

NEW THINKING. NEW POSSIBILITIES.

People's expectation toward individual mobility requires more than just a convenient means of transportation. The old understanding of cars has become outdated. A car represents individuals' lifestyles, and it became an integral part of their lives. At the same time, the automobile industry has experienced seismic change. Hyundai Motor Company has grown rapidly to become one of the largest automakers, backed by world class production capability and superior quality. We have now reached a point where we need a qualitative approach to bring bigger ideas and relevant solutions to our customers.

This is an opportunity to move forward and we have developed a new brand slogan that encapsulates our willingness to take a big leap. Led by our new slogan and the new thinking underlying it, we will become a company that keeps challenging itself to unlock new possibilities for people and the planet.

POSSIBILITIES.

H100

THE HYUNDAI H100 A QUIET REVOLUTION IN LIGHT TRUCKS

Take a good long look at the Hyundai H100 and prepare to redefine your complete expectations from a light truck. Tough and versatile enough to match almost every challenge, yet elegant enough to be a real image enhancing asset, no matter how large or small your undertaking. Powerful enough to make light work of virtually any task or terrain, while surprisingly economical to operate. Compact enough to cope with limited spaces, but with a payload and crew capability usually confined to much larger vehicles. Experience the new Hyundai H100, and discover a whole new standard of refinement and practicality, fit, fine and ready for the future.

APPEARANCES THAT COUNT

You never get a second chance to make a good first impression. We at Hyundai realise that this is as true in business as any other field of life. That's why the H100 is designed with style and simplicity in mind. Business like, but elegant and functional. Notice the wide windscreen, the large clear headlights and clear-type front fog and rear lights. They are all elegant enough for a car, as are the relaxed character lines which define the profile. It all combines into great looks, but in addition the wide-angle vision and enhanced aerodynamics mark a meaningful step forward for light trucks. Yet another integral benefit of this attention to design is the ease of access provided by the wide opening and generously proportion doors, speeding driver and passenger entry and exit.

A NEW QUALITY OF COMFORT IN THE WORKPLACE

It's no secret that a comfortable workplace improves efficiency, so it's no surprise that the H100 offers a new level of comfort. Extra seat and shoulder width for freedom of movement, a driver oriented console and car-like instrument cluster put comfort and control at the drivers fingertips. Reduced cabin noise highlights the benefits of the excellent audio system. In additional convenience details such as the forward folding centre front seat, sunglasses and cup holders, together with a whole range of well thought out and organised storage facilities, all combine to provide an exceptionally efficient and functional comfort.

All-round ventilation
centrally mounted with easy and efficient dial controls, keeps the driver and passenger fresh and alert. Air conditioning is also optionally available.

A truly supportive driver's seat
which could have come from a high quality saloon car eases the longest journeys.

Standard Cab

Double Cab

Cargo space

Cargo space designed for work with a lower deck height of just 745mm and an unobstructed load area, the H100 makes fast and efficient work of loading and unloading cargo weights of up to 1000 kg. Latching side walls and a bolting tailgate add extra security and cargo protection.

Chassis

Tough 100 x 50 mm steel section chassis with double wishbone and torsion bar, front suspension and rear leaf springs, driven by a choice of 2.6 naturally aspirated or 2.5 turbo diesel engines, makes the H100 a supreme performer. Side impact bars, single moulding body panels and a variable cross-section cowl cross member are significant safety features.

Variability and flexibility

Short and long wheelbases with high and low platforms, allow the H100 to be perfectly configured to suit your business needs. Your Hyundai commercial vehicle dealer will be happy to advise and consult on all the possibilities.

Stronger and quieter

Hyundai diesel engines boast exceptional reliability and durability, which are the reasons for the popularity of the H100 truck. The powerful 94ps horsepower and 22.5kg.m torque 2.5 litre diesel (Turbo Charger Intercooler) or 79ps horsepower and 17.0 kg.m torque 2.6 litre diesel (Natural Aspiration) engines with overhead camshaft feature excellent combustion efficiency with high power output, producing less exhaust.

Locking Differential (LD)

Is speed activated, mounted in the rear axle and more efficient than a Limited Slip Differential (LSD) offering exceptional rough terrain manoeuvrability and gradient capability with lower maintenance. Gives LSD functionality in road conditions at over 30kph.

Brakes to depend on

15-inch ventilated disc brakes with a powerful 8+9 inch booster ensure that the stopping power of the H100 matches the dynamic performance. Wider section tyres and a front mounted anti-roll bar add extra precision to the enhanced power steering.

H100 in detail

When we say that the H100 was designed to set new standards for light trucks we mean it. The list of features surpasses even some well-equipped private cars, and some have never, ever been available in this class before.

Power window switch & Auto door lock

Intuitively simple to operate, these are the switches for power windows and central locking. Fine design highlights even the smallest details.

Sedan-inspired cluster

Instruments that are comprehensive, easy to read and fully in vision. High quality information effortlessly and elegantly delivered is a hallmark of the H100.

Power & Tilt steering

Precise power steering reduces driving effort, improving safety. The optional tilting steering wheel further personalises this benefit to the individual driver.

Wide view outside mirror

A useful and meaningful safety enhancement, especially when parking, wide-angle exterior mirrors provide a panoramic rear view.

Seatback console

When you fold middle seat, you can find two cup holders and tray. Further, the small box, behind the tray to open manually, is offered some space to hold maps and paperwork for convenient journey.

Audio system

An optional radio cassette audio system with high quality speakers adds yet another dimension of civility to the comfort of the H100.

Bottle storage & Door map pocket

Documents, maps, or even light refreshments are easily stored and ready for use in the door mounted storage pockets.

Room lamp & sunglass holder

Central interior lighting with a built-in holder for the drivers sunglasses is just one more example of Hyundai's attention to detail, quality and driver well being.

Lockable fuel inlet

Protection for the fuel supply is provided by the security of a locking fuel filler flap.

Tailgate bolt

Secure loads are safe loads. The tailgate bolt serves to keep your cargo on the truck rather than the road.

Foldable stopper

Foldable long load retention pegs help keep ladders, pipes, wood and all other longer loads firmly in place.

Side step

Easy access speeds operations and cuts fatigue. In addition to optimally placed grab handles, the H100 offers this convenient side step.

Sidewall latch

Added side security for cargo retention comes in the form of these robust sidewall latches (Front).

Maintenance Free battery

A positive asset in all-operating conditions, adding worry-free durability to electrical dependability.

Glove box

A cool box in a light truck? With the H100 naturally, while the upper tray holds personal and business items conveniently ready to hand. The integrated cup holder is detachable for easy cleaning.

Tool-box

The exterior mounted toolbox is available in three generous sizes to transport and protect your tools.

Up-front easy access inspection panel

The front panel (bonnet) is designed to open easily as a passenger car which provides exceptional maintenance or emergency access.
