MAINTENANCE - Cont.

4. Hand-rinse the filter in cold water and let it air-dry for at least 24 hours before reinstalling. Air-dry only. DO NOT use a hair dryer or clothes dryer.
5. To clean the interior of the dust cup, rinse it with water. Place it on its side with the lid open to air-dry for at least 24 hours before reinstalling.
6. When the filter is dry, reinstall it in the dust cup, then reattach the dust cup.

DO NOT wash any parts or accessories in a dishwasher.

NOTE: For best results, replace the filter every 6 to 9 months.

TROUBLESHOOTING

Problem	Solution
The vacuum will not operate	Battery needs to be recharged. Try using a different electrical outlet to charge.
Motorized brush will not work	The metal contact pins on the motorized brush are not in contact with the connector slots on the vacuum. Remove the motorized brush and reinsert firmly into the unit's intake house. The motorized brush is blocked. Carefully remove all lint, hair, or other debris from the motorized brush.
Vacuum will not pick up or suction is weak	Dust cup is full. Empty the dust cup. Filter needs cleaning or replacement. Clean or replace the dust cup filter. Vacuum needs to be recharged.
Dust is escaping from the vacuum	Empty the dust cup. The filter is not installed correctly. Remove it and reinsert it. The filter has a hole or a puncture and needs to be replaced. An obstruction may be blocking the door from closing correctly. Clear any obstructions and ensure the dust cup door is completely closed.

BATTERY INDICATOR

No Light	Low Battery	Press the power button. If the unit doesn't turn on, turn the battery power to low. Please charge before use.
Slow Flashing Light (while plugged in)	Vacuum Charging	To charge the vacuum, connect charger cord to unit and plug into wall outlet. The light will flash in and out slowly as the vacuum charges.
Fast Flashing Light (in use)	Low Battery	If the light flashes quickly while the unit is in use, the battery power is low. Recharge the unit.
Solid Light	Fully Charged	When the vacuum is fully charged, the indicator light will illuminate steadily, then turn off. (It takes approximately 5 hours for a full charge).
Five Flashes (after plugging in)	No Charging	If the wrong charger is used, the light will blink five times and then stop. Use the included charger.

BATTERY REMOVAL AND DISPOSAL

This product uses a rechargeable and reusable lithium-ion battery. When the battery no longer holds a charge, it should be removed from the vacuum and recycled. Incinerate or compost the battery.

When your lithium-ion battery needs to be replaced, dispose of it or recycle it in accordance with local ordinances or regulations. In some areas, it is illegal to place spent lithium-ion batteries in the trash or in a municipal solid waste stream. Return spent battery to an authorized recycling center or to retailer for recycling. Contact your local recycling center for information on where to drop off the spent battery.

For more information on battery removal for disposal, please visit sharkclean.com/batterysupport

LITHIUM-ION BATTERY
MUST BE RECYCLED OR
DISPOSED OF PROPERLY

The RBRC® (Rechargeable Battery Recycling Corporation) seal on the lithium-ion battery indicates that the costs to recycle the battery at the end of its useful life have already been paid by SharkNinja. In some areas, it is illegal to place spent lithium-ion batteries in the trash or municipal solid waste stream and the RBRC program provides an environmentally conscious alternative. RBRC, in cooperation with SharkNinja and other battery users, has established programs in the United States and Canada to facilitate the collection of spent lithium-ion batteries. Help protect our environment and conserve natural resources by returning the spent lithium-ion battery to an authorized SharkNinja service center or to your local retailer for recycling. You may also contact your local recycling center for information on where to drop off the spent battery or call 1.800.798.7308.
