About the Company

ZKTeco is one of the world's largest manufacturer of RFID and Biometric (Fingerprint, Facial, Finger-vein) readers. Product offerings include Access Control readers and panels, Near & Far-range Facial Recognition Cameras, Elevator/floor access controllers, Turnstiles, License Plate Recognition (LPR) gate controllers and Consumer products including battery-operated fingerprint and face-reader Door Locks. Our security solutions are multi-lingual and localized in over 18 different languages. At the ZKTeco state-of-the-art 700,000 square foot ISO9001-certified manufacturing facility, we control manufacturing, product design, component assembly, and logistics/shipping, all under one roof.

The founders of ZKTeco have been determined for independent research and development of biometric verification procedures and the productization of biometric verification SDK, which was initially widely applied in PC security and identity authentication fields. With the continuous enhancement of the development and plenty of market applications, the team has gradually constructed an identity authentication ecosystem and smart security ecosystem, which are based on biometric verification techniques. With years of experience in the industrialization of biometric verifications, ZKTeco was officially established in 2007 and now has been one of the globally leading enterprises in the biometric verification industry owning various patents and being selected as the National High-tech Enterprise for 6 consecutive years. Its products are protected by intellectual property rights.

About the Manual

This manual introduces the installation procedure of ZKBio Media software.

All figures displayed are for illustration purposes only. Figures in this manual may not be exactly consistent with the actual products.

Document Conventions

1 ZKBio Media-Software

1.1 Software Requirement

Feature	Specifications
Support Operation System	Windows 7/ 8/ 8.1/ 10 server 2016/ 2019
Database	Postgresql
Suggested Browsers	Chrome
CPU	Dual core processor with speed of 4GHz or faster
RAM	4GB RAM available or above
Storage	50GB available space or above (NFTS recommended)
Monitor Resolution	1024*768 or above

1.2 Installation Steps

Step 1: Double-click the **step.exe** file and select run as administrator. Select the set language to chose during the installation. Click **OK** to start the installation progress.

Step 2: Select the radio button to accept the agreement and privacy policy, then click **Next** to continue.

Step 3: Select the installation path and click **Next** to continue

Note:

- User can select the installation path.
- The software requires at least 914.4 MB space, so make sure that the installation path has enough memory.

Step 4: Select additional shortcuts, and click **Next**.

Step 5: Click **Install** to start installing the software.

Click **Cancel** to quit the installation.

Step 6: After installation, click **Finish** and restart the computer to complete the installation.

2 ZKBio Media-Firmware

2.1 Installation Steps

Step 1: Unzip the ZKBioMedia-XXX file.

Step 2: Double click **zk_install_keep_safe_with_tcpip.bat** file.

Step 3: Input the devices IP address in the command window, and then press enter.

Step 4: Wait for the installation to complete.

2.2 Activation Steps

2.2.1 With U DISK

Step 1: To get SN

Go to ZKBio Media Firmware and select **[Device Setting] > [Active State]**, and then click **“Generate serial number”**, it will generate a **“DeviceSn”** file and saved in U disk.

Step 2: Send SN to Business

- The SN file is saved in the U disk root directory **“ZKLicCheck”** folder.

Note:

- Supports all U disk formats for Android devices with a system version of less than 6.0 or ZKTeco devices with a system version of 6.0 or higher.
- It supports FAT32 U disk only on devices with Android 6.0 or higher operating systems.

Step 3: Change the license name obtained from business to ZKLicenseManager.lic and save it in the DeviceSn.txt file path.

Step 4: Insert the U disk to the device, and then go to firmware menu, select **[Device Setting] > [Active State]** and click **“Activation”**. It will show as activation was successful.

2.2.2 Without U Disk

Step 1: To get SN

Go to ZKBio Media Firmware and select **[Device Setting]->[Active State]** and click **“Generate serial number”**, it will generate a **“DeviceSn”** file and saved in explorer.

Step 2: Send SN to Business

The SN file is saved in **ZKLicCheck** folder in device explorer, send this **“DeviceSn”** to business.

Step 3: Change the license name obtained from business to **“ZKLicenseManager.lic”** and save it in the ZKLicCheck folder.

Step 4: Go to firmware menu of **[Device Setting] > [Active state]**, click "**Activation**". It will show as activation was successful.

3 Program Publish Steps

Step 1: Server Setting

Long press the upper left corner to enter the setting page, click **Server Setting** to input server ip, server port, and file download port.

Server Setting

Device Name: 0017611306E2

Server IP: 192.168.0.150

Server Port: 9999

File Download Port: 10001

Save

Step 2: Go to software, click **[Device Management] > [Device List]** menu to enter the device list interface. Select a record, click the **Authentication** Button to enter the authentication interface, improve the device information, and then click **OK** Button, as shown in the following figure:

Device Certification

* Device Name: DC6294037419 Device Code: DC6294037419

Department: ZKTeco * Group Name: Please input the Group Name

* Device Type: Unknown Location: Please input the Device Address

Latitude and Longitude: 0 Resolution: 1920*1080

MAC Address: DC6294037419 System Version: 6.0

IP Address: 10.0.10.145

Remarks: Please input the remark

Cancel Authenticate

Step 3: Add Material

In **[Program management] > [Material management]**, click **Add** to add program material. Select the material group, and then select the material to be uploaded and click **OK** to start uploading the material.

Step 4: Create Program

- In **[Program management] > [Program Creation]**, click **Add** to create program. Select program type and group name, input program name and resolution, and then click **OK** to enter the program design interface.

Resolution: The width and height of the program must be consistent with the resolution of the playback device (if not, the program will be displayed beyond the scope of the screen or the lower right part of the screen will be blank).

- In edit page to create program, the program supports text, pictures, videos, music, time, live broadcast, documents, buttons and other components. It can be divided and combined freely.

Step 5: Publish Program

- Click the **[information Publish] > [Schedule Publish]** menu to enter the interface, and click the **Add** button. Input the schedule name and select the release type (play priority: **[Insert] > [carousel] > [Default]**), date interval, time interval, download time, repetition mode and play mode. After filling the basic information, click **Next**.
