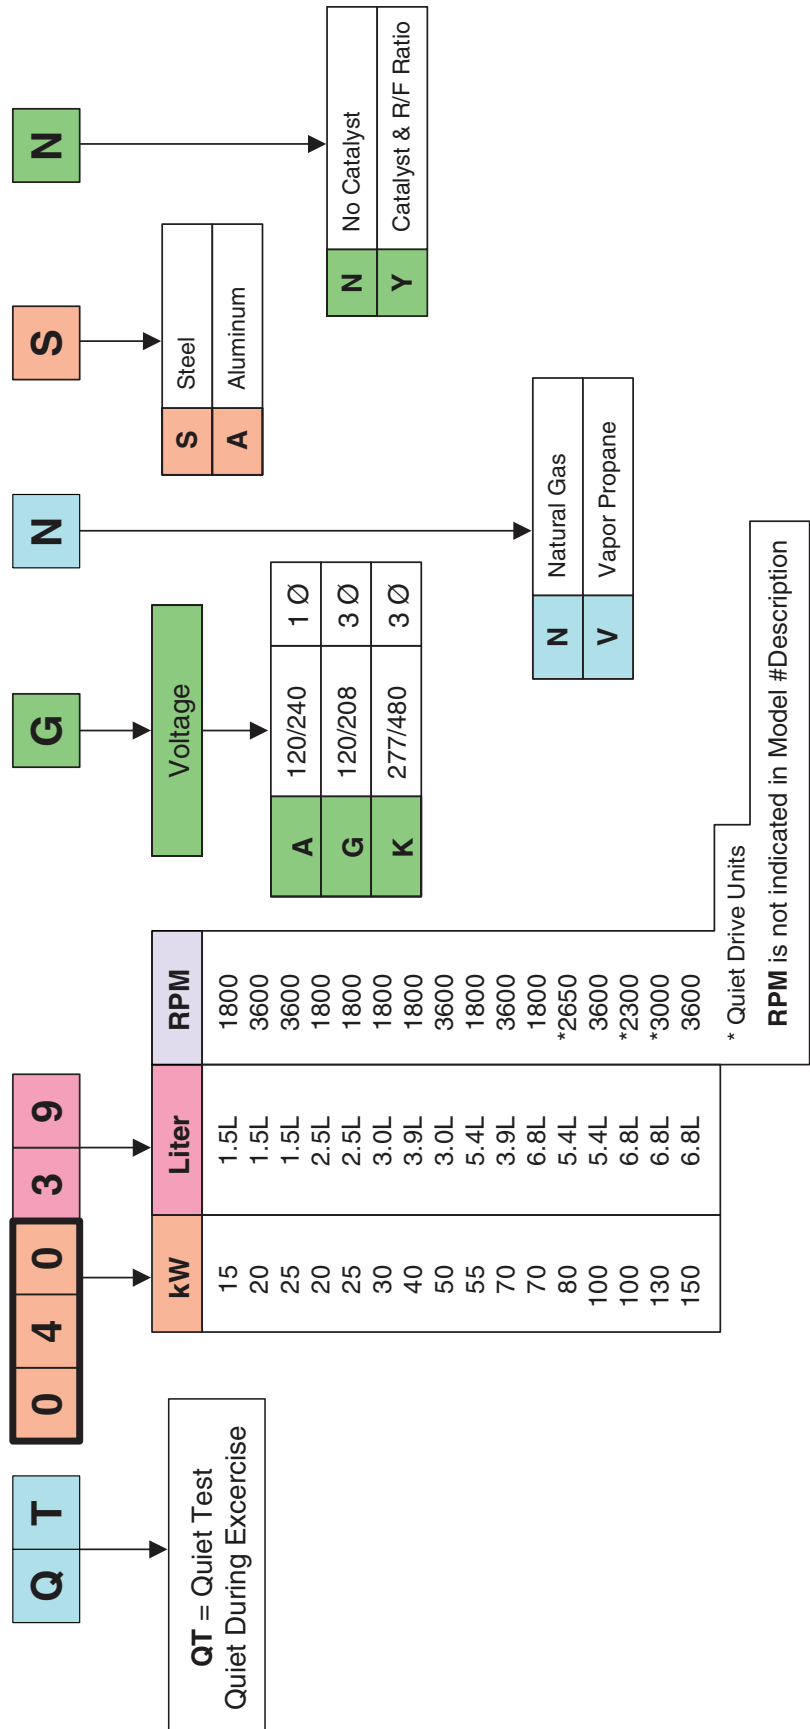

Note 3:

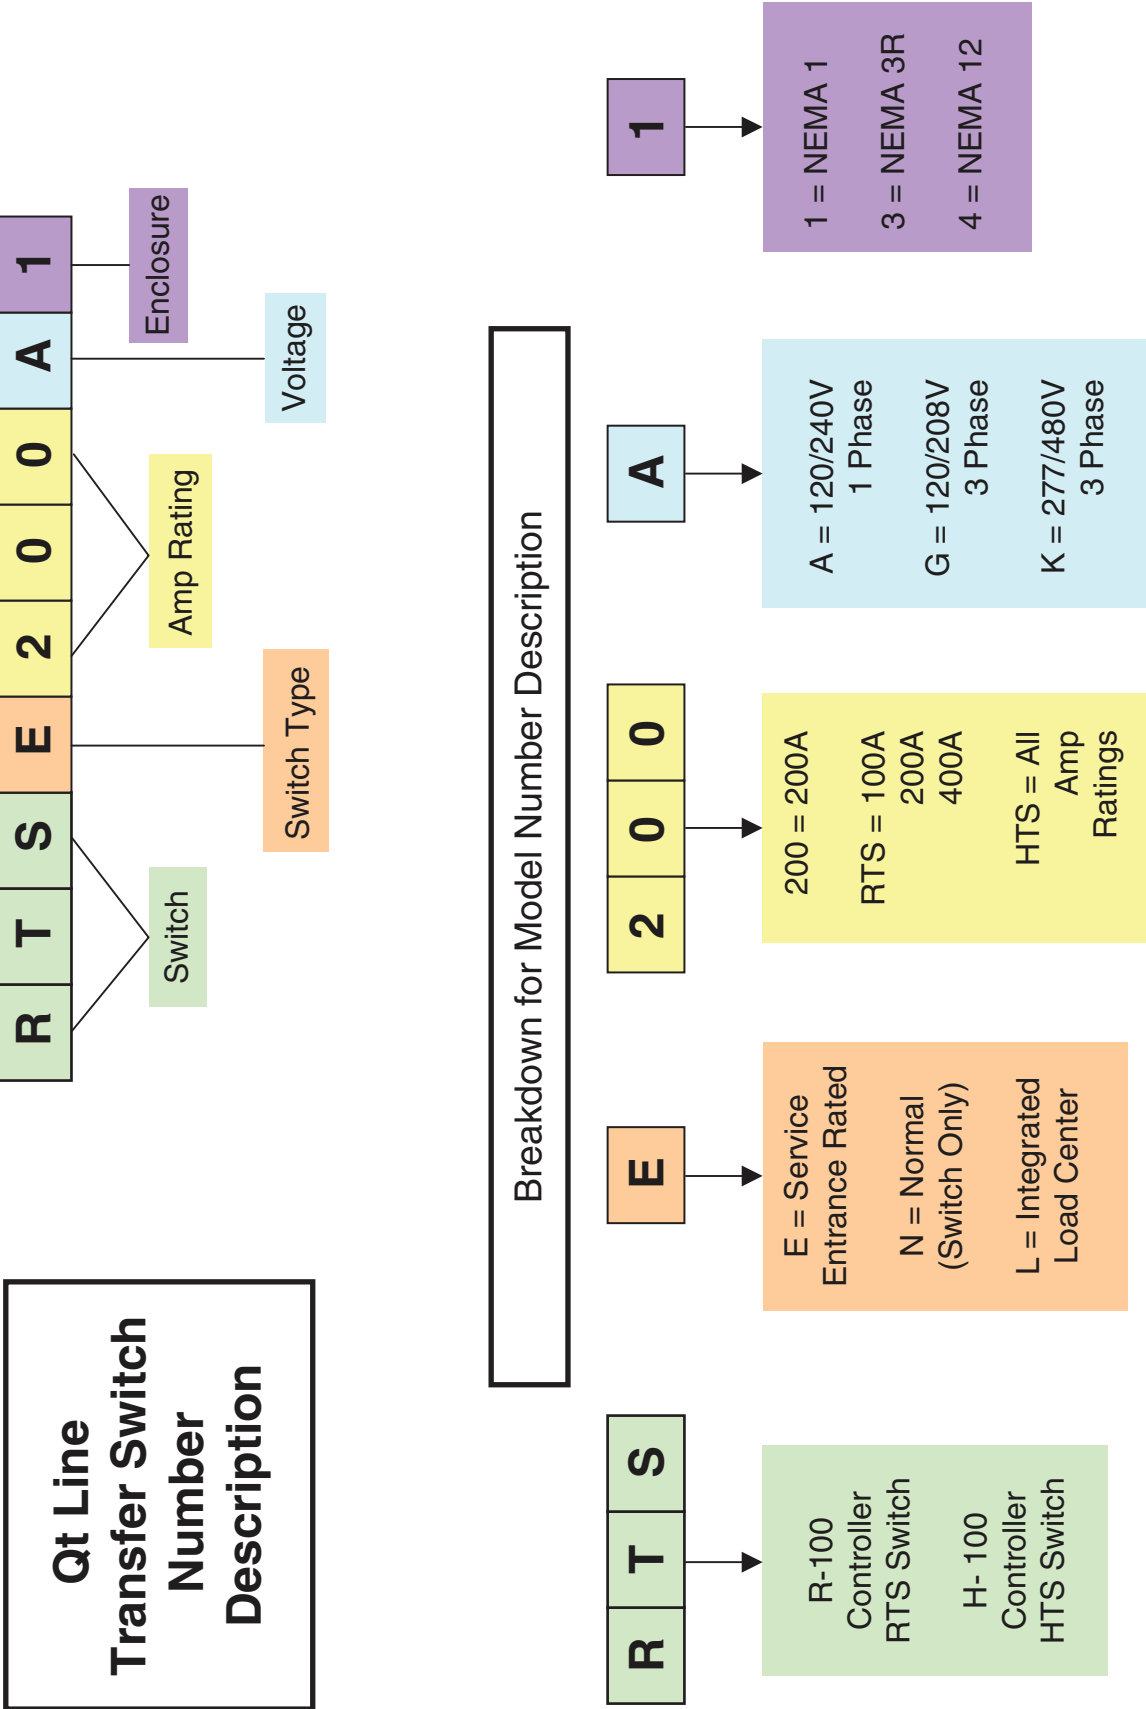

Enclosure:

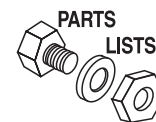

- A = NEMA 1
- B = NEMA 12
- C = NEMA 3R
- D = NEMA 12 W / Instrument Pkg.
- R = NEMA 4 - Aluminum
- F = NEMA 4X - Stainless Steel

Gas Pressure Tester

- Tester is rated from 0-35 inches water column, including a 1/8 inch NPT barbed fitting and hose.
 - This will fit all air cooled and liquid cooled gaseous units up to 40 kW.
 - Mounted in its own durable plastic case, with storage room for larger fittings and hardware.
- (Customer must supply fittings and hardware to allow testing of larger gaseous units above 40 kW).

NOTE: This tester is for low pressure Natural Gas & LP Vapor Systems only!
