Mounting Kit

Factory Reset

Long press the reset button (Fig. 3) for 3 seconds to factory reset the sensor and put it into pairing mode.

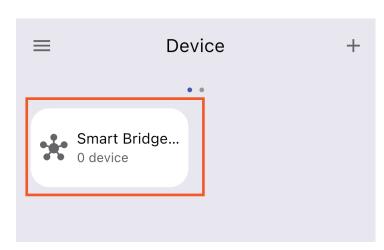

Mounting your Door Sensor

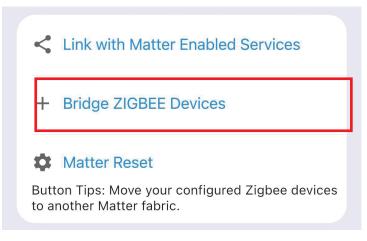

- 1. Make sure the installation surfaces are clean and dry before installation.
- 2. Attach Part A and B with double-sided tape separately, make sure the marks on two parts should be aligned and facing each other, the space in between should be less than 5/8 inches(16mm) when closed.

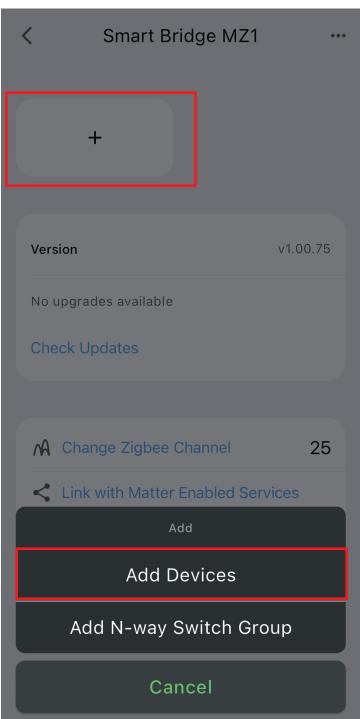

Setup with Smart Bridge MZ1

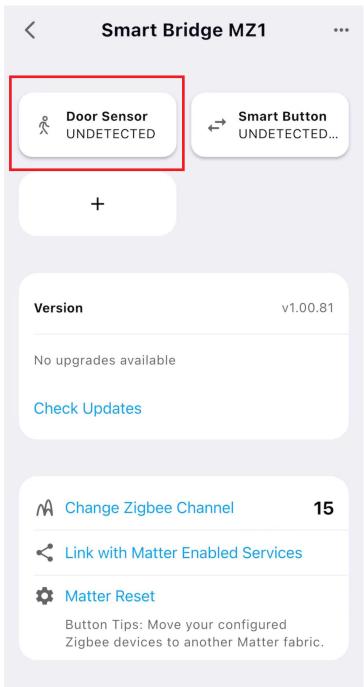

The Smart Bridge (sold separately) enables your Zigbee device to become Matter-compatible, allowing seamless integration with major Matter ecosystems like Apple Home, Google Home, Amazon Alexa, Samsung Smart-Things, and Home Assistant. By setting up your Zigbee sensor with the Smart Bridge, it transforms into a Matter compatible door sensor, enabling local control through Matter. Third Reality also offers the 3R-Installer APP, which lets you configure Zigbee sensor attributes such as default-on behavior and perform firmware updates.

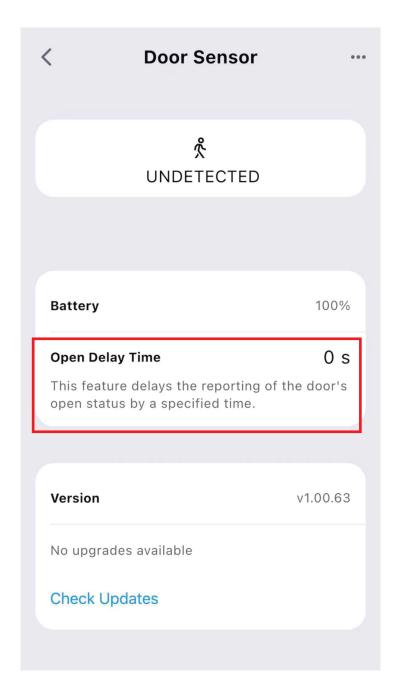

- 1. Ensure your bridge is already set up within your smart home system.
- 2. Press to open part A (Fig. 2), install the batteries and close the back cover, the LED indicator flashes rapidly in blue, the sensor is now ready for setup. If this sequence doesn't occur, long press the reset button (Fig. 3) for 3 seconds to factory reset the sensor and put it into pairing mode again.
- 3. Press the pinhole button on the bridge to activate Zigbee pairing mode. The Zigbee blue LED should start blinking.
- 4. The sensor will pair with the bridge, and a new device will appear in your smart home app, such as Google Home or Alexa.
- 5. Optionally, you can install the 3R-Installer APP and set the open delay time by smart bridge. Then, use the multi-admin feature in your smart home app to share permissions with the 3R-Installer APP.

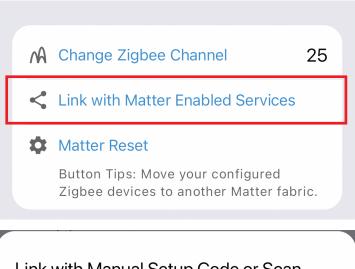

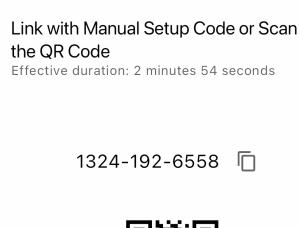

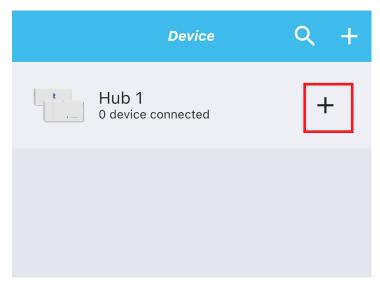

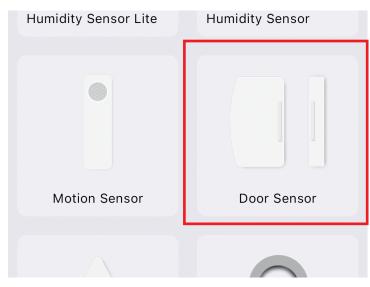

Done

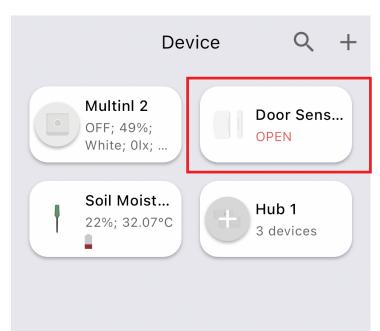

Setup with Third Reality Hub and SKILL

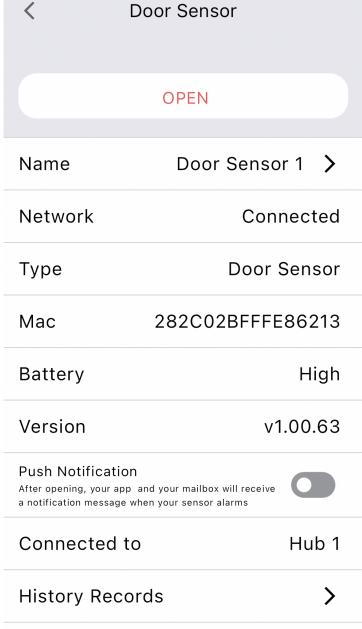

The Third Reality Hub (sold separately) allows you to control your device remotely via the Third Reality APP, making it a great option for smart home beginners or those without a system from major providers. Additionally, the Third Reality Cloud supports SKILL integration with Google Home or Amazon Alexa, enabling you to connect your device to these platforms. However, due to the potential for slow and unreliable Cloud-to-Cloud connections, we recommend using the Bridge solution if Google Home or Alexa is your primary smart home platform.

- 1. Ensure your hub is properly set up with Third Reality App.
- 2. Press to open part A (Fig. 2), install the batteries and close the back cover, the LED indicator flashes rapidly in blue, the sensor is now ready for setup. If this sequence doesn't occur, long press the reset button (Fig. 3) for 3 seconds to factory reset the sensor and put it into pairing mode again.
- 3. Open the Third Reality APP, press the "+" icon next to the hub, and select "Quick Pair."
- 4. The sensor will pair with your hub and appear in the Third Reality APP.
- 5. Optionally, you can enable the Third Reality SKILL in either the Alexa or Google Home app to enable Cloud-to-Cloud communication.

Setup with Compatible Third-Party Zigbee Hubs

Third Reality supports integration with various open Zigbee platforms, including Amazon Echo with built-in Zigbee, Samsung SmartThings, Home Assistant (with ZHA or Z2M), Homey and Hubitat. If you own any of these devices, you can pair the door sensor directly without the need for an additional bridge or hub.

- 1. Ensure your Zigbee Hub is already set up within your smart home system.
- 2. Press to open part A (Fig. 2), install the batteries and close the back cover, the LED indicator flashes rapidly in blue, the sensor is now ready for setup. If this sequence doesn't occur, long press the reset button (Fig. 3) for 3 seconds to factory reset the sensor and put it into pairing mode again.
- 3. Open your smart home app and follow the on-screen instructions to begin the Zigbee pairing process.
- 4. The door sensor will flash and then turn red, indicating it has successfully paired with the Zigbee hub.
- 5. You can now use your smart home app to turn the sensor on/off.

Pairing with SmartThings

App: SmartThings App

Devices: SmartThings Hub 2nd Gen(2015) and 3rd Gen(2018), Aeotec

Smart Home Hub.

Pairing steps:

- 1. Before pairing, check for updates to make sure the SmartThings Hub firmware is up to date.
- 2. Add SmartThings drivers for Third Reality Door Sensor
- Open this link in your PC browser. Log in your SmartThings Account.
 - https://bestow-regional.api.smartthings.com/invite/adMKr50EXzj9
- Click "Enroll" -- "Available Drivers" -- "Install" to install the device driver.

Install

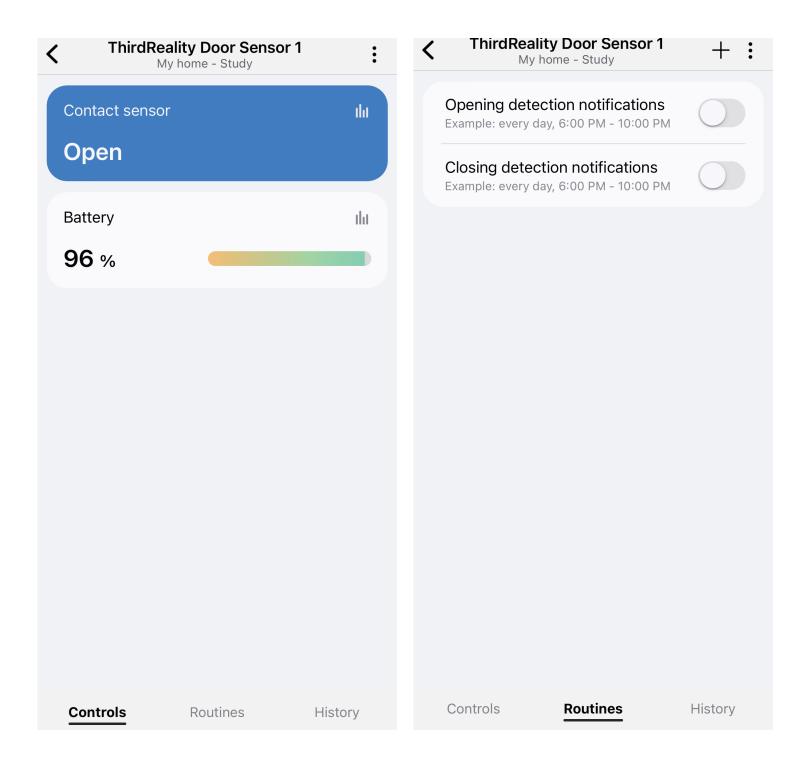

- 3. Press to open part A (Fig. 2), install the batteries and close the back cover, the LED indicator flashes rapidly in blue, the sensor is now ready for setup. If this sequence doesn't occur, long press the reset button (Fig. 3) for 3 seconds to factory reset the sensor and put it into pairing mode again.
- 4. Open your SmartThings App, tap "+" on the up right corner to "Add device" and then tap "Scan nearby".

5. The sensor will be added to your SmartThings hub in a few seconds.

6. Create routines to control connected devices.

Pairing with Amazon Alexa

App: Amazon Alexa

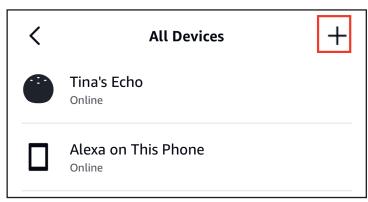

Devices: Echo speakers with built-in Zigbee hub, Echo 4th Gen, Echo Plus

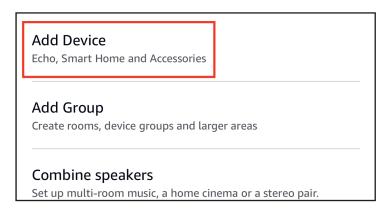

1st & 2nd Gen, Echo Studio

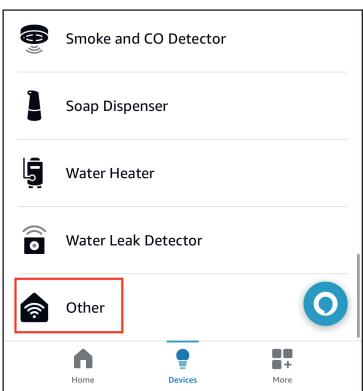

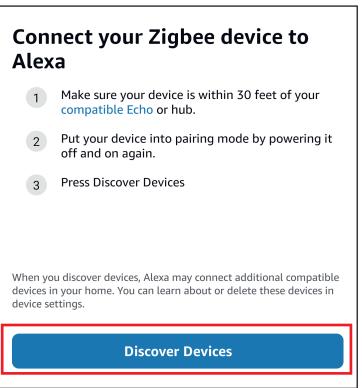

Pairing steps:

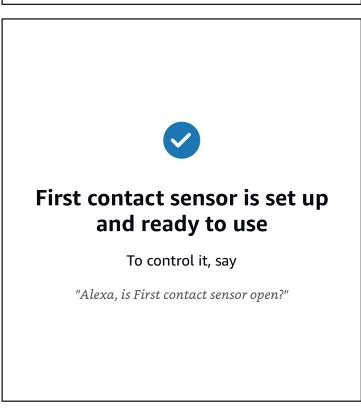

- 1. Ask Alexa to check for updates before pairing.
- 2. Press to open part A (Fig. 2), install the batteries and close the back cover, the LED indicator flashes rapidly in blue, the sensor is now ready for setup. If this sequence doesn't occur, long press the reset button (Fig. 3) for 3 seconds to factory reset the sensor and put it into pairing mode again.
- 3. Tab "+" in the Alexa App, choose "Other" and "Zigbee" to add device, the sensor will be added.
- 4. You can create routines with the device.

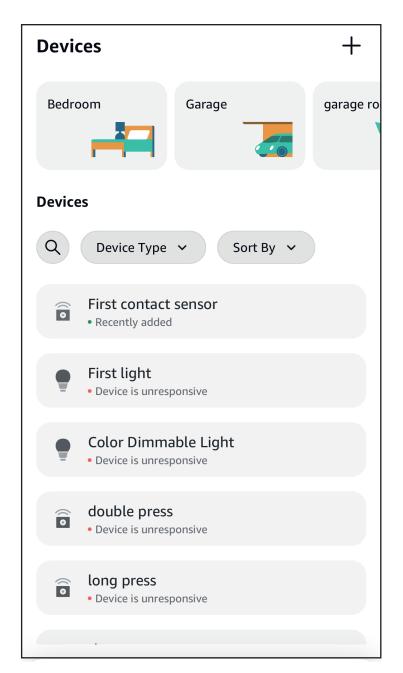

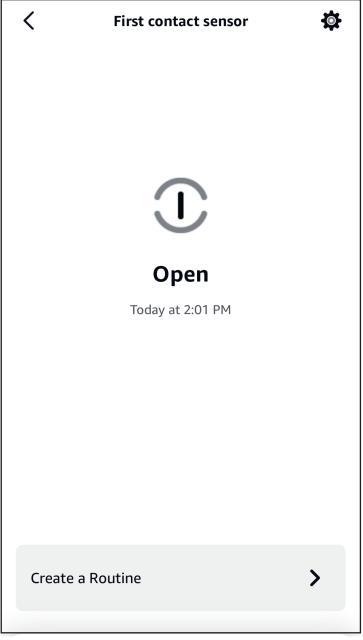

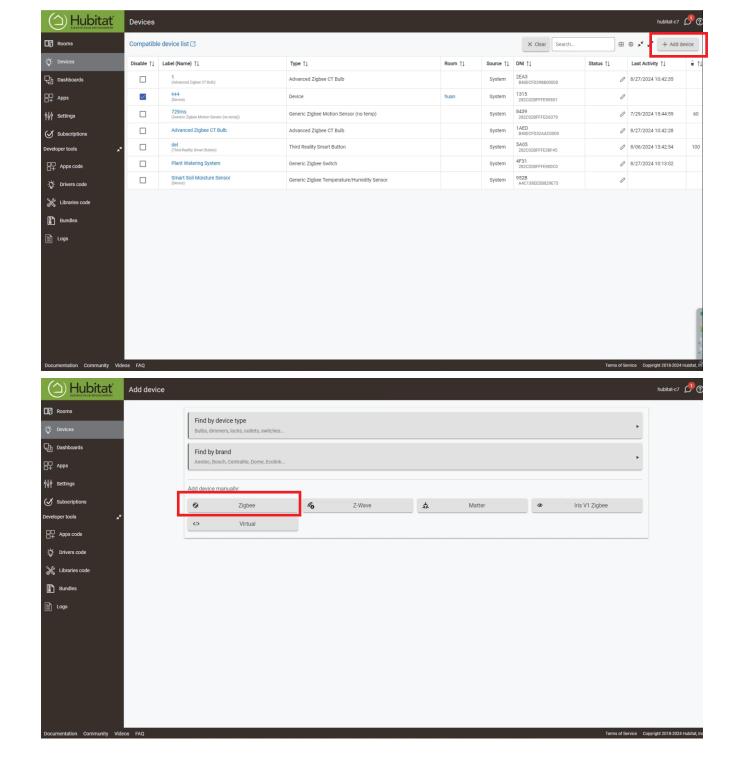

Pairing with Hubitat

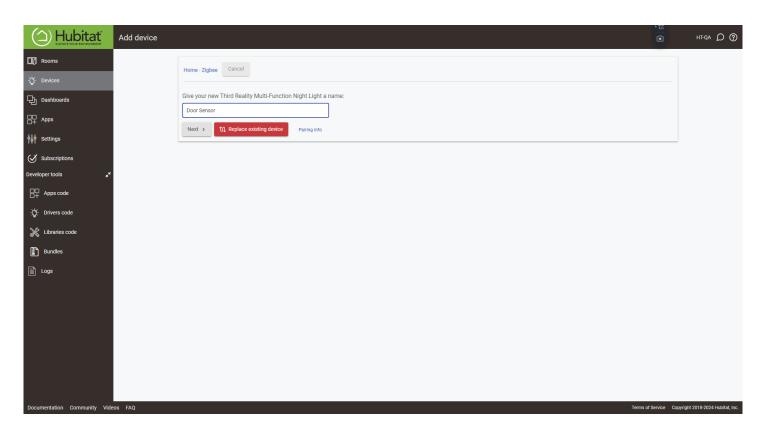

Website: http://find.hubitat.com/

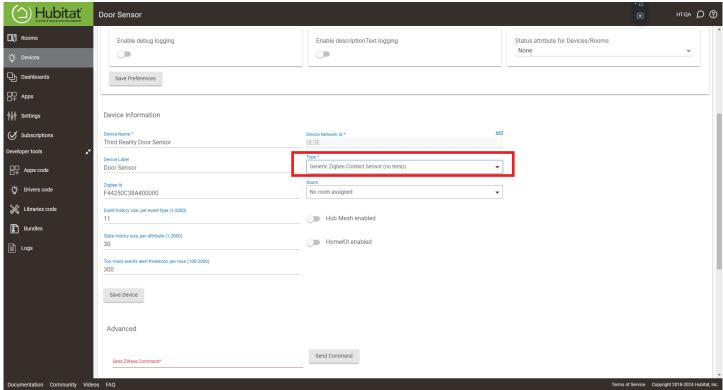

Pairing steps:

- 1. Press to open part A (Fig. 2), install the batteries and close the back cover, the LED indicator flashes rapidly in blue, the sensor is now ready for setup. If this sequence doesn't occur, long press the reset button (Fig. 3) for 3 seconds to factory reset the sensor and put it into pairing mode again.
- 2. Visit your Hubitat Elevation hub device page from your web browser, select the Devices menu item from the sidebar, then select Discover Devices in the upper right.
- 3. Click Start Zigbee Pairing button after you select a Zigbee device type, the Start Zigbee Pairing button will put the hub in Zigbee pairing mode for 60 seconds.
- 4. Pairing is completed. Change type to Generic Zigbee Contact Sensor(no temp).
- 5. Tap Apps, and Create New Basic Rules.

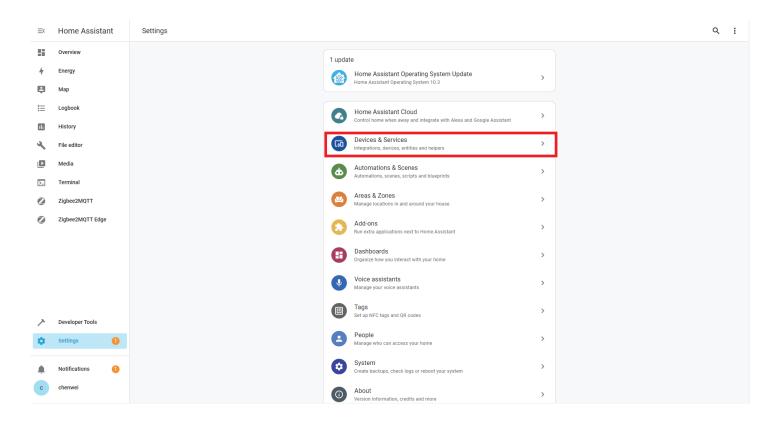

Pairing With Home Assistant

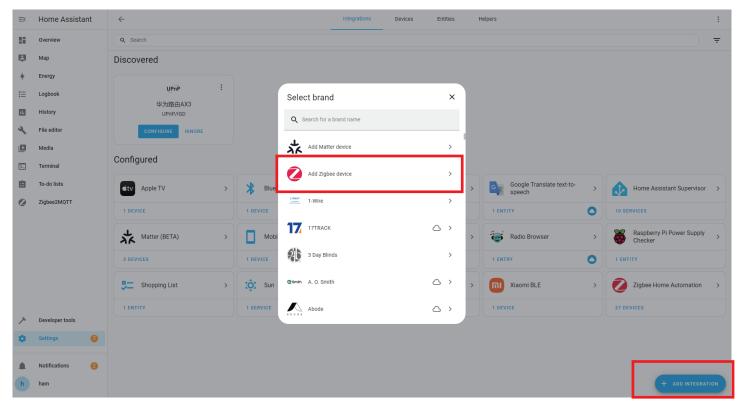

Device: Zigbee dongle

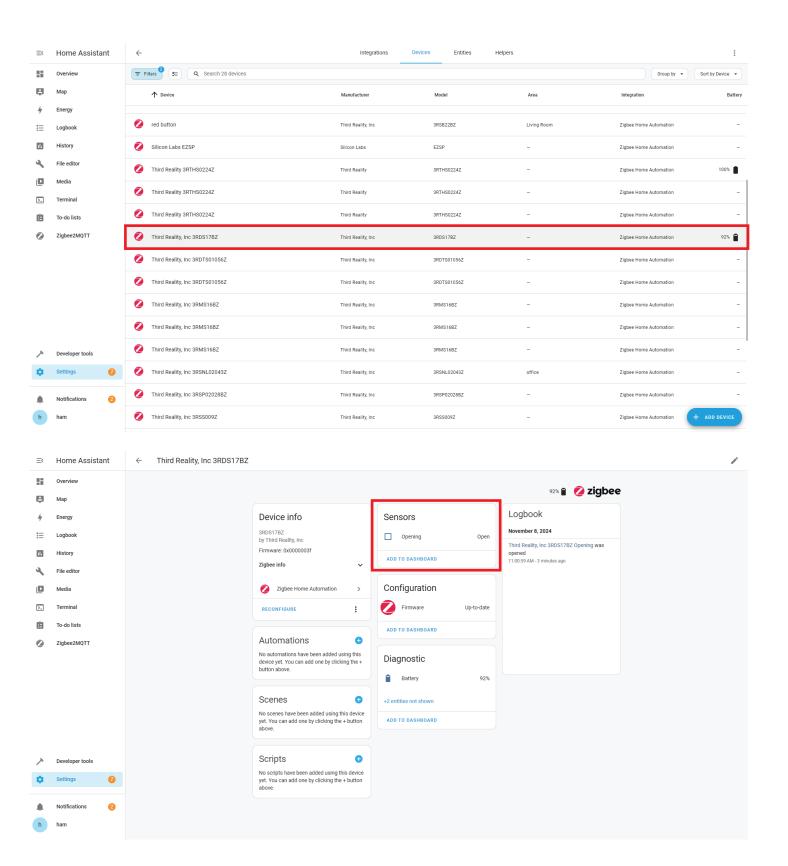

Zigbee Home Automation

- 1. Press to open part A (Fig. 2), install the batteries and close the back cover, the LED indicator flashes rapidly in blue, the sensor is now ready for setup. If this sequence doesn't occur, long press the reset button (Fig. 3) for 3 seconds to factory reset the sensor and put it into pairing mode again.
- 2. In Zigbee Home Automation, go to "Configuration" page, click "integration".
- 3. Then click the "Devices" on the Zigbee item, the click "Add Devices".
- 4. Pairing completed.
- 5. Back to "Devices" page to find the sensor added.
- 6. Click to enter in the control interface to see detailed information.
- 7. Click "+" belongs to Automation and add trigger and actions.

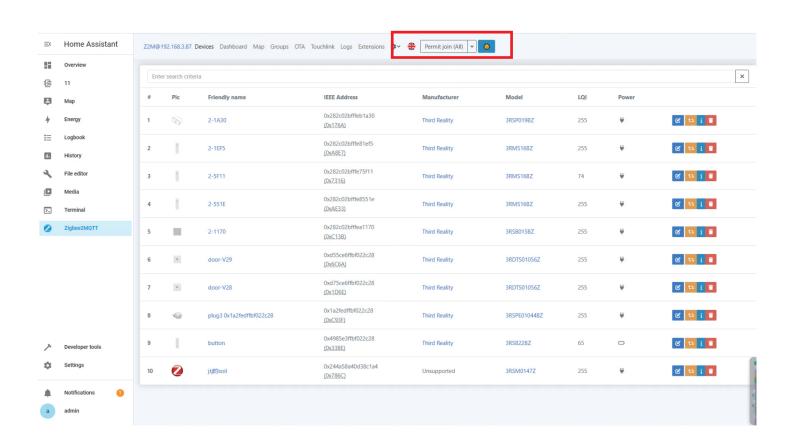

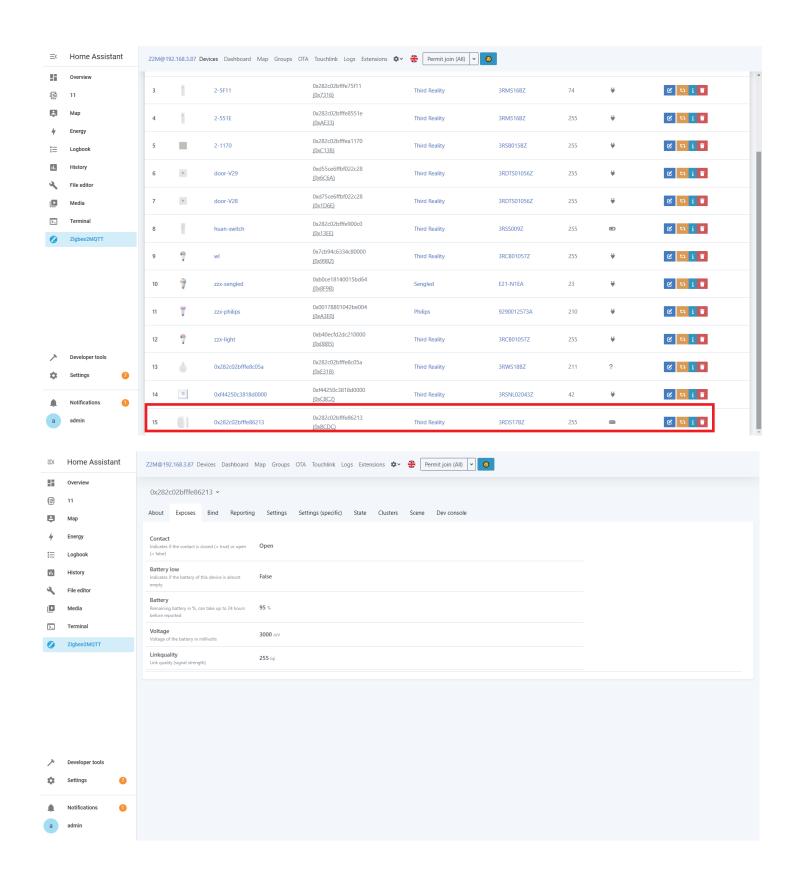

Zigbee2MQTT

- 1. Press to open part A (Fig. 2), install the batteries and close the back cover, the LED indicator flashes rapidly in blue, the sensor is now ready for setup. If this sequence doesn't occur, long press the reset button (Fig. 3) for 3 seconds to factory reset the sensor and put it into pairing mode again.
- 2. Permit join to start Zigbee pairing in Zigbee2MQTT.
- 3. Pairing completed, the sensor will be displayed in the device list Go to Settings page, create automation.

Troubleshooting

- 1. Why can't my Echo discover the door sensor? It has a ZigBee hub built-in.
 - Reboot your Echo by unplugging/plugging it back in.
 - Set the door sensor into pairing mode by long press the reset button inside the device, the blue LED flashes rapidly.
 - Keep the door sensor near the Echo with ZigBee hub build-in, then ask Alexa to "discover devices".
 - If it is still not working, please factory reset your Echo, re-add echo then re-discover device again, then pair it with your Echo device again.
- 2. I have a SmartThings hub, do I need a special hub for the door sensor?
 - Enable the SmartThings Skill inyour Alexa app and sign in to link your accounts on both platforms.
 - Go to Devices tabin your Alexa app and add devices to sync your devices under SmartThings to Alexa: "+" icon(on the upper right corner)->Add Device->Other.
 - Create a routinefor the door sensor and light switches in your Alexa app, you can use door open/close to trigger things like light on/off, or you can set an Alexa "custom message" when the door sensor detects a door is opened.

3. Why nothing shows up for devices or group on the Third Reality app? I am using a SmartThings hub.

Because you are using Echo (Alexa APP) and SmartThings (Smart-Things APP), it will bypass Third Reality app. Only when you are using Third Reality Hub (which is equivalent to SmartThings Hub), then the Third Reality app is required and will show the device in the app.

FCC Regulatory Conformance

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help important announcement.

NOTE: The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications to this equipment. Such modifications could void the user's authority to operate the equipment.

RF Exposure

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment.

This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.

This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

Limited Warranty

For limited warranty, please visit www.3reality.com/devicesupport. For customer support, please contact us at info@3reality.com or visit www.3reality.com.
