123 Robot

Custom manufactured in China for Innovation First Trading S.A.R.L., distributed in the U.S.A. by Mouser Electronics, Central Point, Oregon 97323 U.S.A., 877 W. Park Street, Suite 100, Dallas, TX 75201, and in Canada by Innovation First Trading Inc., 1000 Shenheng Li, Suite 1906, Shenzhen, China 518129. © 2010 Innovation First Trading S.A.R.L., Paris Logistic Building Bld, 3434 - Quai des Batignolles, 75017 Paris, France. © 2010 Innovation First Trading LLC, 6725 W.W.M. 1570, Greenway TX 75462, U.S.A.

CAUTION

- Do not burn, Do not open, Do not crush, heat above 60°C or incinerate.
- Do not recharge battery pack that shows signs of bulging or corrosion.
- Do not expose to water.
- Must be disposed of properly.

Do not charge batteries under direct sunlight without adult supervision.

Do not disassemble or modify.

Do not short circuit or damage.

Connect the equipment into an outlet on a circuit different from that to which the television set is connected.

Consult the dealer or an experienced technician if you have any questions.

Warning: Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

FCC Statement: This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This device contains license-exempt transmitter(s) (see below) operating in the 2.4 GHz Industrial, Scientific and Medical (ISM) band. Operation is subject to the following two conditions:

1. This equipment may not cause interference.

2. This device must accept any interference that causes undesired operation.

L'emetteur/récepteur exempt d'autorisation contient dans la présente appareil conforme aux normes de la FCC et de l'IC. L'opération est soumise aux deux conditions suivantes :

1. Ce dispositif ne doit pas causer d'interférences nuisibles.

2. Ce dispositif doit accepter toute interférence reçue, y compris celle qui peut entraîner un fonctionnement indésirable.

Ce dispositif contient des composants électroniques non autorisés à la vente au détail.

* Use of 12V 1800mAh LiPo Battery by Maxon®. See instructions in the box.

* Charge used with the 12V 1800mAh LiPo battery can damage the cell. If the damage has been repaired, the cell must not be charged again.

* Never use damaged batteries.

* Do not use the robot while it is being charged.

* Always use the robot on a flat surface.

* Never leave the robot unattended.

* Never leave the robot in direct sunlight.

* Never leave the robot near water.

* Never leave the robot near fire.

* Never leave the robot near heat sources.

* Never leave the robot near sharp objects.

* Never leave the robot near strong magnetic fields.

* Never leave the robot near strong electrical fields.

* Never leave the robot near strong light sources.

* Never leave the robot near strong air currents.

* Never leave the robot near strong magnetic fields.

* Never leave the robot near strong electrical fields.

* Never leave the robot near strong light sources.

* Never leave the robot near strong air currents.

* Never leave the robot near strong magnetic fields.

* Never leave the robot near strong electrical fields.

* Never leave the robot near strong light sources.

* Never leave the robot near strong air currents.

* Never leave the robot near strong magnetic fields.

* Never leave the robot near strong electrical fields.

* Never leave the robot near strong light sources.

* Never leave the robot near strong air currents.

* Never leave the robot near strong magnetic fields.

* Never leave the robot near strong electrical fields.

* Never leave the robot near strong light sources.

* Never leave the robot near strong air currents.

* Never leave the robot near strong magnetic fields.

* Never leave the robot near strong electrical fields.

* Never leave the robot near strong light sources.

* Never leave the robot near strong air currents.

* Never leave the robot near strong magnetic fields.

* Never leave the robot near strong electrical fields.

* Never leave the robot near strong light sources.

* Never leave the robot near strong air currents.

* Never leave the robot near strong magnetic fields.

* Never leave the robot near strong electrical fields.

* Never leave the robot near strong light sources.

* Never leave the robot near strong air currents.

* Never leave the robot near strong magnetic fields.

* Never leave the robot near strong electrical fields.

* Never leave the robot near strong light sources.

* Never leave the robot near strong air currents.

* Never leave the robot near strong magnetic fields.

* Never leave the robot near strong electrical fields.

* Never leave the robot near strong light sources.

* Never leave the robot near strong air currents.

* Never leave the robot near strong magnetic fields.

* Never leave the robot near strong electrical fields.

* Never leave the robot near strong light sources.

* Never leave the robot near strong air currents.

* Never leave the robot near strong magnetic fields.

* Never leave the robot near strong electrical fields.

* Never leave the robot near strong light sources.

* Never leave the robot near strong air currents.

* Never leave the robot near strong magnetic fields.

* Never leave the robot near strong electrical fields.

* Never leave the robot near strong light sources.

* Never leave the robot near strong air currents.

* Never leave the robot near strong magnetic fields.

* Never leave the robot near strong electrical fields.

* Never leave the robot near strong light sources.

* Never leave the robot near strong air currents.

* Never leave the robot near strong magnetic fields.

* Never leave the robot near strong electrical fields.

* Never leave the robot near strong light sources.

* Never leave the robot near strong air currents.

* Never leave the robot near strong magnetic fields.

* Never leave the robot near strong electrical fields.

* Never leave the robot near strong light sources.

* Never leave the robot near strong air currents.

* Never leave the robot near strong magnetic fields.

* Never leave the robot near strong electrical fields.

* Never leave the robot near strong light sources.

* Never leave the robot near strong air currents.

* Never leave the robot near strong magnetic fields.

* Never leave the robot near strong electrical fields.

* Never leave the robot near strong light sources.

* Never leave the robot near strong air currents.

* Never leave the robot near strong magnetic fields.

* Never leave the robot near strong electrical fields.

* Never leave the robot near strong light sources.

* Never leave the robot near strong air currents.

* Never leave the robot near strong magnetic fields.

* Never leave the robot near strong electrical fields.

* Never leave the robot near strong light sources.

* Never leave the robot near strong air currents.

* Never leave the robot near strong magnetic fields.

* Never leave the robot near strong electrical fields.

* Never leave the robot near strong light sources.

* Never leave the robot near strong air currents.

* Never leave the robot near strong magnetic fields.

* Never leave the robot near strong electrical fields.

* Never leave the robot near strong light sources.

* Never leave the robot near strong air currents.

* Never leave the robot near strong magnetic fields.

* Never leave the robot near strong electrical fields.

* Never leave the robot near strong light sources.

* Never leave the robot near strong air currents.

* Never leave the robot near strong magnetic fields.

* Never leave the robot near strong electrical fields.

* Never leave the robot near strong light sources.

* Never leave the robot near strong air currents.

* Never leave the robot near strong magnetic fields.

* Never leave the robot near strong electrical fields.

* Never leave the robot near strong light sources.

* Never leave the robot near strong air currents.

* Never leave the robot near strong magnetic fields.

* Never leave the robot near strong electrical fields.

* Never leave the robot near strong light sources.

* Never leave the robot near strong air currents.

* Never leave the robot near strong magnetic fields.

* Never leave the robot near strong electrical fields.

* Never leave the robot near strong light sources.

* Never leave the robot near strong air currents.

* Never leave the robot near strong magnetic fields.

* Never leave the robot near strong electrical fields.

* Never leave the robot near strong light sources.

* Never leave the robot near strong air currents.

* Never leave the robot near strong magnetic fields.

* Never leave the robot near strong electrical fields.

* Never leave the robot near strong light sources.

* Never leave the robot near strong air currents.

* Never leave the robot near strong magnetic fields.

* Never leave the robot near strong electrical fields.

* Never leave the robot near strong light sources.

* Never leave the robot near strong air currents.

* Never leave the robot near strong magnetic fields.

* Never leave the robot near strong electrical fields.

* Never leave the robot near strong light sources.

* Never leave the robot near strong air currents.

* Never leave the robot near strong magnetic fields.

* Never leave the robot near strong electrical fields.

* Never leave the robot near strong light sources.

* Never leave the robot near strong air currents.

* Never leave the robot near strong magnetic fields.

* Never leave the robot near strong electrical fields.

* Never leave the robot near strong light sources.

* Never leave the robot near strong air currents.

* Never leave the robot near strong magnetic fields.

* Never leave the robot near strong electrical fields.

* Never leave the robot near strong light sources.

* Never leave the robot near strong air currents.

* Never leave the robot near strong magnetic fields.

* Never leave the robot near strong electrical fields.

* Never leave the robot near strong light sources.

* Never leave the robot near strong air currents.

* Never leave the robot near strong magnetic fields.

* Never leave the robot near strong electrical fields.

* Never leave the robot near strong light sources.

* Never leave the robot near strong air currents.

* Never leave the robot near strong magnetic fields.

* Never leave the robot near strong electrical fields.

* Never leave the robot near strong light sources.

* Never leave the robot near strong air currents.

* Never leave the robot near strong magnetic fields.

* Never leave the robot near strong electrical fields.

* Never leave the robot near strong light sources.

* Never leave the robot near strong air currents.

* Never leave the robot near strong magnetic fields.

* Never leave the robot near strong electrical fields.

* Never leave the robot near strong light sources.

* Never leave the robot near strong air currents.

* Never leave the robot near strong magnetic fields.

* Never leave the robot near strong electrical fields.

* Never leave the robot near strong light sources.

* Never leave the robot near strong air currents.

* Never leave the robot near strong magnetic fields.

* Never leave the robot near strong electrical fields.

* Never leave the robot near strong light sources.

* Never leave the robot near strong air currents.

* Never leave the robot near strong magnetic fields.

* Never leave the robot near strong electrical fields.

* Never leave the robot near strong light sources.

* Never leave the robot near strong air currents.

* Never leave the robot near strong magnetic fields.

* Never leave the robot near strong electrical fields.

* Never leave the robot near strong light sources.

* Never leave the robot near strong air currents.

* Never leave the robot near strong magnetic fields.

* Never leave the robot near strong electrical fields.

* Never leave the robot near strong light sources.

* Never leave the robot near strong air currents.

* Never leave the robot near strong magnetic fields.

* Never leave the robot near strong electrical fields.

* Never leave the robot near strong light sources.

* Never leave the robot near strong air currents.

* Never leave the robot near strong magnetic fields.

* Never leave the robot near strong electrical fields.

* Never leave the robot near strong light sources.

* Never leave the robot near strong air currents.

* Never leave the robot near strong magnetic fields.

* Never leave the robot near strong electrical fields.

* Never leave the robot near strong light sources.

* Never leave the robot near strong air currents.

* Never leave the robot near strong magnetic fields.

* Never leave the robot near strong electrical fields.

* Never leave the robot near strong light sources.

* Never leave the robot near strong air currents.

* Never leave the robot near strong magnetic fields.

* Never leave the robot near strong electrical fields.

* Never leave the robot near strong light sources.

* Never leave the robot near strong air currents.

* Never leave the robot near strong magnetic fields.

* Never leave the robot near strong electrical fields.

* Never leave the robot near strong light sources.

* Never leave the robot near strong air currents.

* Never leave the robot near strong magnetic fields.

* Never leave the robot near strong electrical fields.

* Never leave the robot near strong light sources.

* Never leave the robot near strong air currents.

* Never leave the robot near strong magnetic fields.

* Never leave the robot near strong electrical fields.

* Never leave the robot near strong light sources.

* Never leave the robot near strong air currents.

* Never leave the robot near strong magnetic fields.

* Never leave the robot near strong electrical fields.

* Never leave the robot near strong light sources.

* Never leave the robot near strong air currents.
